

# County Museum, Aylesbury

Constant Air Systems Ltd acted as principal contractor where we completed the removal of the existing air handling plant and installed new plant at roof level, connecting to the existing air distribution for the museum.

We also provided a new air conditioning system throughout the museum, including modifying the existing humidifiers and a full BMS system to control the site.

Throughout the project we also completed electrical, builderswork, attenuation of the existing ductwork and all crange and logistics of new plant.

**The total contract value was circa £220,000**
