

For immediate release

Pro-Sapien wins new contract as provider of configurable health and safety software to Low and Bonar

Glasgow – 9 October 2015 – Pro-Sapien, award-winning supplier of Microsoft SharePoint and Office365 based EHS solutions to global enterprises, this week announces they have been selected by international manufacturing enterprise, Low and Bonar to provide the organisation with personalised HSEQ Innovate software.

As a result of an extensive selection process, Low and Bonar have chosen Pro-Sapien's enterprise-class HSEQ Innovate solution. HSEQ Innovate will be deployed to support the day to day operations of Low and Bonar's Health and Safety departments across their business units - not only to manage forms and processes but also to produce up-to-date and meaningful management information.

Established in 1903, Low & Bonar has grown from a small jute merchants in Dundee, Scotland to an international business with a global reach with manufacturing plants in Europe, North America, the Middle East and China. With a business focused on sustainability and efficiency, the HSEQ Innovate software will empower Low & Bonar to apply a consistent approach to all aspects of Health and Safety, Environmental and Quality across all Low and Bonar sites and regions.

Pro-Sapien's Commercial Director, Murray Ferguson commented:

"One of the key requirements that Low and Bonar place other than functionality is efficiency, our HSEQ Innovate software has a competitive edge in this regard. The fact that Innovate is fully integrated with Microsoft SharePoint and Office365 is a strong advantage – especially for Low and Bonar, who had already decided on SharePoint as their strategic portal platform. Configurability options also mean Innovate can be optimised to suit the organisation's unique needs. We are absolutely delighted to be working with Low and Bonar, and are looking forward to engaging with them"

Business with Low & Bonar marks another win for Pro-Sapien as the company continues to grow as an award-winning provider of SharePoint and Office 365 based solutions for global enterprises, including some of the world's largest brands.
