transforming patient care your compact mobile assistant

The T1 Transport Monitor/Module is a compact, lightweight solution that serves as a powerful transport monitor, a comprehensive multi-parameter module, and a versatile bedside monitor – all in one. With a robust multi-measurement feature set, the T1 goes even further offering optional multi-vector ST and arrhythmia analysis, 12-lead ECG with interpretation, CO₂ monitoring, and integrated wireless communication to maintain continuity of patient information. When connected to the 19" touchscreen display, the T1 transforms into a bedside monitor with features such as multiple screen layouts for customization of waveform and numeric data, configurable quick keys, and bed to bed communication.
