

In Ear Monitor Cables

Figure-of-Eight Twisted In-Ear monitor cable formed from durable TPE insulation materials with robust Kevlar reinforced Tinsel conductors. Fitted with straight or angled 2 pin gold-plated earphone connectors and a gold-plated 3.5mm stereo audio connector, Stainless-steel stiffeners are fitted to allow the cable to be formed around the ear. Construction and special coating stop sweat migration and cable discolouration. A slider allows the cable to be held to the neck line.

Cable length: 1400mm

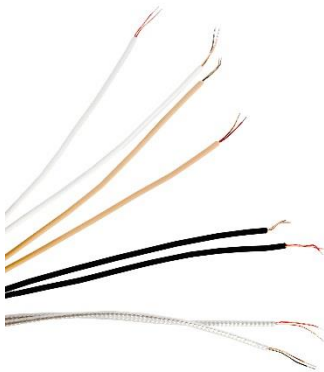

Colours: Clear/Transparent & Black

Straight In-Ear monitor cable formed from a durable TPE insulation material with robust Kevlar reinforced Litz conductors. Fitted with 2 pin gold-plated earphone connectors and a gold-plated 3.5mm stereo audio connector, Stainless-steel stiffeners are fitted to allow the cable to be formed around the ear. A slider allows the cable to be held to the neck line.

Cable length: 1400mm

Colours: Clear/Transparent, Black, White & Beige

Straight In-Ear monitor cable formed from a durable TPE insulation material with robust Kevlar reinforced Litz cable for use by IEM manufacturers. Fitted with a gold-plated 3.5mm stereo audio connector; earphone connections are open-ended and tinned. A slider allows the cable to be held to the neck line.

Cable length: 1400mm

Colours: Clear/Transparent, Black, White & Beige
