

## Overview

The HCS rental 10ft IWOCS unit is a direct hydraulic package ideal for locating in restricted areas on the installation. The unit is suitable for multiple applications and is not restricted to IWOCS functionality. The unit requires a deck jumper to link the hydraulics to a suitable hose reel.

The unit has a suitable habitat that protects the operator from the elements during operation. The system is a proven package that can vary in functionality from workshop testing to operating a xmas tree during SIT, offshore installation, intervention or abandonment.
