

Introducing Rivulis Eurodrip

Our **NAME** - Rivulis Eurodrip

The word "Rivulis" defined:

Rivulis means a **small stream** or river in Latin.

Per our interpretation, Rivulis is a **river** of life-giving hydration, bringing sustenance to crops.

Eurodrip represents a seasoned veteran of nearly 40 years, solely dedicated to micro-irrigation.

Who WE Are

A global leader of micro-irrigation solutions, enabling growers to achieve higher quality crops more consistently, and increase yields both economically and sustainably, while managing water and land scarcity.

Committed to providing tailored irrigation solutions for any challenge, from individual growers to large corporate plantations. **Enabling** a full range of applications for agriculture, horticulture, landscaping and mining.

Dedicated to long term, win-win relationships with our business partners and growers.

Investing continuously in technological innovation to enable growers to succeed in an environment of increasingly strained natural resources.

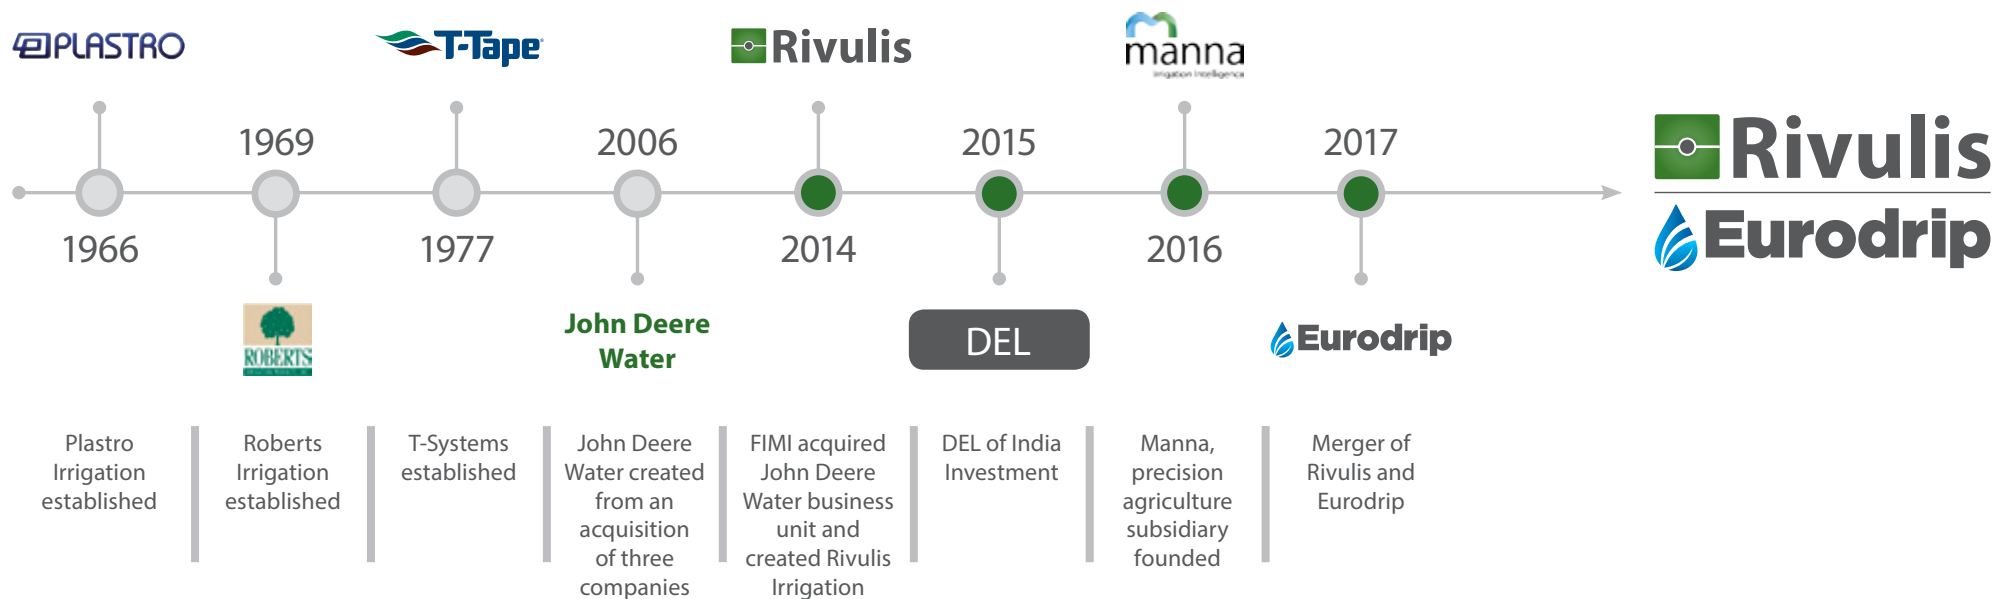

A Solid Foundation: Past, Present and Future

Rich in history, Rivulis Eurodrip has been developing, manufacturing and supporting top quality micro-irrigation solutions for over five decades.

Starting with the consolidation of three leading micro-irrigation companies, Plastro, T-Systems and Roberts during 2006–2008, the worldwide organization grew to serve major markets. In 2014, the consolidated company was purchased by FIMI Opportunity Funds and Rivulis was born.

Since then, Rivulis has focused on providing continuous innovation and strong service to meet the growing needs of the irrigation markets around the world.

In March 2017, Rivulis and Eurodrip merged to create a global leader in micro-irrigation with unparalleled market coverage and the most extensive product and solution offering.

Our VISION

We understand the challenge of being a grower.

We also understand that being a grower is all about passion.

We share that same passion.

We are here to help growers improve yields economically and sustainably, and address water and land scarcity through proven, state-of-the-art micro-irrigation solutions.

Our MISSION

To be a global leader in the adoption of micro-irrigation solutions by:

Providing comprehensive solutions and custom projects which are reliable, easy-to-use and affordable to growers;

Building long term, rewarding relationships with growers and business partners.

Our CULTURE

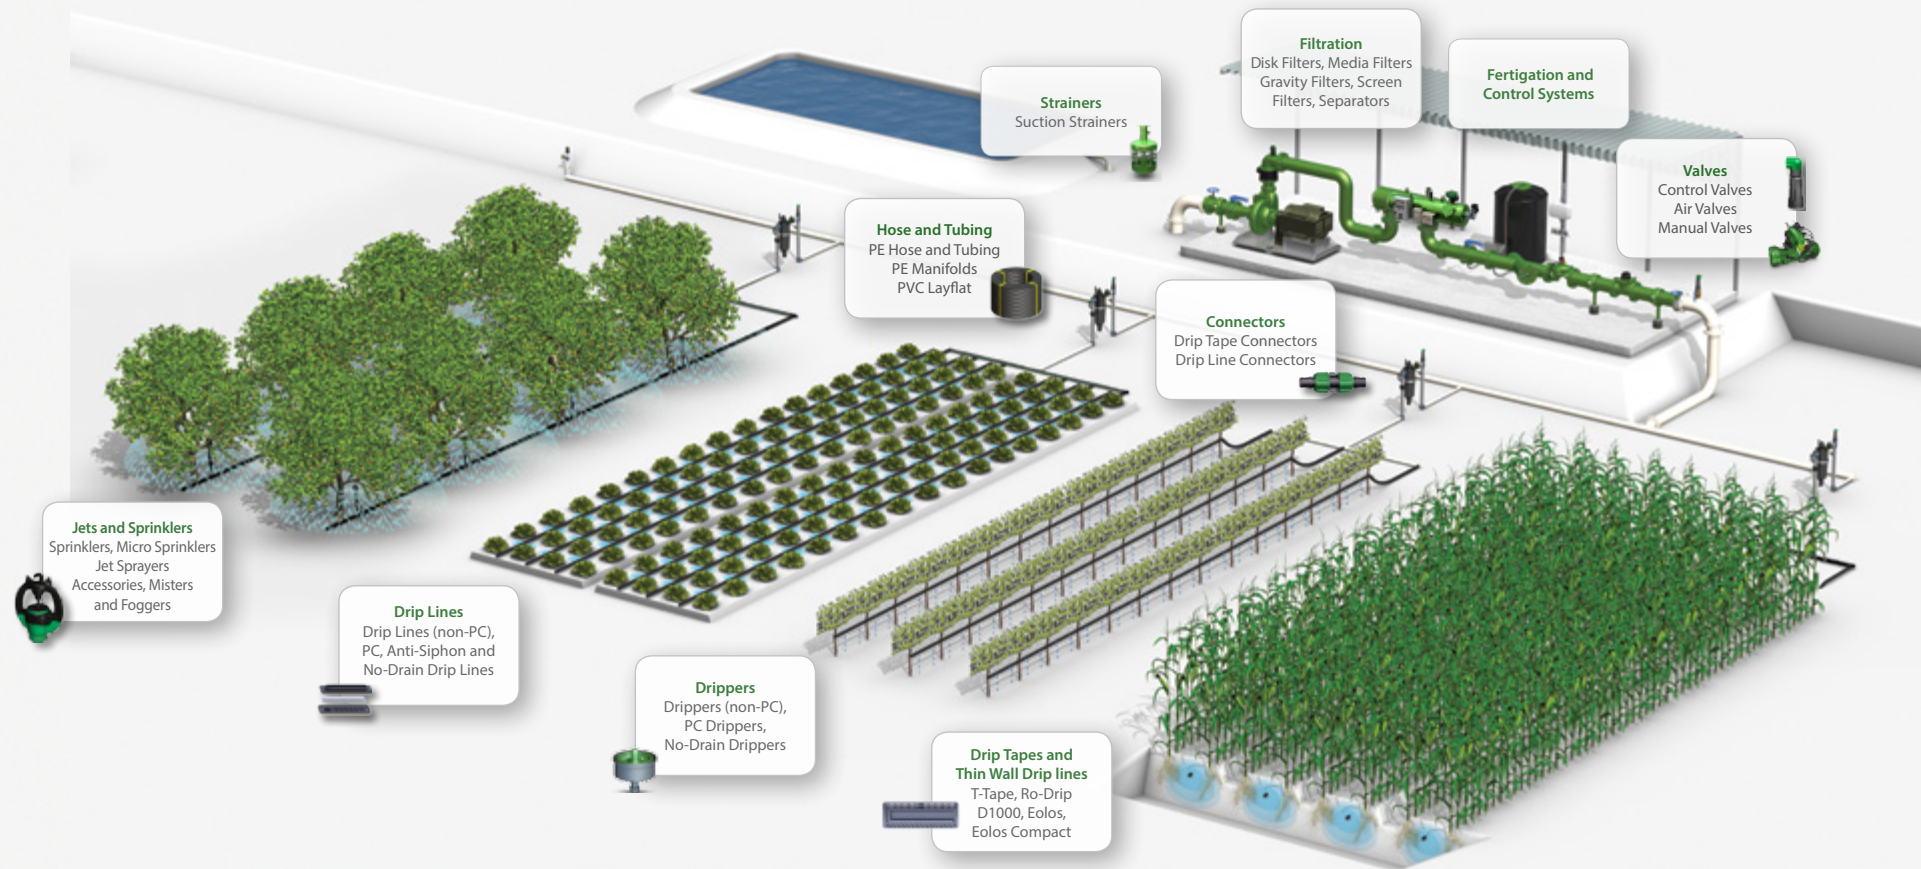

Steeped in our grower heritage and founding role in the micro-irrigation industry, we blend:

A genuine commitment to the success of our partners and the growers they serve

An innovative and fast-moving spirit and integrity in the way we do business.

Industry's Most **Extensive** Product Offering

Designing the right solution for each grower's unique needs

Our Global Presence

15 Factories | 1,700 Employees Worldwide | 3 R&D Centers | 4 Design Service Centers | 2,500 Dealers Worldwide

Full Range of EXPERIENCE:

Across crops, projects, customers and geographies

“ The Rivulis team is always standing by us. Since this [micro-irrigation] technology is new to us, we need their support to manage our crops in the best way. Every time we have needed a consultation or technical advice they have been here for us.”

Benjamin Lupercio Díaz,
Monsanto Field Supervisor,

Development

“ Rugby Farms have been working with Rivulis T-Tape for 18 years. Throughout this time, we have continued to receive excellent service and support. They helped us first adopt drip irrigation in our Bowen properties in North Queensland in 1998. We now use T-Tape on approximately 4,000 hectares on farms throughout Queensland. During this time we have seen improvements in crop yield and quality while reducing input costs of fertilizer, water and power.”

Matt Hood
Director, Rugby Farm Group, Australia

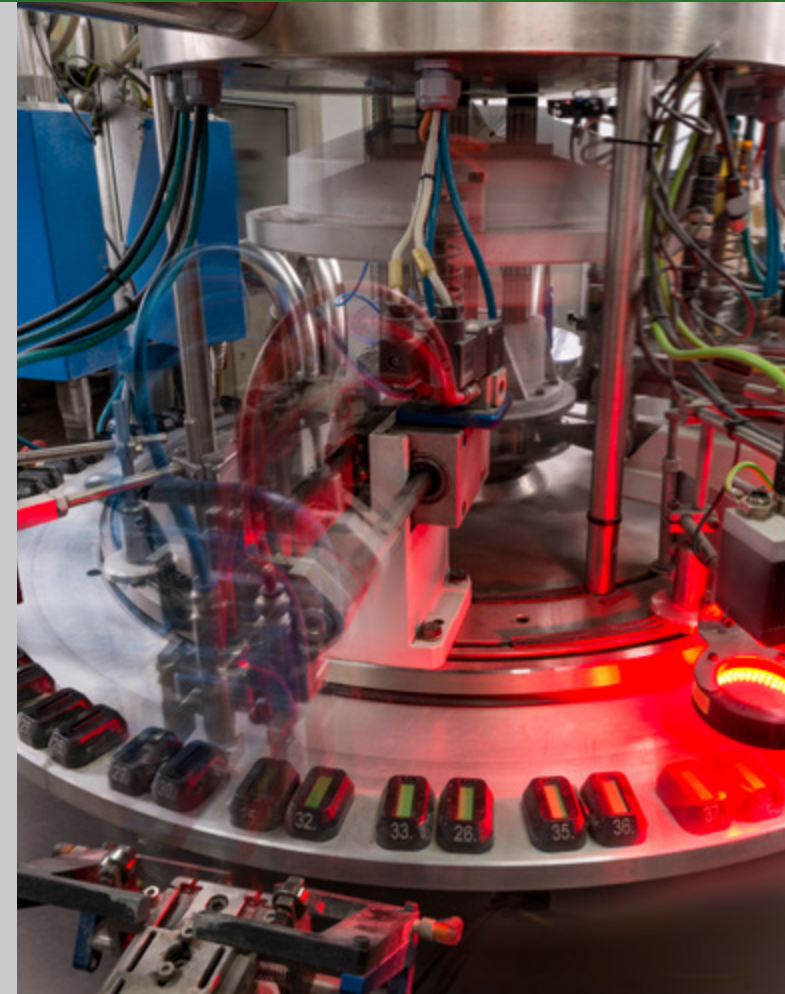

Our **INNOVATION** and **TECHNOLOGY**

Translating Trusted Innovation into Real Grower Results

We pioneered the development of integrated emitter T-Tape and Ro-Drip and molded emitter drip lines: Eolos, Eolos Compact, D1000 and D5000 PC. Now with Manna Irrigation Intelligence, a sensor-free, software-based solution, we are providing site-specific irrigation recommendations at the touch of a button.

Innovation is what we do.

Our focus is on continually providing the highest performance irrigation solutions for growers through multiple Research and Development centers worldwide and rigorous quality lab and field testing along with ISO 9001, ISO 9261, ASNI-5553 and IQNET management systems. You can be assured that each of our products represent the highest standard of innovation, technology and quality.
