Patient Handling Care Specialists

Banana

Part of the GBUK Group 

GBUK Banana is one of Europe's leaders in the technology of patient moving and handling.

The Banana range includes lateral transfer boards and sheets used for moving patients from a bed to a trolley or operating table, slide sheets to assist in repositioning patients in bed and slings for moving patients in safety and with dignity. Innovative and providing excellent value, GBUK Banana products directly enhance & improve the safety and well-being of patients and carers.

Think GBUK BANANA for:

Quality

Innovative

Clinician Led Solutions

GBUK Group award-winning specialist companies are expert in the provision of enteral feeding, critical care and patient moving and handling products and technologies. GBUK Group companies are suppliers to every UK NHS Trust and to a rapidly expanding Export customer base.

Within the Group, GBUK Enteral is the UK's leading supplier of enteral feeding tubes, syringes and gastrostomy devices, GBUK Healthcare offers single-use disposable medical, surgical & critical care devices, and GBUK Banana provides a comprehensive range of innovative safety centred patient moving and handling systems.

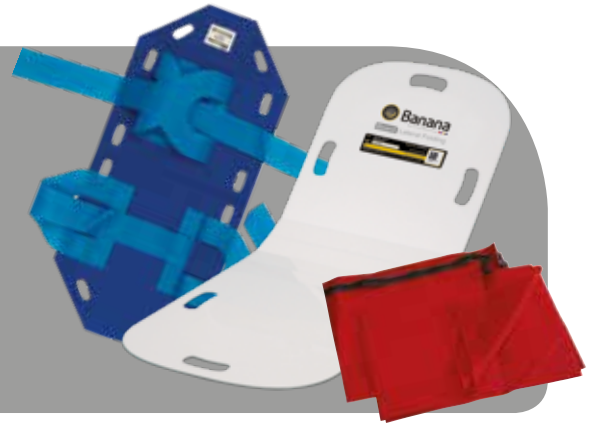

The Group's success is founded upon the pursuit of technical innovation and the provision of world class products in terms of both quality and value.

Product Range

Range Overview

Patient Repositioning, Proning & Transfer Devices

Single Patient Use Slide Sheet, Washable Slide Sheet, Disposable Slide Sheet, Versal, Intoprone, Orbit, Transfer Sheet, Lateral Folding, Lateral Rigid, Flexible Rollboard, Prime Seated, Q2 Seated and Original Seated

Patient Elevation

Loop Sling, Clip Sling and Lo-Raiser

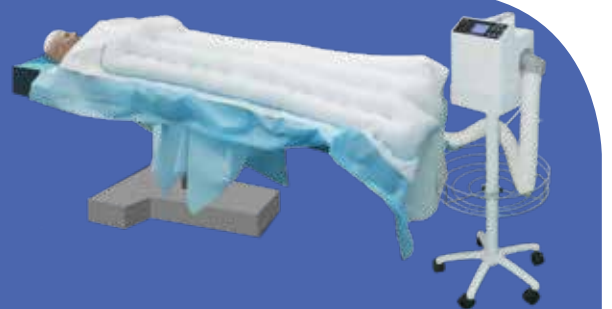

Air Assisted Devices

Air Assisted Transfer, Air Assisted Raise and Airseat

Care Management Systems & Accessories

Versal On Bed System, Versal System Adaptors, Versal System Clamp, One Way Glide, Turning, Transfer Handles, Belt and Patient Warming

Slide

SPU Sheet

Strong and durable red hemmed slide sheets with high slip performance. Silicone coated on both sides with a low profile seam, this sheet provides long lasting, high slip characteristics to enable safe and easy patient repositioning and transfers.

● **Strong hemmed sheet**
optimum durability

● **Silicone coated with high slip finish**
safe and easy patient movement

Banana Slide

Single Patient Flat & Tubular

Think smart, think safe...

When moving a patient **always use slide sheets**

Patient Repositioning

● **Hanging strap**
easy storage close to the patient

● **Latex free**
minimises risk of allergic reaction

● **Available in a wide choice of sizes**

Repositioning Devices From GBUK Banana Offers

- ✓ Innovative products that have been developed by expert clinicians
- ✓ Advanced materials and design technology
- ✓ Scope for full compliance with manual handling techniques
- ✓ Potential to reduce the risk of injury and increase efficiency & standards in practice

Product Features

- ✓ Strong sheet – optimum durability
- ✓ Individually packed – reduces unnecessary use
- ✓ Silicone coated with high slip finish
- ✓ Safe & easy patient movement

Patient Care Packs make life simpler. These packs provide a solution for improving patient care and dignity. Packs can be hung on the bed to ensure the slide sheets are always within easy reach for the carer which saves nurse time locating sheets. The sheets are individually sealed to reduce the risk of cross infection and can help ensure slide sheets are readily available to assist in the patient's needs.

Versal

System

The Versal System, designed by Diane Hindson of County Durham & Darlington NHS Foundation Trust & developed by GBUK Banana, is a moving & handling slide sheet with a difference.

Versal replaces the need for multiple flat or tubular slide sheets. The patented design facilitates a full range of patient movement with the versatility of both flat and tubular sheets.

Versal is a single sized sheet, placed under the patient in the same position, for every procedure.

Repositioning Devices From GBUK Banana Offers

- ✓ Innovative products that have been developed by expert clinicians
- ✓ Advanced materials & design technology
- ✓ Scope for full compliance with manual handling techniques
- ✓ Potential to reduce the risk of injury and increase efficiency & standards in practice

Product Features

- ✓ Simplifies and helps reduce confusion of slide sheet selection by having one sheet for all repositions medially and laterally
- ✓ Improve patient safety by ensuring all bony prominences of the patient are protected by two layers of slide sheet
- ✓ Can improve patient comfort, reduce nursing time and improve efficiency of care
- ✓ Can help reduce the hidden costs of pressure ulcers or an MSK injury

Banana Versal

Helps reduce the risk of injury

Helps avoid hazardous manual handling operations

Helps make proper use of equipment provided for safety

Helps ensure that activities do not put others at risk

www.gbukbanana.com

Patient Proning

Head section removed for visibility of the airway going back to supine

Flexible suitable for use with a range of proning supports

Individually packed reduces risk of cross contamination or wastage

Banana Intoprone

Proning Devices From GBUK Banana Offers

- ✓ Safe solutions to patient proning
- ✓ Reduced risk to staff and patient
- ✓ Time saving for clinicians
- ✓ A more comfortable & dignified turn for the patient
- ✓ Fully-controlled patient proning and positioning

87% of participants concluded that the overall safety and ease of use of Banana Intoprone was

“Very good or excellent” in a large acute Trust evaluation.

Banana Proning Devices

- ✓ Complete control of patient during proning – improves patient safety
- ✓ Eliminates need to “catch” the patient – reduces risk of staff injury
- ✓ One full piece device – easy to insert and remove
- ✓ Time saving for clinicians

Lateral Folding

The unique design of this hinged board means that it can be folded to allow the transfer of patients in a semi upright as well as supine position. This is beneficial for patients who suffer from breathing difficulties or patients who find it difficult to lie flat due to their underlying medical conditions. Made from high strength polypropylene.

Two lengths and two widths of board are available to meet user needs and boards can be wiped clean using soap and water, cleaning disinfectants or alcohol based solutions (up to 75%).

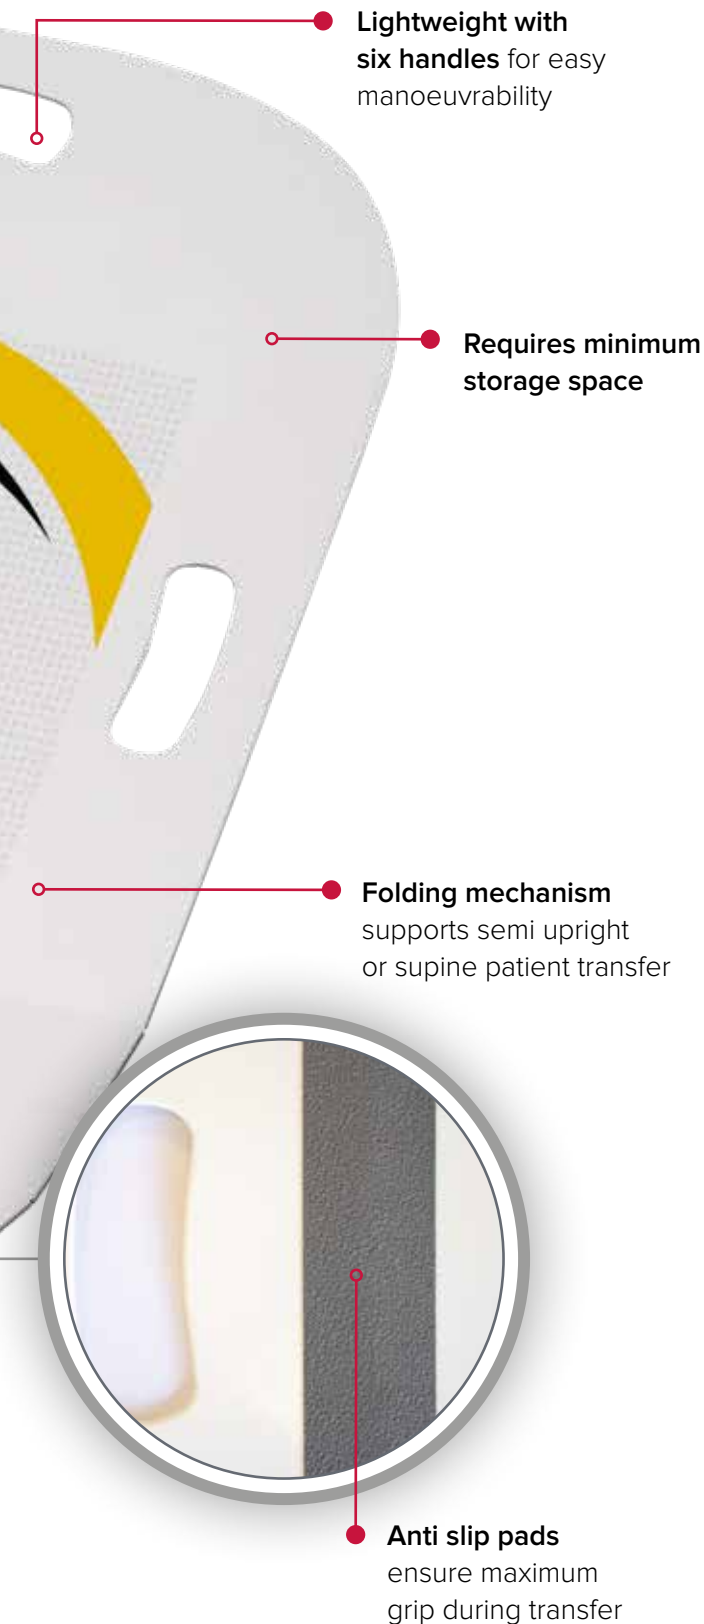

High strength polypropylene for maximum durability

Easy to wipe clean

Patient Transfer

Lightweight with six handles for easy manoeuvrability

Requires minimum storage space

Folding mechanism supports semi upright or supine patient transfer

Anti slip pads ensure maximum grip during transfer

Transfer Devices From GBUK Banana Offers

- ✓ A wide range of innovative products
- ✓ Compliance with safe manual handling procedures
- ✓ Increased safety for carer and the patient

Lightweight with six ergonomically positioned handles

This board can be easily positioned and removed in all transfer situations and requires minimal storage space. Two lengths and two widths of board are available, the narrower 59cm board is ideal for use in confined areas, whereas the wider board will effectively bridge a gap of up to 18cm.

Product Features

- ✓ Folding mechanism supports semi upright or supine patient transfer
- ✓ High strength polypropylene for maximum durability
- ✓ Lightweight with six handles for easy manoeuvrability
- ✓ Anti slip pads ensure maximum grip during transfer

Slings

Lock Sling

Patient Elevation

Pro-Lock® disposable sling has been developed to provide a cost effective patient handling solution to the increasing challenges of infection control. Available in four sizes (x-small, small, medium and large), the Pro-Lock® is designed to be issued for single patient use only and to be disposed of when soiled or no longer required.

The Pro-Lock® sling incorporates a head support for increased comfort and a Patented Positive Locking Clip fixing, suitable for use with any hoist with a clip fixing mechanism.

Positive Locking Clip Fixing - Patent Applied For: GB0821240.9

230kg
weight limit

GBUK has a wide range of slings for Clip and Loop hoists to help perform every procedure comfortably and safely. The clip slings have a patented design to ensure safety when lifting a patient.

Product Features

Loop Sling

Patient Elevation

Pro-Loop disposable sling has been developed to provide a cost effective patient handling solution to the increasing challenges of infection control. Available in three sizes (small, medium, large), the Pro-Loop is designed to be issued for single patient use only and to be disposed of when soiled or no longer required.

The Pro-Loop incorporates a head support for increased comfort, extra padded legs, a unique safety harness configuration and is suitable for use with any hoist with a standard loop attachment spreader bar.

GBUK has a wide range of slings for Clip and Loop hoists to help perform every procedure, comfortably and safely. The clip slings have a patented design to ensure safety when lifting a patient.

Product Features

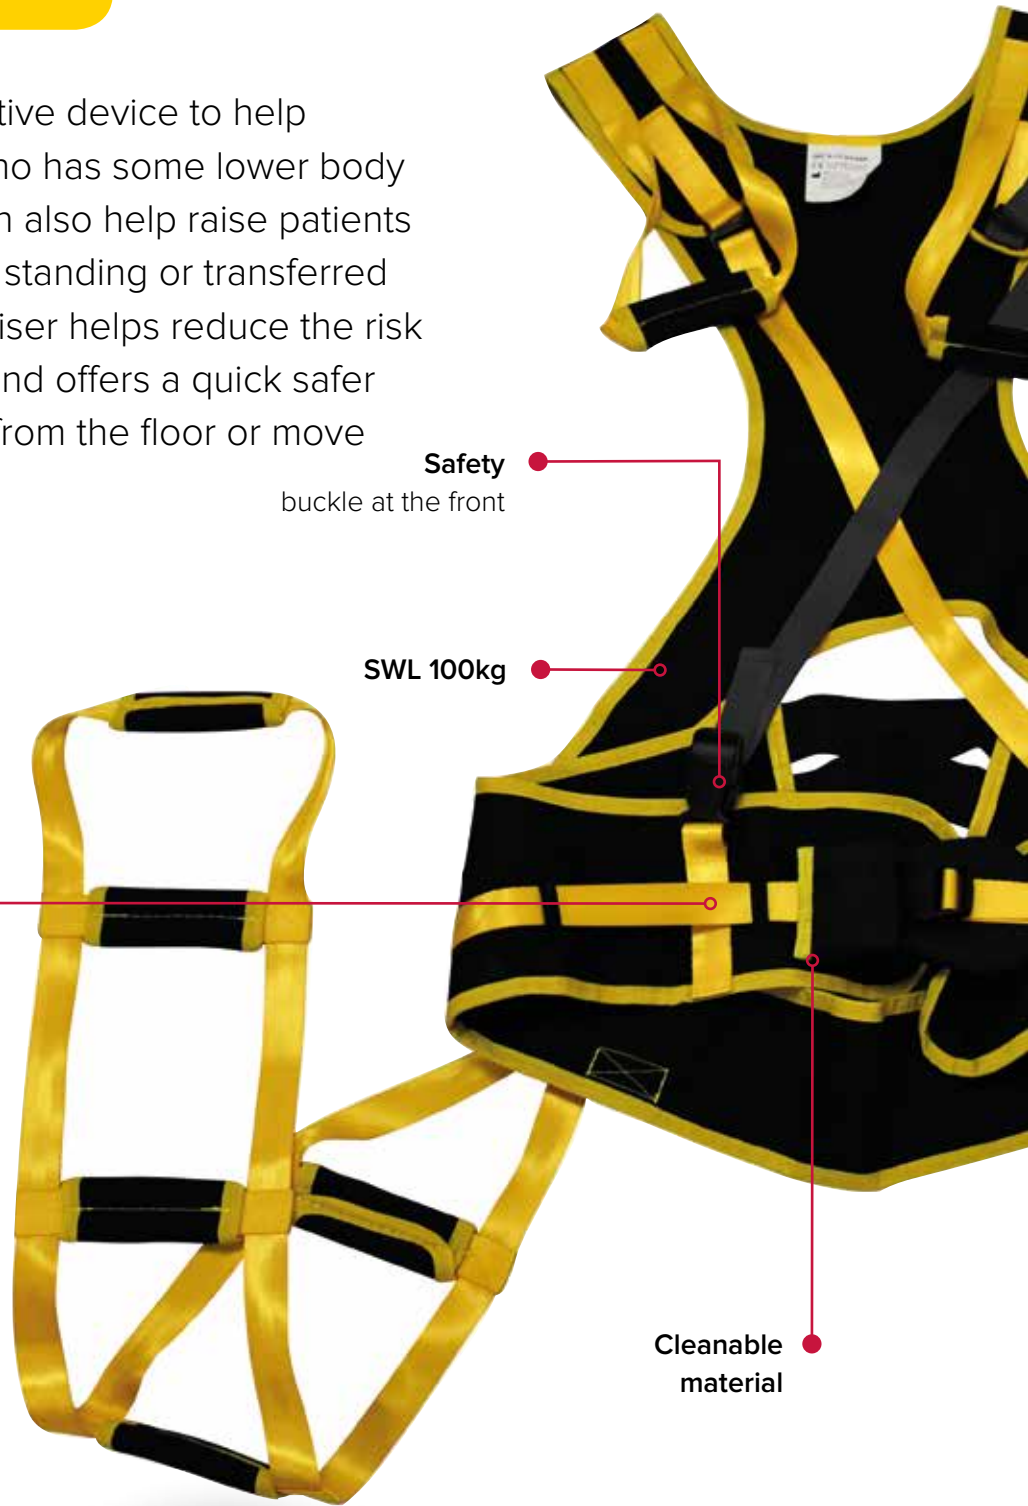

- ✓ Infection control maximised
- ✓ Laundry costs eliminated
- ✓ Unique safety harness configuration
- ✓ 230kg weight limit

Lo-Raiser

The Lo-Raiser is an innovative device to help manually raise a patient who has some lower body strength. The Lo-Raiser can also help raise patients forward in a chair to either standing or transferred to a wheelchair. The Lo-Raiser helps reduce the risk of short cuts being taken and offers a quick safer solution to manually raise from the floor or move from a confined space.

Air

Reusable

The uniquely designed Air platform provides a safe, comfortable and dignified method of transferring and positioning patients. It also enables caregivers to perform lateral transfers with relative ease and with minimal risk of injury.

Made from specialised medical fabrics, this cushioned Air platform maintains patient comfort whilst in situ and minimises friction and shear forces during transfer. Its patented extended handles enable staff to maintain a proper posture protecting them from the risk of injury.

Air Assisted Devices

Air Assisted Devices From GBUK Banana Offers

- ✓ A superior level of comfort and safety for carers and patients
- ✓ A range of innovative and easy-to-use appliances
- ✓ Scope for fewer carers to be needed to carry out a patient movement
- ✓ A superior level of patient dignity during movement and handling procedures

Product Features

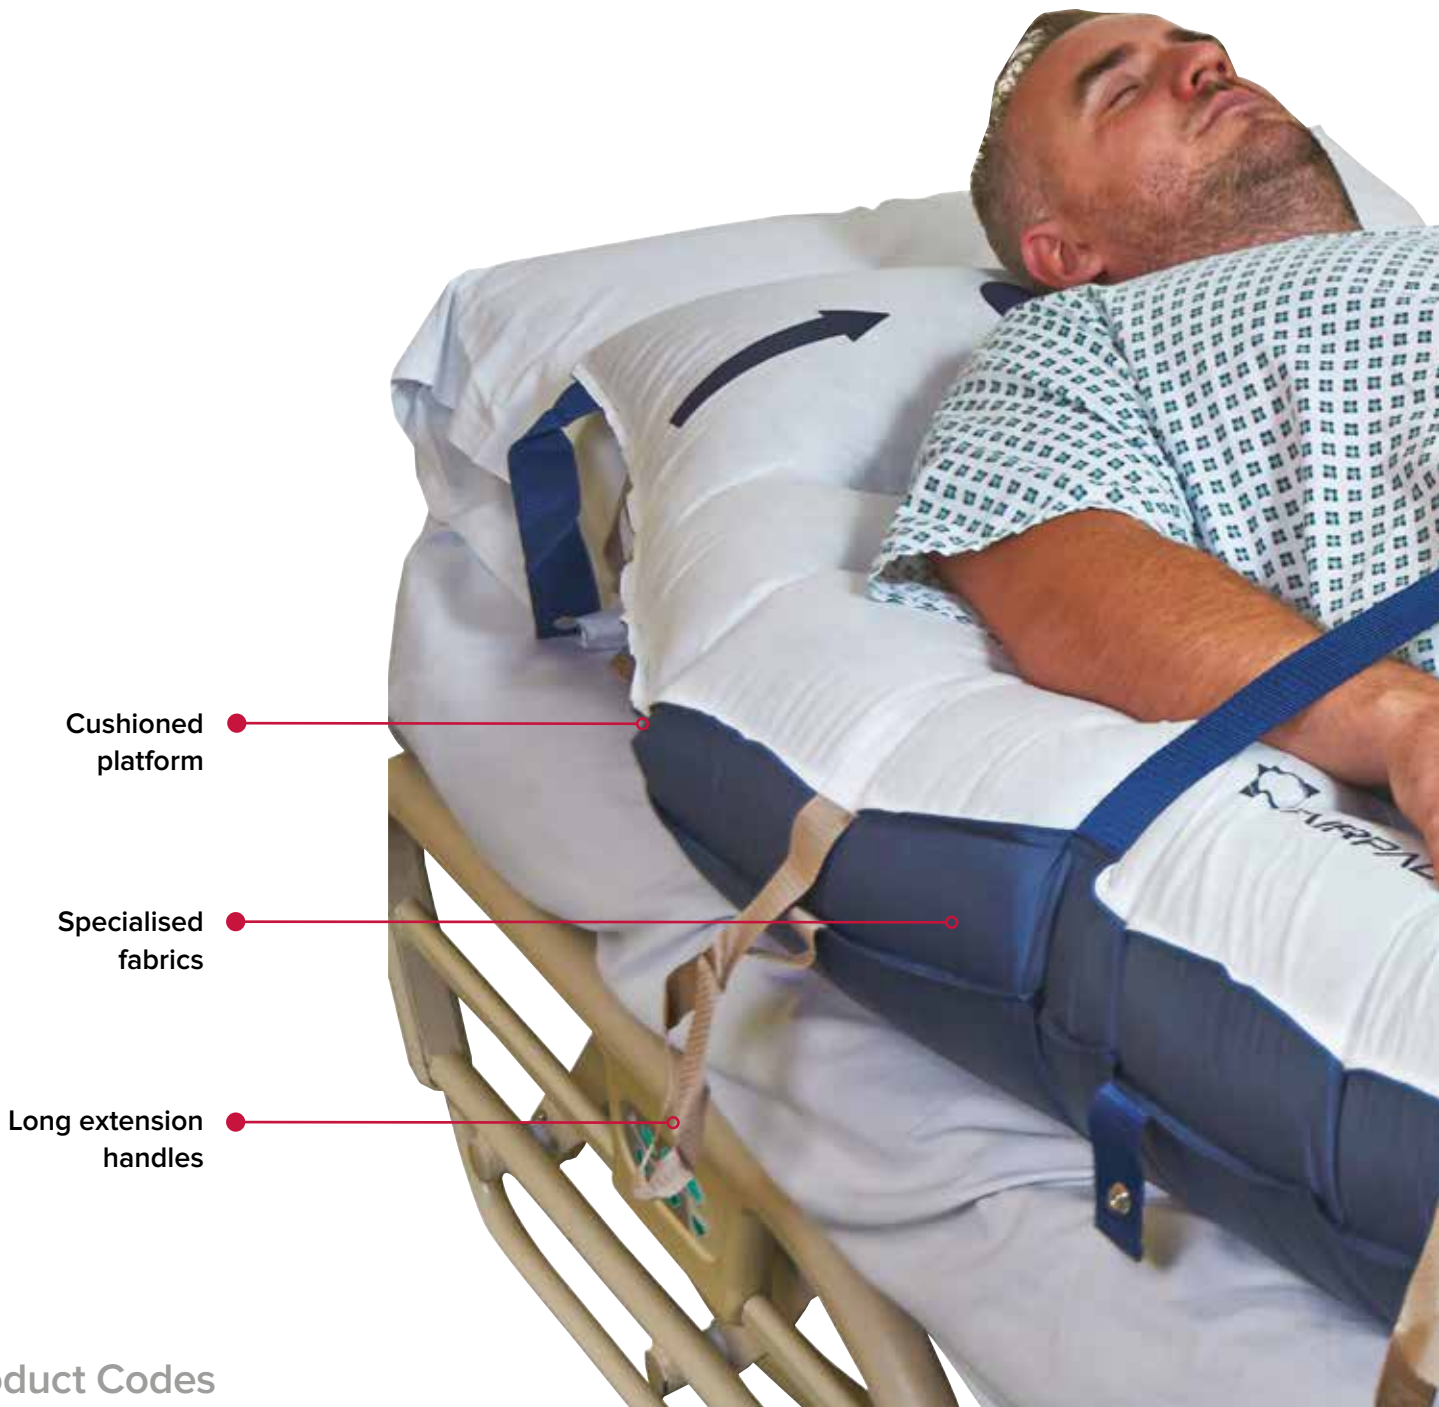

- ✓ Widths 34, 39, 50"
- ✓ May be used for multiple transfers during patient hospital stay
- ✓ Compatible with X-ray and MRI

Patient Warming

Our Patient Warming device is used to keep patients warm during anaesthesia and surgery. They are used in clinical areas where patients are at risk of hypothermia.

Inadvertent Perioperative Hypothermia

Inadvertent perioperative hypothermia is a common and preventable complication of surgery. It is defined as a drop in core body temperature below 36°C and is associated with poor outcomes for patients.

Accessories

Product Features

- ✓ Flexible, easy to use design
- ✓ Uniform perforation across the blanket surface ensures even convective warming
- ✓ Soft, radiolucent, latex-free materials
- ✓ Fully compatible with other brands of warming blankets

Causes of Inadvertent Perioperative Hypothermia

During the first 30 to 40 minutes of anaesthesia, a patient's body temperature can fall due to:

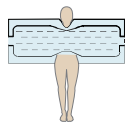

- ✓ Loss of body's normal response to cold due to anaesthetic drug
- ✓ Dilation of peripheral blood vessels
- ✓ Patient's cooling while waiting for surgery
- ✓ Fluid deprivation before anaesthesia

Consequences of Inadvertent Perioperative Hypothermia

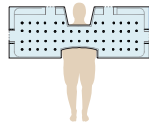

- ✓ Increased blood loss during and after surgery
- ✓ Longer recovery
- ✓ Feeling cold following surgery
- ✓ Increased risk of infection and HAPU
- ✓ Longer hospital stay

Versal

On Bed System

Versal On Bed System is a tough, durable adaptor frame that can be easily fitted to profiling beds to provide attachment points for the Versal Sheet Clamp.

Accessories

Product Codes

	Product Code	Product Description
Versal On-Bed System	B-INBEDREPO-W	Versal, Complete In-Bed Reposition System, Washable, Aid for reducing friction force
	B-INBEDREPO-SPU	Versal, Complete In-Bed Reposition System, Single Patient Use, Aid for reducing friction force

Air

Airseat

The Air Seat is a foldable, inflatable seat cushion which provides excellent postural support to the pelvic area and may also be used as an alternative to lumbar support products. It can help to provide some comfort to those who may suffer pain when sitting because of injury, joint pain or bony prominences, whilst also blocking cold air from the floor.

Accessories

Product Codes

	Product Code	Product Description
Airseat	BAS1200	Airseat, Cushions Pressure Relieving Chairs, 45cm x 45cm

System Adaptor

Accessories

Versal System Adaptor can be fitted to most types of beds including electric profiling, static frame and divan bases in both acute and community care environments.

Can be fitted in minutes to most types of bed without the need for any modifications.

Polypropylene construction ensures the Banana Versal Bed Adaptor can be easily cleaned in compliance with local infection control policies.

Product Codes

	Product Code	Product Description
Versal Bed Adaptor	B-MDBA001-G	Versal, Bed Adaptor, Single, For use with Versal sheet, 88cm x 35cm x 21cm
Versal Plus	B-VERSAL-PLUS	Versal Plus, Advancing Care Pack, 1 x Versal sheet, 1 x in-bed sling, drawstring bag, Aid for in-bed patient movement

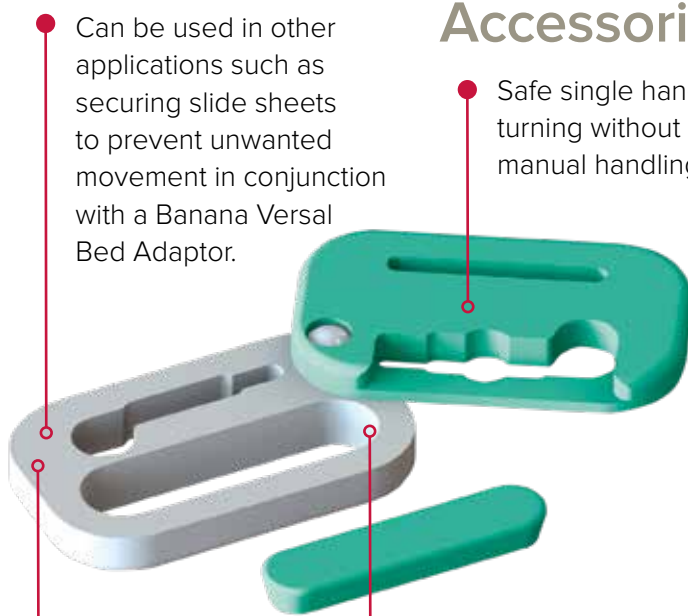

System Clamp

Accessories

Versal System Clamp is a versatile sheet clamp used in conjunction with the Versal Bed Adaptor to prevent unwanted movement of in situ repositioning sheet systems.

The Versal Sheet Clamp can be fitted to a suitable slide sheet or in-bed repositioning system to enable a hoist assisted turn.

Each Versal Sheet Clamp is supplied with a Versal Clamp Strap which when fitted to the Versal Sheet Clamp can be attached to hook onto a hoist spreader bar.

Can be used in other applications such as securing slide sheets to prevent unwanted movement in conjunction with a Banana Versal Bed Adaptor.

Safe single handed turning without manual handling.

Can be fitted exactly where required on the sheet to ensure a safe & comfortable turn.

No handles or straps are required on the slide sheet or in-bed repositioning system.

Product Codes

	Product Code	Product Description
Versal Clamps	B-MDSC002-02-G	Versal, Bed Adaptor Clamps, Pair, For use with Versal sheet, 10cm x 6cm x 2.1cm

One Way Glide

One Way Glide is an anti-slip mat that is designed to prevent the patient from falling or sliding from a chair or wheelchair.

One Way Glide

- ✓ PER, Polymer Environment Resin, is non-phthalate, non-heavy metal, non-toxicant, Oeko-Tex Standard 100 certified
- ✓ Facilitate good sitting position
- ✓ Prevent patient sliding forward
- ✓ Return patient back to upright sitting position
