

## DISASTER RECOVERY

*Statistics state that 68% of companies that suffered a major disaster were forced to go out of business within 9 months of the disaster taking place.*

**DON'T LET THIS HAPPEN TO YOUR BUSINESS.**

The measures an organisation takes to ensure that they can continue to operate after a disaster, whether natural or the result of a criminal act is known as disaster recovery (DR). Every company should plan for potential disruption. An effective recovery procedure can significantly reduce the impact on your productivity, revenue and customers.

Most companies today rely heavily on computer systems & IT infrastructure to deliver key business processes to their users. If your business relies on its computer systems and has no DR in place, it could cost you a lot more than a contract for DR from AVI Systems, to get your business back on its feet!

Important Factors to consider:

- Where you work?
- Who are your key people?
- What technology you simply can't do without?

Our mission is to ensure your company stays in business when disaster strikes. We provide:

- Immediate replacement and re-instatement of systems.
- A flexible solution that can be adapted to individual client's needs.
- Full disaster recovery audits.
- Recovery plan.
- Testing.
