## MODULAR STAGING

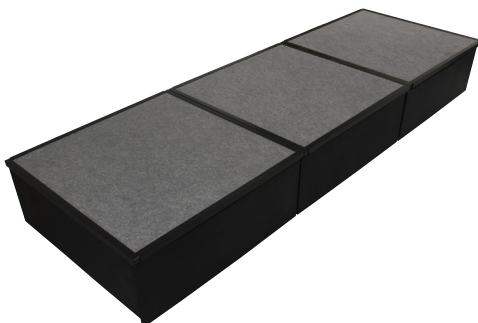

STAGE LIGHTING

CURTAINS & DRAPES

AUDIO SYSTEMS

PROJECTORS & SCREENS

ACOUSTIC PANELS

Our portable modular staging system is lightweight, strong and highly versatile. Easy to handle, stack and store, it allows you to build your stage in just minutes. And after use it can be packed away and stored on its own trolley until next required.

The strong metal base frames are available in a range of heights. The surface decks are available in a plain wood finish or they can be carpeted in a choice of colours.

A wide range of accessories is available to complement the system including steps, ramps, safety barriers, valances and curtains.

Please ask for a no-obligation demonstration.

ACOUSTIC PANELS

Do you need a new stage lighting system? Is your lighting system old and tired, unreliable or even unsafe? Maybe you don't have a lighting system at all?

No problem! We have a range of unbeatable Stage Lighting packages, from simple portable systems to complex multi-bar installations.

Spotlights, wash lights, floods, blinders, PAR cans, LEDs, gobos and disco lighting; the choices can appear confusing, but we are here to help, to ensure you get the perfect solution, whatever your budget.

Please ask for a no-obligation demonstration or site survey.

# Curtains & Drapes

ACOUSTIC PANELS

Staging drapes can make all the difference to your production or presentation.

Front of house curtains provide essential punctuation marks at the start and finish of a production.

Rear drapes allow the depth of the stage to be shortened and enable performers to move around without being observed.

We can supply and install a full range of curtains and drapes, generally made to order. We also design and install track mechanisms - fixed, manual & electric.

Please ask for a free site survey.

ACOUSTIC PANELS

We are specialists in providing and installing audio systems for halls, gyms, drama studios and theatres.

These areas need careful design and planning to ensure that there is sufficient sound to fill the area, but that it is directed and distributed so as to avoid reverberation, reflection and feedback.

No two spaces are the same and the equipment specified should always match the primary use of the room.

Whatever the specification and whatever the budget, rest assured we can provide a made to measure solution.

- ACOUSTIC PANELS

A theatre, gym or hall can provide the perfect environment for a high-power projector and a big screen, but these areas require a specialist approach.

You will need to consider where to site the projector, how to safely fix the screen, how to provide mains power to them both and how to send content to the projector.

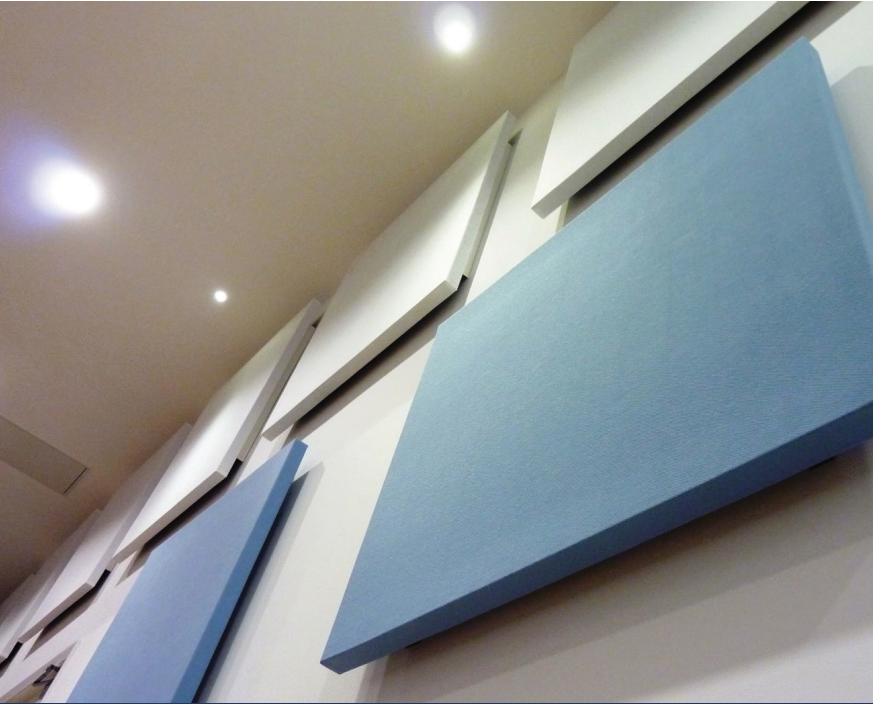

Fortunately we are specialists in this area and you can rely on our experience and expertise, having carried out hundreds of similar installations.

- ACOUSTIC PANELS**

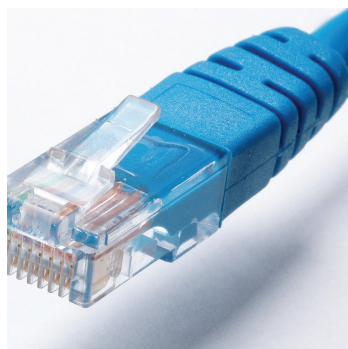

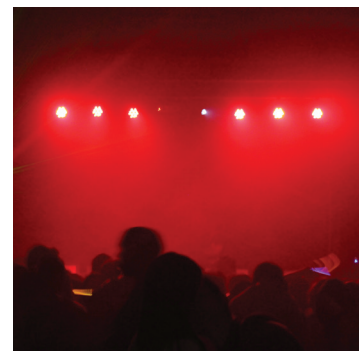

Large open spaces such as gyms, halls and public access areas rarely offer an acoustically balanced environment. High ceilings and hard surfaces can cause reflections and excessive reverberation, conspiring to make speech and music difficult to hear if not totally unintelligible.

Our range of acoustic panels has been designed to reduce reverberation and to absorb low frequencies, resulting in a cleaner, clearer listening experience.

Acoustic panels are available in a wide range of colours and designs, to complement existing décor. They can be made to measure and are equally suitable for new build or refurbishment projects.

Please ask for a free site survey.

## DID YOU KNOW WE ALSO SUPPLY...

AUDIO-VISUAL SOLUTIONS  
INTERACTIVE TECHNOLOGIES  
HEARING INDUCTION LOOP SYSTEMS  
DIGITAL SIGNAGE  
HIRE AND EVENTS  
LIVE VIDEO STREAMING
