

Datasheet for Drain cloth: 10-00.001

Features

With decades of filtration experience Filtration Group B.V. has developed a cloth range to give a solution to all your filtration challenges.

Our broad range of drain cloths is developed in such a way that depending on the demanded temperature range, chemical resistance and selectivity the best solution for your process can be chosen.

A drain cloth maximizes the throughput and the lifetime of the top cloth.

Characteristics

- No seam (round weave) - no breaks. This brings stand-down time to a minimum.
- Optimized weave, making the best throughput-cost ratio.
- Packed in plastic bags to prevent the cloths from becoming dirty.
- A sticker on the plastic bag identifies the cloths. Because the identification sticker does not touch the cloth itself there is no risk of ink or glue going into hygienic applications.

Specifications

Cloth code	10-00.001
Cloth use	Drain cloth
Material	PP
Cloth structure	Monofilament
Surface treatment	Untreated
Filter fineness [μm]	300
Air permeability [$\text{l}/\text{dm}^2/\text{min}$] at 200 Pa	-
Maximum temperature [$^{\circ}\text{C}$]	95

Approvals

Approved according to FDA, declaration of conformity available on request.

Wash the filter cloth before use.
