Portable Horizontal Shaft Impact Crusher (HSI)

RDS-20

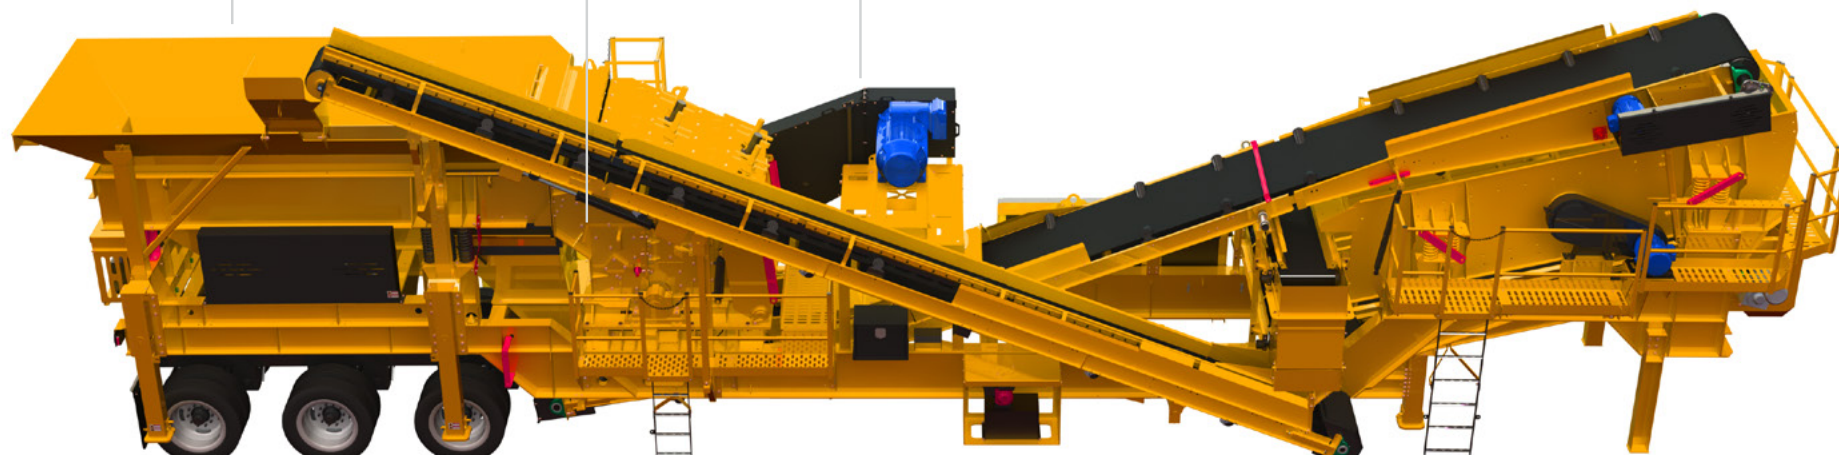

RDS-20 Portable Horizontal Shaft Impact (HSI) Crusher

CRUSHER

1 Patented Hydraset Hopper™

2 4056 Impactor

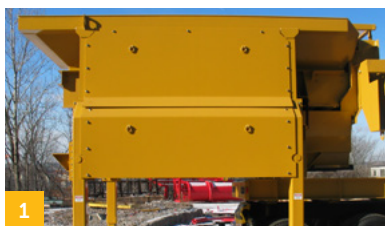

3 One Power Source CAT® C13 Diesel or Electric Motor*

The RDS-20 Portable Horizontal Shaft Impact Crusher (HSI) is the ideal machine for ease & efficiency on your job site. Easy to move. Simple to operate. Quick to set-up. Ideal for boosting productivity. IROCK's RDS-20 crusher increases production by splitting the load on two decks rather than one. The plant combines a closed-circuit design, high-performance four-bar impactor and heavy-duty components to produce a uniform, cubical product. It can process the toughest materials like recycled concrete, asphalt, rock, gravel and slag.

Engine	CAT® C13 475 HP
Hopper Capacity	15 yd ³ hopper
Top Deck	16 feet x 5 feet
Bottom Deck	16 feet x 5 feet
Feeder Size	52 inches x 17 feet
Rotor Size	40 inches x 56 inches

**Available in electric (300 HP, 1200 RPM) or C13 CAT® Diesel*

The patented Hydraset Hopper™ simplifies the connection with one operator able to manage the preparation and removal of the hopper/feeder.

IROCK's four-bar rotor 4056 impactor design produces a consistent, uniform cubical product

One power source to run the complete crushing operation and three auxiliary outlets.

The IROCK RDS-20 Closed-Circuit Portable (HSI) produces up to three sellable, finished products with capability to return oversize from both screen decks.
