

RVT RENTAVENT
EXCELLENCE IN ENVIRONMENTAL CONTROL

Your Centre of Excellence for
Water Schemes

Your Centre of Excellence for

Water Schemes

To ensure minimal disruption and continuity of flow whilst working on Capital Projects or Framework Contracts, it's vital to keep to the schedule and prevent unnecessary or unforeseen delays. Contractors in enclosed spaces deep underground need constant protection from exposure to noxious gases and people living or working nearby need to be protected from the risk of contaminated water, adverse smells and noise.

Major contractors across the UK trust our proven, flexible and tailored solutions to ensure projects flow smoothly and safely, leaving them to concentrate on delivering water schemes on schedule and to budget.

Sewage treatment works
Tank ventilation

During concrete repair works on tanks within an enclosed sewage treatment facility there were issues with air quality. RVT Rentavent provided a safe working environment for operatives by locating powerful VENTEX™ fans externally with ducting forcing fresh air into the confined space.

Haweswater Aqueduct
Ventilation control

RVT Rentavent provided temporary ventilation at multiple locations in remote areas for one of the largest water pipes in the UK. This enabled United Utilities operatives to conduct a detailed structural analysis of the 90-mile long, 2.6m diameter pipe which is hundreds of feet underground in places.

Pumping station
Noise control

RVT Rentavent was tasked with preventing noise breakout from a booster pump station in a sensitive neighbourhood area. To avoid restrictions to services, a bespoke frame was clad with SOUNDEX™ curtains, effectively absorbing noise and reducing impact on the surrounding environment.

**Unsatisfactory
intermittent
discharge scheme**
Shaft ventilation

During a UID construction scheme, RVT Rentavent provided ventilation and exhaust fume control for 14 shafts and tunnel sections. This included unique ventilation to cool sludge pumps deep inside an enclosed tunnelling section and also provide dust control during TBM launches.

We put more in
so you get more out

RVT Rentavent provides temporary air quality and environmental solutions that control dust, fumes, noise, stale air, heat and moisture in the most critical working environments.

We know that what we provide our customers with is just as important as what we take away – our sector-specific knowledge and expertise, our innovative approach to problem solving, unrivalled levels of service and a proven track record on world-class projects all combine to make us a true **'centre of excellence'**.

I'd like to take this opportunity to thank the team at RVT Rentavent for providing my company with extract solutions on a number of our more difficult projects over the past few years.

Problems solved

NOISE CONTROL SOLUTIONS
SOUNDEX™

- ✔ Noise control for substations located adjacent to sensitive neighbourhood areas.
- ✔ Noise reduction for generators and pumps during maintenance and emergency works.

VENTILATION CONTROL SOLUTIONS
VENTEX™

- ✔ Ventilation of culverts, UID schemes and water pipes during maintenance and refurbishment works.
- ✔ Ventilation of shafts and tunnels during major capital project schemes.

EXHAUST FUME CONTROL SOLUTIONS
RAVEX™

- ✔ RAVEX™ Exhaust filters for diesel plant working in confined spaces during excavation works in shaft construction on capital project schemes.

FUME CONTROL SOLUTIONS
RAVEX™

- ✔ High volume extraction of fumes during storage tank maintenance.

“
The advice and service we continually get is a breath of fresh air within our industry and we appreciate the patience and personal touch given.

The broadest
product range

Giving you **what you need,** removing **what you don't**

We're committed to delivering 'Excellence in Environmental Control' for the Water Sector. Whatever sector you're working in, and however demanding your responsibilities, you can be confident that RVT Rentavent will help you overcome your challenges.

Make the right decision

- ✔ Solving problems with innovative, tailored and cost-effective solutions.
- ✔ Working closely with you and sharing knowledge and expertise to get the best outcome.
- ✔ Achieving a balance between compliance and cost without compromising on safety.

Total peace of mind

- ✔ Ensuring projects are delivered safely, efficiently, on time and to budget.
- ✔ Providing solutions that are guaranteed to work and demonstrate value for money.
- ✔ Avoiding unnecessary delays and allowing you to get on with day-to-day tasks.

Safe in the knowledge

- ✔ Ensuring workforces and those around them are protected at all times.
- ✔ Complying with the strictest HSE legislation, ISO regulations and company policy.
- ✔ Meeting your 'Zero Accident' target and keeping RIDDORS to a minimum.

World-class solutions for world-class success

We're focused on delivering our promises and firmly believe that a team with a real can-do attitude can achieve anything. It's this attitude that lies at the heart of everything we do.

With a track record of success on some of the world's most prestigious projects we ensure customers keep working efficiently and effectively and get the job done safely in every sector from Construction, Rail, Retail and Marine to Water Schemes, Civils & Utilities, Healthcare and Industry.
