

# Custom V

**Custom V** is an all-purpose premium progressive lens, which has been designed using Crossbows' latest "Smooth Optics" design system. This radical approach reverses the normal design process and has allowed **Custom V** to be designed from the outset with a very smooth mean power profile, thus minimizing swim effects and providing excellent patient comfort and rapid adaptation.

- "Smooth Optics" design technology
- Incorporates "Eye View" technology
- Smooth mean power distribution
- Soft design with low distortion
- Prescription compensation for as worn condition
- Variable inset
- Automatic corridor length selection based on frame shape and patients fitting details (corridor lengths of 12 to 18mm)
- Minimum fitting height of 13mm (with 12mm corridor design)
