

Corporate and Social Responsibility Policy

Responsible business practice isn't new to AB 2000 Limited, and it is our Policy to keep our workforce safe and healthy, providing good service to our customers and responsibly managing our environmental and social impacts. These are key to how the Company is run and managed.

It is more than just accreditations. It is how we behave and showing respect for our people, our customers, our suppliers and the communities in which we operate. Good health and safety, environmental management, and customer service are as much attitudes as policies.

Our membership with Achilles Link Up and UVDB, and their external audit of our Health and Safety, Quality and Environmental Policies and performance drives AB 2000 Limited to deliver what we say we will do and sharing knowledge and improving helps to make our industry safer, more efficient with resources, and operating with a duty of care for the environment.

Customer Service means we listen to our customers, understand their requirements of us, and deliver what they need.

We seek to implement the highest standards we can in relation to the Environment, Health, Safety and Quality and serve customers by:

1. Delivering the right product in the right place at the right time, at the right rate.
2. Providing reliable equipment.
3. Issuing accurate invoices.

We buy plant with the most energy efficient engines available and have a programme of ongoing investment in new plant and equipment to ensure our fleet is as modern as possible.

We will provide machines with bio oil for customers working in high risk pollution areas.

The Environment - Climate change and the emission of greenhouse gases is a challenge that faces all of us and one in which the plant hire industry has a major role to play and AB2000 Limited is committed to reducing our carbon footprint and supporting our customers in their efforts to operate more efficiently.

To achieve this we:

- Are calculating our carbon footprint and will set targets to reduce it.
- Have implemented a 'switch off' campaign at depot level.
- Purchasing low emission vehicles and plant.
- Continue to invest in our modern, fuel-efficient fleet

Charities and The Community – AB 2000 Limited works closely with charities and local community groups to develop our Corporate Social Responsibility strategy and to provide sustainable long term benefits to the communities we operate in.

The Company has provided equipment free of charge to assist with community organised landscaping projects and the Waverley Foundation as well as sponsoring local youth football teams; raising money every year for Breast Cancer Awareness and Research.

We offer work experience to pupils at local schools, and recruit apprentices on a regular basis. Through these and other initiatives the Company has a positive impact on the social environment of the schools within our communities.

It is AB 2000 Limited's policy to make all of our Staff aware of our Corporate and Social responsibilities to our Customers, our Employees, the Environment, and the wider Community.

This policy will be reviewed annually as part of the Management review process to ensure its continuing relevance and adequacy.

Adam Bruce
