A Specialist 'Designed to Fit' service to suit any changing room environment

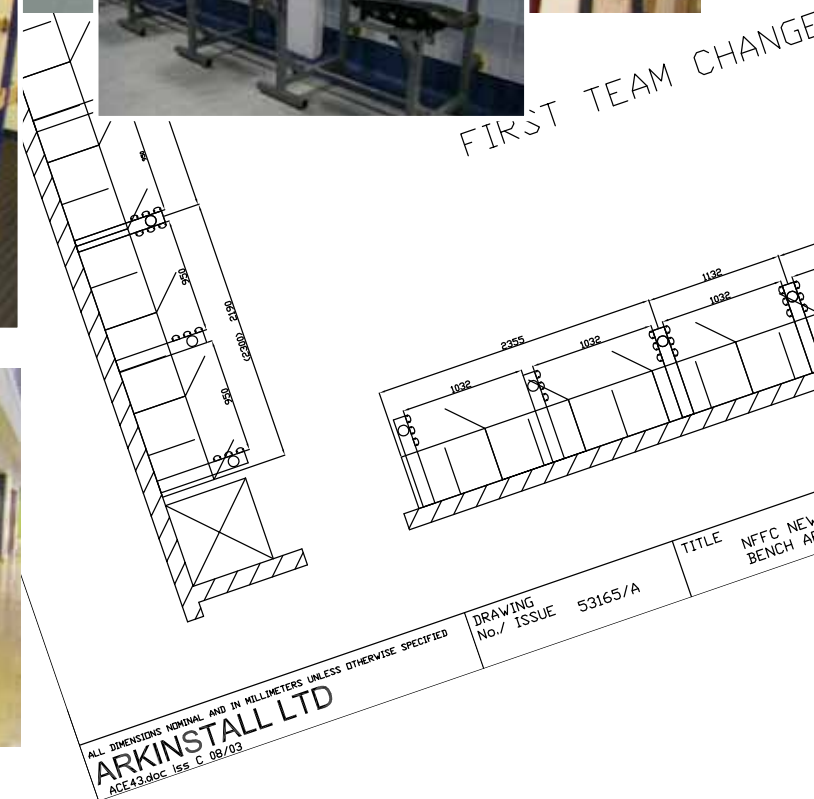

Space comes at a premium and most clients want to maximise the use of whatever changing room space is available to them.

That is why the vast majority of projects that Arkinstall undertake have a specialist and bespoke nature to them. This can vary from reduced sized units to create a uniform fit within a given area, to a complete and newly designed product to meet a particular need. This service is provided free of charge on a no obligation basis.

We offer all or part of the full 'Designed to Fit' service as appropriate:-

- A free no obligation site survey to discuss changing room needs and to assess options
- A free design service providing optional floor plans in cad and pdf format
- 'Made to measure' product design proposals which can range from custom lengths for standard products to completely new hybrid designs to suit a particular purpose
- An optional installation service
- Optional additional finishing services
- Competitive pricing and reliably short lead times

With a design and manufacturing pedigree going back over 50 years, we have many case studies of successful projects including; education, public sports and leisure, MOD, Fire and emergency services and professional football clubs.

NETWoRK

Welded Mesh Lockers

Arkinstalls' **NETWoRK** mesh system offers a uniquely versatile means of storage for just about all applications. Constructed from a steel rod framework infilled with welded mesh panels, **NETWoRK** offers strength and durability whilst retaining the benefits of a mesh system:

- locker contents are totally visible but remain secure.
Can help to reduce pilfering
- excellent ventilation allows contents to dry easily. Ideal for damp workwear
- easily cleaned to minimise risk of cross contamination
Can be hosed down
- can be manufactured to any configuration.

Available in a Bright Zinc Plate or Powder Coated finish.

ENDURANCE

Steel Lockers

ENDURANCE steel lockers provide a versatile and robust locker room solution in just about any environment.

Ideal for all market sectors, all **ENDURANCE** lockers have a spot welded construction for strength and durability. All doors have vertical stiffeners as standard and are hung on 2 or 3 hinges which are spot welded to the door but riveted to the carcass for ease of replacement.

Flat topped lockers have a strengthened cap whilst sloping topped lockers are manufactured complete, not as separate units. The locker design features a 10mm flattened and safety edged doorstop on each side and the 38mm division between tiers provides additional strength and security.

Options include a wide range of lock types, additional shelves, hooks and rails, perforated doors and a wide selection of standard colours.

Solid Grade Laminate Doors are also available for most **ENDURANCE** lockers

FOR MORE INFORMATION INCLUDING STANDARD SIZES AND COLOURS AVAILABLE PLEASE SEE OUR SEPARATE SPECIFICATION SHEET

HYDRALOC

Solid Grade Laminate Lockers

HYDRALOC lockers, are manufactured from Compact (solid grade) laminate, an extremely hard wearing, moisture and scratch resistant material inset in an extruded aluminium profile framework. Ideal for high traffic areas and high moisture & humidity environments.

Available in a range of finishes **HYDRALOC** lockers provide superb security characteristics, are impact resistant and aesthetically pleasing. The 10mm doors are hung on two knuckle SAA hinges with stainless steel pins offering a full 180 degree opening and can be fitted with a range of locking devices.

Carcases and shelves are constructed from 6mm white Trespa Athlon® and a range of accessories including hooks, rails, stands, plinths, end trim panels and sloping tops are available to complete your installation.

The non-porous and closed surface structure of SGL makes it difficult for dirt to cling to the surface and does not support the growth of bacteria and mould.

As with all ARKINSTALL ranges bespoke lockers come at no extra cost !!

VENTURI

Timber Style Lockers

The **VENTURI** range of lockers has been developed using the latest computer aided design techniques and offers aesthetic appeal together with the flexibility of design and dimensions.

Manufactured primarily from medium density fibreboard **VENTURI** lockers come in a wide range of melamine or real wood laminate finishes together with a complimentary array of edging.

Add to this the many locking options and accessories available and you have an almost infinitely variable range available to meet your specific needs.

The design and build quality reflects Arkinstalls' commitment to providing products that meet and exceed the demand for more practical, efficient, reliable and attractive equipment.

VENTURI base models are an industry standard 1840mm H x 300mm W x 450mm D. Finished in Oak, Ash or Beech MF/MDF they have an integral plinth and come complete with self closing 110 degree hinges and a simple cam lock with 2 keys
