

IOPD – GSD2 Pompe – Specialist Paediatric Centres

In **England**, people diagnosed with GSD2 or Pompe Disease are referred to one of the highly specialised treatment centres at three paediatric and five adult hospitals.

In **Wales** patients are generally referred to either the Specialised service at Cardiff or the Manchester centres.

In **Scotland**, a metabolic network exists between specialists in Glasgow and Edinburgh.

Ireland has very few patients, who are referred to either Belfast or Dublin Hospitals.

ENGLAND: Highly Specialised Paediatric Centres
