# MINITEKNA Compact mechanical retractable cotton roller towel cabinet

MINITEKNA is the latest addition to Kennedy's cotton roller towel hand drying range. It provides all the benefits of the original TEKNA for unrivalled hygiene, service and environment plus a 'comfort like home' hand drying experience in a 'mini' sized cabinet.

MINITEKNA features automatic retraction of each used roller towel portion and of the towel end and delivers approximately 130 portions of clean towel from a narrow full length 40m towel.

This system also helps protect the environment as it combines a towel cabinet based on eco-friendly engineering with the cotton towel, a natural biodegradable consumable.

#### Finishes available

### **Benefits**

#### Hygiene & Image

- > Unique, modern and ultra compact design
- > Automatic retraction of clean roller towel portion for each user
- > Clean roller towel isolated from and positioned above used towel

#### **Reliability & Durability**

- > 40 years experience in cabinet engineering
- > Proven robust mechanism based upon the solid reputation of the "Integra", the industry's market leader in cabinets
- > Lockable cabinet to prevent unauthorised access

#### **Ease of Service**

- > Instant towel check through transparent inspection windows
- > Locks located at both sides to maximise fitting options
- > Problem-free loading for guaranteed easy servicing

#### **Environmentally Friendly**

- > Mechanical operation no external power source required
- Cotton towels are one and a half times less
   harmful to the environment than paper equivalents
- > 100% recyclable components
