

STATIC COMPACTORS

ENGINEERING SOLUTIONS FOR THE WASTE & RECYCLING INDUSTRIES

FEATURES

The Mardon Static Compactors are compactors designed and manufactured for use with cardboard, plastics and general waste.

The Compactors come in a range of size dependant on the volume of material the machine will be processing.

With the option of walkways and side mounted doors the Static range can be modified in any orientation and with a dedicated design team door positions and any other additional needs can be met.

- Compact Design - Multi Loading Procedures
Ground Feed, Walk On, Bin Lift or Deck Loading.
- Ready to Use - 415V 3 Phase Supply.
- Simplistic Controls - A control panel allows the user to access all compaction options. IP55 Rated.
- Static Range Equipped with Container - We also design and manufacture containers to suit your static compactor.
- Variable Hopper Options - Variable Shapes and heights of hopper to suit all needs.

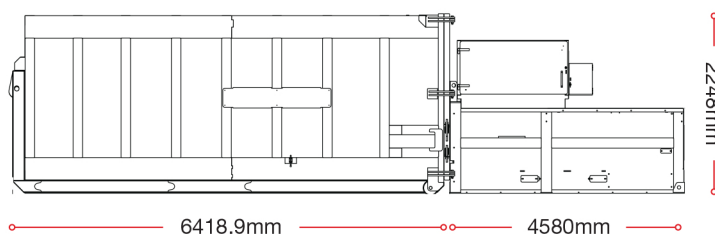

SPECIFICATIONS

Model	RP14 (G60)	RP16 (G90)	RP20 (G120)
Height (mm)	2250	2250	2250
Length (mm)	1850	3440	4580
Width (mm)	1920	1920	1920
Power Supply (v)	415v 3 Phase	415v 3 Phase	415v 3 Phase
Cycle Time (Sec)	43	47	60
Compact Force (t)	25	27	27
Motor Size (Kw)	7.5	7.5	7.5/11/15
Capacity (m³)	1.25	1.8	2.25
Main Body Height	1250	1250	1250
Penetration	Variable	Variable	Variable
Weight (kgs)	2000	3100	3600
