wall murals

Wall murals to help you get the look you want. Our sensational wall mural designs are ideal for your classroom or office wall.

3 easy steps to create a wall mural...

- 1 Email your design
- 2 Include the size and choose your material - pasted or self-adhesive
- 3 One of our design team will contact you with a detailed quotation

Whether you order a pre-pasted wallpaper mural or self-adhesive option, your wall mural will be sent to you as a set of panels. Included with your mural will be an installation and panel guide, showing you how many panels make up your own mural.

For more information and advice on how to order your bespoke wall mural just contact our sales team on 01254 678777.

primary range

flipo folding tables and chairs

The Flipo range features a folding top which enables the unit to be stored quickly, safely and efficiently by nesting them together, as opposed to a conventional stacking system, improving health and safety. The folding mechanism is operated by pulling on the release bar.

Four wheels are fitted to provide maximum manoeuvrability. The wheels are steel housed for extra durability and two feature foot operated brakes.

The frame is epoxy powder coated for durability and the worktop is 27mm thick plastic laminated MDF.

Flipo tables are available in the correct heights to comply with EN1729 with size marks 2 to 4. Please refer to page 119 for an explanation of specifying the correct size mark (SM). Other colours available on request.

height adjustable //

fastlift range

height adjustable round central column

Rapid adjustment. Minimum to maximum height in just 15 seconds with 580mm of adjustment.

The FASTLIFT range of tables adjusts from standing height to sitting height in seconds. This enables the user to be stood in a standing frame or sitting in a chair and also accommodates wheelchair access.

Rapid adjustment. Minimum to maximum height in just 15 seconds with 580mm of adjustment.

In order to achieve the fastest adjustment speeds available the adjustment is by way of a double acting fast helix screw, which takes just 15 seconds to travel from top to bottom and allows a precise adjustment.

For multi purpose areas the tilting top allows the units to be nested into one another, allowing you to open up a room for role play and other activities and the frame features four wheels allowing mobility within any room.

homecare

height adjustable

The HOMECARE range of tables are designed to blend in with contemporary furniture design, creating a comfortable environment for users whilst still offering 300mm of height adjustment.

Homecare range

The Homecare leg system can be configured to work with most top sizes and shapes likely to be required, however if castors are required a sub frame may be necessary. All Homecare units have a height adjustment range of 300mm, which is normally sufficient to enable the table to be used by a seated child or a standing adult. All Homecare tables are finished as standard with silver frames and grey top. Two alternate work tops are available in beech or maple. For colour finishes please refer to the standard finishes chart on page 119.

homecare

height adjustable resistant materials benching

Height adjustable technology benches are normally rectangular with two woodwork vices, the vice on the narrow edge combined with peg holes allows clamping of large items. Tops are beech hardwood.

Our specialists department is happy to discuss different shapes of height adjustable table including square tables.

Optional metalwork vices are available with clamping tray to allow them to be attached to the woodwork vices.

£700.00 (+p&p @ £50.00)

Multifunction workstations offer sitting and standing height adjustment, tilting top with retaining lip and comes complete with the removable stainless steel bowl as standard. If the bowl is not being used the infill piece is also supplied.

The unit is available with and without joystick apertures and the replacement covers.

homecare 2

height adjustable food, science, art, design & classrooms

Homecare 2 with 370mm of height adjustment.

These height adjustable units are operated by a manual crank handle, which is removable to prevent tampering. The two telescopic legs offer unrestricted access for the user. The optional wall brackets are height adjustable to avoid existing pipework.

The hob is a 4-zone electric hot plate and features a heat protection under tray. The tilting top table uses a ratchet mechanism enabling a variety of different angles to be achieved. The sink is available with either a left or right handed drainer and comes complete with hot and cold taps and waste. An optional flexible plumbing kit is also available.

Adjustment Range

The largest range of movement of any height adjustable table on the market with 805mm of adjustment.

vari-x range

height adjustable science, design and classroom

This Vari-X range has the largest range of movement of any height adjustable table on the market. It is the only unit that can be used when lying on the floor, sitting or standing. It may be fitted with a variety of tops and surface accessories, making this system one of the most versatile available.

This robust design has a simple mechanism designed for all to use. To adjust, simply wind the handle until the required height is achieved. The mechanism is self locking and the handle may be removed to make the unit tamper proof.

Colour options available on request

flipo

folding tables

The Flipo range features a folding top which enables the unit to be stored quickly, safely and efficiently by nesting them together, as opposed to a conventional stacking system, improving health and safety. The folding mechanism is operated by pulling on the release bar.

Four wheels are fitted to provide maximum manoeuvrability. The wheels are steel housed for extra durability and two feature foot operated brakes.

The frame is epoxy powder coated for durability and the worktop is 27mm thick plastic laminated MDF.

Colour options and a Trespa worktop are also available at an additional cost, please call us for details on 01254 678777.

V Table Range

The V Table range has been specifically designed to enhance flexibility, durability, style & life cycle. Constructed from 38mm diameter heavy duty steel tubing the common leg frame can be interchanged between various tops to meet varying needs. The work surface is constructed from a 27mm thick high-pressure laminate balanced MDF with three coats of lacquer applied to the MDF edge. When fitted with the optional wheels the units are easy to manoeuvre on a wheelbarrow principle as shown left.

Multifunctional

The V-38 Table range is specially designed to allow multiple configurations. This means the tables can be arranged in various layouts and offer great value for money.

Improve life cycle

The standard leg is used in the Crescent and 600 mm deep Rectangular and Square tables. By standardising legs, components can be re-used to improve life cycle performance.

V-38 Crescent tables are available in the correct heights to comply with EN1729 with size marks 1 to 6. Please refer to page 119 for an explanation of specifying the correct size mark (SM). Other colours available on request.

v-38 flipo

triangular flip table

Flipo Triangular Tables have a unique locking mechanism that locks the table top in the working position, the catch is easily accessed from the front of the table and retains the table top in the upright position safely. Alternative sizes and shapes are also available. Please contact us for details on 01254 678777.

The V-38 Triangular Flipo table is available in the correct heights to comply with EN1729 with size marks 1 to 6. Please refer to page 117 for an explanation of specifying the correct size mark (SM). Other colours available on request.

For power pole details, see opposite page

v-50 table

heavy duty rectangular tables for classroom, art, science, & technology

V-38 Wave and Half Round Wave tables are available in the correct heights to comply with EN1729 with size marks 1 to 6. Please refer to page 119 for an explanation of specifying the correct size mark (SM). Other colours available on request.

Seating and Standing Heights Available

These tables are constructed from fully welded heavy duty 50mm round steel tube making them exceptionally strong. The adjustable feet compensate for uneven floors.

Perfect for use in classrooms where durability is the key priority or practical work areas where the strong legs can maintain standing height stability coupled with allowing unrestricted access to all sides. The V-50 range has become a favourite of the academy programme and are regularly specified by the major academy groups.

They are available in a variety of sizes, finishes and shapes, including square, rectangular, trapezoidal and round with a 27mm laminate MDF or 13mm Trespa top.

The trapezoidal table has one 1500mm edge with a parallel 802mm edge and two sloping 697mm edges. They can be arranged in a multitude of ways to create a hexagonal work area.

daisy chain ict desks

linkable tables including power modules & leads

These single or two person computer desks (when ordered with cable management) feature a rear panel with access to power modules and three compartment cable segregation. This allows a number of desks to offer power charging from one 13 amp power socket. The 'DIT1' codes and prices include 1 no. mains lead 1.5m long fitted with a 13amp plug top and 1 no. interconnecting lead 1.5m long enabling daisy chaining of the desks.

Ivory:	-11	Orange:	-16
Blue:	-12	Black:	-17
Red:	-13	Purple:	-18
Yellow:	-14	Bubblegum:	-19

Order Codes Explained //

To place an order for a size mark 5 Eduflex Cantilever Chair with a green shell and a seat pad, the code will look as follows:
EFC-4243-43 -10 -EF-SP IF084
 (Chair code) (Colour) (Seat pad) (Fabric)

Eduflex is available in three designs; four leg is the most economical, reverse cantilever protects the floor and the operator version is height adjustable and will swivel through 360°.

The reverse cantilever design improves health and safety as, when stored on a table, the chair is less likely to fall off the table top and cause injury. This safe storage solution also aids classroom cleaning.

activo stool

chairs and stools

The Activo stool, with its low back design will allow in most cases for the stools to be stored underneath a standing height loose table whilst standing activities are taking place.

Activo and Eduflex stools are stackable and feature a single piece polypropylene moulded seat and back. The frame has been designed to help prevent users tipping backwards on the stool.

They are supported by a skid frame which will reduce the risk of damage to floor coverings.

Provided by Halo School Furniture Ltd

The Halo Group is a completely reconfigurable system which allows total flexibility to create an array of different work areas. Halo Group consists of eight individual furniture items in three radii that can be arranged and re-arranged to create a multitude of social or individual activity areas and work stations.

The system features a 1200mm long x 900mm high screen (that can be double configured to create a 1800mm high screen), a choice of 900mm or 1800mm end caps, four types of seating (internal or external, seat or bench) internal and external tables and an external library shelving unit.

The system is based on 1 metre, 1.5 metre and 2 metre radii that follow the centreline of the screen.

Available in a variety of laminate, fabric, paint finishes and colours, the screens can also incorporate power and data modules. A member of our sales team will happily talk through any bespoke requirements you have and can be contacted on 01254 678777.

Measurement Definition

All Freedom Ability tables are ergonomically correct to EN1729 part 1. Please refer to the table above, to specify the height of the table or chair that is required. In order to access the height of table or chair required, the childrens popliteal height defines the correct seat and table height. The measurement is taken from the floor to the back of the knee when seated, with thighs horizontal, the lower leg vertical and with feet flat on the floor. Sitting table height is determined by sitting elbow height, measured as the distance from the floor to the underside of the elbow whilst sitting, with the upper arm vertical and lower arm horizontal.

Standing work height is determined by standing elbow height, which is the distance from the floor to the underside of the elbow of a standing person with the upper arm vertical and lower arm horizontal. To order the correct size mark please replace the height element of the product code with the height required. eg. V38P-8373-71-03G the digit "71" within this code refers to the product height from the Sitting Working Height row within the table above (all heights within the table above are in millimetres).

Standard Finishes

Please note if a colour finish is not specified at the time of ordering then the standard default finishes (highlighted below with red box) will be supplied. The standard finish for all metal work is silver. (NB. Due to printing issues the colour finishes below may not always be a true representation so please use as guidance only)

Mainline Plus Fabrics

Postura Plus Chairs

professional services

The directors of Freedom Ability have over 40 years experience in the education furniture sector and are extensively involved in the furniture fittings and equipment consultancy field, which has allowed them to identify how the correct use of school FF&E permits flexible and project based learning.

Services Include:

- Budget control
- Space planning
- Product design
- Client meetings and engagements
- Procurement
- Project management
- M&E and ICT integration
- Legacy surveys

Equal opportunities policy //

This Equal Opportunities Policy Statement and Policy Statement on Harassment at Work are designed to implement the commitment of the Employer to Equal Opportunities. It is the responsibility of every employee to ensure his or her own conduct conforms to the expected standards and reflects these Policy Statements.

The aim of the policies is to encourage harmony and respect amongst individuals so as to promote good working practices with a view to maximising the performance and the return to the Employer and the employees.

If Equal Opportunities are not applied then valuable talent and potential are wasted. Moreover when unfair discrimination, harassment, bullying or victimisation take place they bring about a climate of fear, insecurity and poor work performance. As well as being unlawful it affects profitability and morale. It is therefore vital that every employee understands his or her responsibilities. Equal Opportunities are taken very seriously by the Employer and wilful failure to apply the policies or evidence of discrimination, harassment, bullying or victimisation will result in disciplinary action which may include your dismissal.

The Equal Opportunities Policy Statement

1. The Employer seeks to employ a workforce which reflects the diverse community at large because the Employer values the individual contribution of people irrespective of sex, age, marital status, disability, sexual orientation, gender reassignment, race, colour, religion, ethnic or national origin.
2. All employees will be treated with dignity and respect. The Employer will use its best endeavours to provide a working environment free from unlawful discrimination, harassment or victimisation on the grounds of sex, age, marital status, disability, sexual orientation, gender reassignment, race, colour, religion, ethnic or national origin.
3. The Employer recognises its legal obligations including those under the Race Relations Act, Sex Discrimination Act, The Equal Pay Act, the Disability Discrimination Act and the Part-time Workers legislation.
4. The Employer undertakes to review periodically its selection criteria and procedures to maintain a system where individuals are selected, promoted and treated solely on the basis of their merits and abilities.
5. The Employer will not tolerate acts which breach this policy and all instances of such behaviour or alleged behaviour will be taken seriously, fully investigated and may be subject to the disciplinary procedures of the Employer. The Employer further seeks to give all employees equal opportunity and encouragement to progress within the organisation by implementing a positive action plan.
6. If an existing employee becomes disabled the Employer will make every effort to retain him or her within the workforce whenever reasonable and practicable.
7. Whenever reasonably practicable to do so the Employer will install in existing premises facilities for people with disabilities. Whenever the Employer invests capital in new or refurbished premises every practicable effort will be made to provide for the needs of staff and customers with disabilities.
8. The Employer undertakes to distribute and publicise this policy statement to all employees and elsewhere as from time to time appropriate.
9. Any employee who believes that they may have been subjected to treatment which breaches this policy may raise the matter through the grievance procedure of the Employer.

Policy statement on harassment at work

1. The Employer believes that the dignity of every person must be respected. Harassment of colleagues or visitors is unacceptable and will be regarded as gross misconduct. The highest standards of conduct are required of everyone regardless of seniority.
2. The Employer recognises that harassment may take many forms. It may be directed towards persons of either sex. It may relate to a person's ethnic origin, religion, age, sex, sexual orientation, physical or mental attributes or some other personal characteristic.
3. Harassment may involve action or inaction, behaviour, exclusion, comment or physical contact that the recipient finds objectionable or offensive. It may result in the recipient feeling threatened, humiliated, intimidated, patronised, demoralised or less confident in their ability. Condoning such conduct may be harassment in itself. The test of harassment is, at least in part, subjective.
4. Examples of unacceptable conduct include, but are not limited to:-
 - verbal abuse, or insulting behaviour
 - sexist or racist jokes, jokes about an individual's sexual orientation or jokes about an individual's physical or mental attributes
 - the display or circulation or sexually suggestive or racially abusive material
 - bullying, coercive or threatening behaviour
 - the ridicule or exclusion of an individual for cultural or religious differences, on the grounds of sex or sexual orientation or on the grounds of disability
 - unsolicited or unwelcome sexual advances, including touching, staring or commenting
 - comments of a sexual nature about a person's appearance or dress.
5. Harassment, and particularly sexual, racial or disability harassment, will be regarded as gross misconduct for disciplinary purposes. Accordingly, employees guilty of harassment run a serious risk of summary dismissal.
6. Equally, an allegation of harassment must not be made lightly. If it is found that an allegation of harassment has been made without foundation and maliciously then this will also be regarded as gross misconduct for disciplinary purposes.
7. All complaints of harassment should be made to your manager unless the complaint is regarding this person when you should complain to that person's superior.

Environmental policy //

The Environmental Policy sets out the company's objective to maintain operational standards to protect the environment.

It confirms the company's commitment to the proper management and monitoring of waste streams, the reduction of pollution, compliance with environmental legislation and relevant training of employees.

- Conduct all of its affairs with a sincere, balanced and proper regard for the environment.
- Assess the impact upon the environment before any new products, activities or processes are undertaken.
- At end of life cycle products to be recyclable.
- Use of processes, practices, techniques, materials, products, services or energy to avoid, reduce or control (separately or in combination) the creation or discharge of any type of pollutant or waste, in order to reduce adverse environmental impacts.
- Wood based products to be sourced from FSC certified sources.
- Encourage our supply partners to follow similar policies.

Health and safety policy //

This policy, which conforms to the requirements of section 2(3) of the Health and Safety at Work Act, 1974, outlines the Company's commitment to the health, safety and welfare of employees and third parties that may be affected by our work.

SAFETY IS PARAMOUNT

We protect the wellbeing of the end user and our own people by accepting our moral responsibility for safety.

In addition to our obligations as a furniture manufacturer, we have a clear legal and business obligation to produce safe products - safely.

Our record in product (and process) safety enhances our reputation and credibility and gives us a business advantage. Focus on safety helps us to set the standards for the future. Our safety culture reduces risk commercially, environmentally and improves our working conditions.

Day to day responsibility for management of health and safety is delegated to the management team of the company. Appropriate management and measurement tools will be used to promote ongoing improvement in health and safety.

Within each department, various duties are given to other members of management. It is each of these members of management's responsibility to ensure that health and safety activities are adequately delegated in their absence. No member of management must allow unsafe working practices to occur within their department. The safety of the individual must at all times take precedence over output. Where action in connection with safety matters has been agreed, it is the responsibility of line management to ensure agreed actions are implemented without unnecessary delay. Incidents or accidents arising from circumstances where a conflict between safety and output exists will be regarded as being the direct responsibility of the member of management concerned.

Notwithstanding the fact that we do not live in a perfect world, our target shall always be the achievement of zero defects in health and safety - that is, we shall aim to have no accidents or near misses. Accordingly, we shall plan, manage, monitor and review our health and safety activities, with the specific aim of continually improving our health and safety performance and identifying, controlling and reducing risks associated with our operations. The Company will aim to achieve full compliance with current legislation as a minimum standard.

It is the duty of every employee of Halo Education Ltd to ensure that they conform at all times with their own statutory responsibilities under sections 7 and 8 of the Health and Safety At Work Act 1974, with their terms of employment, and with the Company's rules and regulations in relation to the health and safety of themselves and others. Employees will be involved in and contribute to improving health and safety management systems whenever possible.

The Company will provide necessary training and guidance to all persons who have duties and responsibilities under this policy and legislation, and will endeavour to involve employees through consultation and participation, as well as training.

“Strive for perfection in everything you do. Take the best that exists and make it better. When it does not exist, design it.”

- Sir Henry Royce, Rolls Royce
