one company > a world of innovation

Whether you require one product or a total end-to-end solution, Molex Premise Networks is committed to assisting you in making the right choice for your business requirements.

Our team of technical experts will provide you with a true and honest assessment of your business requirements and design a customised system to support your business today, whilst providing the necessary performance to future-proof your requirements for tomorrow.

By choosing Molex you can be safe in the knowledge that whatever the project, our goal is to ensure that your upgrade to a new system runs smoothly. We work closely with our Business Partners to maintain the highest standards, regardless of the complexity of the project.

This commitment to our customers is reflected in our 25 year System Performance and Application Assurance Warranty and the ongoing support we provide to our business partners.

Whether you require one product or a total end-to-end solution, we are poised to deliver what you need, when you need it.

MOLEX IS COMMITTED TO PRESERVING THE GLOBAL ENVIRONMENT

e c o c a r e

We understand that preservation of the global environment is an important issue for everyone, and that our business operations have an effect on the global environment. As a responsible corporate citizen, we are committed to using environmentally conscious practices during the design and manufacture of our products. These environmental practices are designed to ensure that Molex is developing sustainability through environmental preservation activities.

- ✦ Establish and implement effective Environmental Management Systems
- ✦ Comply with all relevant environmental, health and safety, legal and other requirements
- ✦ Operate our facilities in a way that considers the efficient use of natural resources and provides a safe and healthy workplace.
- ✦ Develop products that minimise environmental impact
- ✦ Continually improve our environmental, health and safety performance and operations
- ✦ Advise Molex employees and business partners of the importance of adhering to this Policy
- ✦ Reduce or eliminate emissions and discharges through pollution prevention activities: Prevent injury and illness through management practices
- ✦ Educate employees to work in an environmentally responsible and safe manner

Our worldwide manufacturing sites are certified to the ISO 14001 environmental management system standard, which requires that a broad range of environmental processes and policies be in place to minimise environmental impact and maintain compliance with environmental regulations.

Bringing Advanced Physical Layer Lifecycle Management to Enterprises Worldwide

Molex Premise Networks (MPN) commits to delivering comprehensive Advanced Physical Layer Lifecycle Management (APLLM) solutions providing enterprises with the ability to manage their Physical Layer infrastructure with a level of visibility and integration unique within the structured cabling industry. Using a combination of software, electronics, traditional data transport solutions and Infrastructure Deployment Services, APLLM allows businesses to track and manage their infrastructure investment starting from planning through to design, procurement, installation, daily management of moves, adds and changes (MACS) and the eventual upgrade of that infrastructure including attached assets.

The Technology Behind APLLM

The MPN portfolio is comprised of our innovative MIIM solutions alongside a full complement of UTP, FTP copper and fibre Data Transport Systems (DTS) - which integrate seamlessly to add exciting new dimensions to network management.

MIIM™ Solution

MIIM is a comprehensive solution focused on enhancing network management at the physical layer, network security, asset management and increased productivity and visibility.

In addition to MAC & work order management, the solution detects network device connect/disconnects regardless of power or broken cables and MIIM's Device Discovery Toolkit, including Global, Directed and Event-Driven Discovery populate the MAC and IP addresses of discovered devices to the MIIM database, enabling continuous monitoring & mapping the physical layer. Compelling MIIM differentiators include true centralised management of the channel beyond the wire closet out to remote work areas regardless of LAN topology, guided patching impervious to human error and collection/reporting/alarming of real time Layer 1 data, registering minimal impact on network resources.

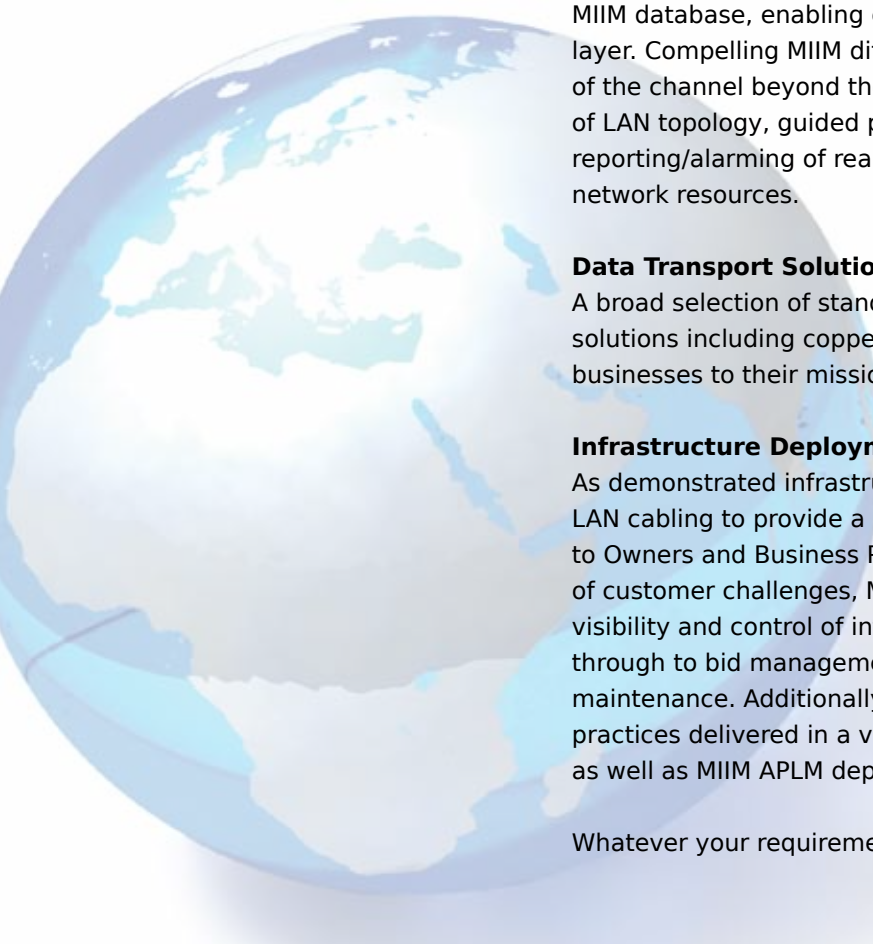

Data Transport Solutions

A broad selection of standards-compliant, end-to-end structured cabling solutions including copper, fibre and free space optics that connect businesses to their mission critical applications.

Infrastructure Deployment Services

As demonstrated infrastructure experts, MPN leverages our know-how in LAN cabling to provide a suite of solutionbased services which deliver value to Owners and Business Partners. Guided by our experience and knowledge of customer challenges, MPN offers Project Control services driving new visibility and control of infrastructure deployments from planning and design through to bid management, project implementation and even ongoing maintenance. Additionally, MPN provides Solutions Training on installation practices delivered in a variety of convenient formats, including e-learning, as well as MIIM APLM deployment services.

Whatever your requirement, we have a solution that supports it.

Advanced Physical Layer Management

MIIM™

A

The MIIM solution enables complete real-time monitoring of the physical channel, while supporting easy communication to SNMP based network management tools. MIIM's Device Discovery Toolkit, including Global, Directed and Event-Driven Discovery populate the MAC and IP addresses of discovered devices

to the MIIM database, enabling continuous monitoring & mapping the physical layer. It facilitates work order management, including scheduling and recording of moves, adds and changes (MACs), and enables patch guidance for technicians, with LEDs on the patch panels to indicate ports with pending work orders.

MIIM Scanner

MIIM scanners monitor activity on a MIIM enabled system. Each 1U scanner can be connected to up to 48 patch panels, providing monitoring of up to 1152 separate physical channels. Standard RJ45 patch cords are used as the data bus connection between scanners and patch panels.

MIIM scanners can be configured and activated independently of the software. When the MIIM application software is connected to the scanner, it "discovers" active hardware and devices on the network and uploads this information onto the MIIM application software. Scanners monitor the connection state of MIIM channels and pass state change data to the MIIM application software. This triggers MIIM's Event-Driven Discovery function which queries the associate switch and updates the software.

- Event-Driven Discovery enables continuous updating of MIIM with minimal impact to the network
- Simple scanner configuration
- Auto discovery of active hardware/devices & automatic database population
- Mission critical port disconnection alerts
- Low power consumption with no fans or cooling required
- Automatic Rediscovery/Re-synchronization after outage or system failure
- Transaction queues record events for later delivery if the scanner is disconnected from the MIIM application
- Data bus connection between the scanner and patch panel is via an industry standard RJ45 patch cord

PowerCat Patch cords Page B-9

Order No.	SAP No.	Description
IMS-00100	183240000	MIIM 576 Channel Scanner
IMS-00101	183240008	MIIM 96 Channel Scanner

MIIM G2 Patch Panels

MIIM G2 Patch Panels are used within the MIIM System. Each 1U 24 Port Patch Panel has one data bus connection port located on the rear of the panel.

The data bus connection port connects the panel to the MIIM scanner via a standard RJ45 patch cord. The patch panel is used by the MIIM system to track connectivity in the patch zone and work area. LED status indicators on the panel show status of connectivity between the panel and the scanner and also provide panel guidance for work orders. Each panel contains 24 MIIM jacks which can be removed from the panel to be terminated individually with standard punch down tools. MIIM panels function as a standard patch panel when not connected to the MIIM system.

- 24 Ports 1U
- EIA 568A/B wired
- Standard 19" rack mount
- Two power status indicators to ensure proper connection of power supply from the scanner
- Data bus connection to the MIIM Scanner is via an industry standard RJ45 patch cord
- Integral cable management shelf ensures bend radius compliance
- International hardware kit contains both ANSI and metric hardware
- Can be terminated using industry standard punch-down tools
- RoHS Compliant

PID-00268	183200013	MIIM G2 Category 6, 1U, 24 Port Patch Panel 568 A/B

MIIM Ready G2 Patch Panels

MIIM Ready G2 Patch Panels are a cost effective solution to provide Category 6 or 6A connectivity while providing an upgrade path to full MIIM capability. The panel as delivered functions as a conventional patch panel and provides the capability to be upgraded to a fully functional MIIM panel with addition of the IMD-00001 MIIM electronics module. Each panel contains 24 MIIM jacks which can be removed from the panel to be terminated individually.

- MIIM Ready panels function as a conventional patch panel as delivered
- MIIM E-module connection with the MIIM scanner is via an industry standard RJ45 patch cord
- Field configurable for 568 A/B
- Integral cable management shelf ensures bend radius compliance
- International hardware kit contains both ANSI and metric hardware
- Can be terminated using industry standard punch-down tools

Advanced Physical Layer Management

MIIM™

A

MIIM E2 Intelligent E-Module

The MIIM E2 Intelligent E-Module enables MIIM Ready G2 panels to sense adds, moves, and changes across all 24 ports on the panel. The E-module contains LED's to provide guidance for work orders on MIIM panels. Modules can be easily added to MIIM ready panels to activate full MIIM capabilities. The E-Module contains an RJ45 jack to connect it to the MIIM scanner via a standard patch cord. MIIM Panels with E-modules that are not connected to a MIIM scanner function the same as a standard patch panel.

- MIIM E-Modules provide intelligent management for MIIM G2 panels
- MIIM E-Modules are easily added and removed from any MIIM G2 panel
- LED's supply guidance for work orders and panel status
- MIIM E-modules are powered by the scanner

Order No.	SAP No.	Description
IMD-00001	183240012	MIIM E2 Intelligent E-Module

MIIM 24 Port Duplex LC Fibre Panel

MIIM Fibre Optic panels are used within the MIIM System. The adapter interface is 24 duplex LC adapters. Each 1U 24 Port enclosure has one data bus connection port located on the rear of the panel that connects the panel to a MIIM scanner via a standard RJ45 patch cord. Two in-built power status indicators on the panel ensure visibility of power from the scanner. When connected to a MIIM scanner, the panels detect connection activity on each duplex LC port. The patch panel works as a conventional patch panel when not connected to the MIIM system

- Two power status indicators to ensure proper connection of power supply from the scanner
- Uses standard RJ45 patch cords for data bus connection to the MIIM scanner
- Panel options for Singlemode and Multimode
- Slide out cable management shelf
- Recessed mounting provides adequate space for routing patch cords, even in free standing enclosures with the front door closed
- ANSI and international metric hardware kit provided

Order No.	SAP No.	Description
RFR-00300	183230000	MIIM Singlemode 24P Duplex LC Fibre Patch Panel
RFR-00301	183230001	MIIM Multimode 24P Duplex LC Fibre Patch Panel

MIIM Fibre Patch Cords

MIIM Fibre Optic Patch Cords are used to connect MIIM fibre panels within the MIIM System. MIIM patch cords incorporate a monitoring cable along with contact points on the patch cord connectors that activate the detection mechanism in the MIIM patch panel. When used with the rest of the MIIM system, the patch cords will provide connectivity information to the MIIM system.

- Monitoring contact interfaces with MIIM fibre patch panels
- MIIM patch cords are constructed from two fibres contained in an outer jacket
- Available in Singlemode (OS1) and multimode (OM1, OM2, OM3) constructions

Advanced Physical Layer Management

MIIM™

A

MIIM Outlet Terminator

The MIIM Outlet Terminator is used at the work area outlet to allow the MIIM system to monitor the connection of the horizontal cable to the work area outlet. The MIIM Outlet Terminator is effectively a stuffer cap with in-built components that work exclusively in the Molex MIIM solution. It enables the MIIM system to determine circuit integrity to the work area outlet. Communications between the MIIM Outlet Terminator and the MIIM Scanner are transparent to the data channel and operate outside the Ethernet bandwidth. The MIIM system can function independently of the MIIM Outlet Terminator. However, the terminator provides enhanced functionality in terms of monitoring spare or unused channels.

- Confirms circuit integrity between the MIIM patch panel and the work area outlet
- Enables monitoring of changes and detects the presence of devices at the outlet
- Transparent to the Data Channel
- RoHS Compliant

Order No.	SAP No.	Description
IMT-00100	183220000	MIIM Category 6 Outlet Terminator (pack of 24)
IMT-00101	183220001	MIIM Category 6A Outlet Terminator (pack of 24)

MIIM Application Software

MIIM Application Software is a client server based Software program and is the central data manager for the MIIM System. It manages OSI Layer 1 assets and provides instantaneous information to the IT Manager regarding connectivity on MIIM enabled channels. The software documents planned and unplanned changes to the network. It allows continuous monitoring of the complete physical channel from work area outlet to the active network device. It automatically monitors all connections/disconnections, updates all MACs to the database, identifies and confirms port availability and notifies the IT Manager of all unscheduled or unauthorised network changes. Event-Driven Discovery gathers device information attached to outlets and is triggered by updates to the scanner. The software allows global network access and cost effective network management.

- Hierarchal view of entire enterprise layer 1 infrastructure to the port/outlet
- Event monitoring of all connections/disconnections
- Event-Driven Discovery keeps data current and minimises network bandwidth usage
- Monitors connectivity and devices, even if the device is turned off
- Enables guided patching
- Search feature to easily locate assets and information
- Event logs for audit trails
- Layer 1 assets linked to building maps
- Open systems architecture can link with other network management applications
- Suite of management reports available
- Unrestricted number of users per license

Advanced Physical Layer Management

MIIM™ICS

Part of the MIIM solution, MIIM ICS enables the deployment of an intelligent solution to an existing network immediately without impacting on restricted budget or crucial resources. Businesses can easily integrate intelligent capabilities with this simple to use solution.

MIIM ICS can transform any businesses in any sector, offering all the benefits of an intelligent advanced physical layer managed network without the hassle.

MIIM ICS 1 Gigabit 24 Port Patch Panel

MIIM ICS G2 1 Gigabit Patch Panels are used within the MIIM System. Each 1U 24 Port Patch Panel includes an E-module with one data bus connection port located on the E-module. The data bus connection port connects the panel to the MIIM scanner via a standard RJ45 patch cord.

MIIM ICS panels are installed in front of existing panels. Each MIIM ICS jack has a pigtail that connects the MIIM ICS port to the corresponding port on the panel in the rack. Threaded standoffs are included with the panel to mount the MIIM ICS panel in front of the patch panel in the rack.

- Power Status LED's indicate connection and communication with the MIIM Scanner
- Port Status LED's provide guidance to complete work orders
- MIIM E-module connection with the MIIM scanner is via an industry standard RJ45 patch cord
- Jacks are field configurable for 568 A/B
- Mounting standoffs available for ANSI and metric hardware
- MIIM ICS panels attach directly to existing patch panels

Copper Solutions

PowerCat™ 6A Shielded

B

Designed to support 10 Gigabit Ethernet (10GBase-T), Category 6A is an optimum speed structured cabling solution offering superior performance where speed, reliability, future proofing or long term tenancy is required. It is the system of choice for Data Centres, financial institutions and enterprises requiring the

maximum performance level for their businesses. The PowerCat 6A shielded solution is designed specifically for high speed data transmissions demanding little room for error, whilst offering exceptional alien crosstalk suppression, excellent insertion loss protection and protection against Electromagnetic Interference (EMI). (RoHS Compliant)

PowerCat 6A DataGate™ Shielded Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat 6A System. The product offers superior alien crosstalk suppression, excellent insertion loss protection and enhanced electromagnetic interference (EMI) protection. Protection is provided by utilising a robust die-cast zinc alloy connector body housing.

This shielded jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual colour coded for either 568A or 568B wiring schedules and is backwards compatible with Shielded C6 and C5e systems. Also available in side entry variation, ideal for use in work area outlet applications with limited back box space.

- 360° Shielded RJ45 Jack
- Robust die-cast zinc alloy housing
- Dual Colour coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts colour coded port identification labels
- Supplied with all C6A patch panels and wall outlets
- Available in either traditional rear or side entry variations
- Side entry jack allows cable termination either side
- 100% factory tested
- RoHS compliant
- Molex 4 Pair Termination Tool or industry standard 110 termination tool compatible

PowerCat Unloaded DataGate Panels

The Molex PowerCat Unloaded DataGate Patch Panels can be configured to provide the exact number of modular ports required. DataGate Category 5e UTP, Category 6 UTP, or Category 6A shielded jacks can be terminated to cable and then snapped into this DataGate patch panel. The patch panel and rear cable manager are constructed of cold-rolled steel for strength and durability.

- Available in 1U 24P Flat, 1U 24P Angled, 2U 48P Flat, 2U 48P Angled
- Easy snap in DataGate UTP or Shielded Jacks (sold separately)
- Modularity provides installation flexibility
- Front portable labelling
- Individually removable patch panel ports
- Removable cable management shelf ensures bend radius compliance
- ANSI and metric hardware kit included
- Grounding screws included

1U Multi-Function Enclosure Page F-5

PowerCat 6A Unloaded DataGate™ Adapter Plate

The Unloaded Adapter Plate 3 x C6A DataGate Jacks is designed for applications where fibre and copper are required in a single panel. The Adapter Plate is designed to accept the DataGate Category 6A Jack (part number KSJ-00062-0*) and snap fits into the Multi-Functional or Specification Grade Fibre Optic Panels. The Adapter Plate can also be combined with Fibre Optic 6 Fibre Adapter Plates for multi-media applications.

- Accommodates 3 x PowerCat 6A DataGate Jacks
- For use within Molex Multi-Functional or Specification Grade Fibre Panels
- Allows multi-media flexibility within a single enclosure/panel

PowerCat 6A Patch Cords

Molex PowerCat 6A Shielded Patch Cords are key components of the PowerCat 6A shielded end-to-end solution. Designed to support high speed 10GBASE-T networks, they are also backward compatible with 10/100/1000BASE-T networks. The patch cable is made from high quality four pair 26 AWG stranded copper wire. Available in a range of colours and lengths, PowerCat 6A patch cords are pre-terminated with RJ45 plugs and feature anti-slug slim strain relief slip on boots.

- 4 pair 26AWG shielded stranded copper cable
- Pre-terminated with RJ45 plugs
- Slim clear anti-slug slip on boots
- Suitable for EIA 568A/B wiring applications
- LS0H sheath
- 10G Performance when installed as a complete PowerCat 6A Shielded System
- RoHS Compliant

PowerCat 6A U/FTP Cable

■ Supports high speed data network applications such as 10-Gigabit Ethernet (10GBASE-T)
 ■ Enhanced performance individually screened 4 pair U/FTP LS0H cable
 ■ Minimises alien crosstalk, provides excellent signal isolation and provides superior electromagnetic interference (EMI) protection.

- ETL verified to TIA/EIA-568-B.2-10 Category 6A standard
- Resistant to alien crosstalk
- Colour coded for ease of termination
- 500m Reel

Copper Solutions

PowerCat™ 6A Shielded

Category 7 Cable

Category 7 S/FTP Cable (each pair has individual shield plus a common shield for the cable made of tinned copper braid) is a complementary product for shielded PowerCat 6 and PowerCat 6A (with limitations) systems.

The cable is suitable for horizontal cabling in high speed data transmission networks as well as vertical cabling for data. Small outer diameter, high flexibility and superior electrical performance are key features of the product.

- Transmission performance C7 in a 1-600MHz range as per IEC 61156-5
- Provides significant margins for NEXT, Power Sum NEXT, PowerSum ELFEXT
- Alien NEXT is significantly reduced so it can be used for 10G Application
- Small outer diameter, high flexibility
- 1000m lengths on wooden, fully recyclable reels

Order No.	SAP No.	Description
CAA-00358	Consult Molex	Category 7 S/FTP Cable, 4 Pairs 23AWG LS0H, Violet - 1000m

PowerCat 6A Contura™ Module

The PowerCat 6A Contura Module was designed to combine aesthetics with functionality. The contemporary design of the product is ideal for the modern office and provides the user with the flexibility of modularity. Compatible with Contura wallplates, the module is supplied with a protected label facility and the angled design reduces patch cord bend radius. This product is shipped complete with the shielded C6A DataGate™ jack. Individual ports may be colour coded for site-specific network administration by fitting connector icon labels (part no. CSP-00021-0**).

- Contemporary design
- Protected labelling facility
- 50 x 22mm fascia
- Compatible with Contura wallplates
- Supplied with DataGate C6A jack

MGB-00006-02	0183010004	PowerCat 6A Angled Contura RJ45 Module, 568A/B Shielded - White

PowerCat 6A Euromod™ II Module

The Euromod modular system provides a flexible and versatile method of installation, allowing the user the choice of installing as many data outlets as required. Compatible with the Euromod range of wallplates, the module is supplied with a protected label facility and the angled design reduces patch cord bend radius. The product is shipped complete with the shielded C6A DataGate jack and 25 x 50mm fascia. Individual ports may be colour coded for site-specific network administration by fitting connector icon labels (part no. CSP-00021-0**).

- Protected labelling facility
- 25 x 50mm fascia
- Compatible with Euromod wallplates
- Supplied with DataGate C6A jack
- Available in either traditional rear or side entry variations
- Side entry jack allows cable termination either side

Copper Solutions PowerCat™ 6A Shielded

All of Molex's most popular modules now feature the PowerCat 6A connector. This superior connector features a unique integral shutter that not only protects the connector from dust and contaminants, but its spring-loaded design also ejects improperly seated patch cords.

The PowerCat 6A connector offers 10G channel performance when installed in an end-to-end PowerCat 6A shielded System. Modules are also available in traditional rear or side entry variations, ideal for use in work area outlet applications with limited back box space

PowerCat 6A Tool-less Keystone Shielded Jack

The PowerCat 6A Tool-less Keystone Shielded Jack is designed for installation in systems accepting Keystone standard modules. The jack is terminated without the use of a Punch Down tool. Cables are cut and then pressed into IDC while closing the socket housing. The module is designed for use in two connector permanent link or channel configuration, with the Molex PowerCat 6A DataGate patch panel installed in a distribution closet and keystone modules installed in telecommunications outlets.

- Designed for 360° shielding and protection against electromagnetic interference
- RJ45 Jack
- Easy and fast termination
- Ability to attach the cable in either 568A or B sequence
- Meets TIA/EIA-568-C.2 and Class EA acc. ISO/IEC 11801 (Ed2.2) and EN 50173-1:2009/A1 requirements
- Can be combined with DataGate panels in two connector permanent link or channel configuration

PowerCat 6A MOD-Clip™ DataGate™ Jack

The PowerCat 6A MOD-Clip DataGate jack offers superior alien crosstalk suppression, excellent insertion loss protection, and provides enhanced electromagnetic interference (EMI) protection by utilising robust die-cast zinc alloy connector body housing. This shielded connector also features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The shielded connector is dual colour coded for either 568A or 568B wiring schedules.

- ETL Verified
- Robust die-cast zinc alloy housing
- Dual Colour coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Spring-loaded shutter
- Available in either traditional rear or side entry variations
- Accepts colour coded port identification labels
- RoHS Compliant
- Designed for use with Molex's MOD-Clip wallplates
- Designed to fit the Clipsal®, HPM® and PDL® system of wallplates

Copper Solutions PowerCat™ 6 UTP

Molex's Category 6 Product Range, PowerCat 6, is designed to meet or exceed the requirements of current international standards and has been independently tested and verified by ETL SEMKO for Category 6 component compliance.

The solution features cable, patch cords, patch panels and wall outlet solutions suitable for a wide range of territorial requirements.

PowerCat 6 UTP DataGate™ Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat 6 System performance.

This jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual colour coded for either 568A or 568B wiring schedules and is backwards compatible with C5e systems.

- Dual Colour coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts colour coded port identification labels
- Molex 4 Pair Termination Tool or industry standard 110 termination tool compatible

PowerCat Unloaded DataGate Panels

The Molex PowerCat Unloaded DataGate Patch Panels can be configured to provide the exact number of modular ports required. DataGate Category 5e UTP, Category 6 UTP, or Category 6A shielded jacks can be terminated to cable and then snapped into this DataGate patch panel. The patch panel and rear cable manager are constructed of cold-rolled steel for strength and durability.

- Available in 1U 24P Flat, 1U 24P Angled, 2U 48P Flat, 2U 48P Angled
- Easy snap in DataGate UTP or Shielded Jacks (sold separately)
- Modularity provides installation flexibility
- Front portable labelling
- Individually removable patch panel ports
- Removable cable management shelf ensures bend radius compliance
- ANSI and metric hardware kit included
- Grounding screws included

PowerCat 6 Consolidation Point Enclosures

Consolidation Points provide increased flexibility and economy for installations where open office spaces require frequent re-configuration. They feature 6 or 8 shuttered PowerCat 6 modules and allow ready access to the Solid Cable Assembly Links. The product is TIA/EIA TSB75 compliant. Two enclosures may be interconnected, allowing for expansion.

- Allows moves, adds and changes without re-terminating and re-testing of cable
- 6 or 8 port DataGate modules
- Rugged graphite grey enclosure
- TSB 75 compliant

PowerCat 6 Euromod™ II Module

The Euromod modular system provides a flexible and versatile method of installation, allowing the user the choice of installing as many data outlets as required. The modules are fully assembled units featuring the Molex shuttered DataGate™ connector in a 25 x 50mm fascia. Individual ports can also be colour coded for site-specific network administration using connector icon labels.

- Shuttered RJ45 DataGate connector
- 25 x 50mm fascia

PowerCat 6 MOD-Clip™ DataGate™ Jack

The MOD-Clip DataGate jack is designed to maintain clean and secure connections. The RJ45 jack features a patented spring-loaded shutter which protects it from dust and contaminants as well as providing tactile feedback. The spring-loaded shutter pops out an improperly seated patch cord - all with single-handed plug-in and removal. Available in seven colours, MOD-Clip DataGate jacks utilise patented IDC V-shaped contacts that flex not fatigue when terminated.

- ETL Verified
- Patented spring-loaded shutter prevents incomplete mating
- IDC contacts that flex not fatigue when terminated
- Pointed IDC towers to speed termination and enhance cable retention
- 568 A/B wiring configuration
- Allows rear and side entry cable termination
- RoHS Compliant
- Designed to fit the Clipsal®, HPM® and PDL® system of wallplates

Copper Solutions

PowerCat™ 6 Shielded

B

The PowerCat 6 FTP System features the FTP DataGate™ Category 6 connector which provides 360° shielded protection by utilising a two piece tin/nickel plated brass can that encloses the RJ45 connector.

Designed to meet or exceed the requirements of current international standards.

PowerCat 6 DataGate Jack

The DataGate Jack is the cornerstone of the Molex Premise Networks PowerCat 6 shielded system performance. The jack provides 360° shielded protection by utilising a two piece tin/nickel plated brass can that encloses the jack.

This shielded jack features a unique spring-loaded shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The product is dual colour coded for either 568A or 568B wiring schedules and is backwards compatible with C5e systems.

- 360° shielded RJ45 jack
- Dual Colour coding allows 568A/B wiring
- Patented IDC V-Shaped contacts that flex not fatigue when terminated
- Patented spring-loaded shutter
- RJ-11 compatible
- Accepts colour coded port identification labels
- Supplied with all PowerCat 6 patch panels and wall outlets
- Molex 4 Pair Termination Tool or industry standard 110 termination tool compatible

DataGate Shutter Operation

PowerCat 6 Shielded DataGate Patch Panel

The PowerCat 6 Shielded Patch Panel features the shuttered shielded DataGate connector, which is dual colour coded for either 568A or 568B wiring. The panel comes complete with an integral cable management tray for cable strain relief and tidy cable dressing. Port numbering is provided on the front and rear of the panel and individual ports may be colour coded using connector icon labels for site-specific network administration.

- 24 Ports 1U
- Rear cable management included
- Colour coded port option
- 360° shielded shuttered DataGate connector
- 568A/B wiring schedule
- Graphite grey finish

PowerCat 6 Shielded Tool-less Keystone Jack

The PowerCat 6 Shielded Tool-less Keystone Jack is designed for installation in systems accepting Keystone standard modules. The module is terminated without the use of a Punch Down tool. Cable is cut and then pressed into IDC while closing the socket housing. The module is designed for use in two connector permanent link or channel configuration, with the PowerCat 6 shielded DataGate patch panel installed in a distribution closet and keystone modules installed in telecommunications outlets.

- Designed for 360° shielding and protection against electromagnetic interference
- RJ45 Jack
- Easy and fast termination
- Ability to attach the cable in either 568A or B sequence
- Meets TIA/EIA-568-C.2:2009 and Class E acc. EN 50173-1:2011 and ISO/IEC 11801:2011 (Ed2.2) requirements
- Can be combined with DataGate panels in two connector permanent link or channel configuration

PowerCat U/UTP Cable

PowerCat Category 5e U/UTP 4 Pair cable has been designed to support high speed data transmission systems. The cable is available in PVC and LS0H sheaths on a 305m Reel-in-a-Box designed to facilitate transportation and cable access.

- U/UTP 4 pair PVC and LS0H cable
- Colour coded for ease of termination
- Independently tested
- 305 metre box

PowerCat UTP MOD-SNAP™ Modules

The PowerCat MOD-SNAP modular system provides a flexible and versatile method of installation, allowing the user the choice of installing as many data outlets as required. Providing a fascia size of 38.5 x 25mm (BT6C) MOD-SNAP modules are ideal for floorbox applications.

The Molex Category 5e RJLP RJ45 connector offers a low profile, space saving design that enables easy installation in shallow backboxes and trunking.

- Fascia size 38.5 x 25mm (BT6C)
- Cut out dimension 37.5 x 22mm
- Category 5e RJ45 RJLP connector
- Space saving low profile design enables installation in shallow backboxes and trunking
- Spring-loaded shutter
- Protected labelling facility
- Compatible with MOD-SNAP wallplates
- Ideal for floorbox applications

Voice Solutions

The Molex Voice Solution provides a range of products to allow the termination of dedicated voice cabling in a structured cabling environment. The range includes 50 Port Voice panels, Telco Panels and Line Adapter Units.

The range also offers a cost effective and simple way to feed PBX or other voice circuits into an installation.

Category 3 Multi-pair U/UTP Cable

Molex 25, 50 and 100 pair Category 3 cable has been designed to support telephony voice wiring applications. The cable has been designed and tested in accordance with UL 444, EIA/TIA568 & ISO/IEC 11801 standards.

- Supports telephony voice wiring applications
- 25, 50 and 100 pair Cable
- PVC and LSOH Sheaths
- Colour coded pairs for ease of termination

50 Port Voice Panel

The 50 Port 1U Voice Panels are a cost-effective product range designed to utilise the minimum of rack/cabinet space to support 2, 25 or 50 pair cables in a voice backbone.

Supporting two or three pair connectivity for analogue or digital telephone services, the panels feature logical port numbering for easy configuration of the pairs (1-2, 3-6, 4-5), using dual colour coded (568A/B) KATT IDC connectors. 19" rack mountable, the panel features an integral rear management tray.

- 50 Port 1U
- Category 3 compliant
- 2 or 3 pair variants
- Integral cable management tray
- 19" rack mountable

C

Modules - Disconnect and Connection

Both disconnect and connection type modules are available for all voice applications, markets and regulatory requirements. The modules accommodate up to 10 pairs in a small footprint, enabling high density interconnection facilities.

Gas Arrestor Module

An over-voltage system is available to protect circuits from voltage surges from lightning strikes or similar events. These modules are industry compliant and compatible with other voice cabling systems.

Order No.	SAP No.	Description

PDS Solutions Category 6

The Category 6 Premise Distribution System (PDS) incorporates a unique pair separation design on the 4 Pair connector. This unique design feature enables 96 pairs to a base, making it one of the highest density Category 6 pair management blocks on the market.

The Molex Category 6 PDS system is independently tested and verified by ETL Semko to ensure compliance to channel and component performance criteria according to international standards.

Category 6 4 Pair IDC Connectors

The 4 Pair IDC block is a high-performance connector capable of providing high-speed data transmission. The design utilises split-pair technology to provide Category 6 performance.

- High performance IDC
- Independently tested
- Gas tight termination

Order No.	SAP No.	Description
KPD-00088	0181980071	Category 6 4 Pair IDC Connectors (Each)

Category 6 PDS 96 Pair Termination Block Kits

The 96 Pair Termination Block Base is the key component of the C6 PDS system and has the same footprint as the Category 5e 100 Pair Termination Block Base. Category 6 performance is guaranteed by the unique pair separation (for the reduction of cross-talk) designed into the base. Manufactured from flame retardant thermoplastic, the termination block base features cut-outs for easy cable routing and is available with or without legs. Supplied with label cards and label holders and 24 4 Pair IDC connectors.

- Industry standard wall mount format
- Available with or without mounting legs
- Supplied with label cards and holders
- Features cut-outs for cable routing
- Available as a kit with IDC connectors or as stand alone bases

PDS Solutions Category 6

D

Category 6 PDS Patch Cords

Category 6 PDS Patch Cords are available as 4 Pair to 4 Pair assemblies or 4 Pair to RJ45 variants. The Category 6 PDS Patch Cord is polarised to prevent accidental reversal of the cord. A moulded-in arrow on the top of the connector provides a visual indication of the correct orientation. Integral strain relief holds the cable in place during lacing and provides proper cable retention for the terminated Category 6 PDS connector.

- 4 Pair - 4 Pair & 4 Pair - RJ45 variations available
- Circuits can be easily changed by untrained personnel without using a punch down tool
- Available in 1, 2, 3 and 5m lengths

PDS Wall Mount Frames

Available as a 900 pair PDS, the Wall Mount Frame provides a complete communications facility. The frame accommodates 100 pair bases, horizontal and vertical cable management rings and drip trays. Its design allows ample space behind the unit for incoming cable. The Wall Mount Frame, Drip Trays, and Ring Run Panels are constructed of rugged, black powder coated steel.

- Rugged steel frame
- Easily installed
- Ring runs and cable management accessories available

Multi-Pair Category 6 PDS IDC Connector Termination Tool

The multi-pair termination tool is designed to terminate the Molex Category 6 4 Pair IDC connector providing a gas tight, reliable, high impact termination.

The uniquely designed Molex Category 6 IDC connector can only be terminated with the specifically designed Molex multi-pair termination tool.

- For use solely with Molex Category 6 PDS 4 Pair IDC Connector
- Provides gas tight, reliable, high impact termination
- Tool head compatible with standard 110 handle

For terminating individual pairs, a standard 110 style termination tool can be used.

Order No.	SAP No.	Description
KPD-00087	0181980070	Category 6 110 Style Multi-Pair Termination Tool with Head and Handle
KPD-00086	0181980069	Category 6 Multi-Pair IDC Connector Termination Tool Head

PDS Solutions Category 5e

The Category 5e Premise Distribution System comprises 100 or 300 pair Termination Blocks, Rack Mount Panels, 110 Connectors and patch cords. Molex's PDS System is ideal for use in high density environments where space is at a premium and is one of the most cost effective

high-density patching systems on the market today.

110 Style Connector

Molex's 110 Style Connector is a high-performance IDC capable of providing all your voice and data interconnect needs.

- Available in 4 pair (8 pos) and 5 pair (10 pos) versions
- Category 5e performance
- IDC contact accepts one conductor only

Order No.	SAP No.	Description
KPD-00058	0181980022	110-C4 Connectors (bag of 100)
KPD-00059	0181980023	110-C5 Connectors (bag of 100)

Category 5e PDS 100 Pair Termination Blocks

The 100 Pair Blocks are the key component in the wall mount Category 5e PDS System. The solidly constructed unit is compatible with the popular 110 IDC PDS connector. These connectors are colour coded to allow easy identification when installing 25 Pair backbone cable.

- Industry standard wall mount format
- Available with or without mounting legs
- Supplied with label cards and holders
- Features cut-outs for cable routing for easier installation

Order No.	SAP No.	Description
KPD-00026	181980018	100 Pair Termination Block Base (no legs)
KPD-00027	181980019	100 Pair Termination Block Base with legs
KPD-00028	181980020	300 Pair Termination Block
KPD-00053	0181980039	1U Ring Run

Category 5e PDS Rack Mount Panels

This cross-connect system combines the advantages of a block-based system with frame mounted active equipment. This block-based format affords individual cable pair management not possible with an RJ patching field; the installer has the advantage of defining cross connections as either 1, 2, 4 or 5 pair at the installation stage rather than at the initial design stage.

- Standard 19" rack mount
- 200 pair capacity
- 3U - small cable management rings for low density applications
- 4U - large cable management rings for high density applications

Order No.	SAP No.	Description
36.B040G	0180410015	200 Pair PDS Panel - 3U (no connectors), Shallow Rings
36.B022G	0180410012	200 Pair PDS Panel - 4U (no connectors), Deep Rings

Fibre Optic Solution Lightband™ Cable

Molex manufactures some of the most comprehensive fibre systems in the structured cabling market, incorporating a variety of connector technologies, such as; ST®, Duplex SC and LC. Molex offers total fibre solutions, ideal for either Backbone or To-The-Desk applications.

The Molex Fibre product range consists of Management Panels, Enclosures, Adapter Plates, Connectors, Modules, Cable, Pre-Terminated Solutions, Adapters, Patch Cords, Splicing Equipment, Field Termination Connectors, Tool Kits and Testers.

Fibre Cable - Internal/External Tight Buffered

Molex Fibre Cable is available in multiple cores. Using tight buffered 9/125µm, 50/125µm and 62/125µm distribution grade fibre that either meets or exceeds, OM1, OM2, OM3, OM4, OS1 and OS2 standards.

- Internal or dry/free draining duct installation
- "E glass" yarn strength member
- 900µm secondary coated fibre
- All meet or exceed OS2 Singlemode, OM1, OM2, OM3 and OM4 Multimode standards
- LSOH sheaths

Fibre Optic Solution Lightband™ Cable

Fibre Cable - Multi-Purpose Loose Tube

Molex multi-purpose fibre optic loose tube cable is suitable for LAN backbones, telecom access lines and campus backbones. The cable is a gel filled central loose tube design with swellable glass yarns as a strength member and rodent protection. The outer jacket is a blue HFFR (halogen free flame retardant) material.

- Loose tube
- Gel filled
- Glass strength member
- HFFR sheath

Fibre Cable - Direct Burial Armoured Loose Tube

Molex Loose Tube Armoured Fibre Cable is constructed of gel filled loose tubes (4-12 fibres). The core is water blocked, wrapped in polyester tape with an inner and outer MDPE sheath. Corrugated steel armouring makes the cable rodent resistant. The cable is designed for direct burial, outdoor data communication applications.

- Outdoor direct burial
- Corrugated steel armoured
- Rodent resistant
- Gel filled loose tube construction

Fibre Optic Solution Lightband™ Patch Cords & Pigtails

Fibre Pigtails

Molex offers a comprehensive range of fibre optic pigtails for Singlemode and Multimode applications. Fibre Pigtails are available as standard in 1m lengths.

- Ruggedised cable construction
- Insertion loss better than 0.35 dB
- All meet or exceed OM1, OM2 and OM3 Multimode and OS1 Singlemode standards

Fibre Optic Solution Lightband™ Enclosures

1U Multi-Function Fibre Enclosure

The 1U Multi-Function Fibre Enclosure is a configurable rack mount unit for storing and terminating incoming fibre cable. The fibre enclosure has been designed to accommodate various termination types and adapter configurations. The floor of the enclosure is constructed to allow maximum flexibility in routing fibres. The enclosure incorporates a heavy duty ball bearing slide mechanism, allowing easy access to fibres. The interchangeable front plate facilitates upgrades as required. The enclosure has an optional front locking kit and an optional front cable management to securely route patch cords.

- Accommodates up to 4 ModLink Quick Connect Cassettes which allows 12-24 fibre connections per cassette with various interfacing adapters
- Accommodates up to 4 Modular Splice Cassettes which allows 6-24 fibre connections per cassette. The cassettes allow for splice termination while protecting individual fibres
- Compatible with preloaded adapter plates in various fibre counts and adapter configurations.
- Self-Adhesive fibre management hub is stackable and can be segmented providing individualisation of fibre routing
- Optional 24 fibre splice tray available to maximise port capacity while providing fibre management for excess fibre.
- Optional front cable management allows for secure routing of patch cords and can be retrofitted.
- Optional locking kits provide security
- Compatible with Molex's 6 Fibre Adapter plates that allow 6-24 fibre connections per plate, 72 Fibre MTP connections and 3 x DataGate Copper/Synergy connections per plate.
- Rugged steel construction in graphite finish
- Compatible with Molex 3 x DataGate Jack UTP or C6A Adapter Plate for Multimedia applications

Specification Grade Fibre Enclosures

Specification Grade Fibre Optic Enclosures are a configurable rack mount unit for storing and terminating incoming fibre cable. Designed to accommodate both the needs of the installer for the initial assembly and the end user for access, maintenance and fibre protection. Great care has gone into the design to protect fibre optic cables and patch cords from damage and to maintain stable optical integrity throughout the life and use of the enclosure.

- Standard 19" rack mount
- Lightweight, lockable, and removable aluminium hinged front and rear doors provide security
- Externally mounted cable strain relief bracket mounts to accommodate cable routing from above or below
- Labelling incorporated on hinged, drop-down metal front door
- 1U Fibre Enclosure - accommodates up to 4 6, 12 or 24 fibre plates, 4 ModLink™ Cassettes & 2 Splice Trays
- 2U Fibre Enclosure - accommodates up to 8 6, 12 or 24 fibre plates, 8 ModLink™ Cassettes & 8 Splice Trays
- 4U Fibre Enclosure - accommodates up to 24 6, 12 or 24 fibre plates, 24 ModLink™ Cassettes & 12 Splice Trays

601 Fibre Enclosure

The 601 Fibre series Enclosures are compact units for fibre optics. Available in ST, Duplex SC and LC versions they provide either 6, 8 or 12 fibre ports. The 601 fibre enclosure has a low profile design and provides the proper internal fibre management to ensure the integrity of the optical network. There is also provision for a user supplied seal for added security.

- Compact unit - 184mm x 127mm x 38mm
- Up to 24 Ports
- Available in Singlemode and Multimode fibre versions
- Available in ST, Duplex SC & LC versions
- Accepts up to 8 fusion or mechanical splices
- Top, bottom and rear access

Fibre Optic Solution Lightband™ Enclosures

Fibre Swing-Out Plastic Patch Panel

The Swing-Out Plastic Patch Panel is a light-weight, robust fibre optic patch panel designed for the installation of up to 48 fibres. The panel offers an economic alternative to metal fibre enclosures. The lower tray is designed to pivot enabling access to the pre-formed fibre and splice management areas for easy cable dressing and installation.

- High density, economic, 48 fibre enclosure
- Compatible with all common fibre adapters
- Manufactured from high-strength, light-weight material
- Lower tray of the panel pivots out for access to splice tray and pigtail routing area

WM-12

The WM-12 is a wall mounted steel enclosure that provides up to 24 fibre ports in a minimum of space. The WM-12 has an integral configurable panel that accepts up to 6 USO II modules. Its design also guarantees that all of the media will be protected and proper fibre bend radius is maintained.

- Fully configurable using fibre or copper modules
- Available with a fully lockable steel cover
- Accepts up to 6 x USO II modules

Xtreme Density System

The Xtreme Density System is a configurable rack mount unit for storing and terminating incoming fibre cable. The chassis is available in a 1U 5 Cassette Module and 2U 12 Cassette Module Chassis – delivering from 124 to 288 fibre via 24 Fibre Plug N Play LC/MTP modules connected 24 Fibre MTP/MTP Optical Cables. The system is ideal for Data Centre, SAN, Enterprise/Campus and Telco central office applications.

- 24 Fibre LC/MTP Plug & Play Cassettes – provides 124F (1U) and 288 Fibres (2U)
- Future Proofing – Low Loss OM3, OM4 and OS2 cabling and cassettes offered as standard
- 24 Fibre MTP/MTP cable assemblies – reduced cable weight and footprint with lower impact on cable routing requirement and HVAC interference
- Rack Mount Chassis configurable with a combination of front door and rear cable management options.
- Optional Sliding Management and Storage Tray available
- Quick Release Tab on Cassettes – allows for tool-less and easy removal from chassis. Mounting tabs on side of cassette lock into the panel. Intermediate lock position locks forward the cassette of the chassis for patch cord installation
- Slide Out Port Labeling - standard with modules
- High Density LC Quad Adapter Footprint – No extraction tool need for patch cord installation. Revised footprint improves front space management and port access.
- Internal fibre management inside the cassettes – ensures effective cable management guaranteeing performance

Optical Fibre Solution Lightband™ Xtreme Density System

Uniboot LC Low Loss Patch Cords

The Uniboot LC Low Loss Patch Cords are slim-line patch cords, ideal for high density/high speed applications. Using a uniboot patch cord provides a 50% space saving when compared to traditional optical patch cords.

Ideal for Data Centre, SAN, Enterprise/Campus and Telco central office applications.

- Full Duplex in a single 3mm cable
- Available in Low Loss OM3, OM4 and OS1/2 Fibre Types
- Reduces space required in cable ways and racks improving access and HVAC performance
- LS0H sheath

Fibre Optic Solution Lightband™ Adapter Plates

Molex makes it easy to field configure many of its fibre optic products by offering an extensive line of Adapter Plates. The plates are loaded with high quality adapters and require no tools - the plates install with a simple snap rivet, making installation and/or changes simple.

6 Fibre Adapter Plates

6 Fibre Adapter Plates fit directly into the Molex Multi-Function and Specification Grade Fibre Enclosures. The simple design requires no tooling as the plates install with a simple snap rivet.

- RoHS Compliant
- Accommodates 6 fibres
- Available in Singlemode & Multimode versions
- For use within Molex's Fibre Management Systems

6 Fibre Shuttered Adapter Plates

6 Fibre Shuttered Adapter Plates fit directly into the Molex Multi-Function and Specification Grade Fibre Enclosures. The simple design requires no tooling as the plates install with a simple snap rivet. Shuttered 6 Fibre Plates feature Molex's unique shuttered technology which protects installers and end users from LED/Laser light emissions.

- RoHS Compliant
- Accommodates 6 fibres
- Available in Singlemode & Multimode versions
- For use within Molex's Fibre Management Systems
- Unique shuttered feature protects from harmful light emissions

Lightband™

Adapter Plates

12 Fibre Keyed LC Adapter Plates

Molex's Keyed LC Adapters used in conjunction with compatible patch cords provide mechanical security and prevent cross connection while allowing for high density layouts without performance compromise.

Molex's Keyed LC Fibre Optic Adapter Plates are a modular platform compatible with various Molex Enclosures and Fibre Splicing Systems. The Molex Plates require no tools for installation.

- Available in 7 different Keyed LC Adapter types
- Available in Singlemode & Multimode versions
- Upgradeable - can be used with Molex's standard fibre optic splicing options or with our new Modular Splice Cassette
- 100% factory tested - guaranteed performance

Fibre Optic Solution Lightband™ Connectors

Molex offers a comprehensive range of adapters and connectors in both Multimode and Singlemode variants. Designed to the highest performance specifications, meeting international standards and providing low insertion loss, the connectors are available as

heat-cured, cold cured and field terminable variants. The adapters feature either snap or flange mount fixings and are designed with the latest polymer and ceramic materials.

Fibre Optic Solution Lightband™ Fibre-To-The-Desk

Molex offers a comprehensive range of fibre-to-the-desk modular systems to suit all applications and market requirements. Elegantly designed, these products offer a low profile and versatile modular construction, allowing the user to easily expand the network as it grows.

Supporting SC, LC and ST fibre adapters, Molex's work area solutions are suitable for both Singlemode and Multimode installations and include Molex's unique "shuttered" technology protecting the user from harmful light emissions.

50 x 50mm Angled Modules

50 x 50mm Angled modules ensure that correct bend radius is maintained in a fibre-to-the-desk environment and feature shuttered adapters, protecting the user from harmful light emissions.

- Available in Singlemode & Multimode versions
- Permits a 30mm bend radius
- For use within Euromod and USO II™ System of Wallplates

Fibre Optic Solution

Lightband™

Fibre-To-The-Desk

Fibre Management Backbox

The Fibre Management Backbox provides enough space for direct termination or splicing of up to eight fibres and is designed to maintain the minimum bend radius requirements for fibre optic cable when used in conjunction with Euromod Angled Modules.

This product is also suitable for applications which require copper modules and can accommodate up to 2 flat Euromod PowerCat or secondary voice modules as well as 4 fibres. It is packaged complete with threaded inserts for trunking applications and adhesive strip for mounting in a surface mount backbox.

- Fits inside 32mm deep UK standard double gang backbox for surface mount applications
- Up to 8 fusion splices can be accommodated securely
- Provides storage for up to 8m of 900µm tight buffered fibre
- Correct bend radius maintained when used with angled modules
- No additional backbox required for trunking applications
- Mixed media capability

Universal Splice Trays & Fusion Splice Protectors

The Universal Splice Tray is a configurable enclosure for both mechanical and fusion splices. Loose tube cable is routed into and out of the tray through adjustable tube grips located at each corner. Grips eliminate the need for cable ties and can be tightened and loosened preventing over-compression of the loose tube cable.

- Accepts mechanical and fusion splices
- Adjustable grips on each corner
- Prevents over-compression of the loose tube cable
- Accommodates up to 12 splices
- Fusion Splice Protectors are available in 45mm and 61mm lengths

Fibre optic Breakout Kits

Fibre Optic Breakout Kits are for use on multi-fibres-per-tube loose tube cables to modify the cable for direct termination. Each kit breaks out 250µm fibres from a multi-fibre loose tube into individual 900µm buffer tubes. The fibres can then be terminated using the connector manufacturer's recommended termination procedures for 900µm tight buffered fibres. Each kit is individually packaged in a sealed plastic bag.

91.B0650	182540001	24 Fibres Per Tube Breakout Kit

Pocket Fault Locator

The Pocket Fault Locator is designed for either Singlemode or Multimode use. This pen-sized unit allows you to visually locate micro-bends, fibre breaks and other sources of optical attenuation in fibre patch cords, patch panels and enclosures.

- Visible 650nm Laser
- Small pocket sized design
- Contiguous or Modulated Light Source
- Supports Singlemode & Multimode applications
- Battery operated
- 2.5mm Universal Ferrule Adapter

Pre-Terminated Solutions

ModLink™ Fibre Plug & Play

ModLink is an ideal solution for mission critical applications such as Data Centres and Storage Area Networks, where fast installation is paramount and where moves adds and changes are frequent or managed in-house.

ModLink is also a viable tool for rapid deployment of an alternate data recovery system. In the event of damage or failure to a vital fibre backbone, the link can be quickly re-established without the need of specialist technicians.

12 Port ModLink Cassettes

ModLink Cassettes provide a cost-effective, quick and easy fibre system, for backbone and to-the-desk applications. 12 Port ModLink Cassettes provide premium factory-controlled optical performance, enabling flexible system configuration and fast, economical installation. Simply plug the cable into the rear of the unit and the link is operational - an excellent solution for fast-track installations.

- Self-contained Fibre optic patching enclosures convert the MTP/MPO interface to a standard LC, SC or MT-RJ adapter
- Low insertion loss for OS1/2, OM3 & and OM4 Cassettes
- Available in Singlemode & Multimode versions
- Front port identification plus labelling field on cassette top for fibre documentation
- For use within Molex's Fibre Management Systems

ModLink™ Fibre

Plug & Play

Keyed LC ModLink Advanced Fibre Cassettes

Molex's Keyed LC Adapters, used in conjunction with compatible connectors, provide mechanical security and prevent inadvertent cross connection while allowing for high density layouts without performance compromise. Combining this with Molex's Plug and Play Advanced Fibre Optic Systems offers premium factory-controlled optical performance, enables flexible system configuration and fast, economical installation.

- Self-contained fibre optic patching enclosures convert MPO/MTP interface to Keyed LC Adapters
- Available in 7 different Keyed LC Adapter types
- Cassettes in 12 fibre format
- Test results with each cassette

Modular Splice Cassettes

Molex's Modular Splice Cassette is an excellent way of managing vulnerable fibre optics, protecting them from dust and damage as a result of routine maintenance. The modular design is upgradeable and reusable. The Cassette is available in a number of pre-loaded kits or in a unloaded configuration.

- For use in Molex's Specification Grade and Multi-function Fibre Enclosures
- High density - up to 24 fibres per cassette
- Provides perfect bend radius for splices
- Integrated cable management - prevents damage

ModLink Cables

- LSOH rated round distribution cables are factory terminated on both ends with multi-fibre MTP® connectors for maximum fibre density
- Round, flexible outer jacket is easy to bend, route and install
- Patented flexible transition sleeve maintains the routing feature of the round cable, absorbs vibration shock and provides an ideal surface to secure the MTP connector
- Industry-leading low insertion loss (0.35dB Maximum Insertion Loss for Laser Optimised OM3/4 Cables and OS1/2 Cables, 0.10dB Typical)
- ModLink advanced fibre optic cables are 100% tested
- Pulling eyes installed to protect the assembly during installation
- 4.5mm o.d.
- Standard and Low Loss versions available

Part No. Matrix - Substitute the correct code number or letter to determine the assembly construction

Hybrid Pre-Terminated Cable Assemblies

Molex Pre-Terminated Fibre Optic Cable Assemblies offer premium factory-controlled optical performance on a variety of connectors that enable fast, economical installation.

Pre-Terminated Cable Assemblies are ideal for mission-critical backbone applications such as Data Center tie cables and low optical loss backbone riser cables.

- Available in:
 - Low Loss: OS1/2, OM3 and OM4 (Aqua or Erica Violet)
 - Standard Loss: OS1/2, OM1, OM2, OM3 and OM4 (Aqua or Erica Violet)
- 12 and 24 cores standard (high core counts up to 144 Fibres available)
- 2mm ruggedized tails and 900µm tails available
- Customised Tail Length and Configuration options available
- LS0H and OFNP cable jacket
- ROHS Compliant
- Ideal for: Internal short optical links
Front panel/equipment connections
Data center infrastructure
Storage Area Network (SAN)

Pre-Terminated Solutions ModLink™ Copper Plug & Play

Factory terminated Plug & Play solutions offer enterprises a number of advantages over traditional cabling systems. Deployment is faster, performance is guaranteed, on site testing is eliminated. Plug and Play solutions are ideal for installations where quality and speed of implementation are paramount, and are ideal for

high density environments such as Data Centres, Storage Area Networks (SAN's) and Server rooms. The ModLink Copper Plug & Play solution when installed in a channel configuration has been certified by ETL Semko as compliant with IEE 802.3ab-1999 for Zero Bit Rate 1000 Base-T transmission.

Copper ModLink Panels

The 48 port ModLink Copper Panel consists of 4 12 port ModLink Copper cassettes loaded into a 1U Rack Mount Enclosure. The cassettes slide easily in and out of the panels, allowing speedy installation. Simple cassette design allows for fast upgrades or expansion of systems with minimum installation time. All cassettes are 100% factory tested, enabling flexible configuration and cost effective installation, while minimising the need for on-site testing.

- Utilises the patented Molex iPass™ connector, providing reliable 10/100/1000BASE-T performance
- Modular Cassettes convert the iPass interface to a standard RJ45 interface
- ModLink panels are modular in design and accept up to 4 ModLink cassettes
- Panels feature integral rear cable management
- Cassettes are configured with 6 or 12 ports
- 100% factory tested

Hydra Cable Assemblies

Hydra Cable assemblies are comprised of 6 RJ45 plugs to an iPass connector on the other end. They are specifically designed to connect Molex's range of ModLink copper cassettes from panel to panel or from the switch to the panel links.

- Hydra cable assemblies feature patented iPass high density, robust die-cast connectors on one end & 6 RJ45 plugs on the other end
- 100% factory tested
- Custom cable assembly lengths in increments from 1m - 90m, enabling flexible configuration and cost effective installation

Media Configurable

Frequently, the need arises to integrate multiple media types within the one cabling system. It is becoming common for example for UTP, fibre optics, audio and video media to be used in the same environment.

To support these situations, Molex has designed a range of wiring closet and work area products, which accommodate UTP, fibre optics, audio and video media types using modular designs.

Audio & Video Modules

Audio and Video modules are versatile modules for unique applications where pre-connectorised cables must be mated. Single Position Modules fit into Molex's configurable panels and wallplate systems that accept Molex's DataGate™ jack.

- Enables line extensions for legacy cabling systems
- Single Position Modules are designed to fit into Molex's Synergy™ & USO II™ system of wallplates and surface blocks

Multi User Telecommunications Outlet (MUTO)

The Multi User Telecommunications Outlet (MUTO) is the ideal solution for high-density fibre or copper requirements in the office environment. This sleek product holds up to twelve 25 x 50mm Euromod Modules or USO II fascias and is easily mounted near file servers, active devices, and workstations. The MUTO can also accommodate up to six 50 x 50mm Angled Fibre Modules.

- Aluminium main body
- Two metal end caps (angled)
- Two plastic end caps (flat)
- Four end cap screws
- Two plastic end plugs (for metal end caps)
- Two Snapz™ icon trees (alpha)
- Accommodates 25 x 50mm USO II fascias, enabling Category 5e or Category 6 performance
- Accommodates ST, SC, MT-RJ & LC Euromod 25 x 50mm and 50 x 50mm Angled Fibre Modules

Industrial Solutions

Molex's Industrial Solutions are specifically designed for installations within harsh environments. Ideally suited for manufacturing facilities, water treatment plants, transportation hubs and food and beverage facilities, the industrial solution features a unique bayonet

latching system that ensures network performance is constantly maintained.

Industrial Copper Assemblies

Enabling side and rear entry termination, the Industrial Ethernet Connector, Plugs and Patch Cords are housed within a rugged Polyester covering and feature a bayonet style latch receptacle for quick and easy connection and proper mating depth. The latching mechanism provides one sealing surface which protects the plug from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes, reducing the likelihood of product failure.

- Category 5e
- One sealing surface
- Bayonet style latch receptacle
- Suitable for extreme environments
- Water and dust tight for functional integrity
- IP 67 and NEMA 6P ratings

The latching mechanism provides one sealing surface which protects the plug from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes, reducing the likelihood of product failure.

- Category 5e
- One sealing surface
- Bayonet style latch receptacle
- IP 67 and NEMA 6P ratings
- Suitable for extreme environments
- Water and dust tight for functional integrity

LC Connector

The LC Industrial Connector is housed within a rugged Polyester covering. The connector features a bayonet style latch receptacle for quick and easy connection and proper mating depth. The latching mechanism provides one sealing surface which protects the connector from dust, moisture, dirt, vibration, chemicals, electromagnetic interference and temperature extremes, reducing the likelihood of product failure.

- Available in Singlemode & Multimode versions
- 100% optically tested to ensure quality performance
- LC connector designed to Telcordia GR-326-CORE
- Suitable for indoor and outdoor applications
- One Sealing Surface
- Bayonet style latch receptacle
- IP 67 and NEMA 6P ratings
- Suitable for extreme environments
- Water and dust tight for functional integrity
- Potted/Sealed version available for extra durability

Industrial Wallplates

- Stainless Steel Robust design
- Low profile for inconspicuous network connecting
- Single Gang - 120mm x 70mm x 11mm
- IP 67 rated

- Totally protected from the ingress of dust
- Protects against temporary immersion in water between 15cm - 1m for 30 minutes
- Accommodates Molex's Industrial Connector

Cable Management Solutions

Cable Management is an important part of any installation. Combining aesthetics with functionality, the Molex range of rack mountable cable management products offer cable management with minimal effort, ensuring long term manageability of the wiring closet.

Ring Run Panels

- Available in various ring sizes for different cable densities
- Standard 19" rack mount 1U and 2U panels
- Styling complements Molex Patch Panel range
- Robust construction to handle harsh treatment
- Flexible rings for convenient operation
- Rounded edges to prevent damage to patch cords

Vertical Rack Manager (VRM)

Used in conjunction with the Molex 45U, 19 inch Open Bay Rack, or equivalent, the VRM provides a robust and efficient way of managing cables and patch cords. It's ergonomic design ensures the necessary support for bundled patch cords, moving them from panels to the frame, maintaining bend radii at all times. Cable routing is flexible, and rapid re-routing can be achieved via the Quick Fit cable spools. Quick snap finger grooves enable flexible equipment management, and allow for expansion from 1U to whatever size required.

- Fits EIA standard 19" open bay racks
- Allows for upgrading current installations while maintaining current investment in hardware
- Maximises building Infrastructure
- Excels in space utilisation freeing up valuable floor space
- Strong & flexible poly carbonate finger guides
- Robust construction perfectly aligns cables, maintaining critical bend radii
- Snap grooved finger guides allow easy modification to 2/3U configuration
- Replacement finger guides ensures ongoing flexibility for future fit-out requirements
- Cable retainers click on to the end of finger guides, ideal for holding cables horizontally in place during maintenance
- Quick lock door allows for fast easy access with instantaneous left or right door opening with flush mounted handles
- Quick fit spool for easy single handed fit and removal of spools saving time and effort
- The design allows flexibility in fit out with additional spools and door kits available

Copper Products Tools and Testers

Molex offers a range of tools and testers to aid installation of copper and fibre systems.

DataGate™ 4 Pair Termination Tool

The Molex DataGate 4 Pair Termination Tool is a robust and reliable product that offers faultless gas-tight terminations of all four pairs simultaneously. The tool frame is manufactured from high grade steel with die-cast termination heads. Designed specifically for use with Molex DataGate and Keystone style jacks, the 4 Pair Termination Tool Frame is supplied unloaded into which either the UTP Termination Head (for termination of the UTP DataGate and Keystone jacks) or the C6A Termination Head (for termination of the C6A shielded DataGate jacks) is fitted.

Operation is uncomplicated and efficient. The jack is placed over the four cables that have been securely seated in the Termination Head. The Termination Head and jack are then pivoted into the cutting position and the handles depressed, resulting in cables that are firmly and accurately seated and neatly trimmed, in one simple operation.

- Designed specifically for the DataGate, Keystone and C6A Shielded Jacks
- Simple to operate
- Cables are terminated and neatly trimmed in one operation
- Tool Frame supplied unloaded. UTP and C6A Termination Heads supplied separately
- MOD-Clip 4 Pair Termination Tool is compatible with UTP MOD-Clip C6 Jacks only. C6A MOD-Clip jacks are terminated using the DataGate tool

Termination Tools & Terminating Puck

The Category 6 110 Style Multi-Pair Termination Tool provides 4-pair high impact termination specifically for Molex 110 Style Category 6 Connector termination.

The IDC Punchdown Tool provides reliable terminations and is compatible with 110 Style.

The Punch-Down Terminating Puck is a handy twisted pair termination aid that works with Molex RJ45 DataGate jacks.

SLT3S™ Tester

The SLT3S Tester is a rugged, lightweight product designed to verify the integrity of 1, 2, 3, and 4 pair UTP and FTP channels. Incorporating a unique 3-in-1 design, this tester features built-in modular jacks for USOC, EIA 568A and 568B wiring sequences.

Simply connect the master and slave unit to each end of the cable under test, and the SLT3S automatically verifies correct cable sequence, as well as open and short circuits.

- Innovative 3-in-1 design features modular jacks for testing USOC, EIA 568A and 568B cabling systems
- Accurately verifies the continuity and sequence of 1, 2, 3 and 4 pair UTP and FTP channels
- Continuously-sequencing LED display provides a diagnostic readout that immediately detects shorts, opens, reversals and mis-wires at a glance
