

ANNELI PROJECT

VALUES STATEMENT

In the Anneli Project our values are very important to us. That means:

WE STRIVE TO WORK IN A WAY THAT IS:

non-judgmental, non-directive, professional and empowering for the service user

WE STRIVE TO:

listen to and hear what women tell us, believe and respect them

WE OFFER:

Support to women, choices and a rights-based approach to our advocacy work.

AS A PROJECT:

We embrace diversity, strive for continuous improvement and have a strong vision and sense of purpose. We want women to lead safer, healthier and more fulfilling lives, and we achieve that through self-directed support.

WE ARE PROUD:

Of our high standards, flexibility and good quality services that are helping women to get the help that they need. We are also proud that we take managed risks in order to do this. We actively include women that other agencies may exclude from their services.

WE UNDERSTAND:

The impact that sexual exploitation has on women, the value of life and the importance of human rights. We understand that women need to have control of their own bodies.

OVERALL

Our work is under-pinned by our feminist ethos, which informs our challenge to end human trafficking for sexual exploitation, which is the 21st century manifestation of slavery.
