New Renderings Released of Philippe Briand's Sailing Concept Perfect 60

9 DECEMBER 2019 BY MIRANDA BLAZEYB

London based superyacht designer [Philippe Briand](#) has revealed new renderings and details about his 62.85-metre sailing yacht concept Perfect 60.

Speaking at a press presentation in London, Briand described the concept as "a special design" with "minimal hull lines" and "flush decks". Briand also revealed that he designed it with "one or two owners in mind".

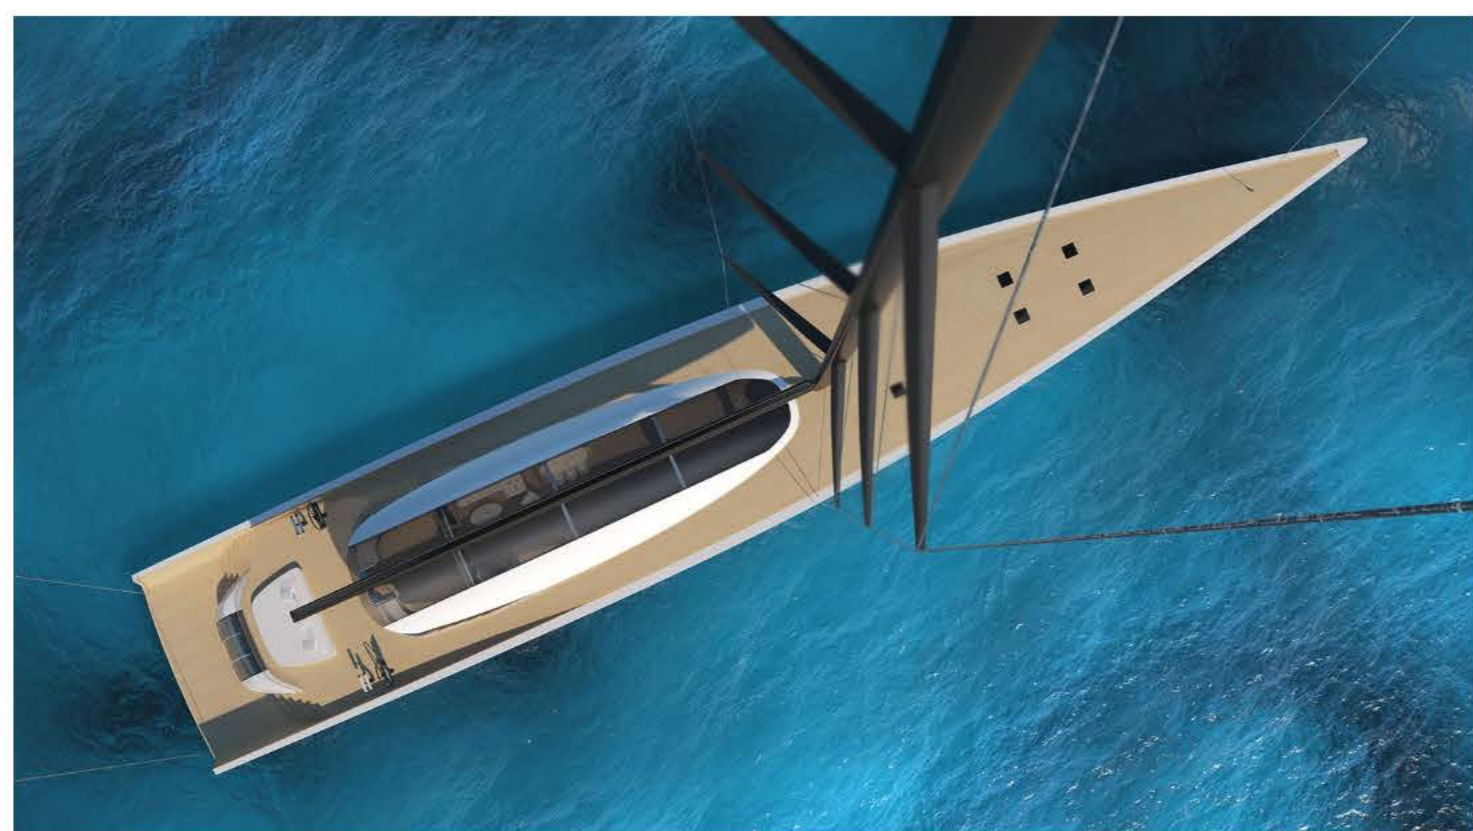

He added that the sailing yacht industry had "reached a glass ceiling".

Philippe Briand revealed more details about the concept at a London based press presentation

He added: "Now we are pushing the glass but we don't seem to go higher - we need lateral thinking. This boat is designed with sustainability in mind with new technology," he said, referring to the Perfect 60.

The design was revealed hot on the heels of the 90 metre [SY 300](#), which was presented by Briand in April this year. He previously described the Perfect 60 concept as the "little sister" of SY 300.

The ketch features the same contemporary hull as the SY 300

The 62.85-metre yacht has a beam of 10.5-metres and is the second concept from Briand's new family of self-sufficient performance yachts.

The ketch features a carbon fibre mast and rig and same contemporary hull and inverted bow as the SY 300.

The aft deck of Perfect 60 sailing yacht

The design comes as Briand responds to the "growing trend for sailing megayachts," which he describes as "effectively motoryachts with sails".

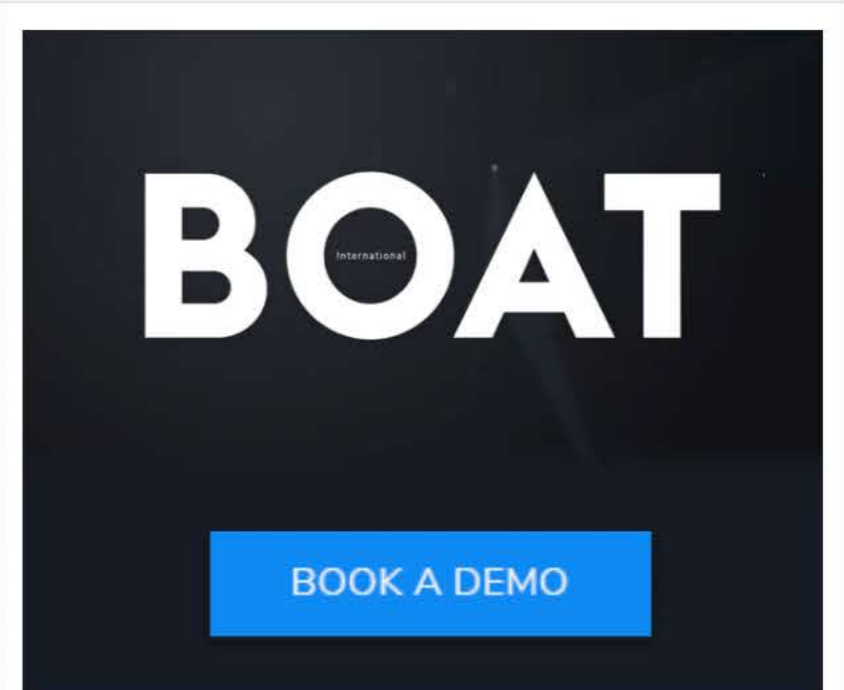

However he added that the Perfect 60 would perform on the racing field and "put her owners on podiums wherever they choose to race".

The Perfect 60 is intended for the racing field

Briand said the yacht will also appeal to environmentally conscious owners and is equipped with underwater turbines capable of charging the batteries.

Accommodation is for a total of 10 guests in the owner cabin and four guest cabins, which are placed aft in the yacht's interior layout. The crew quarters meanwhile sits forward.
