For all your cabling needs

DaC Solutions

Why iDaC Solutions?

At iDaC Solutions we offer customers all the benefits of dealing directly with an industry leading cable manufacturer (project support, on-site technical expertise, training and system warranties), plus the ability to bring together complementary products for a no compromise, best-in-class cabling system.

With superior products for structured cabling networks, fire safety, lift cabling, building automation, special environments & industrial applications; we have a solution for all your cabling needs.

Product Overview

At iDaC Solutions (iDaCs), we offer a wide range of high performance cabling solutions; designed to provide a reliable, fully integrated infrastructure for any building.

- Network Data Cabling
- Fire Safety Cabling
 Lift Cables
- Building Automation Systems

We also have other specialised products for industrial applications, marine environments and clean-room areas (see pages 12 & 13) - contact us to find out more.

Product Overview

Datwyler S/STP Cable

Office LANs

Food & Beverage

Pharmaceutical

Data Centres

Swiss based cable manufacturer, Datwyler (est. 1915), is the specialist in copper cabling systems for network infrastructures. With over 100 years experience our customers are guaranteed a high quality, highly reliable cabling system to support their business - no matter what the application.

Datwyler Cable Categories*

- Cat 5e (U/UTP, F/UTP, SF/UTP)
- Cat6 (U/UTP, U/FTP, SF/UTP & F/FTP)
- Cat6A (U/FTP, F/FTP & S/FTP)
- Cat7 (F/FTP & S/FTP)
- Cat7A (S/FTP)
- Cat 8 (S/FTP)

Some cables are also available in Industrial & outdoor versions - contact us for more details.

We also supply flexible cables, in a variety of colours, for patch lead assembly as well as ready-made Datwyler Patch Leads.

Network Cabling (Fibre)

Datwyler manufactures a comprehensive range of fibre-optic cables and connectivity solutions to suit a wide range of applications:

- Structured premises / Local Area Network (LAN) cabling
- High-density, high-speed Data Centres
- Fibre-to-the-home (FTTx) outdoor and in-house
- Metropolitan Area Networks (MAN)
- Long distance / Wide Area Networks (WAN)

Fibre Optic Cables

Our fibre optic cables are made to the highest quality standards to ensure high performance and reliability. They are manufactured using 'bend insensitive' fibre to make installation easier and are available in single mode (OS2) & multimode (OM3 & OM4) versions;

- Loose Tube (Indoor/Outdoor & Universal)
- Tight Buffered (Indoor/Outdoor & Universal)
- Patch Cable
- Distribution Cable
- Blown Fibre

Cabling Components

Datwyler has a wide variety of fibre optic products for a range of cabling applications. If you'd like to find out more about our FO products, or the new Datwyler 25 Year Fibre Optic System Warranty, please call or email us today.

Reference Project: Al Reem Island, UAE

200,000 Users
Covering over 7 million square metres
430km Cat6A copper data cable
75km single mode fibre

FO Patch Leads

DC IT Safe

Cabinets & Enclosures

Through our partnerships with leading cabinet manufacturers, we offer a full line of racks, enclosures, accessories and PDU's for Local Area Networks, Data Centres and harsh environment applications.

Leading Brands

We supply standard 19" network racks, cabinets and wall mounted boxes from BKT and Eaton; as well as cable management accessories and PDUs.

DATWYLER

Security & Protection

The brand new and exclusive 'DC IT Safe', from Datwyler, offers up to 62U of 19" rack space in just 2m². It's secure and protects against all physical hazards; and is ideal as a micro data centre, for harsh environments or public access areas e.g. hospitals.

Outdoor Environments

BKT also specialize in enclosures for outdoor use and other harsh environments (e.g. manufacturing, marine, etc). They are available from us in standard and custom-built versions. Heating and cooling systems, as well as sensors to monitor moisture levels can be purchased separately.

Let us know your what your requirements are and we'll find a solution to suit your needs. If you're interested in Containerised Mobile Data Centres - see page 13.

Outdoor Enclosures

Fire Safety

Datwyler Fire Safety cables, from iDaCs, provide continuous power and data transmission for fire alarm systems and emergency lighting in the event of a fire.

Fire Safety Cables • Standard in 2.3 & 4 core

Enhanced in 2 & 4 core

Available in red or white

Installation Accessories

Fire Safety Cables

Fire Safety Systems

We also supply 'P' clips, new LINIAN Fire Clips and glands.

70% faster to install than traditional methods

- Fire Rated Cable Fixings BS7671 Amendment 3
- Dramatically reduces labour costs
- Unique design enables tidy finishes

Reference Project: The Allianz Arena, Munich

Communication network, media facilities and award winning fire safety system - all running over Datwyler integrated cabling. **Visit <u>www.idacs.uk.com/allianz-arena</u> for more details**

Security Alarm Systems

Lift Cabling Systems

As buildings are getting higher, the physical demands on the lift cabling are also increasing. Datwyler lift cables are designed to withstand great mechanical stress, and are trusted in some of the World's highest and fastest elevators.

With a range of cables, harness assemblies, accessories, suspension devices and tooling, we provide lift manufacturers (and maintenance companies) with a convenient end-to-end cabling solution.

Flat Travelling Cables

- Low Rise up to 80m
- Medium Rise up to 150m
- High Rise up to 400m
- PVC or LSOH
- Many combinations available
- (select from range of Copper & FO elements)
- Pre-assembled cable harnesses (available on request)

Suspension Devices

Our travelling lift cable suspension devices come in a wide variety of styles; to accommodate different cable widths, cable combinations and travelling height. Our Technical Sales Team are on hand to help you select the appropriate device - and relevant tools - for your installation.

Reference Project: New World Trade Centre, New York

Landmark high-rise, The Freedom Tower, utilises Datwyler lift cables - as well as other buildings in the WTC development. Visit <u>www.idacs.uk.com/wtc</u> for more details

Products for Special Environments

At iDaC Solutions we offer a wide range of specialised high performance cabling products and accessories - designed for a variety of applications - and built to last.

Industrial Grade Network Cabling

Our high performance network cabling range includes IP67 outlets for wash-down areas, PUR cables (which can operate at -30°C to +60°C), outdoor & marine grade cables and fibre optic cables from Swiss-based manufacturer Datwyler. Datwyler's high quality screened cables and components are ideal for use in factories, food processing plants, pharmaceutical facilities, etc.

iDaCs also offer a wide range of screened control cables

for automation and robotics; including flexible cables for

drag chains, motor servo & feedback cables, trailing cables,

heat-resistant cables and other specialised products. With

are ideal for processing areas and oil & gas applications.

Smart Building Solutions

Containerised Modular Data Centres

If you're looking to extend or re-house your IT network, need a segregated data centre or want a fully operational disaster recovery solution; iDaCs' Containerised Modular Data Centre's (MDCs) and new DC IT-Safe Micro Data Centres (see page 9) provide a flexible and economic alternative to a traditional construction project.

They offer a resilient and secure option for your IT network. They're quick and simple to deploy with minimal planning requirements and site preparation; plus they can be re-located easily on a standard container truck – making the most of your Investment.

Electrical Distribution Cabling Systems

iDaC Solutions also supplies Woertz Swiss-made cabling solutions for building automation. Woertz is a leading provider of flatform electrical distribution cables - ideal for use in offices and production areas. The cabling system – which also includes plugand-play IDC junction boxes & taps – offers faster, lower cost installation (up to 75% labour saving versus conventional cabling solutions), plus it allows simple modifications and additions.

Reference Project: Sofitel, London

• 3000 Connections • 605 Bedrooms Visit <u>www.idacs.uk.com/sofitel</u> for more details

Other Special Applications

We also offer other specialised products for less challenging environments e.g. Home Automation Cabling Systems, Lift Cabling (see page 11), 'Smart' Building Automation systems and cable routing systems.

Contact us for more details.

Warranties, Training & Services

Warranties

Datwyler has two 25 year network cabling system warranties available:

Copper Network Link System WarrantyFibre Optic Link System Warranty

iDaC Solutions provides support for all Datwyler system and product warranties in the UK and Ireland; including on-site visits, installer certification training*, technical assistance and warranty sign-off.

To find out more about the systems covered, our overlength warranty, or the Datwyler Installation Partner Program please give us a call or email info@idacs.uk.com

*On completion of the training program, Certified installer's (and their companies) receive official certificates and are eligible to offer Datwyler system warranties (see example on left).

Training & Services

We offer a range of bespoke design services and training sessions, run by our Technical Director Paul Hunter RCDD.

info@idacs.uk.com / +44 (0)2380 279 999 / www.idacs.uk.com

Whether you're a data installer looking for warranty certification, an end user who needs assistance with their cabling infrastructure or are new to the industry and would like an introduction to cabling technology, we have a service to suit you.
