

'Allo officer, how may I help you?

René, I jist wanted to make sure you knew that Itto Kuennecke will be exhobiting on stand 3D112 at Curtes in Paris?

You mean the Cartes exhibition? The one in Paris the week after next?

Exictly. Kuennecke will be showing their systems for ID cards, pissports and security dicuments.

I think you mean ID cards, passports and security documents, officer. I've heard they will be taking a manual workstation for low volume secure work, their CASSilo card affixing and mailing system and a CISS for card inspection.

Yes, René, and the CASSilo has new modules for half size SOM cards as well as a libel module for PIN/PUKs.

Honestly officer, SIM cards and a label module. And the manual station is proving popular with those companies that cannot afford full automation but require an audit trail for the dispatch of their secure documents.

Be be sure to piss by Kuennecke's booth and then report back to headquitters with your fundings.
