

98 YEARS OF HISTORY SPEAK IN OUR BEHALF

In 1917, Gabriel Marí Montañana, an enterprising businessman from Valencia, created his first workshop for manufactured metal products. He began an adventure which has been carried on through generations with enthusiasm and determination...

In 1967 **VDA. DE GABRIEL MARÍ MONTAÑANA, S.A.** was founded, today the hub of an association of companies grouped together under the name **PRACTIC**, with production centres in Meliana and Albuixech.

The enterprising family nature of the company has provided the group with a sound work ethic which is the cornerstone of a company culture based on a commitment to customer service and leadership. State-of-the-art technology and an efficient infrastructure are the answers to the growing and comprehensive needs required for local and international recognition for the products which are produced and marketed under the **PRACTIC** brand. Safety, resistance, adaptability, product range and service are qualities we uphold, control and demand of our company through both internal and external controls.

Our processes and products are guaranteed by the strictest quality certification systems (ISO, EC conformity marking, etc.), which are carried out by both our Quality Control Department and by Independent International Organizations (AENOR, LNE, AFITI, ISTITUTTO GIODARNO...)

CE Mark. Product Certificate approved by the European Commission. Found in conformity with directives of the EN 1856 and EN 1859. Certificate of conformity issued after the production control in factory.

I-Net Certificate Certified Management System. This is an international certifying entity. It certifies that our managing system meets the criteria of the ISO:9001 directive.

AENOR Mark. The Spanish Association for Standardisation and Certification. Product certified and approved in Spain by AENOR, certifying body.

CTE. Pipes and tubes designed and fabricated in conformity with the Technic Code of Building.

LNE. Laboratoire National de Métrologie et d'Essais from France. It realizes strict product controls. It realizes product tests found in the directives of NF EN 1856-1, NF EN 1856-2, EN 1859.

Resistencia al fuego EI 180

AFITI. Fire Resistance Laboratory in Spain. For products which require fire resistance. There is a specific line DW (double wall) designed and tested for a 180 minutes fire resistance. Contact with the technical office.

Istituto Giordano. Certifying Laboratory in Italy. It realizes strict product controls. It realizes tests found in NF EN 1856-1, NF EN 1856-2, EN 1859 directives.

Istituto Masini. Certifying Laboratory in Italy. It realizes strict product controls. It realizes tests found in NF EN 1856-1, NF EN 1856-2, EN 1859 directives.
