DELIVERING EXCELLENCE – EVERY TIME, EVERYWHERE

The “lifeblood” of a modern public or commercial building is the functionality and reliability of the system solutions for communications (data, voice, video/TV), fire safety and lifts. This is true of any such construction, irrespective of whether it is an office block, hotel, hospital, sports stadium, television studio or a tunnel. Choose a reliable system partner right from the start: choose Datwyler!

Hotels, hospitals

FTTx projects

Datwyler Cabling Solutions is an internationally operating supplier of premium-quality products, system solutions and services for electrical and communications infrastructures in public and commercial buildings and data centres as well as for Fibre to the home (FTTH) networks.

Being a well-established company which will shortly celebrate its centenary, Datwyler leads the way in innovations for applications such as ICT networks, fire safety, building automation and lifts.

Datwyler is a one-stop source of customised solutions for all your specific applications – with all the necessary test certificates, authorisations and approvals as well as long-term warranties.

Datwyler successfully operates in the market not only as a reliable supplier of innovative products and systems, but also provides – in close cooperation with experienced local partners – premium quality services for its customers: from site surveys, conception and system engineering through installation, logistics and turnkey supply to documentation and system maintenance.

TURNKEY INSTALLATIONS

Datwyler Cabling Solutions does not only supply integrated system solutions, but has positioned itself successfully as a complete solutions partner: for all manner of purpose-built constructions including multi-site projects, for data centres and for FTTx projects. Our successful processing of projects derives from our high-level skills in developing and manufacturing the required products and solutions, our comprehensive applications expertise, our international presence and our globally established partner network.

Our international presence and our worldwide, actively managed and certified partner network have also proved invaluable in the multi-site projects of major clients. National and international companies rely on Datwyler on-the-spot site audits. Using the site surveys as a base, our engineering experts work out customised solutions with uniform standards for all the sites concerned. Our total solutions package is rounded off by the implementation and assurance of regular operations. While operations are running, we provide servicing and maintenance work to optimise your infrastructure solution. These MAC (move, add, change) services increase the performance and working life of your equipment.

High-quality solutions for all your applications

Year on year, Datwyler invests in even better materials and process technologies, production resources and test methods. This is why our system solutions always keep ahead of the current standards and repeatedly set new standards. The important functions which our solutions must deliver in practice demand the highest possible level of safety and reliability.

This is why we measure each product against stringent quality standards before it leaves the company. Of course, all our processes are ISO 9001:2008 / ISO 14001:2004 certified.

Our sustainable solutions provide you with high-level operational reliability coupled with low operating costs. The proof that Datwyler systems can deliver these benefits has been evident for many years in thousands of installations around the world. In addition, we have a particularly keen eye for consistent, intelligent solutions that simplify planning, sourcing and installation and shorten your construction times.

We have the solutions for all your applications, whatever they are – high-speed communications networks, modern energy distribution, monitoring and control services, fire alarm systems or lift cabling. Or you may want to integrate new systems, interconnect and automate existing systems or simply ensure a reliable power supply. All this is possible with our carefully thought out, pre-assembled and prefabricated subsystems.

Just tell us how, when and where

Besides quality and product price, the logistics performance capability of suppliers is a decisive factor in the successful handling of construction projects. This is particularly true of major projects. With its years of experience and high logistics competences, Datwyler can handle even time-critical major projects smoothly and to the complete satisfaction of customers. Just-in-time deliveries at the right place are all in a day's work for us and our partners.

Besides delivering straight to the construction site, we also offer additional logistics services (time slots, pre-fitted and pre-assembled products etc.). Many customers and suppliers have a direct link to our IT system for rapid and flexible order processing.

As regards cable pre-assembly, Datwyler also has wide-ranging expertise, the product of decades of experience. In our modern cable cutting centre, the engineering department passes the cutting orders electronically without any media discontinuity straight to the production area. Our efficient order communication system with all our customers is due to years of experience with B2B interfaces.

In many countries Datwyler Cabling Solutions work in close co-operation with independent distribution partners. Thus, our customers can rely on the consistently high quality standard of all Datwyler products and solutions whilst benefiting from local contacts and logistics services.

We support you in realising your infrastructure project – reliably, capably, complete and with the highest quality!

HIGHSPEED COMMUNICATION

From analogue telephony up to 10/40/100G; from Local Area Network and high-density Data Centre cabling to entire carrier and Fibre to the home networks – Datwyler is your preferred partner for top-quality, reliable and future-proof ICT networks in copper and fibre optics. With outstanding products and system solutions, Datwyler set standards for quality, performance and investment protection.

Media convergence in communications is an irreversible trend. IP technology merged media such as telephone, television and Internet. Multimedia is already reality.

However, technologies continue to develop, and the demand for ever increasing bandwidth continues to boom.

Future-proof networks thanks to high-quality solutions

With the constantly increasing transfer rates, requirements for cable systems are becoming more demanding. The high-quality solutions of Datwyler exploit the full potential of networks and offer high investment security for the future. The comprehensive product range extends from single cables and components to complete end-to-end systems.

Modular solutions for every application

Datwyler modular solutions are suitable for all sizes and types of networks – from residential cabling to cabling systems for offices or industrial buildings to campus, access, or carrier networks for thousands of users.

Telecom providers rely on our experience and know-how, as do banks, insurance companies, universities, hospitals, airports, car manufacturers and industrial companies.

SYSTEM SOLUTIONS FROM A SINGLE SOURCE

Leading know-how

As a provider of total solutions for information and telecommunication networks, Datwyler possesses extensive know-how accumulated over decades:

- Almost 100 years of experience in cable production
- Leading material, production and process know-how in the fabrication of copper and fibre-optic cables and components
- Solid electro-technical competency
- Close collaboration with renowned technical universities, international standards committees, and independent testing institutes
- Broad systems competence

Diverse applications

In the field of ICT networks Datwyler concentrates on communication infrastructures for public and commercial buildings and on FTTx networks.

Some examples are:

- Office, industrial and exhibition buildings
- Data centres
- Hotels and hospitals
- Stadiums, theatres, concert halls
- Airports and train stations
- FTTx projects of public utility companies and energy supply companies

In these market segments we can also flexibly meet individual customer requirements – up to and including turnkey and multi-site projects – with our cost-effective, modular system solutions and comprehensive services.

Complete system solutions

- Screened and unshielded copper system solutions (categories 3 to 8) for the transmission of voice, data, video, CATV, control signals and remote power (power over Ethernet, PoE+)
- Innovative fibre-optic system solutions with single-mode and multimode optical fibres for indoor and outdoor applications, from LAN backbones to FTTH in-house cabling
- Software solution for building, technology and network management
- Extensive services ranging from consulting and planning via pre-fabrication, logistics and installation to system maintenance.
- Established worldwide, actively managed and certified partner network
- Rigorous training and certification programme to guarantee optimal installation quality of our systems and solutions.
- Long-term warranty covering the entire system

Focus on customer value

Datwyler stands for more than just the fabrication and distribution of products. For your ICT networks we offer future-proof, modular, customised one-stop solutions for all your specific applications – as a uniquely attractive overall package, with all the necessary test certificates, authorizations and certificates and with long-term warranties.

The interaction of these elements creates added value. As a customer you benefit from maximum network availability and high investment protection, even with regard to future applications, expansions and changes.

Allianz Arena, Munich

PRODUCT OVERVIEW

Integrated, future-proof cabling solutions for ultimate reliability in voice, data, video and CATV applications

Performance beyond products

With the complete packages offered by Datwyler you are opting for comprehensive application-neutral and provider-independent system solutions encompassing the communication infrastructure for office and industry environments and for FTTx.

For Datwyler, quality testing and quality management begin during the cable production process. Here relevant electrical and mechanical data are recorded online and automatically compared with the predefined specifications. The performance values of our cables generally exceed current standards and standard drafts by considerable margin.

Datwyler follows the same procedure for the production of connection components such as data outlets, patch panels and patch cables for copper and fibre optic systems.

Labelling of individual components ensures that data measured up to the time of production can be called up at any point in the future. This gives end users a high degree of certainty that the products used and manufactured provide the durability demanded by them.

PRODUCT FEATURES

The following pictograms show the essential features of our products and give an easy reference.

They are allocated to the articles on the data sheets and provide you with a quick overview

Zero halogen, no corrosive gases

These Datwyler cables are halogen-free and reduce possible damage to health or material to a minimum.

IEC 60754-1 and IEC 60754-2,
EN 50267-2-1, EN 50267-2-2, EN 50267-2-3
VDE 0482-267 part 2-1, 2-2 and 2-3

Flame propagation

These Datwyler cables use a high-performance, flame retardant material that is self-extinguishing.

IEC 60332-1-2,
EN 60332-1-2,
VDE 0482-332-1-2

Flame spread

These Datwyler cables are flame resistant and prevent the propagation of a fire from one location to another

IEC 60332-3-22 to 25 cat. A-D,
EN 60332-3-22 bis 25 cat. A-D,
VDE 0482-332-3-22 to 25 cat. A-D

Smoke density

These Datwyler cables emit minimum smoke in the event of fire. Exit routes and fire brigade access are not restricted.

IEC 61034-1 and IEC 61034-2,
EN 61034-1 and EN 61034-2,
VDE 0482-1034 part 1 and 2

Circuit Integrity [FE/PH]

These Datwyler cables with circuit integrity guarantee the function of a single cable for a defined duration. (FE = flame time and influence time)

IEC 60331-1, IEC 60331-2 and part 21,23, 25,
EN 50200 with Annex E, EN 50362,
VDE 0472 part 814, VDE 0482-200,
VDE 0482-362,
BS 8434-2, BS 6387 (cat. C/W/Z)

System Circuit Integrity [E30-E90]

These Datwyler cables, together with certified Datwyler fixing systems, guarantee enhanced circuit integrity of the complete electrical cable installation for a defined time. (E30=30 minutes, E60=60 minutes, E90=90 minutes)

DIN 4102 part 12 (E30-E90)
NBN 713.020 (Rf1, Rf1½)

M

modular

Modular design of the connecting technology with changeable modules. Providing the possibility of faster maintenance and hassle-free alterations in the event of increased user demand.

EMV

shielded

Fully shielded faceplates/outlets, patch panels and data cables, ensuring the compliance with the EMC guidelines according to EN55022 and uninterrupted operation. The compatibility with other systems in the environment is guaranteed due to the excellent shielding of all cables and components.

**Power over Ethernet
PoE+ (IEEE 802.3at)**

30 W

for copper data cables with AWG 22

**Power over Ethernet
PoE+ (IEEE 802.3af)**

30 W

for copper data cables < AWG 22

**Power over Ethernet
PoE (IEEE 802.3af)**

15 W

for copper data cables

ROHS

Directive
2011/65/EU

of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment. (revised form)

THE MOST IMPORTANT TEST PROCEDURES AND THEIR FUNCTIONS

Test on gases evolved during combustion

This test procedure provides information if the insulation material of the cable sheath creates corrosive gases in the event of fire.

Halogen parts or other material in small quantities can be easily identified with this test due to the strong change of pH and conductivity. The conductivity is $< 10\text{mS/mm}$.

Standards

- IEC 60754-1 and IEC 60754-2
- EN 50267-2-1, EN 50267-2-2
- EN 50267-2-3
- VDE 0482-267 part 2-1, 2-2 and 2-3

Test for vertical flame propagation (single insulated wire or single cable)

This test method tests a cable sample (length: 60 cm) for burning behaviour.

Standards

- IEC 60332-1-2
- EN 60332-1-2
- VDE 0482-332-1-2

The flame must extinguish itself, and the burn damage must not reach the upper end of the cable sample.

Test for vertical flame spread (bunched wires or cables)

This test method tests a cable bundle (length: 360 cm) with regard to fire propagation.

The flames must extinguish themselves, and burn damage must not exceed a defined height.

Standards

- IEC 60332-3-22 up to 25 Cat. A-D
- EN 60332-3-22 up to 25 Cat. A-D
- VDE 0482-332-3-22 up to 25 Cat. A-D

Measurement of smoke density

This test checks smoke development when burning the cable or the impairment of the visibility by burning cables.

The reduction in light transparency is measured in a standard chamber.

Standards

- IEC 61034-1 and IEC 61034-2
- EN 61034-1 and EN 61034-2
- VDE 0482-1034 part 1 and 2

THE MOST IMPORTANT TEST PROCEDURES AND THEIR FUNCTIONS

Test of Circuit Integrity (FE/PH)

This test establishes whether a single cable can maintain circuit integrity during and after exposure to a fire for a time period of at least 180 minutes. Cables that fulfil the requirements of this test are marked with "FE180" after their type designation.

There is no obligation to test the cable for Functional Integrity (System Circuit Integrity) beyond the designated period.

Remark:

This test is not equivalent to the test for Functional Integrity in accordance with DIN 4102-12

Test of Circuit Integrity (fire and water)

- BS 6387 (cat.W) [650°C, 3A]
- VdS 3423 [>830°C, 3A]
- EN 50200 Annex E [>830°C, 2A]

Test of Circuit Integrity (fire alone)

- IEC 60331-11/-21/-23/-25 [>750°C]
- BS 6387 (cat. C) [950°C]
- VDE 0472-814 [>750°C]

Test of Circuit Integrity (fire and mechanical shock)

- IEC 60331-1/-2 [>830°C, 2A]
- EN 50200 (PH) [>830°C, 2A]
- EN 50362 [> 830°C, 2A]
- BS 6387 (cat.Z) [950°C, 3A]

Test of Functional Integrity (E) of electrical cable installations

This standard describes the requirements and the actions to achieve enhanced circuit integrity of the complete electrical cable installation in the event of fire (System Circuit Integrity).

While the Circuit Integrity test (FE/PH) is only for single cables, in this test cables are tested together and in connection with practical fixing systems.

It is important to note that there is no connection between the two standards, Circuit Integrity (FE/PH) and enhanced or System Circuit Integrity (E).

The test is carried out and certified from state recognised institutes.

Standards

- DIN 4102 part 12 (E30-E90)
- NBN 713-020 (Rf1, Rf1½)

Better than the standard!

This test (E30-E90) is now the only worldwide standard for guaranteeing the Functional Integrity of the complete electrical cable installation, including the fixing components, under normal operating conditions.

THE MOST IMPORTANT TEST PROCEDURES AND THEIR FUNCTIONS

Temperature change and humidity

This test procedure checks the electrical parameters (LF and HF) of a data cable following temperature or humidity changes. Test conditions for the temperature and humidity dependent measurements must simulate the worst conditions.

Standard

- IEC 60794-1-2F1

Tensile performance

This test checks the behaviour of the electrical LF and HF parameters as a function of the pulling force of the data cable, such as that occurring during draw-in. This is not a destructive test.

This means that the cable is loaded with the maximum allowable pulling force.

Standard

- IEC 60794-1-2-E1B

Repeated bending

The behaviour of a data cable is determined by bending a cable sample forwards and backwards 180 degrees several times. Afterwards, the cable must still fulfil the electrical LF and HF parameters according to the EN 50173 standard.

Standard

- IEC 60794-1-2-E6

Hammer blow

In order to determine the resistance of a data cable against impacts, a wedge is allowed to fall vertically onto the cable. Afterwards, the cable must still fulfil the electrical LF and HF parameters according to the EN 50173 standard.

THE MOST IMPORTANT TEST PROCEDURES AND THEIR FUNCTIONS

Impact

The fall of a heavy tool, device, stone, etc. onto the cable is simulated here. The weight is allowed to fall vertically onto an intermediate steel piece that transmits the force to the cable sample. No damage to the cable sheath may occur.

Standard

- IEC 60794-1-2-E4

Crush resistance

The purpose of this test is to determine the ability of a data cable to withstand transverse pressure. After that, the electrical LF and HF parameters must still correspond to the EN 50173 standard.

Standard

- IEC 60794-1-2-E3

Torsion

During installation, a fibre optic cable must withstand torsion forces in addition to tension, transverse pressure and bending loads. Thus, a cable sample is turned about its own axis. Attenuation deviations are documented during the test. Neither fibre nor sheath materials may be damaged during the test.

Standard

- IEC 60794-1-2-E7

Water penetration

This method checks whether all interstices of a fibre optic outdoor cable are continuously filled with a compound that prevents water from entering the cable. Determining test criteria are the time and the maximum dispersal of the water within the sample. Datwyler uses the more demanding test method B exclusively.

Standard

- IEC 60794-1-2-F5-A/B

ROHS – WEEE – REACH

Statement from Datwyler Cabling Solutions:

As an environmentally conscious manufacturer and supplier of cabling solutions it is our concern not to use any environmentally harmful substances in our products.

Based on current information, the herein-mentioned guidelines / regulations for banned substances are fully complied with. Exceptions are noted as such on the respective data sheet.

Product overview and selection guide for copper data cables

Selection criteria

The Datwyler product portfolio consists of many different cable types.

The following overview lists some of the more important criteria which will help you to decide for the cable types that meet your specific requirements.

page	cable type	Cable design	AWG = American Wire Gauge	Category / Class	Telephone, ISDN	Video signals (RGB); symmetrical transmission	Ethernet 10 BaseT / 100 BaseT	Gigabit-Ethernet 1000 BaseT	10-Gigabit Ethernet	40-Gigabit Ethernet up to 30 m	Cable Sharing	Suitable for horizontal cabling	Suitable for backbone and vertical/riser cabling	Suitable for patch / connecting cables	PimF (Pair in metal Foil)	Bundle cable	Stabilizing element (intermediate sheath for mech. stabilization)	PVC cable sheath (FR/PVC)	Halogen-free cable sheath (FRNC/LS0H)	Multimedia according to EN 50083-8	Stabilising element (Cross)	Suitable for outdoor use	Suitable for industrial applications

Copper connecting hardware, by Category**

CATEGORY / CLASS

COPPER CONNECTING HARDWARE shielded

7_A/F_A (1000 MHz)

7/F (600 MHz)

The Cat.7 connecting hardware was optimized for the Cat.7_A requirements.

6_A/E_A (500 MHz)

10GBase-T*

*) In case of using these modules for 10GBase-T (Class E_A) applications we recommend Cat.7 or Cat.7_A data cables

6/E_A (500 MHz)

6/E (250 MHz)

5e/D (100 MHz)

1000Base-T / 100Base-T

Please find an up-to-date matrix showing which patch panels and outlets are suitable for the insertion of the respective Datwyler module in the Support/Downloads section of our website www.cabling.datwyler.com.

Subject to technical modification.

Modules with a higher category implement all requirements of the category below.

COPPER CONNECTING HARDWARE unshielded

UP/K data outlet
CSA Plus 2/8 Cat.6_A

UP/K data outlet
CSA Plus 1/8 Cat.6_A

Patch panel CSA Plus 24/8 Cat.6_A (IEC)

Please note:

These modules also fulfil all Class E_A Channel requirements when connected to Cat.7 oder Cat.7_A data cables.

RJ45 feed-through coupler
MS/KS, straight

RJ45 module KU-T 1/8
toolless Cat.6

Patch panel CUP 24/8
Cat.6

RJ45 module KU-T 1/8
toolless Cat.5e

Data cable, S/FTP, Category 8.2, AWG23

CU 8203 4P

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Category 8.2 data cable – exceeds the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1, EN 50288-9-1 and IEC 46C/1001/CD (draft). Excellent shielding effect due to individually screened pairs and overall copper braid. Compact cable design. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

High-end data cable for data centres. Developed particularly for 40 GBase-T transmission with maximum channel length of 30 metres in End of Row or Top of Rack (EoR / ToR) applications in data centres. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to 2000 MHz. Applicable for Power over Ethernet (PoE / PoE+).

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.7_A data cable - exceeds the requirements of ISO/IEC 11801, IEC 61156-5, IEC 61156-7, EN 50173-1 and prEN 50288-9-1.
 Excellent shielding effect due to individually screened pairs and overall copper braid.
 Easy identification of wires thanks to longitudinal colour markings.
 Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling.
 For the transmission of digital and analogue voice, video and data signals.
 Suitable for all ICT network applications up to class F_A applications (1000 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
 Optimized for the transmission of broadband signals (such as cable TV) in accordance with IEC 15018.
 Due to the increased wire section eminently suited for Power over Ethernet (PoE) / PoE+.

COPPER DATA CABLES, SHIELDED

Data cable, S/FTP, Category 7, AWG23
CU 7080 4P / 2x4P F8

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.7 data cable - exceeds the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-4-1. Excellent shielding effect due to individually screened pairs and overall copper braid. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to class F applications (600 MHz) in accordance with EN 50173-1 and ISO/IEC 11801 and for the transmission of broadband signals (such as cable TV) in accordance with IEC 15018. Applicable for Power over Ethernet (PoE) / PoE+.

COPPER DATA CABLES, SHIELDED

Data cable, S/FTP, Category 7, AWG23
CU 7002 nx4P Breakout Light (BOL)

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.7 data cable - exceeds the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-4-1. Excellent shielding effect due to individually screened pairs and overall copper braid. Easy handling, small outer diameter and reduced weight thanks to the Breakout Light construction with outer polyester foil instead of an overall cable sheath. Considerable shorter installation time due to the multi-cable construction. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling. For the transmission of digital and analogue voice, video and data signals. Suitable for all applications up to class F applications (600 MHz) in accordance with EN 50173-1 and ISO/IEC 11801 and for the transmission of broadband signals (such as cable TV) in accordance with IEC 15018. Applicable for Power over Ethernet (PoE) / PoE+. Especially suitable for Consolidation Points (e.g. in open-plan offices).

CU 7002 4P Industrial PUR

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.7 data cable with PUR sheath - exceeds the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-4-1. Compatible with Datwyler IP67 connecting hardware. Excellent shielding effect due to individually screened pairs and overall copper braid. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling - designed for use in indoor and outdoor industrial areas. Oil resistant. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to class F applications (600 MHz) in accordance with EN 50173-1 and ISO/IEC 11801. Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.6_A data cable - exceeds the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and prEN 50288-10-1. Excellent shielding effect due to individually screened pairs and overall copper braid. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to class E_A applications (500 MHz) in accordance with EN 50173-1 and ISO/IEC 11801. Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.6 data cable - fulfils the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 und EN 50288-5-1.
Robust cable design with a very high mechanical stability and reliable electrical performance thanks to the stabilising element.
Excellent shielding effect due to overall foil and copper braid.

Simple, fast and reliable terminations thanks to the special cable stripper Abi 62.

Article No. 185640

Tool is applicable for

1. removal of outer sheath
2. removal of stabilising element from pairs

Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling.
For the transmission of digital and analogue voice, video and data signals.
Suitable for all ICT network applications up to class E applications (250 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.5e data cable - fulfils the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-2-1. Excellent shielding effect due to overall foil and copper braid. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to class D applications (100 MHz) in accordance with EN 50173-1 and ISO/IEC 11801. Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Category 8.2 patch cord – exceeds the requirements of ISO/IEC 11801, IEC 61156-6, EN 50173-1, EN 50288-4-2 and IEC 46C/1002/CD (draft). Excellent shielding effect due to individually screened pairs and overall copper braid. Compact cable design. Easy wire identification and termination due to different coloured wires. Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Patch cord in patch panels and as equipment connection cable. For the transmission of digital and analogue voice, video and data signals. Suitable for all ICT network applications up to 2000 MHz. Applicable for Power over Ethernet (PoE / PoE+).

PRODUCT INFORMATION

FEATURES

Electrically and mechanically excellent Cat.7_A patch cord - exceeds the requirements of ISO/IEC 11801, IEC 61156-6, IEC 61156-8, EN 50173-1, EN 50288-4-2 and prEN 50288-9-2.
 Excellent shielding effect due to individually screened pairs and overall copper braid.
 Easy wire identification and termination due to different coloured wires.
 Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.
 Optimised for RJ45 connecting systems.
 Differently coloured sheaths facilitate clearly arranged installations and visual differentiation of services.

APPLICATIONS

As patch cord in patch panels and as equipment connection cable.
 For the transmission of digital and analogue voice, video and data signals.
 For flexible workstation cabling with long patch cords.
 Especially suitable for CP (Consolidation Point) applications.
 Suitable for all ICT network applications up to class F_A applications (1000 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
 Optimized for the transmission of broadband signals (such as cable TV) in accordance with IEC 15018.
 Applicable for Power over Ethernet (PoE) / PoE+.

 Cat 7 / Class F - limit values as specified by IEC 61156-6 and EN 50288-4-2 guaranteed

Industrial flexible data cable, S/FTP, Category 7, AWG26

CU 7702 4P flex Industrial PUR

PRODUCT INFORMATION

FEATURES

Electrically and mechanically excellent Cat.7 patch cord with PUR sheath - exceeds the requirements of ISO/IEC 11801, IEC 61156-6, EN 50173-1 and EN 50288-4-2.
 Excellent shielding effect due to individually screened pairs and overall copper braid.
 Easy wire identification and termination due to different coloured wires.
 Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.
 Compatible with Datwyler IP67 RJ45 plug.

APPLICATIONS

As patch cord in patch panels and as equipment connection cable - designed for use in industrial areas.
 Oil resistant.
 For transmission of digital and analogue voice, video and data signals.
 For flexible workstation cabling with long patch cords.
 Especially suitable for CP (Consolidation Point) applications.
 Suitable for all ICT network applications up to class F applications (600 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
 Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.5e patch cord - exceeds the requirements of ISO/IEC 11801, IEC 61156-6, EN 50173-1 and EN 50288-2-2.
 Construction optimised for fast and reliable terminations.
 Easy wire identification and termination due to different coloured wires.
 Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.
 Optimised for RJ45 connecting systems.
 Differently coloured sheaths facilitate clearly arranged installations and visual differentiation of services.

APPLICATIONS

As patch cord in patch panels and as equipment connection cable.
 For the transmission of digital and analogue voice, video and data signals.
 Suitable for all ICT network applications up to class D applications (100 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
 Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.6 data cable - fulfils the requirements of ISO/IEC 11801, IEC 61156-5, EN 50173-1 and EN 50288-6-1.
Robust cable design with reliable electrical performance thanks to stabilising element.
Very good NEXT reserve due to cable construction with a pair separator (cross).
Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.

APPLICATIONS

Data cable for structured premises cabling.
For the transmission of digital and analogue voice, video and data signals.
Suitable for all ICT network applications up to class E applications (250 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
Applicable for Power over Ethernet (PoE) / PoE+.

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality Cat.6 patch cord - exceeds the requirements of ISO/IEC 11801, IEC 61156-6, EN 50173-1 and EN 50288-6-2.
Construction optimised for fast and reliable terminations.
Easy wire identification and termination due to different coloured wires.
Compatible with all current connecting hardware in accordance with EN 50173 and ISO/IEC 11801.
Optimised for RJ45 connecting systems.
Differently coloured sheaths facilitate clearly arranged installations and visual differentiation of services.

APPLICATIONS

As patch cord in patch panels and equipment connection cable.
For the transmission of digital and analogue voice, video and data signals.
Suitable for all ICT network applications up to class E applications (250 MHz) in accordance with EN 50173-1 and ISO/IEC 11801.
Applicable for Power over Ethernet (PoE) / PoE+.

TELEPHONE CABLES

Telephone cable, U/UTP, Category 3
DATWYLER 25-pair Cat.3 indoor cable

PRODUCT INFORMATION

FEATURES

Electrically and mechanically high-quality 25-pair Cat.3 telephone cable.
 Easy identification of wires thanks to clear longitudinal colour markings and three-layer cable design.
 Exceeds the Cat.3 requirements of TIA/EIA 568B, ISO/IEC 11801, IEC 61156-4, and UL 444.

APPLICATIONS

Cat.3 telephone cable for indoor cabling.
 For the transmission of digital and analogue voice signals.
 Suitable for all applications up to Class C applications.

Factory-assembled copper data cables

PRODUCT INFORMATION

CONCEPT

Faster, safer and more cost-effective: the trend towards pre-assembled systems

Ever shorter time frames for new buildings, renovations, modifications and extensions raise the question of how to carry out installations even more quickly, more safely and more cost-effectively.

Installation often has to take place during current operation and needs to be effected without costly on-site work, and as far as possible without any outside contractors. Neither the quality of the solution (maximum availability requirements) nor its performance should be forfeited in the process.

Datwyler's modular trunk solutions provide the perfect answer. Pre-assembled trunk cables are fabricated using high-performance cable products which are supplied in combination with different performance levels, modules and connectors. The products are delivered in the lengths requested by the customer and have already been tested and certified in accordance with the latest standards.

This provides installers and operators, particularly in data centers, with products which make it possible to install even extensive copper-based systems to the highest quality in a very short time.

DESCRIPTION

Tailor-made pre-terminated copper trunk cable assemblies

- in the requested lengths
- with customized imprints on the single cables
- with the requested connectors
- 100% pre-tested, with measurement reports

APPLICABLE STANDARDS

Depending on the chosen type and Category of cable and connector the Class is based on the following standards:

- ISO/IEC 11801:2002 / Amd.2:2010
- EN 50173-1:2011
- TIA/EIA 568-B.2-10: 2008

Dimensions & length definition

PRODUCT INFORMATION

DIMENSIONS

Flex BOL cable 12-fold
CU 7702 12x4P flex

Solid BOL cable 6-fold
CU 7002 6x4P

LENGTH DEFINITION

The following criteria are decisive for all pre-assembled copper trunks from Datwyler:

Length_{horizontal}

Horizontal distance between the racks (cable fed from ceiling/from below).

We recommend the cables to be laid in trays above the racks to ensure that there will be no disruption to cooling air flow in the false floor. However, the cables can also be directed through the raised floor when it is amply dimensioned.

A1

Vertical distance up to the fixing point inside rack A

B1

Vertical distance up to the fixing point inside rack B

A2 (as per design)

Breakout section in rack A (pre-assembled with connectors)

B2 (as per design)

Breakout section in rack B (pre-assembled with connectors)

R

Admissible bending radius for the copper trunk in case of insertion into the rack from ceiling or from below.

$$\text{Total length for PO} = \text{Length}_{\text{horizontal}} + A1 + B1$$

Checklist: Project planning with copper trunks

Project planning with copper trunks

DO YOU NEED THE COPPER TRUNKS FOR TODAY OR FUTURE NEEDS?

1GBase-T, 10GBase-T, ...

PLEASE CHOOSE THE RIGHT COPPER CABLE TYPE!

Select the cable type - taking into account the requested number of single cables and their Category.
Flex cables are particularly flexible in terms of packing density but have higher attenuation - their maximum link lengths are a little bit shorter!

PLEASE SELECT THE MODULES OR PLUGS FOR THE PLANNED APPLICATION!

Category 5e, 6, 6_A, 7 or 7_A?
For Class D, E, E_A, F or F_A?

PLEASE CHOOSE THE SUITABLE PATCH PANEL!

- KS
- MS
- MPS
- ...

WHAT WILL BE THE LENGTH OF THE REQUESTED COPPER TRUNKS?

Where do you want to install them?
In cable trays above the racks or in the false floor?
Please consider the diameter, the weight and the admissible bending radius of the trunks!

HOW DO YOU WANT TO ROUTE THE CABLES INSIDE THE DISTRIBUTION RACK TO THE PATCH PANELS?

- side-fed from right?
- side-fed from left?
- centred from behind?
- or ...?

THE SINGLE CABLES CAN BE GRADED IN LENGTH - DEPENDING ON HOW THE TRUNK CABLES IS FIXED INSIDE THE RACK.

The single cables may all have the same length - with enough reserve up to the farthest connecting point.
Excess cable lengths can be laid in a tray behind a 19"/1U cable management panel.

CUSTOMER-SPECIFIC IMPRINT / LABELLING?

Available on request for all copper trunks.

PLEASE CONSIDER SOME EXTRA TIME FOR THE PRE-ASSEMBLY IN YOUR TIMETABLE!

YOU NEED CONSULTING SERVICE?
PLEASE DO NOT HESITATE TO CALL US.
WE WILL BE HAPPY TO HELP YOU!

You will find the Datwyler phone numbers on the back page of the catalogue.
For all current information please see our website

www.cabling.datwyler.com

PRODUCT INFORMATION

DESCRIPTION

Compact 1-gigabit network isolator in Keystone construction suitable for device installation or permanent installation.

Can be used in any Keystone-compatible wall outlet panel.

When retrofitting existing installations its rear connecting cable acts as a simple extension.

Meets the performance requirements of TIA 568 Cat. 5e and ISO 11801 Class D in the Permanent Link and is thus designed for transmissions of up to 1 gigabit per second.

APPLICATION

In medical technology, recording studios, measuring and monitoring technology and in the potential-free connection of remote computer systems.

Galvanic isolation of any device connected to a copper-based Ethernet network (wires and screen).

Suppresses potential equalisation currents and protects medical and non-medical equipment and systems from the consequences of dangerous network voltage surges which can be caused by switching operations, moisture, electrostatic discharge, differences in potential or lightning strike.

Attenuates low-frequency signal components so well that it effectively prevents ripple pickup in connected devices.

STANDARDS

IEC 60601- 1:1988 A1:1991 and A2: 1995 (2nd Edition); IEC 60601-1-1:2000; IEC 60601- 1: 2005 (3rd Edition); IEC 60601-1-2:2007; UL 60601; IEC 61000-4-2 (ESD; 15kV Air / 8kV Contact); IEC 61000-4-4 (EFT; 40A, 5/50ns) and IEC 61000-4-5 (Lightning; 12A 8/20 µs)

TECHNICAL SPECIFICATIONS

Length of connecting cable:	20 cm = standard on stock, other lengths on request (from 3 cm up to 10 m)
Electric strength:	6000 VAC at 50 Hz (1 min.), 8500 VDC
Insertion Loss:	< 1dB (1 MHz < f < 100 MHz)
Supported network protocols:	IEEE802.3 10BaseT (Cl.14), 100BaseTx (Cl.25), 1000BaseT (Cl.40)
Kenzeichnungen:	CE, UL (E249126), RoHS compliant, lead-free
Operating conditions:	Temperature: 10° bis 45° C / Air humidity: 10% up to 90% (non-condensing) / Barometric pressure: 860 hPa up to 1060 hPa
Maximum applied voltage (permanent):	400 VAC at 50/60 Hz
Dimensions (housing w/o cable):	H x W x L = 23.5 x 17.3 x 39.9 mm

PS-GG45 patch cords

Measurement / Patch cord PS-GG45 7_A 1000 MHz 4P, shielded
 Adapter patch cords PS-GG45 7_A / RJ45 4P, shielded

Measurement/patch cord 1000 MHz 4P
 PS-GG45™ 7_A / PS-GG45 7_A

Adapter patch cord 4P
 PS-GG45 7_A / RJ45

PRODUCT INFORMATION

APPLICATION

Measurement / Patch cord PS-GG45 7_A 1000 MHz 4P, shielded

Patch cords with PS-GG45 7_A plugs allow for Class F_A compliant cabling systems (up to 1000 MHz) and for Class F installations (up to 600 MHz). The PS-GG45 7_A plug uses only 4 x 2 contacts in the top and bottom corners of the PS-GG45 7_A module, whereby best NEXT und RL values can be achieved. The unused contacts will be connected through a switch to ground. Measurement cords with PS-GG45 7_A plugs are primarily needed for acceptance testings.

Adapter patch cords PS-GG45 7_A / RJ45 4P, shielded

As PS-GG45 7_A plugs are not compatible with RJ45 jacks, the RJ45 jacks in active devices can be connected to the high-performance cabling system with adapter patch cords only. These flex cables are fitted with a PS-GG45 7_A plug on one side and a RJ45 plug on the other side.

Future viability

GG45 cabling systems that use standard patch cords (RJ45/RJ45) provide enough electrical reserve capacities for 10-gigabit Ethernet applications (10GBase-T).

When deploying adapter patch cords with one RJ45 and one PS-GG45 plug you can achieve more than 1000 times better reserve capacities in the Channel.

These reserve capacities are large enough also for the transmission of future applications in Class F_A cabling systems up to 1000 MHz.

COPPER PATCH CORDS

PS-TERA / RJ45 patch cords

Measurement / Patch cord PS-TERA 4P, shielded
Adapter patch cords PS-TERA / RJ45, shielded

PRODUCT INFORMATION

APPLICATION

Measurement/Patch cord PS-TERA™ 4P with flexible cable CU 7150 4P flex, shielded

Patch cords with PS-TERA 4P plugs allow for Class F_A compliant cabling systems (up to 1000 MHz) and for Class F installations (up to 600 MHz).

Measurement cords with PS-TERA 4P plugs are primarily needed for acceptance testings.

Adapter patch cords PS-TERA / RJ45 with flexible cables CU 7702 4P flex, shielded

For multimedia cabling systems with tried and tested copper components and innovative connection technology for Class F_A in accordance with EN 50173 and ISO/IEC 11801.

PS-TERA connectors guarantee highest flexibility: Each port of one 4P module can be used for a separate patch. This allows for simultaneous transmission of TV, video, data and voice in one and the same data cable (1 pair for each application).

DESCRIPTION

The PS-TERA adapter patch cords are available in many types for adaption to the RJ45 standard. They are fitted with a PS-TERA plug for 4, 2 or 1 pair on one side and a RJ45 plug or RJ11 plug (telephony) on the other side.

COPPER PATCH CORDS

RJ45 patch cords Cat. 6_A (IEC) 500 MHz
shielded, wiring 1:1

PRODUCT INFORMATION

DESCRIPTION

Shielded patch cords and connection cables with shielded RJ45 plug on both ends, fitted with an overmoulding and an anti-slag boot in the same colour as the cable sheath and with latch protection. The cable CU 7702 flex 4P (Cat. 7) offers excellent NEXT and impedance values due to the individually foil screened pairs (PiMF). Due to the overall copper braid, the patch cables have an excellent screen performance and are highly flexible. They are optimized for the transmission of CATV signals up to 862 MHz. The patch cords meet all the requirements of Category 6_A (IEC) and the limit values stipulated for Class E_A cabling links (Channels) for 10GBase-T applications.

Standard assortment: from 0.5 m up to 20 m.
Customised adjustments (anti-slag boot, termination, label) are available at short notice.

PRODUCT INFORMATION

APPLICATION

Datwyler's patch cords and connection cables IP67 Cat. 6 are especially suitable for the harsh, industrial environment. The IP67 RJ45 plug is compatible with the Datwyler Modular Solution IP67 components.

DESCRIPTION

The cable type CU 7702 4P flex FRNC/LSOH Cat. 7 provides outstanding electrical and mechanical properties. The shielded pairs (PiMF) and an additional overall copper braid ensure outstanding NEXT and impedance values.

The cable type CU 7702 4P flex Industrial PUR (Cat. 7) meets additional requirements of the industrial environment like oil resistance and robustness.

The standard version is fitted with an IP67 RJ45 plug on one side and a RJ45 plug with a moulded anti-snag boot on the other side.

In addition to the standard version this patch cable is available in other lengths and with other combinations of plugs (on request).

PRODUCT INFORMATION

DESCRIPTION

Datwyler's unshielded Cat. 6 RJ45 patch cords and connection cables (up to 250 MHz) are fitted with a shielded RJ45 plug and a coloured moulded anti-snap boot on both ends. Plugs and anti-snap boots form one unit. The shielded RJ45 plugs provide for better performance. The CU 602 4P flex cable is suitable for transmission rates up to 250 MHz.

¹⁾ FRNC/LSOH = Flame Retardant Non Corrosive / Low Smoke Zero Halogen

RJ45 patch cords Cat. 6 UTP 250 MHz unshielded, wiring 1:1

Cable sheath FR/PVC¹⁾
or FRNC/LSOH²⁾

PRODUCT INFORMATION

APPLICATION	Applicable for all applications up to Class E (250 MHz), for example Gigabit Ethernet 1000Base-T, Fast Ethernet 100Base-T, ISDN, and PoE according to IEEE 802.3af.
DESCRIPTION	RJ45 patch cord, Cat. 6 (up to 250 MHz), unshielded, with a RJ45 plug (Cat. 6) and a moulded anti-snag boot on both ends. Unshielded flexible cable U/UTP, 250 MHz, 4P, AWG 24. Cable sheath made of FR/PVC, also available as FRNC/LSOH. RJ45 plugs (8/8) Cat. 6 in accordance with IEC 60603-7-4.
PROPERTIES	Flame retardant in accordance with IEC 60332-1, RoHS compliant.
APPLICABLE STANDARDS	IEC 61935-2, TIA/EIA 568-B.2-1 Cat.6, Commercial Building Telecommunications Cabling Standard, part 2: Balanced Twisted-Pair Cabling Components (as of June 2002).
PACKING UNIT	One patch cord, bundled as a ring in a plastic bag.

Cable clips 2D
for labelling of patch cords

Fig. 1: Cable clip 2D to be attached to existent patch cord

Fig. 2: Patch cable with pre-assembled Cable clip 2D (with bar code)

Fig. 3: Cable clip 2D with customized text

PRODUCT INFORMATION

DESCRIPTION

The Cable clip 2D is suitable to be attached to already existent (cabled) patch cords or can be ordered together with new patch cords as a pre-assembled addition. Each cable clip can be moved to an easily readable position. No slipping down from a "hanging" patch cord. Text on self-laminating label. Its design makes it suitable for bar code labelling.

Versions:

- Cable clip 2D to be attached to both sides of an existent patch cord (can also be attached to already connected patch cord - see fig. 1)
- Cable clips 2D, pre-assembled to a newly ordered patch cord, optional with standard serial number and 2D bar code (see fig. 2) or with customised text (see fig. 3) and/or 2D bar code (available on request)

MATERIAL

PVC

DIMENSIONS

W x H x D: 28 x 10 x 10 mm

SUITABLE CABLES

Round cables with 3.0 mm up to 5.8 mm external diameter, oval cables with 4.8 x 3.2 mm up to 6.6 x 4.0 mm.

COLOUR

white, similar to RAL 9010

Article No.	Description	PU
400312	Cable clip 2D (to be attached to existent patch cords) without self-laminating label (1 set = 50 pcs.)	1 set

Patch cord with pre-assembled Cable clips 2D

Note: Please order the requested patch cord separately - and please do not forget to mention the requested Cable clip 2D version when ordering!

400310	Cable clip 2D with label with standard serial number and 2D bar code (2 pcs. per patch cord, pre-assembled)	1 pc.
400311	Cable clip 2D with label with customised text (2 pcs. per patch cord, pre-assembled)	1 pc.

GG45™ connector system, Category 7_A

Module PS-GG45 7_A shielded

"Two-in-One" connector
backward compatible to RJ45

Keystone clip

Module PS-GG45 7_A
1000 MHz shielded

Termination tool for PS-GG45

PRODUCT INFORMATION

APPLICATION

The module PS-GG45 7_A is a shielded module, compatible with RJ45 and specified up to 1000 MHz. It was developed especially for applications beyond 10-gigabit Ethernet with highest bandwidths. When used together with Cat. 7_A data cables and patch cords, it enables to fulfil all Class F_A requirements for the 4-conductor Channel in accordance with ISO/IEC 11801 Amendment 1:2008. The "Two-in-One" module has 12 contacts that work in two different transmission modes: Standard = RJ45 and High-Speed = GG45.

DESCRIPTION

Robust zinc die casting housing with Keystone clip for easy installation in patch panels and faceplates with Keystone openings.
Quick and reliable wire-connections with the termination tool for GG45.
Depending on the plug that is used (RJ45 or GG45) there are 8 out of 12 contacts enabled:

- the RJ45 plug uses the 8 contacts on the top-level,
- the GG45 plug enables the 8 contacts in the upper and lower corners.

The 360° braid connection supplies best Coupling Attenuation values and provides for immunity against Alien Crosstalk or other external influences.

MECHANICAL PROPERTIES

Solid copper wire	0.51 mm (AWG 24) to 0.65 mm (AWG 22)
Diameter over insulation	0.7 mm to 1.4 mm (1.6 mm)
Version for stranded copper wire	AWG 24 up to AWG 27
Stranded wire	7 bare stranded wires

STANDARDS

IEC 60603-7-71 (Cat. 7_A shielded, 1000 MHz)
ISO/IEC 11801:2002 / Amd.2:2010
EN 50173-1:2011

GENERAL CHARACTERISTICS

Termination	Pair configuration according to T568- A or T568-B, clearly marked with a colour code
Mounting	Suitable for Keystone openings in accordance with ISO/IEC 60603-7
 Category/Class	Cat. 7 _A / Class F _A

Module PS-TERA 4P Cat. 7_A

Plug PS-TERA 4P, 2P, 1P shielded
Plug PS-TERA 1P unshielded

PS-TERA tool
For easy cable preparation

Parallel pliers

PRODUCT INFORMATION

FEATURES

The module PS-TERA is a shielded module that accepts 1-pair, 2-pair and 4-pair plugs. It fulfils all requirements for Cat. 7_A products up to 1000 MHz in accordance with IEC 61076-3-104. Therefore the module is suitable for 10-gigabit Ethernet transmissions in accordance with IEEE 802.3an and for upcoming applications that need even higher bandwidths. The module is intended for screened Cat.7 or 7_A data cable termination. As it accepts 1-, 2- or 4-pair plugs, it enables the transmission of multiple applications over one data cable at the same time (Plug Sharing). The plugged-in plugs are interlocked. Datwyler offers coloured cable boots for the differentiation of applications. Unused modules are protected with hinged dust shutters. The module is compatible with the wire diameters AWG 22 to AWG 23.

APPLICABLE STANDARDS

IEC 61076-3-104 (Cat. 7_A shielded, 1000 MHz)
ISO/IEC 11801:2002 / Amd.2:2010
EN 50173-1:2011

INFORMATION

The PS-TERA modules can be fitted in all Datwyler faceplates, patch panels or floor box solutions with MPS openings

RJ45 module, shielded, Category 6_A (IEC)

Module KS-T Plus 1/8 tool-less Cat. 6_A (IEC)

RJ45 module KS-T Plus 1/8 tool-less Cat. 6_A (IEC) shielded with dust shutter

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice-, video- and data signals. The module KS-T Plus is specified up to 500 MHz in compliance with the component standard IEC 60603-7-51. Enables acceptance testing with high spare capacity at the limit values stipulated for Class E_A Permanent Links when combined with shielded Category 6_A, 7 and 7_A data cables. Therefore it is applicable for 10-gigabit Ethernet transmissions in accordance with IEEE 802.3. Useable for Power over Ethernet Plus (PoE+) corresponding to IEEE 802.3at.

DESCRIPTION

Solid zinc die casting housing with mounting clip for installation in Keystone panels and outlets. Contact spring with phosphor bronze alloy, plated with gold. For connecting the wires a wire manager is used in combination with two integrated moveable housing wings for tool-less IDC connections. Only for cutting the wires a plane wire cutter is necessary. The 360° metal shield ensures a durable fully shielded environment. Strain relief via cable tie. The module is re-usable. Potential balancing possibility directly at the module when needed. With removable black dust shutter. Other colours available as accessories sets.

MECHANICAL PROPERTIES

Solid copper wire	0.50 mm (AWG 24) to 0.65 mm (AWG 22)
Re-connection	for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
Stranded copper wire	CU 7702 flex (AWG 26/7), re-usable once
Diameter over insulation	0.70 mm to 1.40 mm (1.60 mm)
Temperature range	storing: -40° C to +70° C
	during installation: -10° C to +60° C
	in operation: -20° C to +60° C

Module MS-K Plus 1/8 Cat. 6_A shielded

Dust shutters
Set with 25 pcs.

PRODUCT INFORMATION

APPLICATION	For the transmission of digital and analogue voice, video and data signals. The module MS-K Plus is specified up to 500 MHz in accordance with the component standard IEC 60 603-7-51. In combination with shielded Category 6 _A , 7 and 7 _A data cables all Class D, E and E _A applications are applicable, that is including 10GBase-T (IEEE 802.3an). Useable for Power over Ethernet Plus (PoE+) in accordance with IEEE 802.3at.	
DESCRIPTION	Compact zinc die casting housing. Special construction for high packing density in faceplates/outlets (up to 3 modules). Tool-less wire termination. 360° braid connection to the strain relief bar. Strain relief bar fixed with a cable tie. With snap-in mounting in patch panels and faceplates by a special kind of Keystone fitting (180° turned).

RJ45 module, shielded, Category 6_A (IEC)

Module MS-C6_A 1/8 Cat. 6_A (IEC) 180°

for 10-gigabit Ethernet

Dust shutters

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice, video and data signals. The module MS-C6_A is specified up to 500 MHz in accordance with the component standard IEC 60 603-7-51. In combination with shielded Cat.6_A, 7 and 7_A data cables all applications up to Class E_A are applicable, that is including 10GBase-T (IEEE 802.3an). Useable for PoE and Power over Ethernet Plus (PoE+) in accordance with IEEE 802.3at.

DESCRIPTION

Compact two-piece module, re-usable zinc die casting housing. Special construction for high packing density in faceplates/outlets (up to 3 modules). Tool-less, time-saving wire termination. Possibility to terminate solid and flexible cables. Outstanding electrical performance for 10-gigabit Ethernet applications. 360° braid connection to the strain relief bar. Strain relief via snap-in clip without cable tie.

MECHANICAL PROPERTIES

Wire connection	IDC insulation displacement connectors
Solid copper wire	0.50 mm (AWG 24/1) to 0.65 mm (AWG 22/1)
Stranded copper wire	AWG 26/7 to AWG 24/7, e.g. CU 7702 flex
Re-connection	feasible when using the same or bigger wire diameter
Diameter over insulation	0.7 mm to 1.4 mm (1.6 mm)

PRODUCT INFORMATION

DESCRIPTION

Data outlet CSA Plus Cat. 6_A shielded, angled, for the transmission of digital and analogue voice, video and data signals up to 10-gigabit Ethernet in accordance with IEEE 802.3 - provides high spare capacities to the limit values.

Exceeds the requirements for Category 6_A connecting components (up to 500 MHz) as defined in ISO/IEC 60603-7-51.

Applicable for Power over Ethernet (PoE) / PoE+ in accordance with IEEE 802.3at.

Compact design for easy flush or duct mounting and deployment in floor boxes.

Can be used in combination with design families from many vendors.

Housing made of zinc die casting.

Cable feed from all sides (+/- 30° angle).

Combined shielding contact and strain relief.

LSA connection technology for copper wires from 0.4 mm up to 0.63 mm (AWG26 - AWG22), diameters over insulation from 0.7 mm up to 1.6 mm (PE).

Convenient head on wire termination.

Color code in accordance with T568-A and T568-B.

Temperature range from - 40° C up to + 70° C.

DIMENSIONS

70 x 70 x 47 mm (incl. central plate)

RJ45 module, shielded, Category 6/E_A

Module KS-T 1/8 tool-less Cat. 6/E_A

RJ45 module KS-T 1/8 tool-less Cat. 6/E_A with dust shutter

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice-, video- and data signals. The module KS-T exceeds the IEC 60603-7-5 standard's requirements for Cat.6 connecting hardware up to 250 MHz. It also fulfils all Class E_A Channel requirements up to 500 MHz when combined with Cat. 7 or Cat. 7_A data cables. Therefore it is applicable for 10-gigabit Ethernet transmissions in accordance with IEEE 802.3. Useable for Power over Ethernet Plus (PoE+) corresponding to IEEE 802.3at.

DESCRIPTION

Solid zinc die casting housing with mounting clip for installation in Keystone panels and outlets. Contact spring with phosphor bronze alloy, plated with gold. For connecting the wires a wire manager is used in combination with two integrated moveable housing wings for tool-less IDC connections. Only for cutting the wires a plane wire cutter is necessary. The 360° metal shield ensures a durable fully shielded environment. Strain relief via cable tie. The module is re-usable. Potential balancing possibility directly at the module when needed. With removable black dust shutter. Other colours available as accessories sets.

MECHANICAL PROPERTIES

Solid copper wire	0.50 mm (AWG 24) to 0.65 mm (AWG 22)
Re-connection	for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
Stranded copper wire	CU 7702 flex (AWG 26/7), re-usable once
Diameter over insulation	0.70 mm to 1.40 mm (1.60 mm)
Temperature range	storing: - 40° C to + 70° C during installation: - 10° C to + 60° C in operation: - 20° C to + 60° C

STANDARDS

IEC 60603-7-5 (Cat. 6 shielded, 250 MHz)

RJ45 module KS-TS 1/8 tool-less slimline Cat. 6/E_A

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice-, video- and data signals. The module KS-TS is designed to shorten the termination and installation times. It exceeds the IEC 60603-7-5 standard's requirements for Cat. 6 connecting hardware up to 250 MHz. It also fulfils all Class E_A Channel requirements up to 500 MHz when combined with Cat. 7 or Cat. 7_A data cables. Therefore it is applicable for 10-gigabit Ethernet transmissions in accordance with IEEE 802.3. Useable for Power over Ethernet Plus (PoE+) corresponding to IEEE 802.3at.

DESCRIPTION

Solid zinc die casting housing with mounting clip for installation in Keystone panels and outlets. Compact construction for high packing density in faceplates/outlets (up to 3 modules). Contact spring with phosphor bronze alloy, plated with gold. For connecting the wires a wire manager is used in combination with two integrated moveable housing wings for tool-less IDC connections. Only for cutting the wires a plane wire cutter is necessary. Strain relief via cable tie. The module is re-usable.

MECHANICAL PROPERTIES

Solid copper wire	0.50 mm (AWG 24) to 0.65 mm (AWG 22),
Re-connection	for AWG 22, AWG 23 and AWG 24 when using
	the same or bigger wire diameter
Stranded copper wire	CU 7702 flex (AWG 26/7), re-usable once
Diameter over insulation	0.7 mm to 1.4 mm (1.6 mm)
Temperature range	storing: - 40° C to + 70° C
	during installation: - 10° C to + 60° C
	in operation: - 10° C to + 60° C

RJ45 module, shielded, Category 6/E_A

Module MS 1/8 Cat. 6/E_A
for 10-Gigabit Ethernet

Module MS 1/8 Cat. 6/E_A shielded

Parallel pliers for easy termination

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice, video and data signals.
The module MS 1/8 exceeds the IEC 60603-7-5 standard's requirements for Category 6 connecting hardware up to 250 MHz. It also fulfils all Class E_A Channel requirements up to 500 MHz when combined with Cat. 7 or Cat. 7_A data cables. Therefore it is applicable for 10-gigabit Ethernet transmissions in accordance with IEEE 802.3.
Useable for Power over Ethernet Plus (PoE+) corresponding to IEEE 802.3at.

DESCRIPTION

Compact zinc die casting housing.
360° screen connection with flat plug connector for potential balancing.
Integrated strain relief (cable tie).
High packing density due to very small dimension.
Stable mounting in patch panels and data outlets with a metal spring at the module.

MECHANICAL PROPERTIES

Solid copper wire	0.40 mm (AWG 26) to 0.65 mm (AWG 22)
Stranded copper wire	AWG 26/7 (with 7 bare stranded wires)
Re-connection	for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
Diameter over insulation	0.70 mm to 1.40 mm (1.60 mm)
Temperature range	storing: - 40° C to + 70° C
	during installation: - 10° C to + 60° C
	in operation: - 10° C to + 60° C

RJ45 module KS-TA 1/8 Cat. 6/E_A,
shielded, 45° angled

Patch panel KS 24x-s, 19"/1U, shielded

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice-, video- and data signals.
The module KS-TA exceeds the IEC 60603-7-5 standard's requirements for Cat. 6 connecting hardware up to 250 MHz.
It also fulfils all Class E_A Permanent-Link (PL) requirements up to 500 MHz when combined with Category 7 or 7_A data cables. Therefore it is applicable for 10-Gigabit Ethernet transmissions in accordance with IEEE 802.3.
Useable for Power over Ethernet Plus (PoE+) corresponding to IEEE 802.3at.
The module KS-TA is suitable for the patch panel KS24x-s (Article No. 418023) only.
Due to the module's 45 degree angled front patch connections can be made diagonally from left and right.

DESCRIPTION

Solid zinc die casting housing with mounting clip for installation in Keystone panel KS 24x-s.
Contact spring with phosphor bronze alloy, plated with gold.
For connecting the wires a wire manager is used in combination with two integrated moveable housing wings for tool-less IDC connections.
Only for cutting the wires a plane wire cutter is necessary.
Strain relief via cable tie.
The module is re-usable.

MECHANICAL PROPERTIES

Solid copper wire	0.50 mm (AWG 24) to 0.65 mm (AWG 22)
Re-connection	for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
Stranded copper wire	CU 7702 flex (AWG 26/7), re-usable once
Diameter over insulation	0.70 mm to 1.40 mm (1.60 mm)

Patch panel CSP 24/8, shielded, Category 6 with 24 RJ45 jacks

Patch panel CSP 24/8 Cat. 6, shielded

PRODUCT INFORMATION

APPLICATION Shielded 19"/1U patchpanel for the transmission of digital and analogue voice and data signals. Especially suited for all Class E applications in accordance with EN 50173-1 and ISO/IEC 11801. Applicable for Power over Ethernet (PoE) / PoE+ in accordance with IEEE 802.3at.

CONSTRUCTION

Housing:	Solid metal, front grey, similar to RAL 7035 (black on request); simultaneous cover attachment and shielding contact using two screws
Boards:	3 base boards, each with 8 LSA terminal blocks and 8 RJ45 sockets
Screen tap:	360° screening by ground clips
Strain relief:	with tie wrap
Dimensions:	19"/1U, W x D x H = 482 mm x 96 mm x 44 mm

A termination aid is available as an optional accessory. This consists of two angular sheets that can easily be fixed to the frame or cabinet and make the cable termination more comfortable.

CONNECTION SYSTEM

Cable:	LSA Plus punch down contacts
Socket:	Shielded RJ45 connector (Cat.6, 250 MHz)

Module KS-T 5 1/8 tool-less Cat. 5e shielded

PRODUCT INFORMATION

APPLICATION	KS-T 5 1/8 tool-less is a module that is designed to shorten the termination and installation time. For the transmission of digital and analogue voice, video and data signals. Applicable for the transmission of all applications up to Class D (e. g. 1GBase-T).	
DESCRIPTION	Solid zinc die casting housing with mounting clip for installation in Keystone panels and outlets. Contact spring with phosphor bronze alloy, plated with gold. For connecting the wires a wire manager is used in combination with two integrated moveable housing wings for tool-less IDC connections. Only for cutting the wires a plane wire cutter is necessary. The 360° metal shield protects the module and guarantees stable electric performance. Strain relief via cable tie. The module is re-usable.	
MECHANICAL PROPERTIES	Solid copper wire Re-connection	0.50 mm (AWG 24) to 0.65 mm (AWG 22) for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
	Stranded copper wire Diameter over insulation Temperature range	AWG 26/7, re-usable once 0.7 mm to 1.4 mm (1.6 mm) storing: - 40° C to + 70° C during installation: - 10° C to + 60° C in operation: - 10° C to + 60° C

 Module KU-T 1/8 tool-less, Cat. 6 and Cat. 5e

RJ45 modules KU-T 1/8 tool-less unshielded
 Cat. 6 or Cat. 5e, in white or black

PRODUCT INFORMATION

APPLICATION

For the transmission of digital and analogue voice, video and data signals.
 Suitable for all Class D applications respectively Class E Channels in accordance with
 ISO/IEC 11801, EN 50173-1 and TIA/EIA 568-B.2-10.

DESCRIPTION

Housing made of high-impact resistant, flame retardant compound, UL94V-0 rated,
 with Keystone mounting clip.
 Contact spring with phosphor bronze alloy, plated with gold.
 IDC made of phosphor bronze alloy.

Information:

Suitable for the same faceplates and surface mount boxes
 as Datwyler's shielded Keystone modules (KS-T).

MECHANICAL PROPERTIES

Solid copper wire	0.40 mm (AWG 26) to 0.65 mm (AWG 22)
Re-connection	for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameter
Stranded copper wire	AWG 26 (with 7 bare stranded wires), re-usable once
Diameter over insulation	0.70 mm to 1.40 mm (1.60 mm)

RJ45 module MU 1/8 Cat. 6 unshielded

Parallel pliers for easy termination

PRODUCT INFORMATION

APPLICATION	For the transmission of digital and analogue voice, video and data signals. Especially suitable for all Class E applications in accordance with ISO/IEC 11801, EN 50173-1.	
DESCRIPTION	Compact plastic housing. Very easy termination due to a wire manager and IDC connections. Integrated strain relief (cable tie - not included). High packing density due to very small dimensions.	
	Information: Suitable for the same faceplates and surface mount boxes as Datwyler's shielded MS modules.	
MECHANICAL PROPERTIES	Solid copper wire Stranded copper wire Re-connection	0.40 mm (AWG 26) to 0.65 mm (AWG 22) AWG 26/7 (with 7 bare stranded wires) for AWG 22, AWG 23 and AWG 24 when using the same or bigger wire diameters
	Diameter over insulation Temperature range	0.70 mm to 1.40 mm (1.60 mm) storing: - 40° C to + 70° C during installation: - 10° C to + 60° C in operation: - 10° C to + 60° C

Patch panel CUP 24/8, unshielded, Category 6 with 24 RJ45 jacks

Patch panel CUP 24/8 Cat. 6 unshielded

PRODUCT INFORMATION

APPLICATION Unshielded 19"/1U patch panel for the transmission of digital and analogue voice, video and data signals. Especially suited for all Class E applications in accordance with EN 50173-1 and ISO/IEC 11801. Applicable for Power over Ethernet (PoE) / PoE+ in accordance with IEEE 802.3at.

CONSTRUCTION

Housing:	Solid metal, black, similar to RAL 9005
Boards:	Three base boards, each with LSA plus terminal blocks and 8 RJ45 jacks (unshielded)
Strain relief:	with tie wrap
Dimensions:	19"/1U, W x D x H = 482 mm x 96 mm x 44 mm

A termination aid is available as an optional accessory. This consists of two angular sheets that can easily be fixed to the frame or cabinet and make the cable termination more comfortable.

CONNECTION SYSTEM

Cable:	LSA Plus punch down contacts
Socket:	Unshielded RJ45 connector (Cat.6, 250 MHz)

PRODUCT INFORMATION

APPLICATION	Unshielded 19"/1U phone panels for the transmission of digital (ISDN) and analogue voice signals. Especially suitable for all Class C applications in accordance with EN 50173-1 and ISO/IEC 11801. The patch panels support cables up to 50 or 100 pairs (telephone cables). A maximum of four wires may be connected to one RJ45 socket.	
	A termination aid is available as an optional accessory. This consists of two angular sheets that can easily be fixed to the frame or cabinet and make the cable termination more comfortable. For more accessories see below.

PRODUCT INFORMATION

DESCRIPTION

Modular faceplate for the installation of 2 shielded RJ45 Keystone modules.
Suitable for the flush and duct mounting and for floor box systems.
Mounting frame made of zinc die casting (offers possibility for connection to equipotential bonding).
The snap-in modules are easily fitted into the faceplate.
The mounting frames can be used together with all customary TAE 3-fold central plates
(for multiple designs).

Suitable for the following Datwyler modules:

- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KS-T 5 1/8 Cat. 5e shielded

DIMENSIONS

Mounting dimension: 60 mm

NOTE

Suitable for modules without dust cover only

PRODUCT INFORMATION

DESCRIPTION

Faceplates for the installation of 2 and 3 shielded RJ45 modules MS-K Plus 1/8 Cat.6_A or KS-TS 1/8 Cat.6/E_A.

Suitable for flush and duct mounting as well as for floor box systems.

In case of an installation in a flush-mount cup please use 2-port faceplates (Figure 1 and 3)!

Mounting frame made of zinc die casting (offers possibility for connection to equipotential bonding).

The snap-in modules are easily fitted into the faceplates.

Unused ports are covered with blank covers (metal) that can be removed.

The central plate has a labelling field with transparent cover.

The pure white versions (Figure 3 and 4) are supplied with pure white dust shutters to enable the replacement of the grey shutters at the installed modules.

The mounting frames of the 2-port faceplates (Figure 1 and 3) can be used together with all customary TAE central plates (for multiple designs).

Delivery without modules.

Suitable for the following Datwyler modules:

- RJ45 module MS-K Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded

PRODUCT INFORMATION

DESCRIPTION

Ideally suitable for flush mounting with lack of space, for instance in a flush mount cup. Mounting frame consists of zinc die casting (offers possibility for connection to equipotential bonding). The snap-in modules are easily fitted into the faceplates. Unused ports are covered with blanking elements (metal) that can be removed. The central plate has a labelling field with transparent cover. The mounting frame can be used together with all customary TAE central plates (for multiple designs). Delivery without modules.

Suitable for the following Datwyler modules:

with dust shutters

PRODUCT INFORMATION

DESCRIPTION

AP Surface Mount Box series made of plastic for fast surface mounted installations of up to 2, 4 or 6 modules with Keystone fitting.

All boxes have a labelling field.

The 2-port and 4-port versions are available with or without integrated dust shutters.

All shielded and unshielded Keystone modules tool-less as well as the PS-GG45 7_A module (with clip) are easily fitted into the boxes. When mounting the tool-less modules a cutout in the bottom of the box must be removed.

Delivery without modules.

Suitable for the following Datwyler modules:

- PS-GG45 7_A 4P shielded
- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded

AP / UP / UP-K Faceplates 2x (Edizio due)

surface / flush / duct mounted

for 2 modules MS 1/8, MS-C6_A or PS-TERA, angled, design: Feller

 SWISS STANDARD

UP-K faceplate (duct mounted installation without cover frame, with mounting frame 70 x 70 mm)

UP faceplate (flush mounted installation with cover frame 88 x 88 mm)

AP faceplate (surface mounted installation with housing 88 x 88 x 67 mm)

Blank cover MS

PRODUCT INFORMATION

DESCRIPTION

Modular faceplate system Edizio Feller with angled outlets for the installation of up to 2 modules MS 1/8, MS-C6_A 1/8 or PS-TERA, comprising mounting frame, central plate Edizio with openings, cover frame resp. surface mounted housing. Delivery without modules.

APPLICATION

Design Edizio without 88 x 88 mm cover frame for flush-mounted installation in Thealit ducts with blind technology (UP-K).
Design Edizio with 88 x 88 mm cover frame for flush mounted installation (UP).
Design Edizio central plate with openings in 88 x 88 x 67 mm housing on solid mounting frame for wall mounted (AP) installation.

Suitable for the following Datwyler modules:

- RJ45 module MS-C6_A 1/8 Cat. 6_A shielded
- RJ45 module MS 1/8 Cat. 6/E_A shielded
- RJ45 module MU 1/8 Cat. 6 unshielded
- PS-TERA 4P Cat. 7_A shielded
- Blank cover MS for unused openings

Solutions with additional distance frame 60 x 60 x 15 mm

PRODUCT INFORMATION

DESCRIPTION

Modular faceplate system Kallysto Hager with angled outlets, optimized by Datwyler for the installation of 2 modules.
 Available with optional distance frame - for the professional, fast installation of bigger modules.
 All faceplates offer the possibility of colour coding.
 Delivery with one blank cover - without modules.

APPLICATION

Suitable for the following Datwyler modules:

- PS-GG45 7_A 4P shielded
- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module MS-C6_A 1/8 Cat. 6_A 180°-K shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded

AP / UP / UP-K Faceplates 2x (Edizio flat)

surface / flush / duct mounted

for 2 modules, flat outlet, design: Feller

 SWISS STANDARD

Flush mounted flat outlet
Feller Edizio due (UP)

Surface mounted flat outlet
Feller Edizio due (AP)

Side view of
Feller Edizio flat outlet

PRODUCT INFORMATION

DESCRIPTION

Flat outlet covers Feller Edizio due for 2 modules MS 1/8, PS-TERA or PS-GG45. The flat outlet covers enable easy module connections and allow for good bending radii. They are original Feller products and suit into the Feller modular system. Delivery without modules.

a) suitable for the following Datwyler modules:

- RJ45 module MS-C6_A 1/8 Cat. 6_A shielded
- RJ45 module MS 1/8 Cat. 6/E_A shielded
- PS-TERA 4P Cat. 7_A shielded
- Blank cover MS for unused openings

b) suitable for the following Datwyler module:

- PS-GG45 7_A 4P shielded

PRODUCT INFORMATION

DESCRIPTION

FLF faceplate 2x

for the installation of up to 2 modules MS 1/8, MU 1/8, MS-C_{6A} 1/8, PS-TERA or PS-GG45.
Easy screw-less mounting in doorframes, profiles, ducts, control panels etc. due to a catch spring.
Equipped with dust shutters that also serve as covers for unused ports.
Delivery without modules.

Variant with metal clip for a more stable mounting (available for modules MS 1/8 and MU 1/8 only).

Suitable for the following Datwyler modules:

- RJ45 module MS-C_{6A} 1/8 Cat. 6_A shielded
- RJ45 module MS 1/8 Cat. 6/E_A shielded
- RJ45 module MU 1/8 Cat. 6 unshielded
- PS-TERA 4P Cat. 7_A shielded
- PS-GG45 7_A 4P shielded
- Blank cover MS for unused ports

DIMENSIONS

W x H x D 37.5 x 62.5 x 40 mm

DESCRIPTION

FLF faceplate 3x

for the installation of up to 3 modules MS 1/8, MU 1/8 or MS-C_{6A} 1/8.
Easy screw-less mounting in doorframes, profiles, ducts, control panels etc. due to a catch spring.
Equipped with dust shutters that also serve as covers for unused ports.
Delivery without modules.

Suitable for the following Datwyler modules:

- RJ45 module MS-C_{6A} 1/8 Cat. 6_A shielded
- RJ45 module MS 1/8 Cat. 6/E_A shielded
- RJ45 module MU 1/8 Cat. 6 unshielded

for 2 modules PS-TERA 4P, angled

 GERMAN STANDARD

Fig. 1: Faceplate
for 2 modules PS-TERA 4P, angled

Fig. 2: Example for faceplate
with 2 modules PS-TERA 4P and cover frame

PRODUCT INFORMATION

DESCRIPTION

Modular faceplate PS-TERA 2x for duct mounting (UP-K).
For the installation of 2 modules PS-TERA 4P with angled outlet.
The modules can be easily fitted into the faceplate.
Labelling field with transparent cover.
Delivery without modules.

APPLICATION

The modules PS-TERA 4P enable the installation of multimedia cabling systems up to Class F_A.
At each PS-TERA 4P module the connected 4 pairs can be patched individually, e.g. for transmission of TV, video, data or telephone. Thus, the single pairs in one data cable can be simultaneously used for different applications.

NOTE

The PS-TERA 4P modules can not only be used in this faceplate but also in all Datwyler faceplates, patch panels and floor box solutions with MPS openings.

Patch panel KS 24x

for 24 modules with Keystone fitting
shielded

Blank covers,
black and white

Patch panel KS 24x, shielded

PRODUCT INFORMATION

APPLICATION

Shielded 19"/1U patch panel for up to 24 modules with Keystone fitting. Snap-in modules can be easily fitted into the patch panel. Unused ports can be covered with blank covers.

For the modules PS-GG45 7_A Datwyler recommends the patch panel MGK 24x.

DESCRIPTION

Front panel made of flame retardant compound, UL94V-0 rated, in combination with stainless steel and a cable strain relief.

Front in grey, similar to RAL 7035, or in black, similar to RAL 9005.

Strain relief with tie wrap.

Delivery without modules.

Suitable for the following Datwyler modules:

- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded
- RJ45 module MS-C6_A 1/8 Cat. 6_A 180°-K shielded

DIMENSIONS

Width	482 mm (19")
Depth	160 mm (including cable strain relief)
Height	44 mm (1U)

COPPER PATCH PANEL

Patch panel MS 24/8

for 24 modules MS 1/8 or MU 1/8

shielded and unshielded

Patch panel MS 24/8

PRODUCT INFORMATION

APPLICATION Shielded 19"/1U patch panel for up to 24 RJ45 modules shielded and/or unshielded.

DESCRIPTION Anodised aluminium, silver, and light grey plastic, similar to RAL 7035. Snap-in modules can be easily fitted into the patch panel. The patch panel is supplied with dust shutters and labelling fields. The dust shutters can be individually replaced. Delivery without modules.

Suitable for the following Datwyler modules:

- RJ45 module MS-C6_A 1/8 Cat. 6_A shielded
- RJ45 module MS 1/8 Cat. 6/E_A shielded
- RJ45 module MU 1/8 Cat. 6 unshielded
- RJ45 feed-trough coupler, shielded, Cat. 6 Link / Class E, 180° (straight)
- other modules with MS adapter

Patch panel KU 24x, unshielded

PRODUCT INFORMATION

APPLICATION Unshielded 19"/1U patch panel for up to 24 RJ45 Keystone modules KU-T 1/8, unshielded, in accordance with Cat. 6 or Cat.5e (UTP). Snap-in modules can be easily fitted into the patch panel. Unused ports can be covered with blank covers.

DESCRIPTION Patch panel made of flame retardant compound, UL94V-0 rated. Front in grey, similar to RAL 7035, or in black, similar to RAL 9005. Strain relief with tie wrap. Delivery without modules.

Suitable for the following Datwyler module:
 - RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded

surface mounted
for one insert

Example: AP Distribution box MS 6x with plug-in module and RJ45 jacks

Plug-in module for 6 RJ45 modules MS 1/8, shielded, or MS-C6_A 1/8, 180°, shielded

Plug-in module, loaded with 6 RJ45 jacks Cat. 3 (telephony)

PRODUCT INFORMATION

APPLICATION

Surface-mount distribution box for the insertion of one plug-in module for 6x MS 1/8 or one plug-in module with 6x RJ45 Cat. 3 jacks. Delivery without plug-in modules and without RJ45 modules.

DESCRIPTION

Distribution box delivered with labelling strip. The box can be equipped with a Cat. 3 telephony plug-in module or with a plug-in module for 6 RJ45 modules MS 1/8 Cat. 6/E_A or MS-C6_A 1/8 Cat. 6_A. When MS 1/8 modules are required, the metal insert for 6x MS 1/8 (or MS-C6_A 1/8) is necessary.

PRODUCT INFORMATION

APPLICATION Structured premises cablings in the industrial sector, for the transmission of Ethernet protocols.

DESCRIPTION Field assembly 8-pin RJ45 plug, IP20, Category 6, shielded, with quick connection technology.

Suitable for cables with the following properties:

Solid copper wire	0.40 mm up to 0.64 mm, AWG 24/1 up to AWG 22/1
Stranded copper wire	0.48 mm up to 0.67 mm, AWG 26/7 up to AWG 22/7
Cable sheath diameter	5.5 mm up to 8.5 mm
Protection rating	IP20

Solid housing made of zinc die cast.
 Easy on-site assembly without any special tools.
 With strain relief - can be installed afterwards for colour coding.

APPLICABLE STANDARDS IEC 60603-7-5 (Cat. 6)
 ISO/IEC 11801:2002/Amd.1:2008 and Amd.2:2010 (Class E, 250 MHz)

field assembly

PRODUCT INFORMATION

APPLICATION Structured premises cablings in the industrial sector, for the transmission of Ethernet protocols.

DESCRIPTION Field assembly 8-pin RJ45 plug, IP20, Cat.5e shielded, with quick connection technology.

Suitable for cables with the following properties:

Solid copper wire	0.40 mm up to 0.64 mm, AWG 24/1 up to AWG 22/1
Stranded copper wire	0.48 mm up to 0.67 mm, AWG 26/7 up to AWG 22/7
Cable sheath diameter	5.0 mm up to 8.5 mm
Protection rating	IP20

The plug is pre-assembled and therefore allows for easy on-site assembly without any special tools.

APPLICABLE STANDARDS EC 60603-7-3 (Cat.5/5e)
ISO/IEC 11801:2002/Amd.1:2008 and Amd.2:2010 (Class D, 100 MHz)

PRODUCT INFORMATION

APPLICATION	Structured premises cabling in the industrial sector, for the transmission of Ethernet protocols.
DESCRIPTION	Field-assembly 8-pin RJ45 plug body, IP67, Category 5e, shielded, with quick connection technology. Suitable for cables with the following properties: Solid copper wire 0.40 mm up to 0.64 mm, AWG 24/1 up to AWG 22/1 Stranded copper wire 0.48 mm up to 0.67 mm, AWG 26/7 up to AWG 22/7 Cable sheath diameter 5.0 mm up to 8.5 mm Protection rating IP67 The plug is pre-assembled and therefore allows for easy on-site assembly without any special tools. The easy to handle push-pull interlock protects the connection against shock and vibration and ensures safe data transmissions also in rough industrial environments.
APPLICABLE STANDARDS	IEC 60603-7-3 (Cat. 5/5e) ISO/IEC 11801:2002/Amd.1:2008 and Amd.2:2010 (Class D, 100 MHz) EN 50173-1:2007

Outlets IP67

surface mounted & installation in devices
for 1 RJ45 module MS 1/8 or MU 1/8

Fig. 1:
Data outlet IP67

Fig. 2:
Connector socket IP67

Fig. 3:
Mounting flange IP67

Fig. 4:
RJ45 plug body IP67
to assemble patch cables on-site

PRODUCT INFORMATION

APPLICATION

Structured premises cablings in the industrial sector - components with protection rating IP67 in accordance with EN 50173-2 (draft) and environment classes M3, I3, C3, and E3.

DESCRIPTION

Data outlets IP67 for 1 RJ45 module MS 1/8 (shielded) or MU 1/8 (unshielded) for the transmission of Ethernet protocols in harsh industrial environments in which contaminations may occur:

1. Data outlet IP67 for 1 module MS 1/8 shielded or MU 1/8 unshielded - surface mounted
2. Connector socket IP67 for 1 module MS 1/8 shielded or MU 1/8 unshielded
3. Mounting flange IP67 for 1 module MS 1/8 shielded or MU 1/8 unshielded - for installation in devices
4. RJ45 plug body IP67 - to assemble IP67 patch cables on-site

In order to ensure a secure data transmission, the compatible components offer a large 360° braided connection that results in excellent EMC properties. The covers that are permanently attached to the casings prevent water, dust, dirt and other contaminants from entering the RJ45 jack when unmated. Usable in connection with IP67 or standard RJ45 patch cords in different lengths.

FEATURES

- Fulfill protection rating IP67 when connected to an IP67 plug
- Connection with customary RJ45 plugs possible (without IP rating)
- Plug surface in accordance with IEC 61076-3-106 (option 6)
- Environment classes M3, I3, C3, and E3 in accordance with EN50173-2
- IP67 cover, permanently attached
- Large 360° braided connection, excellent EMC properties
- Add-on surface mounting possibility
- Easy to open modules, reusable
- Add-on unit with an 8-pin RJ45 jack
- Easy and time-saving installation
- Fully shielded modules

Rail adapter MS IP20 rail mounted

for 1 RJ45 module MS 1/8 or MS-C6_A 1/8

Rail adapter for 1 RJ45 module
MS 1/8 or MS-C6_A 1/8

PRODUCT INFORMATION

APPLICATION	Structured premises cabling in the industrial sector, for the transmission of Ethernet protocols.
DESCRIPTION	<p>IP20 protection rating rail adapter for 1 shielded RJ45 module MS 1/8 Cat. 6/E_A or MS-C6_A 1/8 Cat. 6_A (IEC) - can be fitted onto any 35 mm standard (DIN) rail. The RJ45 module is protected by a cover against direct contact. Protection class II without connection to electrical grounding. When installed as part of a protection class I system, the electrical grounding can be realized by means of an integrated spring via the rail. Its width allows for installations of up to 12 RJ45 modules in a row in any standard electrical distributor.</p> <p>Suitable for the following Datwyler modules:</p> <ul style="list-style-type: none"> - RJ45 module MS 1/8 Cat. 6/E_A shielded - RJ45 module MU 1/8 Cat. 6 unshielded - RJ45 module MS-C6_A 1/8 Cat. 6_A shielded
FEATURES	<ul style="list-style-type: none"> - Rail mounted onto TH35 rails (in accordance with DIN EN60715) - W = 1 width unit (< 18mm) (DIN 43880) - Integrated grounding spring (removable) - Colour: light grey, similar to RAL 7035 - Protection class I or II, depending on way of installation - Protection rating IP20 - Protective window for labelling strips - Integrated dust shutter

Structured premises cablings in the industrial sector, for the transmission of Ethernet protocols.

DESCRIPTION

IP20 protection rating rail adapter for 1 shielded RJ45 module MS-K 1/8 Cat. 6/E_A or MS-K Plus 1/8 Cat. 6_A (IEC) - can be fitted onto any 35 mm standard (DIN) rail. The RJ45 module is protected by a cover against direct contact. Protection class II without connection to electrical grounding. Protection class I when installed with connection to electrical grounding. Its width allows for installations of up to 12 RJ45 modules in a row in any standard electrical distributor.

Suitable for the following Datwyler modules:

- RJ45 module MS-K 1/8 Cat. 6/E_A shielded
- RJ45 Module MS-K Plus 1/8 Cat. 6_A shielded

FEATURES

- Rail mounted onto TH35 rails (in accordance with DIN EN60715)
- W = 1 width unit (18mm) (DIN 43880)
- Colour: light grey, similar to RAL 7035
- Protection class I or II, depending on way of installation
- Protection rating IP20
- Protective window for labelling strips
- Integrated dust shutter

Rail adapter Keystone IP20 rail mounted

for 1 Keystone module

1 Side cover
2 Labelling field

3 Dust shutter
4 Grounding spring

Rail adapter
for 1 Keystone module (types see below)

PRODUCT INFORMATION

APPLICATION

Structured premises cabling in the industrial sector, for the transmission of Ethernet protocols.

DESCRIPTION

IP20 protection rating rail adapter for 1 shielded or unshielded module with Keystone fitting. Can be fitted onto any 35 mm standard (DIN) rail - there must be a minimum distance of 10 mm between the rail and the back plane for fitting the rail adapter.

Plastic housing with labelling field and dust shutter.

Electrical grounding realized by means of an integrated grounding spring (via rail).

Its width allows for installations of up to 12 modules in a row in any standard electrical distributor.

When several rail adapters are fitted in rows two side covers (1.5 mm each) are needed to terminate them and ensure IP20 protection rating.

Delivery without module.

Suitable for the following Datwyler modules:

- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KS-T 5 1/8 Cat. 5e shielded
- RJ45 module KU-T 1/8 Cat. 6 unshielded
- RJ45 module KU-T 1/8 Cat. 5e unshielded

FEATURES

- Rail mounted onto TH35 rails (in accordance with DIN EN60715)
- W = 1 width unit (18mm) (DIN 43880)
- with integrated labelling field

INDUSTRIAL

Rail adapter Keystone

rail-mounted

for 1 RJ45 module KS-T, KS-TS or KU-T

Rail adapter for
1 RJ45 module KS-T, KS-TS or KU-T

PRODUCT INFORMATION

APPLICATION

Structured premises cabling in the industrial sector, for the transmission of Ethernet protocols.

DESCRIPTION

Rail adapter for 1 tool-less RJ45 Keystone module KS-T, KS-TS (Slimline) or KU-T.

Can be fitted onto any 35 mm standard (DIN) rail.

Made of stainless steel, therefore always electrically conducted (via rail) with the building's equipotential bonding.

Its width allows for installations of up to 12 modules in a row in any standard electrical distributor.

Delivery without module.

Suitable for the following Datwyler modules:

- PS-GG45 7_A shielded
- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KS-T 5 1/8 Cat. 5e shielded
- RJ45 module KU-T 1/8 Cat. 6 unshielded
- RJ45 module KU-T 1/8 Cat. 5e unshielded

FEATURES

- Rail mounted onto TH35 rails (in accordance with DIN EN60715)
- W = 1 width unit (< 18mm) (DIN 43880)
- with labelling field

Management panels & cable shelves, 19"/1U

in different versions

19"/1U management panel,
versions made of stainless steel,
with 5 support brackets

19" cable shelf with management panel

19" cable shelf with cable feed-
through panel and brush strip

PRODUCT INFORMATION

APPLICATION

19" management panels are suitable for the proper routing of copper and fibre optic cables, particularly suitable for patch cords in racks or cabinets with 19" mounting angles and rails.

Cable shelves fulfil the same function, particularly for multiple (trunk) cables.

DESCRIPTION

19"/1U basic management panels, available in three versions:
a) stainless steel, b) black or c) grey.

These panels come without support brackets.
They can be fitted with 5 support brackets in the required dimension.
Please order the support brackets separately!

There are labelling strips
for complete management panels
with support brackets
available:

Article No.	Description	Colour/Material	PU
1411480	Support bracket 30 mm	plastic, black	1 pc.
1411481	Support bracket 75 mm	metal	1 pc.
1411482	Support bracket 110 mm	metal	1 pc.

Cover frames and surface-mount box for Datwyler faceplates / data outlets

 GERMAN STANDARD

Cover frame, 1-fold
80 x 80 mm

Cover frame, 2-fold
150 x 80 mm

Surface-mount box
for data outlets
height = 40 mm

Distance frame for
surface-mount box
height = 10 mm

PRODUCT INFORMATION

APPLICATION

For the surface mounting of Datwyler faceplates / data outlets.

DESCRIPTION

Cover frame, 1-fold and 2-fold

The dimensions of the 1-fold and 2-fold cover frames fully apply with the German standard, that is: outer frame size 80 x 80 mm, inner frame size 50 x 50 mm.

Suitable for the following Datwyler faceplates / outlets:

- Data outlets CSD 2/8-U 2/8 and CSD 2/8-K
- Faceplates 2x and 3x for MS modules
- Faceplates 2x and 3x for MS-K modules
- Faceplate PS-TERA 2x

DESCRIPTION

Surface-mount box for Datwyler faceplates / outlets:

for copper and fibre optic faceplates / outlets.

The surface-mount box (80 x 80 mm) comprises a housing and a cover frame (H = 40 mm).

The distance frame (H = 10 mm) can be used to increase the height from 40 mm to 50 mm.

Mounting support for cable ducts for Datwyler faceplates

Fig.1 Mounting support for horizontal installation without separator

Fig.2 Mounting support for vertical installation without separator

PRODUCT INFORMATION

APPLICATION

Mounting supports for easy and space-saving mounting of Datwyler faceplates in cable ducts in order to maintain the bending radius as required for copper and fibre optic data cables.

Due to Datwyler's extensive range (see below) one can find a mounting support that fits in almost every cable duct system.
Fixing dimension for the faceplates = 60 mm (horizontal).

Suitable for the following Datwyler faceplates:

- Data outlet CSA Plus 2/8
- Faceplate 2x and 3x for MS modules
- Faceplate 2x and 3x for MS-K modules
- Faceplate 1x, 2x and 3x for KS modules
- Faceplate PS-TERA 2x

DESCRIPTION

There are mounting supports to be used for three different installation methods:

- T-Nut fastening horizontal and vertical, suitable for Thealit and Ackermann-k ducts
- DIN rail mounting (35 mm width) 52 mm overall height, suitable for Niedax, Nowa Plast, Rhönmetall, and Rehnau (Signo series) ducts
- DIN rail mounting (35 mm width) 50 mm and 55 mm overall height, suitable for GGK, Licatec, Stago, and Thorsmann Inka series ducts with adapter TTI-N70 or N215

In order to isolate the parts that are connected to the power supply, the supports can also be delivered with a snap-on separator.

Article no.	Fig.	Description	PU

Tools and installation aids for PS-GG45 modules and patch panels

Termination tool for PS-GG45

Patch panel termination aid for
19" racks / cabinets

PRODUCT INFORMATION

DESCRIPTION

Termination tool for Datwyler PS-GG45 modules

For the assembly of the PS-GG45 module and for connecting the wires at the same time.

DESCRIPTION

Termination aid for Datwyler patch panels

The two angular sheets (brackets) can easily be fixed to the 19" frame or cabinet so that the patch panel is presented at an angle of 45 degrees.

The cable termination is much easier and more comfortable with the panel held in this position.

Article No.	Description	PU
400105	Termination tool for PS-GG45 modules	1 pc.
1401624	Patch panel termination aid (1 set = 2 angular sheets)	1 set

COPPER ACCESSORIES

Tools and installation aids

for LSA Plus / IDC termination
for RJ45 Keystone modules

Termination tools
for LSA Plus and IDC contacts

Installation aid for
RJ45 Keystone modules

PRODUCT INFORMATION

DESCRIPTION

Termination tool for LSA Plus or IDC contacts - cable insulation displacement aid

Suitable for the terminating data cables with solid conductors with LSA Plus or IDC contacts. With the help of these tools the cable can be pushed into the contacts, insulated, connected and cut to the requested length.

DESCRIPTION

Installation aid for RJ45 Keystone modules

The installation aid (hand puck) facilitates the connection of a RJ45 Keystone module with the cable conductors and enables optimum protection against injuries.

Article No.	Description	PU
1401609	LSA Plus termination tool for LSA punch down contacts	1 pc.

Cable connector
Cat. 7 IP20

Anti-dust plug
for RJ45 modules

Anti-dust cover
for RJ45 plug

PRODUCT INFORMATION

DESCRIPTION

Cable connector Cat. 7 IP20

For interconnecting (lengthening) of shielded Cat.5, 6, 6_A, 7 and 7_A data cables.
Shielded metal housing (IP20),
W x L x H: 37 x 114 x 20.5 mm.

DESCRIPTION

Anti-dust plug for RJ45 modules

DESCRIPTION

Anti-dust cover for RJ45 plug

Provides protection against dust and mechanical damage,
fixed to the cable (undetachable),
can be slipped over plugs that are already fitted.

Article No.	Description	PU
417531	Cable connector Cat. 7 IP20	1 pc.
1401628	Anti-dust plug for RJ45 modules	100 pcs.
400305	Anti-dust cover for RJ45 plug	1 pc.

COPPER ACCESSORIES

Tools and installation aids for data cables and for PS / MS modules

PS-TERA/MS tool
for easy cable preparation

Parallel pliers for easy cable termination
(for modules PS-TERA 1/8 and MS 1/8)

Cable stripping tool Abi 62

PRODUCT INFORMATION

DESCRIPTION

PS-TERA/MS tool for cable preparation

To remove the overall sheath of the data cable and the foil around the wire pairs when terminating cables with PS-TERA connectors.
With adjustable block to determine the correct wire lengths.

DESCRIPTION

Parallel pliers for the cable termination with MS 1/8 and PS-TERA 1/8 modules

Pliers for easy cable termination with MS and PS-TERA modules.
Serves as a press-down tool for the modules until they snap into place.

DESCRIPTION

Cable stripping tool Abi 62

The outer sheath and the stabilizing element as well as the screen foil of the data cable CU 6702 4P can be quickly and safely removed with this tool.

Article No.	Description	PU

1409210	PS-TERA/MS tool for easy cable preparation	1 pc.
185640	Cable stripping tool Abi 62 for CU 6702 4P	1 pc.

Floor box inserts
for RJ45 modules and faceplates

Floor boxes are subfloor connectivity solutions in different shapes and sizes.

As a general rule, the following equipment is used:

- rectangular = GES 9 or GES 6
- round = GESR 9 or GESR 6

They offer the following capacities:

- GES 9 / GESR 9 = max. 3 floor box inserts with 3 ports
- GES 6 / GESR 6 = max. 3 floor box inserts with 2 ports

GES 6 / GES 9

GESR 6 / GESR 9

Floor box inserts for data outlets

Datwyler Keystone modules:
PS-GG45 7_A, KS-T series, MS-K series and KU-T series

9x

6x

Floor box inserts for Datwyler Keystone modules

Advantages of floor box inserts and floor box adapter plates

The floor box inserts can be installed in floor boxes from different manufacturers without the need to use mounting boxes. Either data outlets or adapter plates can be installed in the floor box inserts. Adapter plates are available for all types of Datwyler RJ45 modules.

As the floor box inserts can be installed without mounting boxes, this subfloor connectivity solution offers more space and allows for easier subfloor installation of copper and fibre optic cables.

Unused compartments can be closed with blank plates.

City, Access and FTTx networks

Single-mode fibre

G.652.D

Bend insensitive Single-mode fibre

G.657.A1

Criteria for Single-mode fibre selection

Single-mode fibres are the transmission medium of the future. The convergence of telecommunications is a reality, and the demand for network transmission capacity will continue to rise. Datwyler is specifying its single-mode products – focussing on product design for City and Access networks and for Fibre-to-the-Home applications.

Single-mode fibres used by Datwyler provide

- outstanding optical and mechanical properties
- very small polarisation mode dispersion coefficient
- low Water Peak attenuation
- low microbending and low macrobending sensitivity
- highest guarantee of performance delivery to the customer

Bend insensitive Single-mode fibres

For the installation of FTTx networks - including the in-house installation to the local loop - ITU-T defined two single-mode fibre categories, both with two sub-categories that provide different macrobending properties:

ITU-T G.657 Category A

Fibres of this category are compatible with the ITU-T G.652.D fibre, but optimised in terms of reduced macrobending losses (dB) and dimensional specifications. They can be used in the whole FTTx network (access and in-house).

- sub-category ITU-T G.657.A1: suitable for bending radii up to 10 mm
- sub-category ITU-T G.657.A2: suitable for bending radii up to 7.5 mm

ITU-T G.657 Category B

Fibres of this category are compatible with the ITU-T G.657.A and ITU-T G.652.D fibre, but optimised in terms of further reduced macrobending losses (dB). Thus, they are suitable for even smaller bending radii.

They can be used for distances below 1000 m at the end of the FTTx network, particularly in buildings.

- sub-category ITU-T G.657.B3: suitable for bending radii up to 5 mm

Overview: Fibre types and macrobending losses

Bend radius	No. of windings (turns)	G.652.D (1625 nm)	G.657.A1 (1550 nm)	G.657.A2 (1550 nm)	G.657.B3 (1550 nm)
30 mm	100	≤ 0.1 dB	not specified	not specified	not specified
10 mm	1	not specified	≤ 0.75 dB	≤ 0.1 dB	≤ 0.03 dB
7.5 mm	1	not specified	not specified	≤ 0.5 dB	≤ 0.08 dB
5 mm	1	not specified	not specified	not specified	≤ 0.15 dB

Datwyler uses category ITU-T G.657.A1 fibres as standard fibre for the company's FTTx cables. A1 fibres are fully compatible with standard singlemode fibres (ITU-T G.652.D).

Fibre-optic cables with other fibre types are available on request.

Single-mode fibre ITU-T G.652.D

low water peak

PMD frequency scale of the ITU-T G.652.D fibre

Fibre optic systems with very high bit rates and very low chromatic dispersion must use a singlemode fibre with very low PMD (Polarization Mode Dispersion). The majority of the single-mode fibre G.652.D used by Datwyler provides PMD values that far exceed the limit values stipulated by the standard.

Spectral attenuation of the ITU-T G.652.D fibre

The single-mode fibre G.652.D used by Datwyler is optimised for transmissions of highest data rates at all wavelengths and for all applications. The low water peak attenuation enables CWDM transmissions at the E-Band (1383 nm - 1480 nm). The geometrical, optical and mechanical performance corresponds with the relevant European and international standards.

Attenuation of the ITU-T G.652.A-D fibre categories in comparison

	ITU-T G.652.D (OS2)	Datwyler G.652.D (OS2)
Attenuation 1310 nm	≤ 0,4 dB/km	typ. 0,34 dB/km max. 0,36 dB/km
Attenuation 1383 nm	≤ 0,4 dB/km	typ. 0,34 dB/km max. 0,36 dB/km
Attenuation 1550 nm	≤ 0,3 dB/km	typ. 0,22 dB/km max. 0,24 dB/km
Attenuation 1625 nm	≤ 0,4 dB/km	typ. 0,24 dB/km max. 0,25 dB/km
PMD	≤ 0,2 ps/√km	typ. 0,05 ps/√km max. 0,20 ps/√km

Bend insensitive Single-mode fibre E9/125/250

E9/125/250 in accordance with ITU-T G.657.A1
compatible with ITU-T G.652.D

PRODUCT INFORMATION

APPLICATION Home connection, FTTH access network, FTTx in-house cabling.

DESCRIPTION Bend insensitive single-mode fibre with improved macrobending properties for the home connection and for the cabling in FTTH access networks (Fibre-to-the-home). Full-spectrum single-mode fibre, suitable for the operating wavelengths in all FTTx networks. Fully compatible with (and even exceeding) the standards ITU-T G.652.D und ITU-T G.657.A. Permitted bending radius: 15 mm up to 10 mm.

OPTICAL FIBRES

Single-mode fibre E9/125/250

in accordance with ITU-T G.652.D, IEC 60793-2-50 Type B1.3
equates to EN 50173:2011 OS2

PRODUCT INFORMATION

APPLICATION LAN backbone, data centre, city network, access network, FTTx network, long haul network (WAN).

DESCRIPTION Full-spectrum single-mode fibre in accordance with ITU-T G.652.D with optimised transmission characteristics. Suitable for the operating wavelengths in all FTTx networks. Tight dispersion tolerance to support low-cost upstream transmitters. Superior bending properties allow for easy installation. Backward compatible with installed base of G.652 fibre. Enables a cost-effective FTTx deployment: provides extra distance and margin and reduces field equipment and maintenance costs.

Bend insensitive Multimode fibres (G50/125 µm)

With higher bit-rate transmissions (≥ 10 Gbit/s), the attenuation budgets are constantly decreasing. Thus, one has to focus on high-grade products when selecting the fibre optic components. The optical fibres should provide an enhanced transmission reliability and reduce the risks of additional losses that may arise as a result of typical faulty use and of mechanical stress.

This is the reason why Datwyler uses the bend insensitive G50/125µm fibre for OM2, OM3 and OM4 fibre categories: In case that the minimum bending radius is undercut, this leads not necessarily to failure of a connection. However, too small bending radii should be avoided to extend the lifetime of fibre optic cables (and optical fibres).

The bend insensitive G50/125 µm fibres are fully compatible with "traditional" G50/125 µm fibres as described in the standard.

Bend radius (mm)	No. of windings (turns)	Maximum induced bend attenuation (dB)	
		850 nm	1300 nm
37.5	100	≤ 0.5	≤ 0.5
15	2	≤ 0.1	≤ 0.3
7.5	2	≤ 0.2	≤ 0.5

PRODUCT INFORMATION

APPLICATION

In Premises cabling for LAN backbones (Campus and Vertical/Riser cabling), Fibre to the Office and Fibre to the Desk (FTTO, FTTD = horizontal cabling) as well as in Data Centre cabling.

DESCRIPTION

Bend insensitive fibre with enhanced macrobending features, particularly recommended for high-performance transmissions in the 850 nm wavelength like 10-GbE with duplex links or 40/100-GbE with high-speed parallel optic links. The geometrical, optical and mechanical specifications meet or exceed all relevant international standards. This fibre is compatible with standard category OM2 fibres in existing/legacy networks.

HighP, up to 576 fibres

FO Universal ZGGFR / U-DQ(ZN)BH
Flame retardant fibre optic cable for indoor and outdoor use, up to 24 fibres

FO Universal wbGGFR / U-DQ(ZN)BH
Flame retardant fibre optic cable for indoor and outdoor use, up to 144 fibres

FO Universal wbGGFR Easy Blow / U-DQ(ZN)BH
Flame retardant fibre optic cable for indoor and outdoor use, up to 288 fibres, optimised for air injection

FO Outdoor ZGGT HP / A-DQ(ZN)B2Y
HighP, up to 24 fibres

General Information

Please find detail overviews and selection guides
for FO indoor and universal cables on page 196
and for FO outdoor cables on page 219

FO Outdoor ZGGT HP / A-DQ(ZN)B2Y
HighP, up to 24 fibres

FO Universal wbGGFR Safety / U-DQ(ZN)BH
Safety cable, 30 mins. circuit integrity, up to 60 fibres

FO Indoor FTTH STB/ I-V(ZN)H
Semi tight buffer, 2 or 4 fibres

FO Indoor FTTH / I-M(ZN)H
Coating buffer, 2 or 4 fibres

FO Outdoor wbKT Micro / A-DQ(ZN)2Y
Micro cable, up to 144 fibres

FO Outdoor wbKT S-Micro / A-DQ(ZN)2Y
High-density micro cable, up to 216 fibres

FO Outdoor ZT S-Micro / A-D2Y
High-density micro cable, up to 24 fibres

Product overview and selection guide for FO indoor and universal cables

Selection criteria

The Datwyler product portfolio consists of many different cable types.

The following overview lists some of the more important criteria which will help you to decide for the cable types that meet your specific requirements.

Cable name Datwyler / DIN VDE	page
-------------------------------	------

				Cable characteristics										Laying		Application								
				Maximum number of fibres	Rodent protection	Non-metallic (no potential differences)	Longitudinal water blocking	Halogen-free sheath	Flame retardant sheath	Functional integrity / Circuit integrity 30 min.	Loose tube	Semi Tight Buffer	Coating buffer design	Tight buffer tube design 0.9 mm	Tight buffer tube design 0.6 mm	Blowing through thermoplastic ducts	Installation in vertical / riser zone	Laying in trays and on cable platforms	Tunnels / Safety areas	Campus / Access networks	LAN: backbone	LAN: Fibre to the desk (FTTD)	LAN: Patch area

General Information

PRODUCT INFORMATION

FEATURES

Thin and flexible fibre optic Simplex cable with semi-tight buffer 0.9 mm.
 Easy handling, easy to strip off.
 Flame retardant halogen-free LSOH sheath. Low fire load.

APPLICATION

Suitable for patch cables between terminal distributors and/or end devices.
 For direct termination with connectors.
 Can also be spliced in terminal distributors.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range in operation: -20 / +60°C IEC 60794-2-10
 -10 / +60°C for assembled patch cords
 Tensile performance: IEC 60794-1-2 E1 A
 Crush resistance: IEC 60794-1-2 E3
 Impact: IEC 60794-1-2 E4
 Repeated bending: IEC 60794-1-2 E6
 Torsion: IEC 60794-1-2 E7
 Bend: IEC 60794-1-2 E11 A

FO Indoor Mini Zipcord / I-V(ZN)H

1.8 mm, LSOH

Tight buffer

flame retardant - IEC 60332.1

PRODUCT INFORMATION

FEATURES

Very thin and flexible Mini Zipcord with tight buffers 0.6 mm.
The ends can easily be split into two single cables.
Flame retardant halogen-free LSOH sheath.
Very low fire load.

APPLICATION

Suitable for patch cables between terminal distributors and/or end devices.
For direct termination with Simplex or Duplex connectors.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range in operation: -20 / +60°C IEC 60794-2-10

FIBRE OPTIC INDOOR CABLES

FO Indoor Duplex / I-V(ZN)HH

2.0 mm / 2.8 mm, LSOH

Semi-tight buffer

flame retardant - IEC 60332.1

PRODUCT INFORMATION

FEATURES

Robust and flexible fibre optic Duplex cable, based on 2 single-fibre cables 2.0 or 2.8 mm with semi tight buffer 0.9 mm in a common sheath.
 Easy handling, easy to strip off.
 Flame retardant halogen-free LSOH sheath.
 Low fire load.

APPLICATION

Suitable for patch cables between terminal distributors and/or end devices.
 For direct termination with connectors.
 Can also be spliced in terminal distributors.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

FIBRE OPTIC INDOOR CABLES

FO Indoor FTTH / I-M(ZN)H

2.2 mm, LSOH

Coating buffer

flame retardant - IEC 60332.1

in accordance with IEC 60794-2-20

PRODUCT INFORMATION

FEATURES

Easy to handle fibre optic cable with 2 or 4 optical fibres.
 Very small outer diameter (2.2 mm) due to innovative coating buffer.
 Flame retardant halogen-free LSOH sheath. Very low fire load.
 Robust sheath for easy installation into tube systems occupied by other cables.

APPLICATION

Indoor cabling for Fibre to the Home (FTTH) applications.
 Indoor cabling for data network and building automation applications.
 Connection cable between building entry point (BEP) and FO data outlet.
 Suitable for laying in cable trays, ducts and vertical shafts.
 Can be spliced in wall mounted distribution boxes and in FO data outlets.

OPTICAL CHARACTERISTICS

The cables are available with the ITU G.657.A1 optical fibre.

MECHANICAL CHARACTERISTICS

Temperature range in operation: -20 / +60°C IEC 60794-1-2 F1
 Tensile performance: IEC 60794-1-2 E1
 Crush resistance: IEC 60794-1-2 E3
 Impact: IEC 60794-1-2 E4

FIBRE OPTIC INDOOR CABLES

FO Indoor BO / I-V(ZN)HH

Breakout, 2.0 mm, FR/LSOH

Semi-tight buffer, flame retardant
in accordance with IEC 60332.1 and IEC 60332.3 C

PRODUCT INFORMATION

FEATURES

Robust and flexible fibre optic breakout cable, based on 2 up to 12 single-fibre cables 2.0 mm with semi-tight buffer 0.9 mm in a common sheath.
Easy handling, easy to strip off.
Flame retardant halogen-free FR/LSOH sheath.
Very low fire load.

APPLICATION

LAN backbone.
Connection cable between the building distributors and/or floor distributors.
Suitable for laying in cable trays, ducts and vertical shafts.
For direct termination with FO connectors.
Can also be spliced in FO distributors.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

FIBRE OPTIC UNIVERSAL CABLES

FO Universal ZGGFR / U-DQ(ZN)BH

for indoor and outdoor use, up to 24 fibres

metal-free, dry interstices,
rodent protection, flame retardant,
in accordance with IEC 60332.1 and IEC 60332.3 C

PRODUCT INFORMATION

FEATURES

Robust, non-metallic fibre optic outdoor and indoor cable with one or two central loose-tubes. High crush resistance for high transmission reliability. Easy handling due to cable construction with dry interstices. Non-metallic rodent protection. The two coloured ripcords are easy to identify and enable the safe opening of the cable sheath. Flame retardant halogen-free FR/LSOH sheath.

APPLICATION

LAN backbone, access and riser zone. Connection cable between the building distributors and/or floor distributors. Suitable for laying in cable trays, ducts and vertical shafts. Can also be spliced in all FO distributors and joints.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range	storage:	-25 / +70°C	EN 60794-1-2 F1

FIBRE OPTIC UNIVERSAL CABLES

FO Universal ZGGFR Safety / U-DQ(ZN)BH

Safety cable E30

metal-free, water resistant, rodent protection,
in accordance with IEC 60332.1 and IEC 60332.3 C

30 minutes System Circuit Integrity according to DIN 4102-12

PRODUCT INFORMATION

FEATURES

Metal-free fibre optic safety cable with one central loose tube, up to 12 fibres. The optimal combination of flame retardant fibre coating and flame-inhibiting stabilizing elements ensures enhanced functional integrity (System Circuit Integrity) in case of fire for 30 minutes (transmission of audio, video and 1Gbit/s signals approved by a certified test report).

APPLICATION

Safety applications in tunnels, underground railways, banks, insurance companies, large-scale industry. LAN backbone. Indoor and outdoor cabling. Can be installed in cable platforms, trays, ducts and vertical shafts. Can be spliced in FO distributors.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

FIBRE OPTIC UNIVERSAL CABLES

FO Universal ZGGFR Easy Blow / U-DQ(ZN)BH

Fire resistant, optimized for blowing through thermoplastic ducts

metal-free, rodent protection,

in accordance with IEC 60332.1 and IEC 60332.3 C

PRODUCT INFORMATION

FEATURES

Robust, metal-free fibre optic outdoor and indoor cable with one central loose tube. Optimized for blowing through thermoplastic ducts: Its good greasing characteristics, smooth and strong sheath surface and good internal strength provide for an axial linear motion and reduced friction (in comparison with standard indoor/outdoor cables). Therefore a blowing length of up to 2000 m is possible. Non-metallic rodent protection. Flame retardant and fire resistant sheath with very low fire load. The coloured ripcords are easy to identify and enable the safe opening of the cable sheath.

APPLICATION

For blowing through thermoplastic ducts with blowing lengths of up to 2000 m. In Premises cabling for LAN backbones (Campus and Vertical/Riser cabling) as well as for tunnels.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

Fire resistant, optimized for blowing through thermoplastic ducts

metal-free, dry interstices, rodent protection,
in accordance with IEC 60332.1 and IEC 60332.3 C

PRODUCT INFORMATION

FEATURES

Robust, metal-free fibre optic outdoor and indoor cable with stranded loose tubes.
Optimized for blowing through thermoplastic ducts:
Its good greasing characteristics, smooth and strong sheath surface and good internal strength provide for an axial linear motion and reduced friction (in comparison with standard indoor/outdoor cables). Therefore a blowing length of up to 2000 m is possible.
Non-metallic rodent protection.
Flame retardant and fire resistant sheath with very low fire load.
The coloured ripcords are easy to identify and enable the safe opening of the cable sheath.

APPLICATION

For blowing through thermoplastic ducts with blowing lengths of up to 2000 m.
In Premises cabling for LAN backbones (Campus and Vertical/Riser cabling) as well as for tunnels.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range	storage:	-25 / +70°C	IEC 60794-1-2 F1
	during installation:	-10 / +50°C	
	in operation:	-25 / +60°C	
Tensile performance:	IEC 60794-1-2 E1		
Crush resistance:	IEC 60794-1-2 E3		
Impact:	IEC 60794-1-2 E4		
Repeated bending:	IEC 60794-1-2 E6		
Torsion:	IEC 60794-1-2 E7		
Bend:	IEC 60794-1-2 E11		
Water penetration:	IEC 60794-1-2 F5

FIBRE OPTIC UNIVERSAL CABLES

FO Universal wbGGFR Combi / U-DQS(ZN)BH

Combination cable with 3 stranded copper wires, indoor and outdoor use

dry interstices, rodent protection,
in accordance with IEC 60332.1 and IEC 60332.3 .C

PRODUCT INFORMATION

FEATURES

The glass armour provides for a combined non-metallic rodent protection and strain relief.
Two ripcords enable the safe opening of the cable sheath.
Dry stranding interstices - easy handling.
Longitudinal water resistance.
Flame retardant, flame resistant cable sheath.

APPLICATION

Camera combi cable in tunnels, underground railroads, large-scale industry.
Pulling in or blowing through thermoplastic ducts.
Laying on cable platforms and cable trays.
Direct burial.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

Product overview and selection guide for fibre optic outdoor cables

Selection criteria

The Datwyler product portfolio consists of many different cable types.

The following overview lists some of the more important criteria which will help you to decide for the cable types that meet your specific requirements.

Cable name Datwyler / DIN VDE page

				Cable characteristics										Laying			Application		
				Maximum number of fibres	Robust cable design	Lightweight construction	Rodent protection	Rodent security	Metal-free (no potential differences)	Dry interstices	Longitudinal water blocking	Halogen free sheath	Loose tube	Micro bundle	Installation with cable winches	Blowing through thermoplastic ducts	Laying in cable trays	WAN / City network	Campus / Access network

General Information

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor wbKT HP / A-DQ(ZN)2Y

HighP

metal-free, dry interstices,
non-armoured, longitudinally watertight

PRODUCT INFORMATION

FEATURES

Compact, metal-free fibre optic outdoor cable with stranded loose tubes. Water blocking elements in the strand interstices prevent water penetration. Easy handling due to lightweight construction. The two coloured ripcords are easy to identify and enable the safe opening of the cable sheath. HDPE cable sheath, easy to lay.

APPLICATION

For pulling in or blowing through thermoplastic duct systems. Suitable for laying in cable platforms and cable trays. Direct burial.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor ZGGT HP / A-DQ(ZN)B2Y

HighP

central tube design, metal-free,
longitudinally watertight, rodent protection

PRODUCT INFORMATION

FEATURES

Robust, metal-free fibre optic outdoor cable with one central loose tube and up to 24 fibres. High tensile strength and high radial load strength for the highest transmission security. Lightweight and installation friendly cable construction. Non-metallic rodent protection. The two coloured ripcords are easy to identify and enable the safe opening of the cable sheath. HDPE cable sheath, easy to lay.

APPLICATION

For pulling in or blowing through thermoplastic duct systems. Suitable for laying in cable platforms, cable shafts and even in very complex cable trays. Direct burial.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheet).

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor wbGGT HP / A-DQ(ZN)B2Y

HighP, 2-layer

metal-free, dry interstices,
longitudinally watertight, rodent protection

PRODUCT INFORMATION

FEATURES

Compact fibre optic outdoor cable with up to 576 fibres for city and access networks. 2-layer loose tube construction, longitudinally water protected and with dry strand interstices. The glass armour provides for a combined non-metallic rodent protection and strain relief. The two coloured ripcords are easy to identify and enable the safe opening of the cable sheath. HDPE cable sheath, easy to lay. Direct burial.

APPLICATION

Optimised for blowing into compact thermoplastic ducts.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheet) that can also be combined in one cable.

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor wbKWT HP / A-DQ(ZN)(SR)2Y

HighP

dry interstices, longitudinally watertight,
corrugated steel tape, rodent proof

PRODUCT INFORMATION

FEATURES

Robust fibre optic outdoor cable with multiple loose tubes.
Installation friendly dry construction.
Rodent proof due to corrugated steel tape.
High tensile strength, easy to lay.
Optimised for installation in and blowing into ducts.

APPLICATION

For pulling in or blowing through ducts.
Suitable for laying in cable platforms, cable shafts and even in complex cable trays, particularly where a reliable rodent protection is required.
Direct burial.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range	storage:	-40 / +70°C	IEC 60794-1-2 F1
	during installation:	-10 / +50°C

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor ZGGT BL / A-DQ(ZN)B2Y

Basic Line

central loose tube, metal-free,
longitudinally watertight, rodent protection

PRODUCT INFORMATION

FEATURES

Metal-free fibre optic outdoor cable with central loose tube, up to 24 fibres.
For the use in cable ducts and for all applications with low mechanical stress (low tensile force, for example).
Non-metallic rodent protection.

APPLICATION

For pulling in or blowing through ducts.
Suitable for laying in cable platforms and cable shafts/trays.
Direct burial.

OPTICAL CHARACTERISTICS

The cables are available with different types of optical fibre (see fibre data sheets).

MECHANICAL CHARACTERISTICS

Temperature range	storage:	-25 / +70°C	IEC 60794-1-2 F1

FIBRE OPTIC OUTDOOR CABLES

FO Outdoor ZT S-Micro / A-D2Y

S-Micro, up to 24 fibres

metal-free, non-armoured, dry interstices, longitudinally watertight

PRODUCT INFORMATION

FEATURES

Very thin, metal-free fibre optic outdoor cable with up to 24 fibres in one central loose tube. Easily cut back, installation friendly cable construction.

APPLICATION

FTTx, Fibre-to-the-home networks. Optimised for injection into microducts.

OPTICAL CHARACTERISTICS

The standard version of this cable is available with single-mode fiber according to ITU G.657A1.

MECHANICAL CHARACTERISTICS

Temperature range	storage:	-25 / +70°C	IEC 60794-1-2 F1
	during installation/injection:	-2 / +35°C	
	in operation:	-25 / +60°C

FIBRE OPTIC TRUNKS

Pre-assembly of loose-tube cables

with all current FO connector types

Trunk termination

PRODUCT INFORMATION

DESCRIPTION

The pre-assembly of loose-tube cables from Datwyler enables customers to work with ready-to-install fibre optic multiple cables (trunks) in the requested lengths and types. The trunks are made to customer specifications under laboratory conditions. Pre-assembled trunks allow for cost saving and simple installations without expensive fibre optic equipment.

FEATURES

Trunk termination

- Termination of up to 144 fibres
- Termination with all current fibre optic connectors
- After the distribution splitter (screwable) each single fibre is protected by aramide yarn and has its own sheath
- Versions with more than 48 fibres come with 3-step (cascaded) fibre distribution
- Single fibre termination graded in length (maximum length after distribution splitter: 2 m)
- Delivery with crush-resistant hose protection (protection rating IP67), optional with braided sleeving only
- Delivery with optical attenuation measurement report (measurement with OTDR: optional at an extra charge)

Trunk termination (Article numbers are valid for FO connector termination on one side only)

Numer of fibres	Multimode connector types				Single-mode connector types					
	ST	SC	LC	LSH	ST	SC	LC	LSH	SC/APC	LSH/APC
4	1406098	1406421	416601	417131	417218	1407244	415096	417219	415001	417222
6	1407718	1407658	415018	417213	1407719	1407778	415014	415010	417221	415006
8	1406758	1407777	415028	417214	1405818	1410923	417132	417220	415002	417223
12	1406403	1406794	415019	417215	1407720	1407035	415015	415011	415003	415007
24	1406780	1408597	415020	417216	1408529	1406242	415016	415012	415004	415008
48	1406091	1408725	415021	417217	1408723	1406768	415017	415013	415005	415009

Attention: Please order the loose tube cable separately - according to your individual needs!

When ordering a trunk cable please ensure that the specified length of the trunk cable is defined by the length of the longest single optical fibre! This means: The total length of the trunk cable is the length of the cable between the two distribution splitters plus the additional length of the longest single optical fibre on both sides.

You can find the lengths of the single fibre elements in the installation manual on the Datwyler homepage.

Pre-assembly of breakout cables

with all current FO connector types

Breakout assembly

PRODUCT INFORMATION

DESCRIPTION

The pre-assembly of breakout cables from Datwyler enables customers to work with ready-to-install fibre optic multiple cables (trunks) in the requested lengths and types. The trunks are made to customer specifications under laboratory conditions. Pre-assembled trunks allow for cost saving and simple installations without expensive fibre optic equipment.

FEATURES

Breakout assembly

- Termination of up to 48 single-fibre cables
- Termination with all current fibre optic connectors
- Single fibre termination optionally graded in length
- Delivery with optical attenuation measurement report
- Delivery with braided sleeving (optional at an extra charge: with cable gland and/or crush-resistant hose protection)

 When ordering a trunk cable please ensure that the specified length of the trunk cable is defined by the length of the longest single-fibre cable! This means: The total length of the trunk cable is the length of the cable between the two splits plus the additional length of the longest single-fibre cable on both sides.
 You can find the lengths of the single-fibre elements in the installation manual on the Datwyler homepage.

FIBRE OPTIC TRUNKS

FO flexible trunks

Dimensions & length determination of pre-assembled FO trunks

PRODUCT INFORMATION

DESCRIPTION

A Datwyler FO flexible trunk consists of up to 24 single fibre cables (per 2.0 mm) that are combined in a sturdy HDPE braided hose and have pre-assembled connectors on both ends. FO flexible trunks come in customized lengths and gradations. This solution is suitable especially for data centre cabling, rack-to-rack connections and multiple patch links. Delivery with optical attenuation measurement report. Please see page 258 for optical performance values.

LENGTH DETERMINATION

The following criteria are decisive for all pre-assembled FO trunks from Datwyler:

Length _{horizontal}	Horizontal distance between the racks (cable fed from ceiling/from below). We recommend the cables to be laid in trays above the racks to ensure that there will be no disruption to cooling air flow in the false floor. However, the cables can also be directed through the raised floor when it is amply dimensioned (not recommended for FO flexible trunks)
A1	Vertical distance up to the fixing point inside rack A
B1	Vertical distance up to the fixing point inside rack B
A2	Length of graded partition from fixing point to longest single fibre element
B2	Length of graded partition from fixing point to longest single fibre element

Pre-assembled loose-tube cables (page 242) always come with single fibres graded in length (for partition lengths see installation instructions on our website). This gradation may be customized, though.

Checklist: Project planning with fibre optic trunks

Project planning with fibre optic trunks

DO YOU NEED THE FIBRE OPTIC TRUNKS FOR TODAY OR FUTURE NEEDS?

10GBase, 40GBase and 100GBase

CHOOSE THE RIGHT FIBRE OPTIC CABLE TYPE OR SOLUTION!

Please select the cable type or solution on the basis of the needed performance class, lengths and number of fibres.

Breakout trunks and flexible trunks are particularly flexible in terms of fibre number. They do not need a distribution splitter and are suitable especially for comparatively short rack-to-rack connections with fibre numbers ≤ 24 .

CHOOSE THE REQUESTED FIBRE TYPE!

OM4 is state-of-the-art in data centers (or OM3 at least). For single-mode it should be OS2.

SELECT THE REQUESTED CONNECTOR TYPE!

LC is the most common connector for single fibres. It is also possible to choose any other connector type for trunk cable termination.

WHAT WILL BE THE LENGTH OF THE FIBRE OPTIC TRUNKS?

Where do you want to install them?
In cable trays above the racks or in the false floor?
Please consider the diameter, the weight and the admissible bending radius of the trunks!

HOW DO YOU WANT TO ROUTE THE CABLES INSIDE THE DISTRIBUTION RACK TO THE PATCH PANELS?

- side-fed from right?
- side-fed from left?
- centred from behind?
- or ...?

THE SINGLE CABLES CAN BE GRADED IN LENGTH - DEPENDING ON HOW THE TRUNK CABLE IS FIXED INSIDE THE RACK.

The single cables may all have the same length, but this increases the dimensions of the connector protection. That's the reason why Datwyler offers single fibre termination graded in length.

The single cable elements are usually placed in breakout boxes behind the management panels.

CUSTOMER-SPECIFIC IMPRINT / LABELLING?

Available on request for all copper trunks.

PLEASE CONSIDER SOME EXTRA TIME FOR THE PRE-ASSEMBLY IN YOUR TIMETABLE!

**YOU NEED CONSULTING SERVICE?
PLEASE DO NOT HESITATE TO CALL US.
WE WILL BE HAPPY TO HELP YOU!**

You will find the Datwyler phone numbers on the back page of this catalogue.

For all current information please see our website:

For parameters of all FO terminations see the data sheet "FO connector termination" / catalogue page 258.

Patch cords with Duplex connectors on both ends are delivered with a single Duplex clip which is not fixed to enable a change of polarity.

The polarity of these connectors is marked with cable clips "A" and "B" - please see the data sheet "FO connector termination" / catalogue page 258.

For parameters of all FO terminations see the data sheet "FO connector termination" / catalogue page 258.
Patch cords with Duplex connectors on both ends are delivered with a single Duplex clip which is not fixed.
In Patch cords with MT-RJ connectors on both sides the fibres are crossed.

The polarity of these connectors is marked with cable clips "A" and "B" - please see the data sheet "FO connector termination" / catalogue page 258.

PRODUCT INFORMATION

FEATURES

Datwyler offers a broad range of terminated connectors for individual customer needs, such as the connector types SC, LC, ST, LSH, FC/PC, MU, MT-RJ, MTP/MPO, and others. These can be supplied in simplex as well as in duplex variants. Most types are available as APC/HRL variants, too. We are also able to deliver terminations for higher optical performance requirements.

Ferrule material:	Zirconia; MT-RJ and MPO: Polymer
Lifetime:	1000 connections with stable attenuation values
Test conditions IL:	IEC 61300-3-4
Test conditions RL:	IEC 61300-3-6
Reproducibility of the IL value:	during the whole lifetime a maximum of +/- 0.1 dB
Operating temperature:	-10° C up to +60° C

Connector	IL [dB] typical	IL [dB] maximum	RL [dB] typical	RL [dB] minimum	Grade (IEC 61755)
MM	0.15	0.3	35	30	better than Bm2m
SM	0.15	0.3	55	50	better than B2
SM/APC	0.15	0.3	70	65	better than B1
MT-RJ	0.5	0.75	25	20	better than Cm2m
MTP®/MPO MM	0.1	0.35	25	20	better than Bm2m
MTP®/MPO SM	0.1	0.35	65	60	better than C1

All connectors are tested with our simplex, duplex and Mini Zipcord cables as well as our pigtails.

NOTE

Our single fibre cables and the connectors of our Duplex patch cables are marked with cable clips „A“ and „B“.

There is a single Duplex clip enclosed to enable a change of polarity.

Wiring of an FO Duplex patch cable A to B

MTP® is a registered brand of US Conec.

PRODUCT INFORMATION

APPLICATION

Faceplates and outlets especially for the high-speed transmission of voice, video and data in accordance with the EN 50173.

DESCRIPTION

Flush and surface/duct mount FO faceplates for SCD adapters

Cut-outs: for 2x SCD adapter
 Outlet attachment: 90 or 180 degree

Article No.	Description	Colour (similar to)	Fig.

FO patch panel OV-AT

19"/1U, unloaded

exchangeable front plate, telescopic slides,
depth-adjustable mounting

Fibre optic patch panel OV-AT, 19"/1U, without front plate,
with telescopic slides, depth-adjustable mounting

PRODUCT INFORMATION

APPLICATION For the termination of fibre optic cables (breakout, loose tube) - maximum of 96 fibres.
Applicable with a wide range of front plates / connector systems (see OV-AT / OV-S 1U accessories).

DESCRIPTION

Housing:	metallic, with telescopic slides and locking mechanism
Rack mounting:	depth-adjustable mounting of box (5 steps, maximum 50 mm) due to the adjustable 19" mounting brackets
Colour of mounting brackets (variants):	similar to RAL 7035, similar to RAL 9005 or stainless steel numbers (silk screen printing) on front plate (to be ordered separately)
Imprint:	up to 96 fibres
Capacity:	with cable tie and screwed cable gland or cable distributor
Strain relief:	rear left and right (the openings are covered with a blind cover and a straight cable entry plate with M20 and M25 slotted holes - Article No. 416994)
Cable entry:	19"/1U, depth 254 mm
Dimensions:	

CONNECTOR SYSTEM Adapter: ST, FC, SCD, SC, LSH, LCD (dependent on front plate)

SCOPE OF DELIVERY Box, strain relief with M20 (1U) cable gland, splice tray holder and adhesive fibre fixation (3 pcs.)

Please order the front plate separately.

Article No.	Description	Colour (similar to)	Note
416964	OV-AT telescopic 1U	RAL 7035	without front plate
(on request)	OV-AT telescopic 1U	RAL 9005	without front plate
416975	OV-AT telescopic 1U	stainless steel	without front plate
1405304	Label for OV-AT, self-adhesive, length 420 mm		

FO patch panel OV-S

19"/1U, unloaded

exchangeable front plate, extractable,
depth-adjustable mounting

Fibre optic patch panel OV-S, 19"/1U, without front plate, extractable, depth-adjustable mounting

PRODUCT INFORMATION

APPLICATION For the termination of fibre optic cables (breakout, loose tube) - maximum of 96 fibres. Applicable with a wide range of front plates / connector systems (see OV-S / OV-AT 1U accessories).

DESCRIPTION

Housing: metallic, extractable drawer with locking mechanism
 Rack mounting: depth-adjustable mounting of box (5 steps, maximum 50 mm) due to the adjustable 19" mounting brackets

Colour mounting brackets (variants): similar to RAL 7035, similar to RAL 9005 and stainless steel
 Capacity: up to 96 fibres
 Strain relief: with cable tie and screwed cable gland or cable distributor
 Cable entry: rear left and right (two big openings, covered with straight cable entry plates: Article No. 415308 with pre-stamped cable entries M20 and M25 and Article No. 418650 with pre-stamped cable entries 2x M15, 1x M20 – these pre-stamped holes can be opened as necessary)

Dimensions: 19"/1U, depth 300 mm

OPTION An additional element (folding mechanism) allows the drawer to be hinged down at a 45 degree angle (tool-less assembly)

CONNECTOR SYSTEM Adapter: ST, FC, SCD, SC, LSH, LCD (dependent on front plate)

SCOPE OF DELIVERY Box, with straight cable entry plates, splice tray holder.
 Please order the front plate separately.

Article No.	Description	Mounting brackets Colour (similar to)	Note

19"/2U, unloaded

exchangeable front plate, extractable or telescopic, depth-adjustable mounting

Fibre optic patch panel OV-AT, 19"/2U, without front plate, extractable or with telescopic slides, depth-adjustable mounting

PRODUCT INFORMATION

APPLICATION	For the termination of fibre optic cables (breakout, loose tube) - maximum of 192 fibres. Applicable with a wide range of front plates / connector systems (see OV-A / OV-AT 2U accessories).	
CONSTRUCTION	Housing:	metallic, extractable drawer (OV-A) or drawer with telescopic slides (OV-AT), both with locking mechanism
	Rack mounting:	depth-adjustable mounting of box (5 steps, maximum 50 mm) due to the adjustable 19" mounting brackets
	Colour mounting brackets (variants):	similar to RAL 7035 or stainless steel
	Imprint:	numbers (silk screen printing) on frontplate (to be ordered separately)
	Capacity:	up to 192 fibres
	Strain relief:	with cable tie and screwed cable gland or cable distributor
	Cable entry:	rear left and right (the openings are covered with a blind cover and a straight cable entry plate with M20 and M25 slotted holes - Article No. 417561)
	Dimensions:	19"/2U, depth 254 mm
CONNECTOR SYSTEM	Adapter:	ST, FC, SCD, SC, LSH, LCD (dependent on front plate)
SCOPE OF DELIVERY	Box, strain relief with M25 (2U) cable gland, splice tray holder and adhesive fibre fixation (3 pcs.)	
	Please order the front plate separately.

PRODUCT INFORMATION

APPLICATION

Modular solution for the termination of multiple-fibre cables - maximum of 288 fibres.
Suitable for a wide range of applications - depending on the type of FO slide-in modules or front plates (maximum of 12).

DESCRIPTION

Housing: Solid aluminium profile with side walls, integrated 19"/3U fixation on the front and pre-assembled guide rail for FO slide-in modules
Colour: Aluminium, anodised
Capacity: 84HP, up to 12 slide-in modules or front plates 7HP/3U
Cable entry: from rear, via the cassette for excess cable length (only for 4U version)
Support brackets: can be mounted in front of cassette for excess cable length
Dimensions: 19"/3U, depth 225 mm
19"/4U, depth 295 mm

CONNECTOR SYSTEM

ST, SCD, SC, LCD, LSH Pre-assembled FO slide-in modules with coloured pigtails (IEC 60304), stripped and stored in splice tray

SCOPE OF DELIVERY

19"/4U variant delivered with cassette for excess cable length and 5 support brackets

Article No.	Description	Dimensions
416980	FO subrack (unloaded)	84HP/3U
416907	FO subrack (unloaded)	84HP/4U with cassette for excess cable length
416908 *	FO slide-in module for 6x SCD (fastened by screws)	7HP/3U with splice tray, without adapters/pigtails
417212 *	FO slide-in module for 12x LCD (snap-in adapters)	7HP/3U with splice tray, without adapters/pigtails
416909 *	FO slide-in module for 12xSC/LSH (fastened by screws)	7HP/3U with splice tray, without adapters/pigtails
416981	Blank front plate	7HP/3U for FO subrack

* All unloaded FO slide-in modules (without adapters/pigtails) are delivered with a splice tray (already mounted) which provides an excess fibre length section and a cover.

Article No.	Description		
417350 *	FO slide-in module	loaded with 12x LCD adapter (beige) and 24 LC pigtails	G50/125 OM2
417351 *	FO slide-in module	loaded with 6x LCD adapter (beige) and 12 LC pigtails	G50/125 OM2
417352 *	FO slide-in module	loaded with 6x LCD adapter (blue) and 12 LC pigtails	E09/125 OS2
417353 *	FO slide-in module	loaded with 12x LCD adapter (turquoise) and 24 LC pigtails	G50/125 OM3
417354 *	FO slide-in module	loaded with 12x LCD adapter (blue) and 24 LC pigtails	E09/125 OS2
417355 *	FO slide-in module	loaded with 6x LCD adapter (turquoise) and 12 LC pigtails	G50/125 OM3
417356	FO slide-in module	loaded with 6x SCD adapter (beige) and 12 SC pigtails	G50/125 OM2
417357	FO slide-in module	loaded with 6x SCD adapter (turquoise) and 12 SC pigtails	G50/125 OM3
417358	FO slide-in module	loaded with 6x SCD adapter (blue) and 12 SC pigtails	E09/125 OS2

All loaded FO slide-in modules are delivered with splice holder, splice protection and excess fibre length section. Pigtails (colour code: IEC 60304) are ready for splicing.

* FO slide-in modules LCD are based on article no. 417212 for snap-in adapters.

Please ask for further versions of our pre-assembled FO slide-in modules!

FO patch panel OV-S

19"/1U, loaded

splice box with adapters and pigtails

Fibre optic splice box OV-S, 19"/1U, extractable, configuration example with 24 SCD adapters and 48 pigtails

PRODUCT INFORMATION

APPLICATION	For the termination of fibre optic cables - maximum of 96 fibres. Loaded with FO adapters, ready for splicing, with prepared pigtails (per 2 m, colour code: IEC 60304).	
DESCRIPTION	Housing:	metal sheet, black, extractable drawer with locking mechanism, box allows for depth-adjustable mounting (5 steps, maximum 50 mm)
	Colour (front):	similar to RAL 7035, similar to RAL 9005 or stainless steel
	Imprint:	numbers (silk screen printing) on frontplate
	Capacity:	up to 96 fibres
	Strain relief:	with cable tie and screwed cable gland (M20)
	Cable entry:	rear left and right (two big openings, covered with straight cable entry plates: Article No. 415308 with pre-stamped cable entries M20 and M25 and Article No. 418650 with pre-stamped cable entries 2x M15, 1x M20 – these pre-stamped holes can be opened as necessary)
	Dimensions:	19"/1U, depth 300 mm
CONNECTOR SYSTEM	Adapter:	SCD, LCD, LSH, ST
SCOPE OF DELIVERY	Splice box with - two straight cable entries - one screwed cable gland M20 - coloured pigtails with measurement report - FO adapters, fastened by screws - splice trays with cover and support Delivery without splicing protection	
NOTES	Variants on request. Upgradable with an optional folding mechanism (Article No. 415245).

PRODUCT INFORMATION

APPLICATION For the distribution of the fibre optic backbone cabling to the horizontal cabling. Suitable for splice connections or removable connections.

DESCRIPTION

Housing: steel plate 1.5 mm, removable front door and side walls

Colour: RAL 7035

Patch panels: available for 48 adapters SCD, SC, ST and LCD (other on request)

Strain relief: with cable tie, screwed cable gland or snap-in

Cable entry: on four sides possible

Dimensions: H x W x D: 300 x 300 x 85 mm

CONNECTOR SYSTEM ST/FC, SCD, SC/LSH/LCD

SCOPE OF DELIVERY Fibre distribution box OV-W with lock and two keys, splice tray holder for four cassettes, fastening set

Article No.	Fig.	Description	PU
416904	1	FO wall mount distribution box OV-W, 300 x 300 x 85 mm (unloaded, with splice tray holder)	1 pc.

Splice tray holder

Fig. 5:
Splice tray take-up

PRODUCT INFORMATION

APPLICATION	For the distribution of the fibre optic backbone cabling to the horizontal cabling. For splice connections or removable connections.	
DESCRIPTION	Housing:	steel plate 1.5 mm, with removable front door and side walls, can be extended
	Colour:	RAL 7035
	Patch panels:	available for 48 adapters SCD, SC, ST and LCD each (other on request)
	Strain relief:	with cable tie, screwed cable gland or snap-in
	Cable entry:	on four sides possible
	Dimensions:	600 x 425 x 220 mm
CONNECTOR SYSTEM	ST/FC, SCD, SC/LSH/LCD	
SCOPE OF DELIVERY	Fibre distribution box OV-W with lock and two keys, fastening set	

Article No.	Fig.	Description	PU
416900	1	FO wall mount distribution box 600 x 425 x 220 mm (unloaded)	1 pc.
416901	2	Angle bracket set for patch panels for 416900	2 pcs.
416902	3	Brush strip set for 416900	2 pcs.
417396	-	Cable entry set PG 16 / PG 21 for 416900	2 pcs.
416903	-	Patch panel 2U for 24x SCD for 416900	1 pc.
418983	-	Patch panel 2U for 48x ST for 416900	1 pc.
416997	4	Splice tray holder for 12 cassettes for 416900	1 pc.
416988	5	Splice-tray take-up for 416900 and 416904	4 pcs.

Management panels & cable shelves 19"/1U

in different versions

Management panel 19"/1U, version made of stainless steel, with 5 support brackets

19" cable shelf with management panel

19" cable shelf with cable feedthrough panel and strip

PRODUCT INFORMATION

APPLICATION

Management panels 19"/1U are suitable for the routing of copper and fibre optic cables, particularly suitable for patch cords in racks or cabinets with 19" mounting angles and rails.

Cable shelves fulfil the same function, particularly for multiple (trunk) cables.

DESCRIPTION

The basic management panels 19"/1U are available in three versions: a) stainless steel, b) black or c) grey.

These panels come without support brackets. They can be fitted with 5 support brackets in the required dimension. Please order the support brackets separately!

There are labelling strips for complete management panels with support brackets available:

Article No.	Description	Colour/Material	PU
1411480	Support bracket 30 mm	plastic, black	1 pc.
1411481	Support bracket 75 mm	metal	1 pc.
1411482	Support bracket 110 mm	metal	1 pc.
1411604	Management panel 19"/1U for 5 support brackets (delivery without brackets)	RAL 7035	1 pc.
1407689	Management panel 19"/1U for 5 support brackets (delivery without brackets)	RAL 9005	1 pc.
418200	Management panel 19"/1U for 5 support brackets (delivery without brackets)	stainless steel, blank	1 pc.
401240	19" blank plate, 1U	RAL 7035	1 pc.
401241	19" blank plate, 1U	RAL 9005	1 pc.
401242	19" blank plate, 1U	stainless steel, blank	1 pc.
401243	19" blank plate, 2U	RAL 7035	1 pc.
401244	19" blank plate, 2U	RAL 9005	1 pc.
401245	19" blank plate, 2U	stainless steel, blank	1 pc.
401247	Cable feedthrough panel with strip 19"/1U	RAL 7035	1 pc.
401248	Cable feedthrough panel with strip 19"/1U	RAL 9005	1 pc.
401249	Cable feedthrough panel with strip 19"/1U	stainless steel, blank	1 pc.
400300	19" cable shelf, depth adjustable due to slide rails (from 520 mm up to 850 mm) (only mountable with a management panel or cable feedthrough panel; rear side 19" fixation necessary)		1 pc.
470038	Labelling strip (for complete management panel with bracket type 1411480)		1 pc.
470039	Labelling strip (for complete management panel with bracket types 1411481, 1411482)		1 pc.

Launch cable box
for OTDR testing

OTDR launch cable box

PRODUCT INFORMATION

APPLICATION Launch cables are necessary for optical performance testing (measurement) of fibre optic connections with an OTDR.

DESCRIPTION

Housing: PVC hard-top case (275 x 225 x 80 mm)
with spare tray for FO adapters and other accessories

Contents: optionally with 3 different fibre types

The fibres are wound strain-relieved. About 2.5 m of the fibres are protected by a hollow tube.

CONNECTOR SYSTEM ST, SC, LSH, LC, FC/PC, HRL variants and other (to be defined)

with glass front door, perforated rear door

Server rack SP with glass front door and perforated rear door

PRODUCT INFORMATION

APPLICATION

19" server rack

FEATURES

High-grade 19" server cabinet in four sizes
 Can be very flexibly assembled, configured and fully dismantled
 Can be bayed together side-by-side
 Protection rating IP20
 Load capacity up to 1000 kg

DIMENSIONS

19"/42U, H x W x D: 2100 x 800 x 800 mm
 19"/42U, H x W x D: 2100 x 800 x 1000 mm (version with circumferentially perforated glass front door)
 19"/42U, H x W x D: 2100 x 600 x 1000 mm
 19"/24U, H x W x D: 1300 x 600 x 1000 mm

DESCRIPTION

- Basic frame made of steel profiles, pegged with corner pieces (screwed)
- 4 mounting angles 19" (482.6 mm)
- 2 depth members on either side for depth adjustable installation of the mounting angles
- Front door with 3 mm toughened safety glass and standard lever handle / 2-point locking system
- Perforated rear door (passive ventilation) with lever handle
- 2 removable side walls with safety lock
- One-piece roof, ready for strip (enclosed) and with 6 knockouts for fans
- Plinth 100 mm (removable), passively ventilated, with levelling feet
- Set for protective earthing conductor installation
- 19" fastening set

Cold Aisle Containment Systems

For network and server racks SP and PX

Cold Aisle Containment Systems (CACS) meet the two most significant thermal challenges in data centres

- preventing hot air from recirculation
- preventing high losses of cold air

Arguments for CACS:

- Economical, energy efficient solution
- Minimal effort, easy installation of roof and doors
- Cooling capacity through false floor can be adjusted according to the demand
- Cold Aisle Containment provides physical separation between cold and hot aisles
- Scalable with additional cooling units within the rack rows when needed
- Optionally expandable solution (cold aisle *and* hot aisle containment)

Example for cooling through the raised floor and for a containment of cold aisles

suitable for up to 12 kW per rack

Effective cold-air routing

The purpose of a cold aisle containment is the complete structural separation of the cold air in front of the servers and the hot air behind the servers.

To achieve this, data centres are equipped with raised floors, rack rows are aligned face to face, and the corridors between them are fitted with ceilings and sliding doors to enclose the cold aisles.

The cold air directed through the false floor is exclusively released into cold aisles. Containment of the cold aisles (and the hot aisles) facilitates the targeted routing of cold air from the raised floor to the hotspots in the cabinets - and of warm air back into the cooling cycle in the rear of the racks. In addition, it effectively prevents warm and cold in the data centre from mixing.

Cutting costs

Cold Aisle Containment Systems are a globally recognised and proven solution for reducing the energy needs and cutting costs while achieving the required cooling performance in data centres. When rack extensions are necessary, the doors can simply be reattached to the end cabinets, and additional ceiling panels can be added.

If you are interested in a consultation or in developing a project please do not hesitate to contact us. We would be happy to give you more information!

For contact details please see the catalogue's back cover. For more information please visit our website www.cabling.datwyler.com.

DATA CABINETS & RACKS

Wall mounted cabinets

19"/9U, 12U or 15U

Mini rack

19"/18U

19" wall mounted cabinets

19" mini rack with levelling feet

PRODUCT INFORMATION

APPLICATION Wall mount cabinets and mini rack for 19" components.

FEATURES

- Removable side walls and glass front door
- Protection rating IP20
- Load capacity up to 3kg/U
- Reversible front door
- Pre-punched wall-fixing holes in rear wall
- Mounted and packed

DIMENSIONS

Wall-mounted racks:	Mini rack:
19"/9U, H x W x D: 475 x 570 x 400 mm	19"/18U, H x W x D: 910 x 570 x 600 mm

19"/15U, H x W x D: 750 x 570 x 400 mm	
19"/15U, H x W x D: 750 x 570 x 500 mm	

DESCRIPTION

- Multi-bend basic frame, screwed together
- Glass front door with 3 mm toughened safety glass and lock, removable (lock nut hinge pins)
- Knock-out holes (top/bottom) for cable entry with pre-installed strip
- Removable side walls, perforated for passive ventilation
- 2 mounting angles 19" (482.6 mm), zinc-plated
- Cable support rail for cable ties
- Set for protective earthing conductor installation with earthing cable 1.5 mm²

Future-proof cabling solutions for data centres

The requirements for data centre infrastructures are increasing as the rapid growth in worldwide IT usage continues. High-performance system solutions in copper, but chiefly in fibre optic technology, already constitute the backbone of high-speed data transfer in data centres.

The ever higher transmission rates not only call for high quality optical fibres, they also make increasing demands on the connecting components. Both these parameters are crucial to the efficient performance of transmission channels.

Flexibility is the core requirement for a cabling solution in today's data centre environment. New systems need to be planned, assembled and installed within a very short time. New technologies like blade systems or virtualisation, for example, mean that link performance standards are continually rising.

Datwyler's newly developed Data Centre Solution surpasses all the requirements for current cabling solutions, its high quality and excellent optical and geometric connector assembly values being of particular note here.

Benefits of the Datwyler Data Centre Solution

- Top quality guarantees top performance
- High packing densities hand in hand with good clear layout
- Fast and easy assembly (plug-and-go)
- Modifications/installations possible during ongoing operation, no need for outside companies
- Pre-assembly: no stripping, splicing or connector termination work necessary
- Slimline cable design, so no disruption to cooling air flow and no redundant lengths of cable in rack
- Scalable thanks to modular design
- Investment protection and future viability as migratable to 40/100G (MTP®)
- High spare capacity due to extremely low optical losses,
- Power budget protection thanks to bend insensitive fibres (multimode)

The most important system components

- Pre-assembled fibre optic mini trunks (high-performance)
- Pre-assembled fibre optic plug-in modules (high-performance)
- Fibre optic fanout cables (high-performance)
- Fibre optic patch cables (high-performance)
- Modularly equipped 19-inch 1U, 3U and 4U panels / subracks
- Patch management trays and cable management accessories

In server rooms and data centres these system components provide high-performance modular cabling solutions tailored to customer requirements, the outstanding features of which are clear layout, flexibility, high packing densities and good handling during operation.

Optical values of the components

Criterion Connector type	Assembly Class	Insertion Loss IL [dB]		Return Loss RL [dB]	
		mean	maximum	mean	minimum
Multi-fibre MTP Elite® 0° PC (Multimode)	Grade B	0.15	0.3	≥ 35	≥ 30
Multi-fibre MTP Elite® 8° APC (Single-mode)	Grade B	0.1	0.3	≥ 70	≥ 65
Single-fibre LCD Uniboot 0° PC (Multimode)	Grade B	0.1	0.25	≥ 40	≥ 35
Single-fibre LCD Uniboot 8° APC (Single-mode)	Grade B	0.1	0.25	≥ 75	≥ 65

MTP® and MTP Elite® are registered brands of US Conec.

Fibre optic channel configuration options

The high-performance carefully coordinated cables and components of Datwyler's Data Centre Solution can be combined as required and make it possible to implement an open infrastructure design decoupled from the user's equipment pool. The system also allows simple migration to future applications. The graphics below show some possible typical configurations.

Please note:

Only data sheets of the most important system components are covered in the following pages. You can obtain further information direct from Datwyler or on our website www.cablings.datwyler.com.

Module-to-module configuration

Two FO-DCS plug-in modules are inter-connected by a thin FO-DCS mini breakout cable MTP-MTP.

For all known duplex applications such as 10G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 12x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Module-to-module configuration (spliced)

Two FO-DCS splice plug-in modules are interconnected by a thin FO-DCS universal cable (for indoor and outdoor use).

For all known duplex applications such as 10G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Universal cable U-DQ(ZN)BH	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Splice plug-in modules, 3U/7HP, 24F, 12x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Module-to-fanout configuration

One FO-DCS plug-in module is connected to two FO-DCS fanout cables (MTP on LCD Uniboot) by a thin FO-DCS mini breakout cable MTP-MTP for a direct link between the active ports (e.g. ports of a SAN switch). For all known duplex applications such as 10G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 12x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B
4	High-performance	Front plate, 3U/7HP, 2x MTP adapter type A	also available with 4x or 8x MTP adapter
5	High-performance	Fanout cable, 1x MTP on 6x LCD Uniboot	Polarity: type A or type C

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Migration to 40/100G (parallel optics)

The FO-DCS plug-in modules (MTP-on-LCQ) in subracks are replaced by FO-DCS front plates with MTP adapters.

The high-performance mini-breakout cables MTP can continue to be used. Datwyler supplies high-performance MTP patch cables for connection of the active IT equipment.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Front plate, 3U/7HP, 4x MTP adapter type A	also available with 2x or 8x MTP adapter
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres
4	High-performance	Y-patch cable (1x MTP 24F on 2x MTP 12F)	Polarity: type A, B or C, 24 fibres
5	High-performance	MTP jumper cable	Polarity: type A, B or C, 12 fibres

MTP® is a registered brand name of US Conec

FO-DCS modular subrack, 19"/4U
to take 12 FO-DCS plug-in modules / front plates 3U/7HP

Modularly equippable FO-DCS 19"/4U subrack

Strain reliefs

Blank partial front plates

PRODUCT INFORMATION

APPLICATION

The modularly equippable 19"/4U subrack can be used for a wide variety of applications, depending on the type of plug-in module or front plate. It can be used as a modular high-density solution for up to 144 duplex ports (288 fibres) or up to 96 MTP ports (1152 fibres) in the data centre environment. It will accept up to 12 FO-DCS 3U/7HP plug-in modules or up to 12 FO-DCS 3U/7HP front plates that are used to terminate pre-assembled LCD or MTP® trunk or breakout cables or fibre optic cables which are spliced in-situ. Easy migration to all parallel optic applications, e.g. to 40/100 GbE, is possible with FO-DCS 3U/7HP MTP front plates.

DESCRIPTION

Sturdy aluminium housing with side panels and front 19"/3U mounting brackets. Pre-assembled with horizontal 84HP guide rails to take a maximum of twelve 3U/7HP FO-DCS plug-in modules or FO-DCS front plates. The extractable excess cable length tray (1U) is equipped with a base and offers 2 big slots on one side and pre-cut holes on the other side. It can be inserted to the subrack on the fourth rack unit from the rear in two ways, so that optionally the slots or holes can be used as cable entry openings. The slightly recessed arrangement of the excess cable length tray allows a 19"/1U management panel with support brackets or a patch management tray with guide elements to be fitted at the front.

SCOPE OF DELIVERY

19"/4U subrack with 19" mounting brackets on 3U (without plug-in modules / front plates)
84HP guide rails for 12 3U/7HP FO-DCS inserts
1U excess cable length tray, integrated, insertable from rear
19" mounting material

Cable support rails and more accessories available.
May be combined with various blanking panels and management panels from the Datwyler range.

TECHNICAL DATA

Material: Aluminium
Colour: Aluminium, anodised or black

FO-DCS modular panel, 19"/1U

to take 3 FO-DCS plug-in modules / front plates 3U/7HP

Modularly equippable FO-DCS 19"/1U panel

Blank partial front plate

PRODUCT INFORMATION

APPLICATION

The modularly equippable 19"/1U panel can be used for a wide variety of applications, depending on the type of plug-in module. It can be used as a modular high-density solution for up to 36 duplex ports (72 fibres) or up to 24 MTP ports (288 fibres) in the data centre environment. It will accept up to 3 FO-DCS 3U/7HP plug-in modules or up to 3 FO-DCS 3U/7HP front plates that are used to terminate pre-assembled LCD or MTP® trunk or breakout cables or fibre optic cables which are spliced in-situ. Easy migration to all parallel optic applications, e.g. to 40/100 GbE, is possible with FO-DCS 3U/7HP MTP front plates.

DESCRIPTION

Sturdy aluminium housing with base, side panels and front 19"/1U mounting brackets. Pre-assembled to take a maximum of three 3U/7HP FO-DCS plug-in modules or front plates. 3 cable support rails for the back side cable entries are enclosed separately.

SCOPE OF DELIVERY

19"/1U panel with 19" mounting brackets (without plug-in modules / front plates)
3 cable support rails, enclosed separately
19" mounting material

Can be combined with various blanking panels and management panels from the Datwyler range.

FO-DCS compact breakout panels, 19"/1U

with 12 or 24 LC Quad adapters

for OM3, OM4 and OS2

Compact 19"/1U breakout panel,
version with 12 LCQ ports, OM3 turquoise

View from rear

PRODUCT INFORMATION

APPLICATION

Compact 19"/1U breakout panels with 12 or 24 LC Quad adapters are a cost-optimised high-density solution for all high-performance applications with duplex signals, particularly in the data centre environment. They are used to accept pre-assembled LCD trunk cables or LCD breakout cables.

DESCRIPTION

Sturdy aluminium housing with base, side panels and front 19"/1U mounting. Pre-assembled with 12 or 24 LC Quad adapters. At the front the panels provide 24 duplex ports (48 fibres) or 48 duplex ports (96 fibres).

SCOPE OF DELIVERY

19"/1U compact panel, with 19" mounting brackets
Aluminium front panel, fitted with 12 or 24 LC Quad adapters
19" mounting material

Cable support rails available as accessories.
Can be combined with various blanking panels and management panels from the Datwyler range.

FO-DCS compact panels, 19"/1U

with MTP-LCD pre-assembly

for OM3, OM4 and OS2

Compact, pre-assembled 19"/1U panel, version with 8 MTP couplers (rear) and 48 OM3 LCD ports turquoise (front)

View from rear with cover

PRODUCT INFORMATION

APPLICATION

These compact, pre-assembled FO-DCS panels are a cost-optimised high-density solution for all high-performance applications with duplex signals, particularly in the data centre environment. They are used to accept pre-assembled MTP® trunk cables or MTP breakout cables.

DESCRIPTION

Sturdy aluminium housing with base, side panels, cover and front 19"/1U mounting. Pre-assembled with 4 or 8 MTP couplers (rear side), 4 or 8 MTP-on-LC (high performance) module fanouts and 12 or 24 LC quad adapters (front side). At the front side the panels therefore provide 24 or 48 duplex ports (48 or 96 fibres). Top-quality assembly ensures optimum values for optical performance (IL/RL).

SCOPE OF DELIVERY

19"/1U compact panel with 19" mounting brackets
 Aluminium front panel, fitted with 12 or 24 LC Quad adapters
 19" mounting material
 Aluminium rear panel, fitted with 4 or 8 MTP adapters
 Aluminium cover, fixed with screws
 4 or 8 module fanouts (high performance): per 12 fibres 1x MTP Elite® (female) on 12x LC
 Supplied inclusive of test certificates for all fanouts

Cable support rails available as accessories
 Can be combined with various blanking panels and management panels from the Datwyler range.

REMARKS

Laser protection:	Optional LCD laser protection clips (metal), can be obtained and retrofitted
Polarity methods:	Fiber light propagation conforms to TIA-568-C.3

As a high-performance patch cable we recommend the FO-DCS LCD Uniboot patch cable

MTP® and MTP Elite® are registered brands of US Conec.

FO-DCS MTP plug-in modules, 12F, 3U/7HP

for FO-DCS modular subrack / modular panel

for OM3, OM4, OS2

High-performance
FO-DCS MTP plug-in modules,
12F, 3U/7HP

PRODUCT INFORMATION

APPLICATION

FO-DCS MTP® plug-in modules are suitable for all high-performance applications with duplex signals, particularly in the data centre environment. They find modular application in FO-DCS modular panels (19"/1U) or in FO-DCS subracks (19"/3U, 19"/4U).

They are used to accept pre-assembled MTP trunk cables.

Packing densities of up to 144 fibres on 3U are achieved with these plug-in modules.

They are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Polycarbonate (PC) housing with press-fit side panels (sealed) and polycarbonate (black) or aluminium front panel (1U/7HP).

At the rear these FO-DCS plug-in modules have one MTP coupler which is routed to the front couplers (6x LC duplex) by way of an internal fanout and integrated fibre management. The black PC front panels provide labelling strips on both sides of the LCD ports for customer-specific printing.

Fixed with two knurled screws (captive).

SCOPE OF DELIVERY

Housing with front panel, equipped with 6 LC duplex adapters (ceramic sleeves).

Rear fitted with 1 MTP adapter (Type A).

1 module fanout (High P): 12 fibres, 1x MTP Elite® (female) on 12x LC (ceramic ferrules).

Delivery inclusive of test reports on fanout.

¹ Insertion Loss (IL) is determined by the latest measurement methods under EFL multimode excitation conditions (EFL = Encircled Flux Launch) at 850 nm in accordance with IEC 61280-4-1.

CONFORMANCE

MTP IEC 61754-7, IEC 61755-3-31, IEC 611755-3-32
LC IEC 61754-20

REMARKS

Laser protection: Optional LCD laser protection clips (metal) can be obtained and retrofitted
Polarity methods: Fibre light propagation conforms to TIA-568-C.3

As a high-performance patch cable we recommend the FO-DCS LCD Uniboot patch cable.

MTP® and MTP Elite® are registered brands of US Conec.

FO-DCS MTP plug-in modules, 12F, 3U/7HP

for FO-DCS modular subracks / modular panel

for OS2 (G.652.D)

High-performance
FO-DCS MTP plug-in modules,
12F, 3U/7HP, for OS2 (G.652.D)

PRODUCT INFORMATION

APPLICATION

FO-DCS MTP® plug-in modules are suitable for all high-performance applications with duplex signals, particularly in the data centre environment. They find modular application in FO-DCS modular panels (19"/1U) or in FO-DCS modular subracks (19"/3U, 19"/4U). They are used to accept pre-assembled MTP trunk cables. Packing densities of up to 144 fibres on 3U are achieved with these plug-in modules. They are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Polycarbonate (PC) housing with press-fit side panels (sealed) and polycarbonate (black) or aluminium front panel (7HP/1U). At the rear these FO-DCS plug-in modules have one MTP coupler which is routed to the front couplers (6x LSH-C) by way of an internal fanout and integrated fibre management. The black PC front panels provide labelling strips on both sides of the LCD ports for customer-specific printing. Fixed with two knurled screws (captive).

SCOPE OF DELIVERY

Housing with front panel, equipped with 6 LSH-C adapters (ceramic sleeves). Rear fitted with 1 MTP adapter (Type A). 1 module fanout (High P): 12 fibres, 1x MTP Elite® (female) on 12x LSH (ceramic ferrules). Delivery inclusive of test reports on fanout.

FO-DCS splice plug-in modules, 12F, 3U/7HP

for FO-DCS modular subracks / modular panel

with 1x 12 pigtails OM3, OM4, OS2 and 6 LCD adapters

High-performance
FO-DCS splice plug-in modules,
12F, 3U/7HP

PRODUCT INFORMATION

APPLICATION

FO-DCS splice plug-in modules are suitable for all high-performance applications with duplex signals, particularly in the data centre environment. They find modular application in FO-DCS modular panels (19"/1U) or in FO-DCS subracks (19"/3U, 19"/4U). They are used to accept fibre optic cables which are spliced in-situ. Packing densities of up to 144 fibres on 3U are achieved with these plug-in modules. They are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Polycarbonate (PC) housing with press-fit side panels and polycarbonate (black) or aluminium front panel (3U/7HP). Equipped with 1 splice cassette for 12 fibres. Splice cassette has splice reserve on both sides (cable / pigtail), splice comb and strain relief. Black PC front panels provide labelling strips on both sides of the LCD ports for customer-specific printing. Fixed with two knurled screws (captive). There is a separate distribution box available for the partition of multi-fibre loose tube cables or for storing the excess tube lengths.

SCOPE OF DELIVERY

Housing with front panel, equipped with 6 LC Duplex adapters (ceramic sleeves). Rear fitted with one M12 cable entry. 1 splice cassette with cover and splice comb for 12 fibres. 1 pigtail set (1.3 m), 12x LC (ceramic ferrules).

DATWYLER DATA CENTRE SOLUTION

FO-DCS loose tube distribution box

for FO-DCS splice plug-in modules 3U/7HP

for loose tube cable partition or storage of excess cable lengths

FO-DCS loose tube distribution box type 1

FO-DCS loose tube distribution box type 2

Screwed cable gland M20 / M25

PMA adapter M12 / M16

Corrugated plastic tube M12

PRODUCT INFORMATION

APPLICATION

The FO-DCS loose tube distribution boxes for FO-DCS splice plug-in modules (3U/7HP) are suitable for the partition of multi-fibre loose tube cables or for the neat and safe storage of the excess tube lengths (approx. 2.0 m) when fibre optic cables with loose tube designs are used which must be spliced in-situ.

These boxes allow for easy and safe splice works on a table in front of the rack. They are mounted in the back area of the racks in most cases.

DESCRIPTION

Plastic boxes available in two sizes (type 1 and type 2).

Loose tube fibre optic cables enter via screwed cable glands (M20 / M25).

Single loose tubes are routed to the plug-in splice modules in corrugated plastic tubes (M12).

SCOPE OF DELIVERY

Plastic box with transparent cover (IP54).

Equipped with internal mounting plate and two bending limitation elements ($r = 50$ mm).

Through holes and dummy plug screws in the side panels.

FO-DCS-MTP front panels,
3U/7HP, black

PRODUCT INFORMATION

APPLICATION	FO-DCS 3U/7HP MTP® front panels are suitable for all high-performance applications with duplex and parallel optic signals, e.g. 40/100 GbE, particularly in the data centre environment. The front panels are used in FO-DCS modular panels (19"/1U) or FO-DCS subracks (19"/3U, 19"/4U). They are designed to accept pre-assembled MTP trunk cables, MTP patch cables or MTP fanout cables.	
DESCRIPTION	Polycarbonate (PC) or aluminium front panels, 3U/7HP. The PC front plates provide labelling strips on both sides of the MTP ports for customer-specific printing. Fixed with two knurled screws (captive). Each MTP adapter (Type A: key-up/key-down) is fitted with two dust caps (front/rear).	
SCOPE OF DELIVERY	Front panel equipped with 2, 4 or 8 MTP adapters (Type A: key-up/key-down) and two dust caps per adapter.

FO-DCS mini breakout cables MTP-MTP, 12-144 fibres for interconnecting FO-DCS plug-in modules

OM3, OM4, OS2

FO-DCS mini breakout cable,
MTP-on-MTP,
12-144 fibres

PRODUCT INFORMATION

APPLICATION

OM3, OM4 and OS2 MTP®-on-MTP mini breakout cables are suitable for all high-performance applications with duplex and parallel optic signals in a data centre environment. For duplex applications, the pre-assembled connectors at either end of the cable are connected to FO-DCS plug-in modules. The cables can continue to be used in the event of migration to parallel optic applications, e.g. to 40/100 GbE, when the plug-in modules are replaced by FO-DCS MTP front plates. The FO-DCS mini breakout cables are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Compact, metal-free cable construction with FR/LSOH cable sheath and 12 to 144 fibres. OM3, OM4 or OS2 versions are available. Sticker labelling at both cable ends. The breakout length of individual cables may be defined on the basis of a specific project (max. 4.0 m). Breakout separation is effected without a divider housing. All breakouts are assembled using MTP connectors with high-performance 12-fibre Elite® ferrules. Standard polarisation modes can be type A or type C (other types available on request). The cables are fitted at both ends with protective sleeves.

SCOPE OF DELIVERY

FO-DCS Mini breakout cables (FR/LSOH) with 12-144 fibres OM3, OM4 or OS2 (G.652.D)
High-performance connector assembly at either end with MTP Elite (male)
Labelled using stickers at both cable ends
Test reports on all MTP connectors

FO-DCS universal cables MTP-MTP, 12-48 fibres for interconnecting FO-DCS plug-in modules

OM3, OM4, OS2

FO-DCS universal cable,
MTP-on-MTP,
12-48 fibres

PRODUCT INFORMATION

APPLICATION

OM3, OM4 and OS2 MTP®-on-MTP universal cables are suitable for all high-performance applications with duplex and parallel optic signals in a data centre environment. They are particularly used when installation requires sturdy, metal-free indoor and outdoor cables that provide enhanced crush resistance and rodent protection. For duplex applications, the pre-assembled connectors at either end of the cable are connected to FO-DCS plug-in modules. The cables can continue to be used in the event of migration to parallel optic applications, e.g. to 40/100 GbE, when the plug-in modules are replaced by FO-DCS MTP front plates. The FO-DCS universal cables are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Compact, metal-free cable construction with FR/LSOH cable sheath and 12 to 48 fibres. OM3, OM4 or OS2 versions are available. Sticker labelling at both cable ends. The breakout length of individual cables may be defined on the basis of a specific project (max. 4.0 m). Breakout separation is effected without a divider housing. All breakouts are assembled using MTP connectors with high-performance 12-fibre Elite® ferrules. Standard polarisation modes can be type A or type C (other types available on request). The cables are fitted at both ends with protective sleeves.

FO-DCS fanout cables MTP-LCD, 12 fibres

for connecting active components

OM3, OM4, OS2

FO-DCS fanout cable,
MTP-on-LCDU,
12 fibres

PRODUCT INFORMATION

APPLICATION

OM3, OM4 und OS2 MTP®-on-LCD fanout cables are suitable for all high-performance applications in a data centre environment.
The connection between six duplex ports and one parallel optic port enables quick and space-saving cabling of active components such as routers, switches, servers and storage systems.
The fanout cables are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Thin, very flexible fibre-optic fanout cable (round cable, Ø 3.0 mm) with 12 fibres.
Low fire load due to its halogen-free flame-retardant LSOH sheath.
OM3, OM4 and OS2 versions are available with 2.5 m standard length (other lengths on request).
Standard polarisation modes can be type A or type C.
Sticker labelling at both cable ends.
Breakout separation is effected with a thin divider housing.
The legs (Ø 2.2 mm) with LCD Uniboot (LCDU) plugs are numbered (1 – 6).
The legs can be ordered graded in length or of equal length.
Project-specific assemblies are available on request.

SCOPE OF DELIVERY

FO-DCS fanout cable (FR/LSOH) with 12 fibres OM3, OM4 or OS2 (G.652.D)
High-performance connector assembly with MTP and LCD Uniboot
Labelled using stickers at both cable ends
Test reports (IL/RL) on all connectors

FO-DCS patch cables MTP-MTP, 12 fibres

Patch- and connection cable für parallel optic links

OM3, OM4

FO-DCS patch cable,
MTP-on-MTP,
12 fibres

PRODUCT INFORMATION

APPLICATION

OM3, OM4 and OS2 MTP®-on-MTP patch cables are suitable for all high-performance applications with parallel optic signals in a data centre environment.
The round patch cables are pre-assembled with high-performance MTP connectors (female) at both ends.
They are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Thin, very flexible fibre-optic patch cable (round cable, Ø 3.0 mm) with 12 fibres.
Low fire load due to its halogen-free flame-retardant LS0H sheath.
OM3 and OM4 versions are available with up to 5 m standard lengths (other lengths on request).
Sticker labelling at both cable ends.
Standard polarisation modes can be type A, B or type C.

SCOPE OF DELIVERY

Parallel optic patch cable (FR/LS0H) with 12 fibres OM3 or OM4
High-performance connector assembly with MTP Elite® (female) at either end
Labelled using stickers at both cable ends
Supplied with test report

FO-DCS patch cables LCD-LCD, 2 fibres

High-performance

OM3, OM4, OS2

High-performance FO-DCS patch cables, pre-assembled with LCD Uniboot connectors at either end, OM3 and OS2 versions

PRODUCT INFORMATION

APPLICATION

OM3, OM4 and OS2 (G.652.D) LCD-on-LCD patch cables are suitable for all high-performance applications with duplex signals in the data centre environment. The round patch cables are assembled with LCD Uniboot connectors (High Performance) at both ends. The patch cables are assembled to a very high quality and guarantee optimum values for optical performance (IL/RL).

DESCRIPTION

Compact cable design with FR/LSOH cable sheath (Ø 2.2 mm) and 2 fibres. OM3, OM4 and OS2 (G.652.D) versions are available with standard lengths up to 10 m (G.657.A1 or G.657.A2 fibres and other lengths on request). Patch cables come with straight polarity (A to A) or cross polarity (A to B). Sticker labelling at both cable ends.

SCOPE OF DELIVERY

Duplex patch cable (FR/LSOH) with 2 fibres OM3, OM4 or OS2
High-performance connector assembly with LCD Uniboot at either end
Labelled using stickers at both cable ends
Packed and labelled in clear plastic sleeve
Supplied with test report

Cleaning rod for sleeve

PRODUCT INFORMATION

APPLICATION

The cleanliness of FO connectors is critical for satisfactory optical performance and long-term trouble-free transmission. Connectors that are dirty, worn or scratched due to improper use will have a negative effect on optical performance because the Insertion Loss (IL) increases whilst the Return Loss (RL) falls.

This topic is so important that it has found its way into all FO-related cabling standards. The standards point out that professional cleaning tools are necessary to ensure successful acceptance tests and trouble-free patching.

For professional on-site cleaning of FO connectors (e.g. MPO/MTP®) the equipment as featured in Datwyler's FO accessories portfolio (see below) is particularly suitable.

Article No.	Fig.	Description	Items cleaned / method	PU
1411400	1	Reel Cleaner	FO connector	1 pc.
1411401	-	Replacement reels for Reel Cleaner		6 pcs.
415627	2	FO connector cleaning device for MPO	FO connector and through adapter	1 pc.
415628	3	FO connector cleaning device for 2.5 mm	FO connector and through adapter	1 pc.
415629	-	FO connector cleaning device for 1.25 mm	FO connector and through adapter	1 pc.
1411404	4	Cleaning rod for 2.5 mm	Sleeve in connector	10 pcs.
1411405	-	Cleaning rod for 1.25 mm	Sleeve in connector	10 pcs.

MTP® is a registered brand of US Conec.

HIGH-PERFORMANCE WIRELESS NETWORKS

WIRELESS NETWORKS THAT WILL KEEP PACE WITH YOUR BUSINESS GROWTH

Wire transmission no longer meets all the demands of modern in-building communication systems. Wireless connectivity (WLAN, Wi-Fi) is essential to provide unrestricted mobility within a building. The intrinsic strengths of these two transmission methods make them both mutually dependent and complementary.

With our skilled and experienced system, planning and installation partners, we can supply all the equipment required for your Wireless LAN infrastructure plus all the network components needed. This means that everything you need for in-building communication systems in any public or commercial building and at all system levels is available from a single source: from the heart of the system, the cable, through the passive connecting and system components of your LAN, to active wireless communication technology.

Active support for our customers:

- Advice on selecting the components required
- Technical planning assistance and simulations
- Site surveys to verify the planning data
- Installation
- Acceptance testing

**Become our
Wireless Solutions Partner
and get registered as
a reseller**

Benefit from the many advantages:

- intensive training on products
- technical support
- project back-up

WIRELESS SOLUTIONS FOR HIGH REQUIREMENTS

Mobility has become an integral part of modern day-to-day business. Employees, customers and partners take for granted the existence of wireless access points, and what's more, they are dependent on it. The massive increase of smartphones and tablet PCs in the workplace impressively proves this trend. Forward-looking companies have recognised the signs of the times and responded accordingly.

Trend-setting array solutions provide optimum conditions with their above-average range, coverage and bandwidth. The system is ideally suited for professional use in offices, factory buildings, conference halls, schools, hospitals and hotels.

Bandwidth-hungry applications such as IP television (IPTV), Video on Demand and Voice over WiFi in particular benefit from trouble-free operation with superlative "Quality of experience", even when being simultaneously used by a lot of people and over a large coverage area.

WIFI-ARRAYS

Unlike conventional access points, the Xirus arrays provide many already integrated devices: from 2 up to 16 radio cells, highly sensitive directional antennas, multi-gigabit switch, controller, firewall, spectrum analyser, and threat sensor.

The advantages of this all-in-one architecture are obvious: less arrays, less cables and less switch ports will result in less investment in communications infrastructure – already in the project implementation period.

Up to 7.2 Gbit/s bandwidth in the 802.11a/b/g+n/ac range ensure WiFi coverage of up to 1920 users and an area of over 100 x 100 metres.

POWER SUPPLY

There are two ways of supplying power to the WiFi arrays: You can use a PoE (Power over Ethernet) adapter or a multi-port PoE switch

Power over Gigabit Ethernet (PoGE)

The PoGE system is a simple and cost-effective method of supplying power to the WiFi arrays. This method is using the existing data cable.

High-performance data cables

Arrays can be connected with fibre optic cables or high-performance copper data cables.

MANAGEMENT

Xirus Management System (XMS) provides a platform for the centralized management of arrays. Network administrators use it for efficient and centralized configuration, administration and control of Xirus WLAN networks.

Main functions:

- Web-based user interface
- Network discovery
- Configuration management
- Station assurance
- Network assurance
- Intrusion detection
- Real-time monitoring
- Wireless network mapping
- Drill-down reports
- Safety monitoring and management

On-premise installation

or
Cloud based management

BENEFITS AT A GLANCE

Less WiFi equipment

- up to 10.4 Gbit/s bandwidth
- higher range and coverage
- up to 1024 users per array
- wireless mesh
- access points can be configured and removed individually (IAP)
- integrated Gigabit switch
- integrated WiFi controller

Security

- intelligence at the interface
- integrated firewall
- integrated WiFi threat sensor

Professional support

- measurement
- network planning
- checking

Investment protection

- modular, expandable design
- new standards by means of hardware upgrades and software updates
- arrays suitable for 802.11ac/ad
- switchable between 2.4 and 5 GHz

HOUSINGS AND ACCESSORIES

You can choose from a wide range of housings for indoor and outdoor use as well as various installation devices. This ensures that the arrays are well protected from environmental influences and damage.

Indoors

The indoor housing can easily be mounted on or in the ceiling.

Outdoors

- Protection rating IP65 for protection against dust and rough environmental conditions.
- -40° C up to +55° C
- various types of antenna available

SERVICES

Datwyler complements its services with professional support when measuring a building, designing the network and checking the network installed.

Site Survey

Measurement is carried out with the arrays directly in the building in which WiFi is to be installed.

Simulation

A simulation based on building plans or site maps is carried out to determine the number of arrays required.

Checks

After the installation, the range and coverage is measured and the WiFi network is tested to guarantee the highest possible quality.

MAINTENANCE CONTRACTS

Protect your investment with a maintenance contract. This is the way to keep arrays and software up to date at no extra cost.

Comprehensive services

Over and above the standard warranty, maintenance contracts provide services which include the fastest possible support, replacement of defective hardware within one working day, and all software updates.

Upgrade and updates

Hardware upgrades and software updates ensure that your WiFi arrays will always be fully compliant with the latest standards.

PRODUCT INFORMATION

APPLICATION

The cost-efficient Xirrus WiFi access points are designed for quick and easy deployment of wireless networks. They are particularly suitable for use in offices, hotel rooms, dorms, smaller classrooms and similar applications with low user density but high demands on device variety and bandwidth.

DESCRIPTION

These APs with integrated controller deliver the highest flexibility and performance for networks with a small to medium density of users. Xirrus access points have 2 radios with omnidirectional antennas and can support up to Gigabit speeds.

The devices support the new WiFi standard 802.11ac and are downwardly compatible. They distinguish themselves by a high level of security, which is increased by the application control with deep package inspection (DPI). All radios are multi-state capable, so that for a switch from 2.4 to 5 GHz the correct settings can be found for each network. Wireless controller, multi-gigabit switch, firewall, threat sensor and spectrum analyzer are also integrated.

The access points have the same functionality as the modular Xirrus WiFi arrays and can be easily integrated in bigger WiFi networks.

Access point comprises

- 2 radios, 300, 450, 867 Mbit/s per radio, depending on the model
- integrated WiFi controller
- array operating system, including analysis and control software

ACCESSORIES

Power is supplied with PoE / PoE + on a switch or midspan injector.

Maximum input power	12,5 W	19 W	24 W

PRODUCT INFORMATION

APPLICATION

The Xirus WiFi arrays are designed mainly for wireless networks with high user density, a wide variety of devices and/or high bandwidth requirements (video applications, for example).

DESCRIPTION

These wireless arrays are the first modular WiFi products of their kind. They are characterized by upgradeability, excellent scalability, high performance, and integrated safety. They consist of modular multi-state integrated access points (2.4 GHz and 5 GHz) with powerful directional antennas, wireless controller, multi-gigabit switch, firewall, threat sensor and spectrum analyzer in a single, modular housing.

Their fully modular construction and software controlled via Web interface allow extremely flexible use of the array and sophisticated fine-tuning to each operational scenario.

Array comprises:

- WiFi array, the choice of 2 to a maximum of 16 integrated access points, depending on configuration, with up to 1.3 Gbit/s
- integrated WiFi controller
- standard mounting kit for ceiling mounting
- array operating system, including analysis and control software
- optional: Premium Support for hardware and software

Due to the modular design of the WLAN portfolio the WiFi arrays are already geared up to future WiFi standards, therefore providing good investment protection.

ACCESSORIES

PoE adapter (see: WiFi accessories - power supply).

The use of standard PoE units is not feasible for a power supply via PoE, as the arrays have a different energy requirement.

PRODUCT INFORMATION

APPLICATION

Xirrus has designed a wide range of solutions for installing wireless arrays in various environments and for different applications. These covers, housings and mounting kits serve to install and arrange the wireless arrays in a protected, secure and covered way and provide for long-term high performance of the devices.

DESCRIPTION

The housings available for indoor and outdoor use will protect each array from environmental influences – for example solar radiation, rain, atmospheric humidity, low temperatures, heat and coarse contaminants – and will provide protection against accidental or malicious damage.

Flexible solutions are available for mounting arrays to walls, ceilings or at hall roof level.

TECHNICAL SPECIFICATION

PRODUCT INFORMATION

APPLICATION To simplify network access, Xirus offers high-performance switches. These switches provide an appropriate number of Gigabit Ethernet ports and 4 fibre optic ports. They will make it possible to manage the entire network from a single source – either through the cloud or on-premise solution.

DESCRIPTION Main features of Xirus switches:

- 24 and 48 port GigE connectivity
- PoE/PoE+ on every port
- Stackability up to 8 switches in a single IP stack
- Advanced security such as AAA with Radius/802.1x, port locking, and MAC locking
- Simplified cloud mangement or on-premises management for switches, arrays and APs
- Reduced IT burden with zero touch provisioning
- Robust network access for 802.11ac WLAN devices

XP8-MSI-70M

PRODUCT INFORMATION

APPLICATION

The Xirrus XP Power over Gigabit Ethernet (PoGE) system is used to provide Xirrus WiFi arrays with a simple and cost-effective remote power supply by way of the data cable.

DESCRIPTION

The PoGE system supplies the Xirrus array internally with direct current via the Gigabit Ethernet data interface. As the arrays require more power than other WLAN solutions, use of the PoGE system is imperative and already included in the bundle packages on offer.

ACCESSORIES

PoE adapters for use in racks or cabinet systems are available as accessories.

WiFi accessories - Xirrus Management System

PRODUCT INFORMATION

APPLICATION

The Xirrus Management System (XMS) provides a powerful platform for central management of the WiFi array network. The XMS detects, configures and monitors the array network and can be scaled to an intercontinental system.

Because of the comprehensive opportunities for analysis and evaluation on the management console, the XMS is equally suitable for optimising the wireless network on the basis of equipment type and bandwidth requirements.

For smaller environments the usage of the XMS NextGen cloud solution is recommended, since no additional hardware and software must be installed. Therefore a significant reduction of the operating costs can be achieved. In mid-sized environments is the multi-tenant XMS Enterprise cloud solution a way to achieve cost-savings in infrastructure.

DESCRIPTION

The Xirrus Management System (XMS) is available as a Linux-based appliance or as software for Windows HyperV or VMware solutions. Software licensing depends on the number of integrated access points to be administered.

Main features of the XMS:

- Automatic detection of the WiFi arrays in a network
- Policy-based configuration for the simple setup of one or more arrays
- Consolidated view of arrays, radio cells, security, performance and alarm status
- Numerous statistics on all aspects of arrays and performance
- Central monitoring and classification of external access points and wireless devices
- View of alarms, system logs for error monitoring of the entire network
- Overview and detailed reports on data throughput, security, channel utilisation etc.
- Simultaneous push software upgrades for one or more arrays
- Database based platform, supports large networks, spread over several locations
- System monitoring via integrated heat map and geo-localization
- Guest access management

CAT TV Panel / CAT TV Balun

Active system, up to 862 MHz
for the distribution of CATV signals

- 1 Input: unbalanced, 75 ohm, coax
 - a) directly from broadband network (building entry point, BEP)
 - b) after signal processing at head-end
- 2 CAT TV Panel
- 3 Patch panel, 100 ohm
e.g. Datwyler patch panel
- 4 Patch cord with RJ45 plug, shielded
- 5 Data cable, Category 7 or 7_A, shielded, with low attenuation,
e.g. Datwyler CU 7150 Multimedia or CU 7702 (AWG 22)
- 6 Faceplate/data outlet with shielded jacks
- 7 CAT TV Balun (balancer/unbalancer)
- 8 TV connection cable, 75 ohm, coax

CAT TV Panel

Active distribution panel, up to 862 MHz,
for the distribution of CATV signals

CAT TV Panel

Power adapter for CAT TV Panel

PRODUCT INFORMATION

APPLICATION

For the distribution of CATV signals over structured premises cabling.

DESCRIPTION

The CAT TV Panel is an active distribution panel that converts CATV signals (coaxial / 75 ohm) into a balanced signal (symmetrical / 100 ohm) for transmission over structured premises cabling. The CAT TV Balun* which is connected close to the TV / Radio reconverts the signal to coaxial / 75 ohm. It is possible to simultaneously distribute TV and telephone services over one and the same cable.

Digital video broadcast programs over cable (DVB-C) can be also transmitted without problems. For reception a DVB-C receiver is necessary that is integrated in the end-user device or a set top box must be connected. Some satellite programs can also be transmitted if they are transformed into a frequency channel of the CATV frequency range.

TECHNICAL SPECIFICATION

Transmission of CATV signals over shielded class E/E_A and F/F_A cabling.

Connections on the rear of the panel:

Frequency range:	45 (85) - 862 MHz
Frequency range backward:	without or (optional) with backward channel 5 - 65 MHz
Input signal level:	70-83 dBμV, maximal equalization: 12dB
Integrated impedance transducer:	75 / 100 ohm
Link length:	10 - 90 m, adjustable for LAN, dependent on the type of data cable
Input 1:	F-type jack, 75 ohm (on the rear side)
Input 2:	Interface input, 15 pin D-type
Measurement connection:	1x F-type jack, 75 ohm, for data / backward channel
Output:	12x RJ45, 100 ohm
Housing:	metal, 19"/1U
Power supply:	from an external power supply (adapter included)
EMC:	in accordance with EN 50083-8 and EN 55022 Part B

Article No.	Description
1411770	CAT TV Panel set, 12 ports, with power adapter without backward channel
417824	Power adapter for CAT TV Panel
1411764	Passive diplex module for retrofitting for backward channel 5 - 65 MHz

*A separate CAT TV Balun is required for each link where an end device is to be connected.

CAT TV Balun

Active balun, up to 862 MHz,
for the distribution of CATV signals

CAT TV Balun

PRODUCT INFORMATION

APPLICATION

For the distribution of CATV signals over structured premises cabling.

DESCRIPTION

The CAT TV-Balun reconverts the balanced signal (100 ohm) that is transmitted from the CAT TV Panel over the structured cabling system into an unbalanced (75 ohm) coaxial output for the connection of an end device (e.g. television, radio).

One CAT TV Balun is required for each link to an end device.

A 3-position switch provides adjustment for cable length, attenuation and equalization.

TECHNICAL SPECIFICATION

Frequency range:	45 (85) - 862 MHz without (or with) backward channel
Frequency range backward:	without or (optional) with backward channel 5 - 65 MHz
Input signal level:	75 / 100 ohm
Input:	1x RJ45 jack, 100 ohm
HF output 1:	1x IEC plug, 75 ohm, for TV / radio
HF output 2:	Version without backward channel: 1x IEC jack, 75 ohm, for radio Version with backward channel: 1x F-type jack, 75 ohm, for data
Output signal level:	60 - 77 dB μ V

Article No.	Description
1411767	CAT TV Balun without backward channel
1411769	CAT TV Balun with backward channel 5 - 65 MHz

Adapter RJ45-IEC

Multimedia adapter

for transmission of broadband signals up to 862 MHz without a Balun

Multimedia adapter RJ45-IEC

PRODUCT INFORMATION

APPLICATION

For the distribution of CATV signals over structured premises cabling.

DESCRIPTION

Adapter for transmission of digital TV broadband signals (DVB-C) in high quality LANs without a Balun.

A high quality shielded twisted pair cable generally allows transmission of two different transmission modes: even mode and odd mode. For data transmission in data cables only the odd mode is used. The adapter RJ45-IEC uses for transmission the even mode. The physical transmission is like that in a coaxial cable. The adapter provides the current IEC plug as physical interface.

Odd mode: Current data transmission mode (10GBase-T, 1000Base-T, etc.) when using symmetrical copper data cable. One conductor of a pair of wires is used as "forward conductor", the other one as "backward conductor". The shield carries no current – it only serves as shielding for protection against EMC.

Even mode: Quasi-coaxial transmission mode. Both conductors of a pair of wires are used as "forward conductors". The shield serves as "backward conductor" – just like the shield of a coaxial cable.

TECHNICAL SPECIFICATION

Frequency range: 5 - 862 MHz
 Attenuation: < 0.5 dB
 Return loss: > 12 dB
 Interface: RJ45 [plug] / IEC [male]
 Pin assignment RJ45: PIN [7/8]
 Colour: orange
 Weight: 10 g

Dimensions:

NOTE

The use of the adapter is recommended when the following data cables are deployed:
 CU 7150 S/FTP AWG22 Cat.7_A
 CU 7120 S/FTP AWG23 Cat.7_A

Article No.	Description	PU
417917	Adapter RJ45-IEC	2 pcs.

GENERAL INFORMATION

Testing and measuring procedures of copper data cables

This overview indicates to what degree and how consequent all Datwyler copper data cables are tested for their quality.

Testing of all manufactured cables*

DC resistance of copper wire

Voltage indication

Capacitance

Testing content

Wire resistance, loop resistance, resistance difference

Wire to wire and wire to screen

Mutual capacitances, capacitive couplings, capacitive earth unbalance

* Each length is tested.

Point by point testing (per production unit)

Transmission characteristics

Material features

Testing content

Impedance, Return Loss, Attenuation, Near End Cross Talk (NEXT), ACR-F

Break stretching of the copper wire, tensile strength of the insulation, stretching of the insulation, tensile strength of the sheath, stretching of the sheath

These values / features are tested with samples.

Type specific tests and measuring

Transmission characteristics

Mechanical and physical product features

Tests to avoid damage during installation

Environmental qualities

Insulation Resistance

Screen performance

Testing content

All electrical parameters demanded in the appropriate standards, Permanent Link and Channel measurements

Shrinking of the insulation, wrapping of the insulation after alteration, cold resistance of the insulation, tensile strength and break stretching of the cable sheath after alteration, pressure sensitivity at high temperatures, cold bending test of the cable, heat resistance, atmospheric humidity test for cables, temperature test, and UV test

Cable crushing, wire crushing, shock resistance of the cable, repeated cable bending and tensile strength test

Acid emission, smoke emission, burning test for individual cable (fire behavior) and burning test for cable bundle (vertical burn test)

Each wire against each wire and against cable screen

Transmission impedance of the cable, Coupling Attenuation

Type specific tests are carried out during the development stage and in case of changing the cable construction

Quality Control

Imprint

Content

It is ensured by an identification of each cable (production batch number) that the measured values can be recovered at any time.

Example: CU 7002 4P FRNC/LS0H 887149

PATENTED STABILIZING ELEMENT

A very important aspect of high performance data cables is their sturdy mechanical design. The mechanical stress during the installation must not be underestimated: it can have negative effects on the transmission characteristics.

Datwyler maximises the electrical performance of some of its high-quality data cables with an additional stabilizing element. This special construction is protected by the European patent 0567757 B1.

Colour code of copper data cables

Wire insulation colours of Datwyler CU twisted pair data cables (in accordance with IEC 60189)

CU 6002 4P, 7060 4P, 7080 4P, 7002 4P, 7120 4P

AWG = American Wire Gauge.

This number is derived from the number of drawing dies that are needed to manufacture a certain cross section.

The larger the AWG number, the smaller the wire diameter.

AWG	Diameter of solid conductor, minimum [mm] <small>(according to UL 444 as of 11 July 2008)</small>	Cross-sectional area of stranded conductor, minimum [mm ²] <small>(according to UL 444 as of 11 July 2008)</small>
18	1.013	0.807
19	0.866*	0.641
20	0.772*	0.509
21	0.688*	0.404
22	0.610*	0.318
23	0.546*	0.254
24	0.485*	0.201
25	0.432*	0.159
26	0.384*	0.126
27	0.358	0.100
28	0.318	0.079

*) Minimum acceptable diameter (0.95 x nominal) of a solid conductor of this size

AWG number for typical copper data cable constructions

AWG	Category & cable type
AWG 26	Cat.7 flexible cable, shielded (S/FTP, stranded wire)
AWG 24	Cat.6 flexible cable, unshielded (UTP, stranded wire)
AWG 24	Cat.6 data cable, unshielded (UTP)
AWG 23	Cat.7 data cable, shielded (S/FTP)
AWG 22	Cat.7 data cable, shielded (S/FTP)
	due to its low attenuation especially suited for:
	- 10-gigabit Ethernet with big reserves to the limit values
	- CATV transmissions up to 862 MHz
	- Power or Ethernet (PoE...)

Installation guidelines for copper data cables

Quality assurance on the construction site

- Please check the following points:
 - Did the delivery include the right cable type?
 - Does the product show any damage caused by transit?
 - Is a temporary store organised for the cables on the construction site?
 - Do the cable and connection components comply with the requested Category / Class?
 - Do you have shielded connection components for the shielded cable?

Storage

- If you do not intend to install the data cables immediately after delivery they should be stored in a place that offers protection from mechanical damage and temperature influences.
- The store should be dry and protected from environmental influences.
- Stored cables should be kept in their original packaging until they are to be installed.

Regulations, standards and guidelines

- In general, always follow the regulations and guidelines specific to the country in which the materials are being installed. Always follow the manufacturer's guidelines for the cables and connecting hardware.

Open installation, wall openings, cable trays

- Copper data cables cannot be installed like power cables and should be installed distant from other cables.
- When these requirements are fulfilled, copper data cables can be laid in open trays in all areas (cable trays, riser zone, communications rooms, etc.).
- The cables can be held in place using cable ties or similar equipment, but the cables should not be crushed when using these devices. Please see the passage 'Pressure on data cables'.
- Before installation, the edges of wall apertures should be smooth and rounded off. This will prevent sheath damages and the need to remove and replace cables at a later date.
- The bending radius of the cables should not fall below the value stipulated by the manufacturer.
- The radius of the cable channels must correspond to the specified bending radius of the cables.

Lubricants for cable moving

- Never use milking grease or other oiliferous and fatty substances.
- For cable pulling the following lubricants may be used:
 - Yellow lubricant (Wire-Pulling, Lubricant of Klein tools; 51000)
 - Talcum

Pulling force of data cables

- You can find the permitted pulling force per cable on the Datwyler copper cable data sheets.

Installation guidelines for copper data cables

Cable pulling

- Always pull cables directly from the drum or box. When using reels always use suitable equipment that will ensure free rotation of the reel.
- Never pull the cables over the flange of the reel (risk of twisting).
- Rewind unused cable and fix the end firmly.
- Use all wires for retracting.
Please fix the open wires with insulating tape between the moving equipment and the cable sheath.

Bending radius

- The bending radius of copper data cables should always be bigger than 8x the overall diameter of the cable during installation (in accordance with EN50173) - unless otherwise specified by the cable manufacturer.
- Always check the data sheets for exact specifications.
If two different bending radii are listed, this means:
 - bend radius with the higher value: during installation
 - bend radius with the lower value: after installation

Pressure on data cables

- Avoid any pressure on copper data cables! Crushing that effects the wires can have a negative effect on the transmission characteristics of the cable.
The most frequent reasons of crushing are improperly fixed cables, crossing of cables and mechanical stress.

Heat influence

- Foamed wires are sensitive to direct heat influence.
Never expose Datwyler data cables to direct heat sources.
Never use a hot air gun or a gas burner (e. g. when using heat shrinking tubing).

Cable laying

- Lay data cables in channels / trays distant from power cables; always use a bridge when crossing 90°. That avoids negative EMC influence.
Please see the passage «Regulations, standards and guidelines».

Cable termination in patch panels

- Always follow the connecting hardware manuals.
- Avoid storing 'reserve loops' at the patch panel.
- For cables with pairs in metal foil (S/FTP, PiMF) the foil screen should be brought as close as possible to the point of termination.
- If the cable provides an additional stabilizing element and a metal foil these must also be brought as close as possible to the point of termination.

Standards for copper data cables

Areas of application of the standards

Cabling standardisation comes from two main organisations: ISO/IEC defines standards that are applicable world wide.

In Europe, an additional organisation called CENELEC defines specifications which support safety guidelines on behalf of the European Union and the EFTA. Thus, the European Standard EN is the principal reference standard in most European countries.

The cabling system standards are defined in the standards ISO/IEC 11801 and EN 50173-1.

These standards also describe the basic requirements for data cables. Due to these requirements the different cable specifications were worked out and defined in the following documents.

Standards for symmetrical data cables

In Europe, the following international standards are for information only.

INTERNATIONAL STANDARDS

ISO/IEC 11801
is applicable worldwide

ISO/IEC 11801	Information technology and application-independent wiring systems
IEC 61156	Multiconductor and symmetrical pair-/star quad twisted cable for the digital communication transmission
	IEC 61156-1: Subject basic specification
	IEC 61156-2: Frame specification for floor cable
	IEC 61156-3: Frame specification for equipment connection cable
	IEC 61156-4: Frame specification for distribution cables
	IEC 61156-5: Frame specification for data cables up to 1000 MHz
	IEC 61156-6: Frame specification for equipment connection cable up to 1000 MHz
	IEC 61156-7: Frame specification for Backbone cable up to 1200 MHz

These documents specify the copper data cables of the categories 3, 5, 6, 6_A, 7 and 7_A (upcoming: 8) for patch and connecting cables, for installation cables and backbone cables.

EUROPEAN STANDARDS

EN 50173
is the European standard

50173 series 2011	Information technology: Generic cabling

NOTE concerning Alien Crosstalk (the influence by signals of electromagnetic interference from parallel laid other copper cables):
All Category 7 copper data cables fulfil "per design" the standard requirements for Alien Crosstalk parameters.
In the European standard EN 50173-1:2007 three different grades for the electromagnetic compatibility are defined (MICE table).
The best grade E3 can be achieved only with shielded data cables.

**Datwyler has recommended high-grade shielded Cat.7 and Cat.7_A copper data cables (PiMF) for many years
and has therefore - in view of the increasing requirements - provided its customers with long-term investment protection.**

GENERAL INFORMATION

F/UTP

U/FTP

SF/UTP

S/FTP (PiMF with overall braid shielding = best shielding performance)

Advantages of high-grade copper data cables

Low attenuation

The data cable has a decisive influence on the attenuation of a data connection (Link), consisting of a patch panel, a data cable and an data outlet.

Data cables with a low attenuation permit cable lengths in excess of 90 m in accordance with the requirements of the chosen application.

Furthermore, the low attenuation offers additional safety, particularly regarding future applications.

Minimised transfer impedance due to foil and braid shielding

The combination of foil and braid shielding results in a low transfer impedance. Coupled interferences can therefore be better discharged via the shielding and over a large frequency band.

As a side-effect, an increased mechanical stabilisation of the cable construction can be achieved.

Constant balance of pairs due to stabilizing element (CU 6702 4P)

The additional stabilizing element results in an additional stabilisation of the wires within the pairs. Thus, the cable provides a very sturdy mechanical design with improved lateral crush resistance, and it also enables smaller bending radii.

A further advantage is - besides a higher stress resistance during installation - an easier compliance with the electrical values at the point of termination.

Advantages of high-grade copper data cables

Insensitivity against external electrical and magnetic influences

The electromagnetic field of an unshielded copper data cable is not limited to the immediate area between the wires (see figure 1).

The electrical and magnetic fields close to an installed data cable are rarely uniform or constant. For an unshielded cable these fields directly effect the electrical transmission characteristics of the twisted pairs (see figure 3).

In a shielded data cable (with foil and braid shielding of high quality) the electromagnetic field is contained within the overall shield. Therefore, major external influences have minimal effect on the transmission performance of the cable (figure 2).

The impedance path is not influenced by the surrounding.

The results are stable transmission characteristics (figure 4), usually indicated by excellent Return Loss (RL) values for installed cables.

General Information

Optical fibre protection & tube construction

There are four different types of fibre optic tube construction - according to the different types of secondary coating that is added to the optical fibres:

- Tight buffer
- Semi tight buffer
- Mini bundle
- Loose tube

Tight buffer

The fibre is tightly jacketed with a thermoplastic oversheath.

Semi tight buffer

The fibre is loosely jacketed in a tube of a polymer material. The spare room between the fibre and the loose tube is only a few hundredths of a millimeter. The overall diameter of the semi tight buffer is identical with the diameter of the tight buffer.

The advantages of the semi tight buffering compared with the tight buffering are:

- the tube can be easily stripped
- minimal effect of microbending

Micro loose tube

2 to 24 optical fibres are loosely encapsulated. The secondary protection consist of one layer of thermoplastic material. The interstices inside the tube are filled with gel. The overall diameter is 1.45 mm for 12 fibres and 1.95 mm for 24 fibres.

Loose tube

2 to 24 primary coated optical fibers are loosely encapsulated. The tube consist of one or two layers of the same or different materials. The interstices inside the tube are filled with gel. The overall diameter is 2-4 mm, depending on fibre count.

Fibre / tube colour codes & sheath colours

In order to differentiate between the tubes in the FO cables and the optical fibres in a loose tube, the tubes and fibres (more precisely: the primary coating) are given different colours.

Fibre colour code (in accordance with IEC 60304)

(up to 12 fibres)

Fibre no.	colour	
1		red
2		green
3		blue
4		yellow
5		white
6		grey
7		brown
8		violet
9		turquoise
10		black
11		orange
12		pink

Fibre colour code with ring signature (Datwyler)

(up to 24 fibres)

Fibre no.	colour	
13		red/black
14		green/black
15		blue/black
16		yellow/black
17		white/black
18		grey/black
19		brown/black
20		violet/black
21		turquoise/black
22		transparent/black
23		orange/black
24		pink/black

Tube colour code

Tube type	Colour		RAL No.	Fibre types
1st tube		red	3020	all types
2nd tube		green	6018	all types
add. tubes		white	9016	E9/125
		light green	6019	G50/125
		blue	5015	G62/125
dummy elements		black	9005	

Sheath colours

Cable type	Colour	
FO Outdoor cable		black with orange longitudinal stripe
FO Universal cable		green
FO Indoor cable		Single-mode G.652 + G.657 yellow (green)
		Multimode G50 (OM2) orange
		Multimode G50 (OM3) turquoise
		Multimode G50 (OM4) heather violet
		Multimode G62.5 (OM1) grey

GENERAL INFORMATION

Opening of cable sheaths of Datwyler fibre optic cables

Instruction manual

Opening of the cable sheath of fibre optic (FO) cables

Instruction manual

Opening of the cable sheath of type ZwbKWT cable

1. Attach a radial cut with a cable stripping knife, approx. 15 cm from one cable end.

Remove the short end by attaching a longitudinal cut.

1. Cut the cable sheath radially, approx. 15 cm from one cable end and from the mark of the required length. (Scratch the corrugated steel tape!) Break the steel tape at those points with care.

2. Lay open the ripcords.

2. Heat the cable end with a gas burner or with an industrial blow-dryer. Remove the heated end carefully (glove!).

3. Fix the ripcord to a screwdriver with a knot (8-loop).

3. Lay open the ripcord. Heat the cable sheath part you want to remove. Grip the ripcord with a screwdriver.

4. Open the cable sheath by pulling the ripcords (vertical to the cable) up to the required length.

4. Grip the ripcord and pull it up to the required length.

5. Carefully remove the cable sheath. Cut back the sheath, glass armour, ripcords and supporting elements.

5. Carefully remove the cable sheath and the supporting elements.

ACR (Attenuation to Crosstalk Ratio)

The distance between the wanted signal and the interfering signal (ACR) is an important factor for the transmission quality. To ensure a faultless transmission, the interfering signal caused by the crosstalk attenuation must be smaller by a certain factor. This corresponds to the difference between the near end crosstalk attenuation (NEXT) and the attenuation of the link.
 $ACR [dB] = NEXT [dB] - a [dB]$; (a = attenuation)

ACR-F

A calculation that normalizes the results of a FEXT measurement, because it takes attenuation into account. It is derived by subtracting the attenuation of the interfering pair from the far end crosstalk (FEXT) that it has caused in the interfered pair.

Alien Crosstalk

Alien crosstalk (AXT) is electromagnetic noise that can occur in a cable that runs alongside one or more other signal-carrying cables. The term "alien" arises from the fact that this form of crosstalk occurs between different cables in a group or bundle, rather than between individual wires or circuits within a single cable.

Attenuation (signal attenuation, conductor attenuation)

The attenuation depends on the conductor resistance R' and the mutual capacitance C' .
The attenuation rises roughly to 50 MHz with the root of the frequency and increases linearly with the length.

Conductor Resistance (resistance per unit length R')

The resistance per unit length R' includes the losses in the metallic conductors. The conductor dimensions, the conductor material and the temperature determine the DC resistance R_0 . Due to the skin effect the conductor resistance increases with frequency. It behaves linearly with cable length.

Coupling Attenuation

This is the sum of the unsymmetrical attenuation of cable pairs and the shielding effectiveness/attenuation.

Technical terms used in data cable technology

Decibel [dB]

Decibel indicates the relation between the voltage of received signal (U_2) and transmitted signal (U_1). The result is a factor [dB]. The relation is defined:
 U_2/U_1 [dB] = $20 \log_{10} (U_2/U_1)$

U_2/U_1 [dB]	Received signal [%]	U_2/U_1 [dB]	Received signal [%]
0.0	100.0	4.0	63
0.1	98.8	20.0	10
0.2	97.7	40.0	1
0.9	90.1	60.0	0.1
1.0	89.3	80.0	0.01
2.0	79.4	100.0	0.001

De-embedded

The de-embedded testing method for connecting hardware and components provides combinations with all defined quality classes for the RJ45 connectors. The integrated parts are real category 6 which provides the possibility to create open "mix & match" cabling systems without compatibility or test restrictions for the used patch cords, test adapters or active networking devices.

Dielectrical Constant (DK)

The Dielectrical constant is a material constant of the dielectric. The relative permittivity says how much bigger the capacity of the condenser becomes if instead of air the insulant is used as a dielectric. If the dielectrical constant is multiplied by the DK of the empty room, then the result is the DK of the dielectric.

Distributed Inductance L'

The distributed inductance consists of several parts. The outer inductance is determined by line geometry and the magnetic material qualities. It is frequency-independent. Since mainly non-ferromagnetic metals are used as conductor, it is also independent of the current intensity. The inner inductance can be explained by the current flow and the magnetic fields connected with that in the conductor. Due to the current superseding, L' disappears at high frequencies. For shielded, symmetrical cables the frequency dependent cover inductance as well as the inductance produced by proximity effect must be taken into account.

Distributed Leakage G'

It describes the insulation losses, the dielectric losses as well as the Corona losses between the wires. Instead of the often strongly frequency dependent parameter G' the factor Q (Q = theta) indicates the loss factor. The value of the loss factor depends on the insulant, the insulation design, the frequency and the temperature. Q should be as small as possible and generally constant.

DMD

Differential Mode Delay. DMD measurement: A single laser light pulse excites a few modes equally within a multimode fibre (MMF) cable. These modes (or light pathways) then follow two or more different paths. These paths may be of different lengths and have different transmission delays as the light travels through the cable. With DMD, a distinct pulse propagating down the cable no longer remains a distinct pulse or, in extreme cases, can become two independent pulses. Strings of pulses tend to interfere with each other, making it difficult to recover data in a reliable fashion.

Lasers function at the baud rates and longer distances required for Gigabit Ethernet: The IEEE 802.3z Gigabit Ethernet Task Force has identified the DMD condition that occurs in certain circumstances with particular combinations of lasers and MMF cable. The resulting characteristics create an additional element of "jitter" that limits the reach of Gigabit Ethernet over MMF cable

Earth Unbalance

The measurement of the difference in the electrical performance of the individual wires of a pair to earth and to the screen. It corresponds to the difference between the capacitance of wire A to the screen and the capacitance of wire B to the screen. It influences the transmission characteristics of the cable.

EMC (Electro Magnetic Compatibility)

The ability for an electrical device to not influence other devices with its electromagnetic field and also to work satisfactorily within the electromagnetic fields of other devices.

FRNC, FR/LS0H or FRNC/LS0H

FR	= flame retardant
NC	= non corrosive - means no corrosive effect in the event of fire
LS	= low smoke - means low smoke emission in the event of fire
0H, ØH or ZH	= no halogen, zero halogen

Halogen-free coating material

A halogen is a salt creator. Chlorine, bromine, fluorine and astat are listed in the periodic table of elements. Cables with a PVC (polyvinyl chloride) sheath are flame retardant (see > PVC). Halogen-free sheath materials don't contain any halogens! Therefore no corrosive gases are emitted from the cable in the event of a fire, the smoke emission is reduced to a minimum and fire propagation is avoided.

Technical terms used in data cable technology

Impedance Z_0 (wave impedance, characteristic wave impedance)

The impedance of a wire represents the ratio of the voltage wave progressing in a direction to the current wave. Common values are 100, 120 and 150 ohm. For higher frequencies the impedance is the root over the ratio between the distributed inductance L' and the mutual capacitance C' . It is important that the impedance of the cable corresponds with the input/output impedance of the attached end device.

minEMBc

The minEMBc bandwidth (Minimum Calculated Effective Modal Bandwidth) is the newest, most flexible and most accurate method to determine the minimum laser bandwidth (high data rate capability of a fibre). Its results are more comprehensive than those of DMD mask measurement methods. Both the minEMBc and the DMD measurement techniques were developed as part of the IEEE 802.3ae standard. The minEMBc method is described in TIA/EIA 455-220A and IEC 60793-1-49 Ed. 2.0. Today, it is the only scaleable measurement technique recognised by international standards. Just as over-filled launch (OFL) bandwidth testing has demonstrated conformance for legacy applications and specifications, laser bandwidth test data provided by Datwyler MMF suppliers can be used to certify the requirements demanded by bandwidth hungry applications used today and in the future.

Mutual Capacitance (Distributed capacitance C')

This is the function of the line geometry (line ÷ line ÷ screen) and the dielectric constant (DK) of the insulation. As long as the DK of the insulation is constant with frequency, the distributed capacitance is almost frequency-independent. The mutual capacitance increases linearly with the cable length.

Network Theory

Every homogeneous line is defined by four parameters which refer to a unit length and are generally frequency-dependant. These are the resistance per unit length R' (conductor resistance) in ohm, the distributed inductance L' in Henry, the distributed capacitance C' (mutual capacitance) in Farad and the distributed leakage G' in Siemens.

NEXT, FEXT crosstalk attenuation

An interfering signal is induced by the field produced by a transmitted signal in one twisted pair on to a neighbouring twisted pair. The crosstalk is length-independent and becomes bigger with an increasing frequency. The difference between the desired signal and the induced signal on the neighbouring twisted pair is described as crosstalk attenuation and is indicated in dB. We distinguish between NEXT = Near End Cross Talk and FEXT = Far End Cross Talk.

NVP (Nominal Phase Velocity of Propagation)

Corresponds to the reciprocal value of the speed of transmission a sinusoidal wave relative to the speed of light. It is indicated in % c (c = speed of light). The NVP is primarily determined by the relative dielectricity constant of the wire coating. NVP is an approximate average value for the cable.

OFL (Overfilled Launch Bandwidth)

Overfilled launch bandwidth (OFL BW) is a familiar metric that is now understood to correlate only with LED-based multimode applications (typical: up to 100 Mbit/s). It is important to understand that OFL BW is never suitable for predicting laser performance.

PE

Polyethylene (PE) is a halogen-free synthetic material that burns easily. By adding additives, PE can be made flame retardant and get low smoke characteristics.

PiMF

Pair in metal foil - description for a STP cable. Each pair is shielded with a metal foil of its own.

PoE / PoE Plus

Power over Ethernet is the transmission of DC voltage - maximum 15 W (PoE) or 30 W (PoE Plus) - over twisted pair data cables and data networks. The transmission of DC voltage takes place parallel to the transmission of Ethernet protocols in one and the same cable by using the spare wires.

PSACR-F

PSACR-F is the Power Sum Attenuation to Crosstalk Ratio. As with all crosstalk measurements (including ACR) there is also a Power Sum ELFEXT (PSELFEXT). These are calculated values expected for multi-pair simultaneous full duplex transmissions

PVC

Polyvinylchloride (PVC) is a synthetic material containing halogen (unlike Polyethylene). Halogens (salt creators) are chlorine, bromine, fluorine, iodine and astat. By using additives like chlorine and fluorine PVC can be made flame-retardant and more resistant against outer influences. PVC jacketed cables are flame-retardant. Synthetic materials containing halogen, form highly-poisonous gases in case of fire. When mixed with water these gases form harmful corrosive acids.

Technical terms used in data cable technology

Return Loss (RL)

The transmission performance of a data cable differs along the length of the cable. The reasons are tolerances caused by different dielectric constants for the insulation and unavoidable production differences along the cable's length. Although they are so small this discontinuity in the cable construction causes reflections of voltage waves and current waves. Results of these reflections are:

Reflection coefficient	=	Relation between transmitted (regular) and received (reflected) voltage wave or current wave at the discontinuity points
Reflow factor	=	Sum of all reflections having an effect on the beginning of the line (transmitted wave). This factor indicates the usefulness of a line
Return Loss (RL)	=	Logarithm of the reciprocal value of the reflow factor

A high Return Loss can only be reached by the highest production precision and by extremely little production tolerances (high homogeneity) and therefore is a quality characteristic.

RML (Restricted Mode Launch Bandwidth, RML BW)

RML Bandwidth test procedure is standardized in both TIA/EIA 455-204 (FOTP 204) and IEC 60793-1-41. RML BW restricts an overfilled launch through a 23.5 micron patchcord, which in turn measures the bandwidth capability of a fibre's low and intermediate mode groups. The resulting bandwidth measurement predicts laser performance for intermediate bandwidth systems (up to 850 MHz.km) in the same way – and with the same level of accuracy – as OFL BW predicts LED performance in legacy-bandwidth systems.

Skin Effect

The higher the signal frequency, the closer the current flows to the outside of the cable. At high frequencies the current flows through the very outer molecules of the wire.

Transfer Impedance (Coupling resistance)

The Transfer Impedance is a main parameter for the quality of the screen and is frequency dependant. The relation is between the voltage drop along the screen on the disturbed lengthways side (outer) to the interfering current on the other side (inside) of the screen. The coupling resistance is determined by the construction of the screen, the skin effect and the capacitive coupling.
