

PH MEDIA    YOUR REPROGRAPHIC NEEDS

Confined for years inside their New York apartment by a domineering father, the Angulo brothers spent a remarkable childhood building props and recreating films to better understand the outside world. Here Mukunda Angulo gives Port a firsthand account of life at home for him and his six siblings, now stars of Crystal Moselle's documentary *The Wolfpack*

## MEXICAN WAVES

...ING ON THE COLORS AND TEXTURES OF ITS AZTEC AND SPANISH

a renaissance, with a new generation of buildings by high-tech architects  
and designers. As well as a center of finance, Mexico City has become a hub  
for art, design and creativity, with an economy the size of Peru's.

"Construction started to boom here even when other parts of the world  
were in recession," says architect Ezequiel Farca, who works both in Mexico  
City and Los Angeles. "Architecture and design are going through a great  
phase now and are poetic and free enough to create something bold and full  
of imagination. Young architects are inspired by the Mexican masters, which  
you can see through their use of color, proportion and building techniques.  
At the same time there is a revival of furniture design and a greater  
appreciation for design icons such as Clara Porset and William Spaulding."  
In the past few years, not only have charming old buildings been rejuvenated

...ning, but Norman Reedus is at peace. In 1991, the actor was fifty cents an hour working in a busted Harley repair shop in LA. He'd followed a girl from Japan over to LA, but it didn't work. One night he found himself angry and drunk at a party in the Hollywood – his abusive tirade won him a part in a play. and a career's worth of roles in dark, violent and barely seen as a man in the shadows, flirting with photography, art and the good. And then it all changed. AMC's The Walking Dead by acclaimed show about survival in post-apocalyptic, zombie-transformed Reedus, at forty-six, into one of the most recognisable
