CrewCommCenter
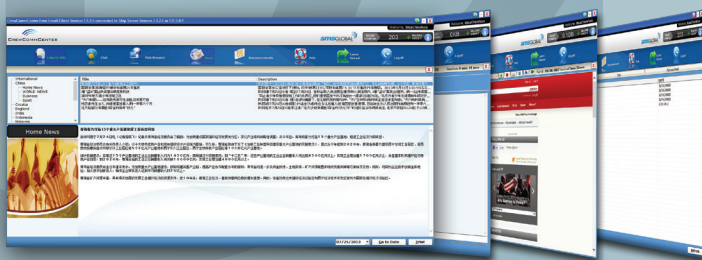

CrewCommCenter is a customized crew communication system designed for maritime satellite communication trough the Inmarsat, Iridium & V-Sat networks. The system offers a complete set of features as an on-board Internet Café, but where the ship owner can ensure a IT secured environment with data and time usage limits, bandwidth control, content control and satellite transmissions cost control.

THE ULTIMATE CREW COMMUNICATION SOLUTION FOR MARITIME BROADBAND

Optimized Web Browser. Web sites are compressed up to 70% of its original sizes, with flash, video & audio streaming block as option, mobile browsing option, bandwidth control, data usage and time limit per crew member per day/month configurable.

Online Chat with Yahoo, MSN, AIM & Facebook. Chat for 500 minutes for less than 1MB. Text based only chat client that blocks all graphics, themes, icons, file sharing and video/sound streaming.

Global News feature with International and National news in multilingual languages provided daily to the crew accounts.

Announcement Board that enables the Ship managers to send internal corporate bulletins to their crew members at sea. Free or Pre-paid inbound & outbound E-mails & SMS text messages world-wide.

Local Chinese and Philippines SMS Gateways. Loved ones on shore can send SMS text messages to the seafarers on the vessels world-wide for local rates.

Support for all International languages including Chinese, Japanese, Korean, Thai, Russian and Arabic.

Individual & private E-mail and SMS mailboxes that follows crew from vessel to vessel.

Web-mail access while on shore.

IMEC and ITF compliant.
