

Ideal for customers with lower bandwidths, our business-grade Broadband options let users download data, share files and make calls without interruption.

Consistent speeds

Delivered over Asymmetric Digital Subscriber Line (ADSL) or Fibre-To-The-Cabinet (FTTC) where available, our Broadband products provide a cost-effective and consistent connection speed that won't vary throughout the day.

Scalable connectivity

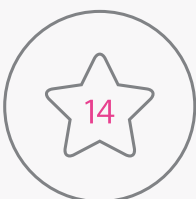

Our Broadband can be tailored to suit your customers' needs and can be scaled up as their business grows. If you have customers that are already in a "superfast" area, FTTC broadband can provide them with download speeds up to 80Mb and upload speeds up to 20Mb.

Fully supported

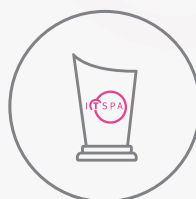

Broadband services are fully supported by Hello Telecom and are deliverable either as an internet circuit or a private voice only circuit.

Ideal for lower bandwidths
Superfast speeds up to 80Mb (FTTC)
ADSL or FTTC broadband options available
Cost-effective connectivity
Tailored and scalable services
Fully supported by Hello Telecom
