

Wet Rolled Wipes In Canisters Complete Turn-Key Lines

Installation, Service, Parts, Delivery & Training, under ONE umbrella

- As little as 2 operators from the master roll to a canister packed in a box
- Strikingly low changeover downtime, raw materials waste and space requirement design, leading to substantial costs savings
- Throughputs offered in 60, 120 and 200ppm
- NOT just generic machines but equipment designed for the specific market needs of high quality canisters wipes production

We offer proven experience delivering full turn key solutions to the following markets:

- Personal care
- Cosmetics
- Household
- Automotive
- Industrial
- Agricultural

“When it comes to packaging equipment finding everything you need with one reliable, experienced supplier can be challenging. Most vendors can only offer a few types of generic machinery forcing you to shop for potentially incompatible technologies from multiple sources. With SA, you get the most advanced round wipes packaging equipment in the world, as a turnkey system, from just one dedicated, experienced manufacturer. We have actually designed our wipes equipment with the specific needs of the rolled wipes market in mind and boast a proven track record of successfully delivering over 40 lines globally over the last decade - consistently learning, improving and challenging ourselves.” – Shai Shemesh, Managing Director, London Office.

- 1 Converting Machine ENR-1000 (*Recommended*)
- 2 Canisters Unscrambler (SA-CF120)
- 3 Rolls Feed Conveyor
- 4 Automatic Rolls Stuffer SAS120
- 5 Automatic Dosing & Filling Machine FGW120
- 6 Automatic Foil Cutting & Canisters Thermo Sealing Machine SEALPRO120
- 7 Automatic Capper CIW120
- 8 Full Wrap Around Labeler LWA120
- 9 Continuous Labels Rolls Magazine
- 10 SA Case Packer, Cartons Form Fill & Seal, RELENTLESS SXS

FULLY AUTOMATIC ROLLED WIPES LINE

HOW IT WORKS

This illustration demonstrates the basic machine components of a simplified high speed rolled wipes line. There are thousands of possible equipment configurations that can be custom tailored to your specific project needs.

The Value Proposition

1. Teaming up with the world's most advanced round wipes downstream equipment maker to expand knowhow, enhance production efficiency, lower costs per unit sold, raise output and product quality, thereby **improving market share and overall profit margins for the business.**
2. It is our belief that the suggested Line is the most advanced in the world today. In addition to **Ultra low downtime, sanitary and materials waste control design**, some of the Line components like our flagship first-to-market vertical **SAS** for round wipes canisters stuffing, the special **FGW** no-drip, no - "nonwoven overflow" shower nozzles with 0.5% accuracy in fill & portion, the **SEALPRO** linear cut & thermo seal methodology and the **CIW** no lids deformation mechanism are **unique in the industry**. These are **NOT generic machines** but were developed for the **specific market needs** required for **high quality canisters wipes production.**
3. SA boasts **unprecedented proven empirical experience** providing **one-stop shop** turnkey canisters wipes solutions for **converting, cans feeding, wipes stuffing, filling, sealing, capping, continuous labeling and case packing**. From the client's perspective, this means less responsibility questions , lower costs at the sale and after sale stages and **seamless, reliable and efficient operating standard.**

The world's undivided maker
 of round wipes downstream equipment
