**Section 4: First aid measures****4.1 Description of first aid measures****General information**

Provide general first aid, rest, warmth and fresh air. As a general rule, in case of doubt or if symptoms persist, always call a doctor. Seek medical attention for all burns and eye injuries, regardless how minor they may seem. First aid personnel must be aware of own risk during rescue.

**Inhalation**

If this product is inhaled and symptoms occur, move the exposed person to fresh air promptly. If not breathing, give artificial respiration and seek medical attention. If breathing is difficult, oxygen should be administered by qualified personnel. Seek medical attention.

**Ingestion**

DO NOT induce vomiting! Obtain medical attention immediately. Thoroughly rinse the mouth with water. Immediately give two glasses of water, provided the victim is fully conscious. Never give anything by mouth to an unconscious person.

**Skin contact**

Promptly flush contaminated skin with water. Remove contaminated clothing, shoes and jewelry and wash before reuse. Continue to rinse for at least 15 minutes. Get medical attention if irritation develops or persists.

**Eye contact**

Do not rub eye. Avoid contaminating unaffected eye. Remove contact lenses if present and easy to do so. Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately. Continue to rinse.

**4.2 Most important symptoms and effects, both acute and delayed****General information**

The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

**Inhalation**

No specific symptoms noted.

**Ingestion**

May cause discomfort if swallowed.

**Skin contact**

Prolonged contact with skin may cause irritation.

**Eye contact**

May cause eye irritation.

**4.3 Indication of any immediate medical attention and special treatment needed****Notes to the physician**

Treat symptomatically.

**Section 5: Fire-fighting measures****5.1 Extinguishing media****Extinguishing media**

Use fire-extinguishing media appropriate for surrounding materials.

**Unsuitable extinguishing media**

High volume water jet.

**5.2 Special hazards arising from the substance or mixture****Hazardous combustion products**

The product is not flammable. Combustion may lead to the release of harmful vapours, including but not limited to oxides of carbon.

**Unusual fire & explosion hazards**

No unusual fire or explosion hazards noted.

**Specific hazards**

If heated, harmful vapours may be formed.

### 5.3 Advice for firefighters

- Special fire fighting procedures** Avoid breathing fire vapours. Keep up-wind to avoid fumes. Fight advanced or massive fires from safe distance or protected location. Water spray should be used to cool containers. Ventilate closed spaces before entering them. Do not release runoff from fire to drains or watercourses.
- Protective equipment for firefighters** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

### 6.1 Personal precautions, protective equipment and emergency procedures

- Personal precautions** Wear protective clothing as described in Section 8 of this safety data sheet. Avoid inhalation of dust or vapours and contact with skin and eyes. Evacuate and ventilate area. Eliminate all sources of ignition. Do not touch or walk through spilled material. Keep unnecessary and unprotected personnel from entering.
- For emergency responders** Follow safe handling advice and personal protective equipment recommendations for normal use of product.

### 6.2 Environmental precautions

- Environmental precautions** Spillages or uncontrolled discharges into watercourses must be reported immediately to the Local Authority or other appropriate regulatory body.

### 6.3 Methods and material for containment and cleaning up

- Spill clean up methods** Wear appropriate personal protective equipment as specified in Section 8. Ventilate and evacuate the area. Eliminate all ignition sources. DO NOT touch spilled material! Stop leak if possible without risk. Absorb spillage with inert, damp, non-combustible material or use a liquid binding material. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container. Flush contaminated area with plenty of water.

### 6.4 Reference to other sections

- Reference to other sections** See section 1 for emergency contact. For personal protection, see section 8. For waste disposal, see section 13.

---

## Section 7: Handling and storage

---

---

## 8.1 Control parameters

### Ingredient comments

No exposure limits noted for ingredient(s).  
Ireland, Occupational Exposure Limits 2016.  
Workplace Exposure Limits Guidance Note EH40/2005.

## 8.2 Exposure Controls

### Protective equipment

### Engineering measures

Provide adequate ventilation, including appropriate local extraction, to ensure that the defined occupational exposure limit is not exceeded.

### Respiratory equipment

Not required under normal circumstances. Where risk assessment shows air-purifying respirators are appropriate a full face respirator conforming to EN143, and suitable respirator cartridges as a backup to engineering controls.

Use respirators and components tested and approved under appropriate government standards such as CEN (EU). Consult manufacturer for specific advice.

### Hand protection

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374) is recommended. Suggested material: PVC. Rubber. Nitrile rubber. Minimum layer thickness: 0.11 mm. Break through time: >480 minutes. Consult manufacturer for specific advice on material.

Gloves must be inspected prior to use. Selection of the glove material depends on consideration of the penetration times, rates of diffusion and degradation, and concentration specific to the workplace. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.

### Eye protection

Wear safety goggles or face shield to prevent any possibility of eye contact. Use equipment for eye protection tested and approved under appropriate government standards such as EN 166(EU).

### Other protection

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist. The selected clothing must satisfy the European norm standard EN 943.

### Hygiene measures

DO NOT SMOKE IN WORK AREA! Wash hands at the end of each work shift and before eating, smoking and using the toilet. Wash promptly if skin becomes wet or contaminated. Promptly remove any clothing that becomes contaminated. Wash contaminated clothing before reuse. When using do not eat, drink or smoke.

### Process conditions

Ensure that eye flushing systems and safety showers are located close by in the work place.
