Hello@goodsignsandprint.co.uk

WHY CHOOSE GOOD SIGNS & PRINT...

DESIGN, MANUFACTURE & PRINT

We manufacture from our 6,000 square foot building in Rhuddlan, offering a complete large format, paper and digital printing solutions with outstanding levels of value and service to our customers. We continuously develop some of our own products that can be branded and finished to provide unlimited personalization for our customers.

QUALITY, CUSTOMER SERVICE & COMPETITIVENESS

Our excellent reputation with over 40 years experience. We operate a management system that complies with the requirements of ISO 9001: 2008 - The international standard for quality management- an accreditation that we have held since 2011.

SIGNS, DISPLAYS AND PRINTS

Our huge product range covers every area of promotional signage, displays and printed media. It extends from our renowned pavement and shop frontage signs through an extensive range of leaflets, flyers, banners and pop up displays.

We thank you for your time to browse through our catalogue and hope you find what you need here. Please feel free to contact us or browse our website if you need any advice.

You. Putting your name
ABOVE & BEYOND

It Is All About First Impressions...

Before your customer steps into your business, what do you want them to think about you and your company?

Making a successful shop sign is all about selecting the right materials which determines how the overall sign looks. There is a whole world of materials available in many different colours, shapes and sizes which gives it that quality look and finishing touch. Even by using some of the economic plastics or composites you are able to make it look like an expensive shop sign.

- CORREX
- FOAM CORE
- FOAMEX
- ALUMINIUM COMPOSITE
- STAINLESS STEEL
- WOOD
- PLYWOOD
- ACRYLIC
- GLASS

CORREX:

This is our most economical plastic material which is ideal for short term signage. With a wide range of thickness to choose from, it creates an affordable option for fayre signage, estate agents signs, shows & temporary construction site notices. They can be cable tied or nailed to posts.

FOAM CORE:

With a soft foam core and each side with a layer of coated card the foam core boards are very light, perfect for ceiling hanging signs, interior displays and folded signs.

FOAMEX:

From 1mm to 10mm Foamex is perfect for more durable signs and external use, is perfect for shop fronts, shapes, displays and many more.

ALUMINUM COMPOSITE:

This material has more sturdy & long lasting properties but it also offers a very high standard finish for your high end looking signs.

STAINLESS STEEL:

What can last longer! High performance when expose to elements, it is perfect for that high end look and comes with a wide range of effects from rustic to mirror.

Did you know we print at 1,440DPI with light-fast and waterproof UV inks

FITTING & FINISHING SERVICE

DID YOU KNOW?

We provide a full fitting service on site, which includes a visit to the site for measuring and safety assessment. Our team are happy to meet up and discuss any requirements for the sign installation

AMAZING!

LAMINATION / ENCAPSULATION

For extra protection for your signage from the elements we provide a lamination service for our products. These processes extend the life span of an uncoated sign, as well as protecting them from minor scraps or scratches.

SHAPED SIGNAGE

Supplying a high impact product or a visually stimulating display is essential for increasing business. Shaped displays have a more inspiring and eye-catching aesthetic, giving the board an extra dimension. (Cut to shape boards have an extra charge due to the additional process)

FITTING & FINISHING SERVICE

FLAT FOAM, ACRYLIC OR ALI COMP CUT LETTERING

Flat cut lettering is a fantastic way to brand your business premises. Using plastic as a fascia surface or also for illuminated signs is a good choice. Typical plastics used are: Foam and Perspex but you can go an extra level and make use of Aluminium composite for your letter giving you a brushed metal, gold or chrome finish option. Our flat cut letters literally stand out from more run-of-the-mill printed signage, especially when combined with our easy-to-use locators that float the letters in front of your wall or backing board.

3D METAL LETTERING, BUILT UP STAND-OFF LETTERING

Metal lettering ultimately gives off a touch of class that you don't get from other signage formats. It denotes performance, reliability and dependability. Our choice of metals range from stainless steel and aluminum for a modern look, to brass for the more traditional look.

ACRYLIC 3D LETTERING, BUILT UP STAND-OFF LETTERING

Acrylic lettering is a fantastic method of signage and is available in a wide range of colours and finishes. It also comes in translucent colours which is great for creating lighting effects. Acrylic lettering is superb for displaying a modern, clean feel and for providing a dash of colour and bringing your sign to life.

VINYL LETTERING AND FASCIA

Vinyl is the most used material in the signage industry as it's cost effective, easy to work with and flexible enough to suit most jobs. It is the material to fall back on when other materials are either too expensive or impractical for the required fascia design.

BESPOKE SIGN TRAYS

ALUMINIUM COMPOSITE SIGN TRAYS

Colours include: Black, White, Red, Yellow, Green, Blue, Cream, Gold, Silver and Bronze. Aluminium Composite is a fantastic material for tray signs as it's light, cost effective and easily to produce for a fast turnaround, ideal for many signs with vinyl graphics, metal text or acrylic shop lettering.

We have the technology and skilled sign makers to make sign trays in any design or shape. If you do need a bespoke shaped sign tray then simply let us know and we'll do the rest.

IT'S A
Good
IDEA!

We can also supply
aluminium frames & trays
to fit your sign, for that finish
look & protect from
the elements.

CUTTING SERVICES

One Machine,
COUNTLESS POSSIBILITIES.

POS, EXHIBITION & DISPLAY

SHAPES & FIGURES:

Cut out shapes are an excellent way to show off your logo or brand with multiple uses such as props, presentation graphics, even for parties and conventions. Printed in full colour on flexible PVC Board these water resistant boards are suitable for outdoor use. All our boards are directly printed and we ensure of a smooth finish on all your print. Multiple sizes are available.

POINT OF SALE:

Experiment with your retail displays while stepping up on your sales. From small counter top designs to leaflet holders, literature stands and large show displays are the perfect pickup for customers.

EXHIBITION & MORE:

Did you know we can actually make eco friendly products even furniture using the most affordable materials, cardboard seems to be the material of choice so if you have a show coming up or need a stand to showcase your products we can help or even if you want to cover a wall or create a partition in your premises without having to go to the expense of building materials.

BUS ADVERTISING

Bus advertising is the most seen type of advertising outdoors with a great impact. We understand that & offer our printing services to advertising companies that create this area of advertising. We have the technical knowledge and good experience gained in the past by working with advertising agencies such as CBS Outdoors.

Our prints can be supplied on various medias such as self-adhesive Greenline films for short-term applications, or our biodegradable boards that will help your company to fulfill the environmental requirements of your customers.

BUS ADVERTISING PRINTED PRODUCTS INCLUDE:

- Headliner
- Bulkhead
- Rear
- Streetliner
- Superside
- T-side

PRINTED BOXES

Box it up! Let your packaging do the talking....

*Struggling with the design?
Check out our website for hints & templates.*

Printed boxes opens up new possibilities, it promotes your brand, finishes off your product or a gift to clients or business partners.

Whether for welcome gifts or forgive aways at trade shows: Our pillow boxes create a symbiosis between companies and their customers in a charming way.

For audio accessories, cosmetics, confectionery, sun and reading glasses, contact lenses or even office supplies, the possibilities are extremely varied.

Our boxes can be made out of 500gms card, single wall cardboard, Foam Core or many more.

*We can also supply:
Mailer Boxes
Gift Pocket Boxes*

SPECIALIZED PRINT

FINE ART ACRYLIC PRINTS:

Imagine having a work of art in your office, gallery or home. Think of the perfect focal point you could have in the room; something that will really complement the rest of your interior design perfectly. Acrylic signs are the perfect substitution for traditional glass. They can be used as lobby signage, directional signage and architectural signage and can be directly printed on.

*Don't be fooled by white vinyl backed prints
All our fine art prints are white ink printed
At the back to avoid the curling of the white
Vinyl backed prints*

FINE ART WOOD PRINTS:

Printing artwork on wood gives you new options for transforming and enhancing spaces and day to day objects such as doors!

Yes, we can print direct onto doors.

In addition, our ability to print with white ink creates the opportunity to print vivid colours to darker materials, so if you fancy using eco friendly materials our wood prints combined with our eco-friendly inks make the perfect product.

LARGE FORMAT SERVICES

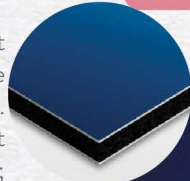

FINE ART DIBOND PRINTS:

Are you looking for an aluminium product that gives your image an extravagant look? Then we recommend a direct print on brushed aluminium. With this product, the whites and very bright parts of your photos are not actually printed; Instead, these areas retain the horizontally brushed appearance of the aluminium surface.

This look gives your favorite images a modern, metallic elegance. Thanks to our UV print technology, your picture on aluminium Dibond is suitable for indoor or sheltered outdoor areas.

SPECIALIZED PRINT

FINE ART TOUGHENED GLASS PRINTS:

Fine Art or colour backed glass is supplied toughened, giving it a high heat tolerance and five times the impact resistance of non-toughened glass. The effect of printing images on to the rear of glass is stunning, and has to be seen to be truly appreciated. It is available for decorative wall display, partitions, kitchen splashbacks and even shower wall panels.

SPECIALIZED PRINT

DOOR PRINTING:

We can print any of your favourite designs directly onto an Internal Door leaving a fantastic photo quality scratch resistant finish.

Our door prints are produced by printing directly onto any flat surfaced door using our UV flatbed printer. As long as your door is flat and under 50mm thick we can print it! If you need us to supply the door we can do provide this service

Choose from a 6 panel moulded door with a woodgrain effect or simply a plain door. Our doors are available in 3 standard sizes
27" 30" 33".

LABELLING SOLUTIONS

Be proud,
PUT YOUR NAME ON IT.

PERMANENT ADHESIVE PRODUCTS

For our permanent labels we use LG and Avery Suertac vinyls which are some of our highest adhesion vinyls, they have been tested and approved for most of the automotive companies; When adhesion is critical and you have foam boxes made out of difficult components such as Polyprop, these labels can be a great solution with their high adhesion properties, they can also stand exposure to the elements and be washable.

We can offer matt or gloss finishes and lamination for extra protection; they can be supplied as individual sets or on A4 or A3 sheets depending on their size.

FEATURES:

Excellent adhesion to low surface energy and textured surfaces

Good sheet stability and layflatness

Excellent printability, conversion, application characteristics

High gloss for superior appearance

Good dimensional stability during use

Up to 3 year outdoor durability

Superb UV, humidity and saltspray resistance

CLEAR OR TRANSPARENT PRODUCTS

We offer these labels as a solution for colour critical labelling, if you want to match your boxes or pallet colours with your labels with our clear vinyl labels this is easy to achieve. Some other uses for these labels or stickers are window or glass graphics and architectural purposes.

FEATURES

- High transparency.
- Excellent printability and handling on selected printers.
- Outstanding durability and outdoor performance.
- Excellent conformability to irregular substrates.
- Superior high gloss appearance.
- The durability is based on middle European exposure conditions.
- Actual performance life will depend on substrate preparation, exposure conditions and maintenance of the marking.

MINIMAL TEMPERATURE RESISTANCE: -40.0 °C

MAXIMAL TEMPERATURE RESISTANCE: 80.0 °C

MINIMUM APPLICATION TEMPERATURE: 10.0 °C

APPLICATION SPECIFICATIONS: CURVE FORMAT, CURVED SURFACES, CORRUGATED SURFACES

ADHESIVE COLOUR: CLEAR

REMOVABILITY: PERMANENT

FIRE RATING: FIRE RATING SELF EXTINGUISHING

SEQUENTIALLY NUMBERED LABELS

We understand how important it is that barcodes scan accurately to minimise any disruptions to your operations or your customers, hence the reason we have devised a system to eliminate error occurrence by ensuring that every barcode is scanned for its readability prior to dispatch. We do this because we know how much the quality of the product is absolutely paramount to the success of your business and your customers.

Our in-depth knowledge enables us to supply high quality barcode labels tailor made to our customers expectations. These labels are usually printed on our matt permanent or removable vinyls, the matt finish of the label allows it to be easy to read, they can include product description, sequence numbering & positioning descriptions and they can also be laminated for extra durability.

DIFFERENT TYPES OF BARCODES

- CODE 39:** THE INDUSTRY STANDARD ALPHANUMERIC CODE.
- CODE 128:** USED EXTENSIVELY IN THE SHIPPING & PACKAGING INDUSTRIES, HIGH DENSITY REPLACEMENT FOR CODE 39.
- EAN-8:** RETAIL BAR CODE WHERE SPACE IS LIMITED.
- EAN-13:** INDUSTRY STANDARD RETAIL CODE.
- QR CODE:** ORIGINALLY DEVELOPED BY TOYOTA FOR CAR PARTS, NOW USED BY THE ADVERTISING INDUSTRY AND CAN BE SCANNED WITH A MOBILE PHONE.

Lets try the potential
SEE WHERE THIS QR CODE LEADS YOU.

ULTRA DESTRUCTIBLE LABELS

Ideal for nameplates, schematics on mechanical and electrical appliances, identification markings, instruction panels for manufacturing equipment, safety inspections and non-removable guarantee labels.

These premium quality cast vinyl labels have been specially developed with a Hi Tack, solvent acrylic adhesive for use in all areas where tamper evidence, security and durability of information is paramount. The increased adhesion properties give excellent tamper proof properties even on typical, low energy surfaces.

It will become tamper proof within twenty minutes. The product is used extensively for security seals of utility meters, identification of automotive and other high value parts, automotive safety information labels, tagging of electronic components and general packaging seals for sensitive products.

TYPICAL APPLICATION AREAS:

- AUTOMOTIVE
- MEDICAL DEVICES
- SOFTWARE
- APPLIANCES
- PHARMACEUTICALS
- WHEREVER YOU WANT LABELS TO STAY ON GUARD
- ELECTRONICS/ELECTRICAL
- WAREHOUSING

PLASTIC TAGS & PLATES

Plastic tags & plates can be supplied with pre-drilled holes or self adhesive backing. We use 900 Micron plastic (our thickest and most durable at just under 1mm), or 400 Micron Plastic which allows flexibility for your tags.

Custom printed with product description and barcodes if needed, made to size with any design required.

They are tough, durable, waterproof and weatherproof, these plates can also be laminated for extra protection.

THE MOST COMMON USES ARE:

- INSPECTION TAGS
- SAFETY TAGS
- WARNING TAGS,
- ASSET TAGS
- TOOL TAGS
- MACHINE TAGS
- EQUIPMENT TAGS
- INFORMATION TAGS
- SERVICE TAGS
- RECORD TAGS
- COLOUR CODED TAGS
- IDENTIFICATION TAGS
- NUMBERED TAGS

.....**PLUS MANY OTHER APPLICATIONS!**

SOLID MATT FOILS LABELS

These labels resemble a brushed chrome polyester finish, ideal for product promotion, nameplates and with its chemical resistant properties is ideal for packaging and bottling products.

Available in mirror gold and silver and printed with hardwearing UV inks, our labels can be printed on metallic finished vinyls which are great for branding, decoration, and product customisation.

In fact, they're great for anything.

REFLECTIVE LABELS

You will get perfect visibility reflective labels during the day and night and in all weather conditions.

We can help you create a range of reflective vinyl labels and reflective decals by colour for colour identification, for motorcycle and bicycle helmets, boats, sports goods, hard hats, luggage, equipments, street poles and number plates, for road and school safety and security utilities.

The reflective vinyl labels are made from a heavy-duty industrial reflective material that is used for industrial and road safety and it is heftier and far more superior to normal vinyl stickers.

PHOTOLUMINESCENT LABELS AND SIGNS

We use the latest photoluminescent technology, meeting or exceeding the industry's most rigorous standards, giving you the best solution for your photoluminescent needs.

We use GloBrite films which are available in polyester or PVC, with a selection of safety grade solutions to meet your unique product specifications. The two formats we provide are either flexible film or a rigid sheet.

We also use Glo Brite promotional grade products which are the complete glow-in-the dark solution for your promotional applications, these are designed to absorb and store ambient light, and are immediately visible in blackout or lowlight environments.

STANDARD HEALTH & SAFETY LABELS AND SIGNS

With our large database of Health and Safety signs & signal designs, we can supply plastic signs or labels that can comply with the regulation standards.

Digital printed health and safety warning stickers are available in a wide range of shapes and sizes.

Warning labels and stickers are self adhesive removable type or the permanent type for indoors or outdoors designed for short or long term durability.

You could opt for lamination for the warning labels and decals for extra protection this adds a protective layer on top of the labels to help against intentional deterioration and acts of exposure to harsh chemicals.

Prices for laminating are available on request and subject to minimum order quantity.

Depending on the application, warning (danger, caution, notice, etc.) decals can vary significantly with color and should be used for each specific type of application (warning-ANSI is orange, danger- ANSI is red). We can print your warning decals on a wide variety of materials depending on your end usage.

For custom digital printed sticky warning labels and stickers, we have the capabilities to turn it around in a timely and affordable manner, without any compromise on quality.

INDOOR/OUTDOOR BANNERS

We offer a wide range of finishing methods for your Outdoor Vinyl Banner including Straight cut & Eyelets, Hemmed Edges & Eyelets, Rod Pockets and Velcro Around Perimeter.

HEMMED EDGES & EYELETS

This is the most popular option for people attaching banners to fences as you simply use cable ties (zip ties) through the eyelets.

ROD POCKETS

Rod Pockets are perfect for creating a banner to use in a march/parade or as a hanging advertisement for your business. We produce 75mm Layflat rod pockets that fit poles up to 45mm in Diameter. The pockets can be put on two opposite sides and the other sides are hemmed for strength.

HEMMED EDGES & VELCRO

We can also finish your banner with Velcro around the perimeter. This finishing method is commonly used for trade shows. If you have a fabric (loop) wall that you can attach hook velcro to you will only need to order with the banner with hook velcro. You can also select to have both the hook and loop velcro supplied, the hook side will be attached to the banner and the loop side can be stuck onto a wall as it comes with a strong adhesive on the back.

FEATHER FLAGS

TEARDROP FLAGS

RECTANGLE FLAGS

Letting your message...
FLY HIGH.

NEED HELP?

Plenty of options for your flag stand, just ask for our advice and we will find you the best suitable option.

All flags feature adjustable draw string tethers for optimal tensioning

Item	O/A Height (mm)	Flag size (mm)
Feather Small	2493	739 × 2244
Feather Medium	3480	790 × 3182
Feather Large	4688	880 × 4330
Teardrop Small	2250	854 × 1979
Teardrop Medium	3340	1124 × 3037
Teardrop Large	4925	1201 × 3917
Rectangular Small	2115	790 × 1810
Rectangular Medium	2897	790 × 2610
Rectangular Large	4020	790 × 3600

FLAG SPECIFICATIONS

Our standard flag material is a 115gsm close weave knitted polyester textile, chosen for its durability and image vibrancy. For optimum performance, a 135gsm 'airmesh' material is also available which, thanks to small holes in the fabric, presents less resistance in the wind.

As standard, our flags are supplied with printed, non-elasticated 'wrap-around' pole sleeves, giving maximum possible printed display area. For extra durability, we also offer a reinforced elasticated black sleeve, which we recommend for flags in exposed and unattended locations, such as roadside and 24/7 retail sites, where the flag may not be taken in overnight.

OUTDOOR PERFORMANCE

Naturally, Flying Banner life span depends on how and where they are used. We recommend taking them in overnight and avoiding use in inclement weather (i.e. 24+ mph wind speeds/Beaufort scale 6). Teardrop flags can last longer than Feather flags as the banner fabric is held in tension and experiences less movement.

Standard 'close weave'
polyester flag material (115gsm)

- FRAME 32: 32mm thick frame
- FRAME 48D: 48mm thick frame
Can also be used for free-standing displays (*Special Order*)
- FRAME 55: 55mm thick frame (*Special Order*)
- FRAME 100: 100mm thick frame.
(*Special Order*)

ALUMINIUM EXTRUSION
LENGTHS ARE AVAILABLE IN 3M
AS STANDARD, HOWEVER THESE
CAN BE EASILY JOINED TO
CREATE MUCH LARGER FRAMES.

BESPOKE DESIGN

We take pride in ourselves for stepping out the box and work with interesting concepts and ideas whilst listening to your needs. We take an easy-going and creative approach to your design needs making the whole process enjoyable for our customers and our design team counts with complementary qualities, from the experience of our Senior Designer Mark and the creative passion of our Junior Designer Jen and working as a team with our production team and management we make sure your designs and further projects go as smoothly as possible.

Whatever you have in your mind our designers are able to put pen to paper and paper to computer to recreate your vision, allowing you to relax and enjoy watching your ideas evolve.

...We really get excited by what we do and would love to help you with your design needs!

Our professional approach and complete 1-1 contact from the first initial meeting with constant email access makes us highly recommended by previous clients.

1. SAVE COLOURS AS CMYK:

Our large format ink-jet printers use CMYK colour to output. If your design work includes Pantones, RGB colours or Duotones we recommend converting these colours to CMYK for optimum results and colour matching.

2. DOCUMENT SIZES & RESOLUTIONS:

Artwork at the following sizes and minimum resolutions:

100% Size at 150 DPI

50% Size at 300 DPI

25% Size at 300 DPI

3. FONTS:

Please either include or embed all fonts when sending the artwork. In the case of JPEG files, fonts will not be required.

4. SCANS:

All your scans should be high resolution and saved as CMYK colour. If possible

we suggest keeping scans to a minimum of 150 DPI finished size. If you are supplying artwork, we can accept hard copy for scanning from original photographs.

5. PROOFS:

If supplying your own pop-up display artwork we suggest sending either a hard copy colour proof or an Adobe PDF with your artwork. If you choose to use us for your design preparation we will supply proofs either by hard copy or via email as an Adobe PDF document. If you require a set of reduced size colour proofs before we run to print your pop-up display graphics we can organise this at a small cost.

6. SENDING YOUR FILES:

You can send your artwork in one of two ways: Sharing your file with us via drop box, just use our email address hello@goodsignsandprint.co.uk by email (please ZIP all files before sending).

7. SUPPORTED ARTWORK FORMATS:

Adobe Acrobat (300 DPI files) - Adobe Illustrator -
Adobe Photoshop
Adobe InDesign - Corel Draw - Jpeg - Eps

THANK YOU FROM
