

Case Study

University of Chester C of E Academy, South Campus

Complete Demolition Ltd were appointed by key client ISG for the extensive demolition works at University of Chester C of E Academy, South Campus in Ellesmere Port.

The project involved the full soft-strip and demolition of the redundant school buildings, the works were carried out over a 12 week programme.

The demolition works were undertaken using a 'top down' sequence with 4 demolition machines working onsite to ensure the tight programme was met. The work was undertaken using traditional demolition excavators equipped with specialist attachments including selector grab, concrete pulveriser and steel cutting shears. The clean hardcore was crushed and left onsite to be incorporated into the follow-on development works.
