

SharePoint QHSE Solution

www.pointsolutionsuk.com

Efficiency and Compliance

Our SharePoint Quality, Health, Safety and Environmental Management solution helps businesses to prevent loss, reduce risks, costs and improve efficiencies while maximising the potential of their SharePoint environment. Because it's SharePoint it can also be configured to meet the exact requirements of your business.

QHSE is a top corporate priority for many businesses with two thirds of workplace deaths occurring within high-risk industries such as construction, agriculture, manufacturing, waste and recycling.

PointSolutions SharePoint based QHSE solution helps business owners and managers to ensure they are putting adequate focus on their legal responsibilities and to address their overall QHSE requirements.

Mobile Forms Processing

Our eForms are compatible with all tablet and mobile platforms (Android, iPads (iOS), Microsoft).

Once completed and submitted, the forms automatically update the system, invoking the linked processes (i.e. creation of nonconformity records).

Management Dashboards

- Presentation of Management Dashboards based on the area of ownership
- Exception Management provides visibility around overdue actions
- Displays status of all live nonconformities
- New nonconformities (created from the incident log and/or audit) are automatically promoted onto the Management Dashboard for assessment and action allocation

RISK ASSESSMENT ANALYSIS

Comparison chart, comparing the severity with the potential risk to give an overall score

Likelihood	Severity				
	Insignificant Harm (1)	Slightly Harmful (2)	Harmful (3)	Very Harmful (4)	Extremely Harmful (5)
Negligible (1)	Minimum Risk (1)	Minimum Risk (2)	Minimum Risk (3)	Low Risk (4)	Low Risk (5)
Rare (2)	Minimum Risk (2)	Low Risk (4)	Low Risk (6)	Moderate Risk (8)	Moderate Risk (10)
Unlikely (3)	Minimum Risk (3)	Low Risk (6)	Moderate Risk (9)	Substantial Risk (12)	Substantial Risk (15)
Likely (4)	Low Risk (4)	Moderate Risk (8)	Substantial Risk (12)	Substantial Risk (16)	Intolerable Risk (20)
Very Likely (5)	Low Risk (5)	Moderate Risk (10)	Substantial Risk (15)	Intolerable Risk (20)	Intolerable Risk (25)

“ PointSolutions have worked closely with us to ensure that our SharePoint QHSE solution meets the needs of our business. The team have been very professional and responded to any changes and additional functionality required to match our specific requirements.

A Modular Approach

System/Module Benefits

PointSolutions provides a modular SharePoint QHSE Management System derived from experience in delivering these solutions to many organisations across different market sectors. The delivery experience and the feedback from our clients has helped us shape our offerings with the key points being:

- A transparent single licensing model helps businesses to manage expectations and budget for scalability
- Global management functionality (ability to have regional QHSE managers/administration within a single deployment) future proofs the investment
- Integration services helps avoid duplication and errors resulting in an increase in efficiencies and productivity

“

PointSolutions have helped us to develop our Business Operations System (BOS). It allows us to speedily communicate changes in policies and procedures to the business. This includes some unique features around approval routes, document classes and automated review scheduling.

”

Linda Blatt
Bridon International Ltd

Key Features

- The quality management process is coordinated via a relational process structure, which incorporates audit and incident logging, nonconformity logging, investigation tasks, corrective action tasks, preventive action tasks and risk management
- Quality audit scheduler
- Audit check eForms – upon submission any flagged nonconformities are automatically logged
- Quality manager dashboard displays overdue audits, tasks, incidents to review and the audit schedule
- Management reporting presents key management information including the risk register and the number of nonconformities by policy and by measure
- Individual dashboard enables users to see the tasks assigned to them
- Audit tracking to ISO standards
- Nonconformity analysis at policy/process level

Implementation Packs

PointSolutions provide flexible implementation options which cover the following areas:

- Consultancy
- System Integration
- System Configuration
- Data Migration
- Workflow Creation
- Security Configuration
- Dashboard Design
- Management Reports
- Training

Support Credits

PointSolutions offer a number of credit based support packages to help businesses maximise and extend the SharePoint environment. Our packages allow you to call off credits /time to contribute towards enhancing the systems we have helped you deploy.
