

“ Data Center Modernization

Modernize Your Data Center For The Next It Generation

Businesses and organizations across the globe are adopting advancements in big data applications, cloud computing, enterprise mobility, the Internet of Things and other disruptive technologies to keep pace with rapidly changing technology and end-user demands.

To meet the rising needs of your organization, our engineers and systems experts can help you match your business goals and IT needs to strategically and cost-effectively modernize your data center. Our roadmap will allow you to rollout your new or upgraded data center simply and informatively, increasing your organization's adoption rate.

Rely On Industry Experts For A Smooth Transition

Moving legacy systems on to modern infrastructure like the cloud can be cost effective but too often new infrastructure is designed and new applications must be built, resulting in more expense. At Ventech Solutions, we believe the most efficient approach is just the reverse model. Our teams deliver robust infrastructure platforms for existing business applications to be easily deployed without any service disruption. Also, we design the new platforms to be compatible for next-generation applications.

Our data center modernization services align with your organizations' cloud strategy with a software defined networking approach, transforming aging data centers for a better return on investment, higher performance computing environments and ease of operations. Our data center modernization services include:

- Infrastructure architecture
- Continuous monitoring
- Automated patching
- Disaster recovery
- Continuous deployment
- Automated testing
- Operations management

Call us today to learn how we can transform your data center for tomorrow's needs.

Ventech Solutions is a healthcare solutions provider who has expertise in end-to-end information technology life cycles and data solutions. Across its offices, teams combine passion, experience and technical expertise with superior process and delivery knowledge to provide high-quality IT products and services that align with our key strength areas. Ventech Solutions proudly provides mission-critical initiatives for the U.S. government. For more information, visit www.ventechsolutions.com.
