

ABOUT AUTOMATION SERVICE

AUTOMATION SERVICE IS THE WORLD'S LARGEST REMANUFACTURER OF HIGH-QUALITY PROCESS CONTROLS.

We are known industry-wide for our superior workmanship, on-time deliveries, competitive pricing, and an environmentally-friendly alternative to buying new equipment. Since 1956, we have been committed to delivering high-quality remanufactured products our customers trust.

In order to provide the highest-quality remanufactured process controls, we restore every reusable component in a control and then build instruments to order from those and new components. Automation Service remanufactures over 30,000 different parts that are production ready the minute an order is received. Our extensive inventory of ready-to-use parts allows us to quickly respond to customer needs and market demands.

Automation Service remanufactures products originally manufactured by Rosemount®, Fisher®, Foxboro®, Honeywell® and Moore®, and we are proud to say that our products are 100% "Re-Made in the USA."

RETAIN TOP VALUE FOR YOUR DEPARTMENT BY RECYCLING YOUR CONTROLS

Automation Service recycles controls originally made by Rosemount®, Fisher® and Foxboro®. Our industry leading reclamation program takes in between 16,000 and 18,000 pieces of equipment each year from some of the largest companies in the world, such as:

- ▶ BP
- ▶ Chevron
- ▶ Conoco Phillips
- ▶ Domtar
- ▶ Dow
- ▶ International Paper
- ▶ Marathon Petroleum
- ▶ Oxy
- ▶ Rock Tenn
- ▶ Tate & Lyle

There are numerous reasons why customers choose to recycle their instruments and control valves with us.

Value is one of the top reasons for participation. Customers that are responsible for maintaining these types of items within their facilities, are allowed to retain the value of that asset for their department, as opposed to losing it to a general fund fed by the scraping or liquidation of equipment. Some customers have been able to make upgrades and/or projects that originally seemed unlikely due to budgetary restrictions possible with the credits earned through our recycling program.

Another reason is our unique Reclamation Road Trip rewards program. It's in addition to the credits and allows participants to accumulate points (or "miles") to have popular regional foods shipped to them from all over the country. Participants also have an option to convert their "miles" into a cash donation to a charity of their choice, in the event that a food option does not work for their purpose.

Yet, for many of our customers, the value they receive is almost secondary to the realization that participation is just the right thing to do for our environment.
