

2015 PROGRAM

WELCOME TO THE 2015 NORTHERN ONTARIO MINING SHOWCASE

A Welcoming Message From The Honorable Greg Rickford, Minister for FedNor

On behalf of the Harper Government, I am pleased to welcome participants from across Canada and around the world to the 2015 PDAC International Convention, and particularly, to the newly expanded, FedNor-funded Northern Ontario Mining Showcase.

Canada is a leader in mining and mineral exploration, and increasing trade in this key sector will help grow and enhance our economy, support jobs and the long-term prosperity of our nation. As Canada's Minister of Natural Resources and Minister for the Federal Economic Development Initiative for Northern Ontario, I encourage everyone to discover the wealth of products, services and investment opportunities Canada has to offer. The Northern Ontario Mining Showcase is the perfect place to begin your exploration.

I would like to take this opportunity to congratulate the organizers of the 2015 Northern Ontario Mining Showcase for their dedication and hard work in ensuring the success of this important project. Please accept my best wishes for a productive and enjoyable convention.

Sincerely,

The Honourable Greg Rickford, Canada's Minister of Natural Resources and Minister for the Federal Economic Development Initiative for Northern Ontario

A MESSAGE FROM THE ORGANIZING COMMITTEE

To all companies, business owners, executives, dignitaries and other special guests from around the world, we welcome you to the Northern Ontario Mining Showcase.

Led by the City of Temiskaming Shores, this event is the result of a longstanding partnership between various communities and organizations that recognize the unique potential which PDAC affords for the promotion of Northern Ontario and its businesses to the world. Spearheaded in 2010 by the Township of James / Elk Lake, the collaborative effort has since grown and evolved, thanks to the generous support of FedNor, into the Northern Ontario Mining Showcase pavilion that you are visiting today.

While here, we encourage you take the opportunity to network, cultivate relationships, and generate business opportunities and leads with the over fifty participating exhibitors. Learn first-hand why Northern Ontario is deemed to be a centre of mining excellence and, while you're at it...enjoy some of our famous Northern hospitality!

Sincerely,

**The 2015 Northern Ontario Mining Showcase
Organizing Committee**

ABITIBIGEOPHYSICS

ABITIBI GEOPHYSICS

ageophysics.com - THUNDER BAY, ON

Abitibi Geophysics provides a full range of ground and borehole geophysical surveys to the mining industry. We are dedicated to providing the highest quality geophysical data collection processing and interpretation to help our clients find precious and base metals, diamonds, uranium and other mineral resources. We have built an international reputation over 28 years through innovative developments and by delivering competitively priced top-quality products safely and on time.

Pam Coles, Regional Manager

Quality Analysis. Innovative Technologies.

ACTLABS

actlabs.com - THUNDER BAY, ON

Serving the mineral exploration industry for over 27 years, Actlabs is considered to be one of the most innovative laboratories of its kind. Recognized for our work in developing new geochemical technologies for the discovery of blind mineral deposits, we also excel at providing routine assaying and environmental analysis requirements. Accredited to ISO 17025 and/or certified to 9001:2008 our full assay labs in Thunder Bay, Timmins Sudbury, Geraldton, Dryden, and Ancaster, Ontario, perform high-quality accredited or certified analysis. We provide fast turnaround time and responsive and knowledgeable service to our customers.

CLEARLOGIC CONSULTING PROFESSIONALS

clearlogic.ca - TIMMINS, ON

We work with mining firms and exploration companies to improve their corporate social responsibility performance. Resource extraction companies, particularly in mining and energy, are increasingly finding that they require a social license to operate, i.e. approval from a range of stakeholders in order to secure financing government and local support. We help companies in this sector secure their SLO, preparing them to meet stakeholder challenges by developing and executing policy process and communications. This includes: Advising on how to meet ICM and other industry standards of sustainability particularly around stakeholder engagement; Assisting with process development in the Corporate Social Responsibility (CSR) area; Assessing social return on investment (SROI) for companies that want to determine the best ROI on CSR activities (we are one of very few firms offering this); Developing policy frameworks for Aboriginal relations; and more.

Maggie Matear, Director Sustainability & Strategic Planning
mmatear@clearlogic.ca

PNEUMA-TOOL

pneuma-tool.com - NORTH BAY, ON

Pneuma-Tool Inc.

Superior lubrication
 Improved Performance / Profitability

Pneuma-Tool rock drill lubricants represent a small expense for a mine but can help reduce operating costs by increasing drill service intervals, reducing freeze up due to water in the compressed air, and by providing healthier operating conditions for miners. Much like a magnet, Pneuma-tool synthetic lubricants are negatively charged and are attracted to steel components ensuring even and consistent lubrication. Pneuma-Tool can tolerate high operating temperatures to nearly 300°C compared to 200°C for conventional mineral oil. This protects equipment against premature failures caused by high heat operations. Pneuma-Tool is patented in the U.S.A and South Africa; patents pending in Canada and Australia.

TRACKS & WHEELS EQUIPMENT BROKERS INC.

tracksandwheels.com - SUDBURY, ON

Our MineMaster® line of mine utility vehicles was introduced in 1980 and has set the standard of excellence for mine utility vehicles in the mining industry. The MineMaster® name and logo became a Registered Trademark of Tracks & Wheels Equipment Brokers Inc. in 1997 and is well known throughout the world as a symbol of quality and excellence in the mining industry. We consider ourselves professionals in finding "SOLUTIONS" to our customers' problems and in doing so have become experts in the customizing and modifying of equipment to suit our clients' unique needs and requirements. At Tracks & Wheels future advancements are being made to our MineMaster® line of equipment on a continuous basis. We listen to customer input regarding new features they would like to see in our equipment. Listening to the "voice of our customer" allows us to continually improve our equipment.

WABI IRON & STEEL CORP.

wabicorp.com - NEW LISKEARD, ON

The Mine Equipment Division provides design and fabrication of a wide variety of underground conveyances and loading systems for mines throughout North America and around the world. The company's APEO certified Engineering Department designs all types of products which are then fabricated in house in either steel, stainless steel, and/or aluminum to individual customer specifications. In addition to Wabi's ISO 9001 registered Engineering and Fabrication capabilities, the company has a fully equipped, full service Machine Shop on site.

Wabi's Foundry Division is capable of providing castings ranging in weight from 5 to 8,000lbs in over 100 alloys including chrome iron, ni hard, grey iron, steel, alloy steel and stainless steel.
