

Products and Services Guide

Welcome To NWR Hygiene Group

NWR Hygiene Group is a privately owned local company that offers a superior service suited to meet the customers' needs.

Supplying throughout the UK we know that you don't just want the very best in washroom equipment; you also want safe, reliable and long lasting products. We can provide you with a range of equipment that is second to none in terms of performance, affordability and excellent guarantees.

This combination of reliable products and high standards of customer care has led to an ever-increasing body of satisfied customers.

The law on waste disposal and your 'Duty of Care'.

The Environmental Protection Act 1990

NWR Hygiene Group provides a range of disposal services that comply with the Environmental Protection Act 1990. This act places a legal 'Duty of Care' upon you and your organization, to ensure that all waste produced on your premises is correctly managed right up to the point of final disposal.

NWR Hygiene Group provides all of the correct documentation to certify that your waste is being disposed of correctly.

The Workplace (Health, Safety and Welfare) Regulations 1992

These regulations are a legal requirement on employers to provide appropriate facilities for their employees at the workplace. These facilities include **Sanitary Disposal, Air Freshening, Soap dispensing, Water Management Systems, Drying Facilities and Paper Systems**. Regulation 21 of the Approved Code of Practice, in The Workplace (Health, Safety and Welfare) Regulations 1992 advises that, "in the case of water closets used by women, suitable means should be provided for the disposal of sanitary dressings". This regulation is further supported by the Water industries Act 1991, which states that no items should be flushed that may cause a blockage within a sewer or drain. The regulation on Air Freshening states that "suitable means should be taken to prevent odours from lingering in and from entering other rooms".

Disclaimer: Every reasonable effort will be made to ensure that all featured products are available, but interruption in supply may occur. NWR Hygiene Group reserve the right to vary specifications and design or use alternative materials or products as may be deemed necessary at any time. (Changes or variation not to affect quality or performance). Whilst great care has been taken to ensure accuracy of all descriptions, NWR Hygiene Group reserves the right to correct errors or misprints.

The Air Care range that NWR Hygiene Group offers can help you meet these requirements. The regulations also state that you must provide your employees with soap and paper products and also a drying facility. NWR Hygiene Group has a wide range of products to fulfill these needs.

Water By-Law 83 states that every pipe that supplies water to a flushing system or urinal shall be fitted with either a flow shut off device controlled by a time switch and lockable shut off valve or some equally effective automatic device that empties the cistern or trough. By fitting a water management system NWR Hygiene Group can save you up to 80% off your water bill.

Further information on the Workplace (Health, Safety and Welfare) Regulations is available at the HMSO website. NWR Hygiene Group has a wide range of equipment and products that will help you to comply with these regulations.

Feminine Hygiene & Baby Care

Feminine Hygiene Bin

Our slim line, hands free, foot pedal sanitary bin offers you a discreet and hygienic way to dispose of your sanitary waste. This hands free bin has a covered lid to enclose bad smells and so you cannot see what has been disposed of in the bin. These bins have an easy clean surface to prevent dirt build up and make them extremely easy to clean. These bins come in either white or a chrome finish.

Vending Machines

We offer the highest quality vending services suitable for both ladies and gents. Our vending machines look clean, hygienic and modern. We have feminine hygiene and condom vending machines available. We offer a number of options in vending machines which include nappy disposal, dispensing Pampers nappies and much more.

Baby Changing Unit

This unit is a great way of offering baby changing facilities that are safe and hygienic to use for your staff and customers. Our baby changing unit comes with a built in hold strap to prevent a baby from moving and hurting themselves. These units come with either a horizontal or vertical opening allowing them to fit in small areas. They are secured to the wall by our trained engineers making sure that they are 100% safe to use.

Nappy Bins

Designed with robust performance in mind, our Nappy Bin range from NWR Hygiene has a large 60 litre capacity and easy to service features. With a large, easy to use pedal and contemporary, easy to wipe down design these bins also offers end users a simple solution to dispose of nappy waste.

Available in White and Yellow

Clinical Waste & Sharps Disposal

Sharps Bin Exchange

This service is a hassle free, safe and hygienic way of disposing sharps material correctly. The sharps bins come with a temporary lock which prevents sharps that have been placed in the bin being retrieved. The slim design of the bin allows it to fit into almost any gap, making it suitable for any surgery. These bins are available in 5 and 7 litres.

Clinical Waste Disposal

Our clinical waste disposal is a great way to safely and hygienically dispose of your clinical waste in the correct manner. Our bins and disposal complies with the Environmental Protection Act 1990 making it the most environmentally friendly way to dispose of your waste. This bin has a wipeable surface and comes in bright yellow making it stand out from normal house hold waste bins. These bins come supplied with clinical waste bags.

Nappy/Clinical Waste Bin

These bins are a great way of holding a great amount of nappy or clinical waste. They are designed for outdoor use meaning at the end of the day you can empty your waste into the bin, leaving your indoor bin smelling fresh and looking clean. These bins are great for busy businesses that require indoor bins to be emptied on a regular basis. Clinical waste bags for these hygiene bins are provided.

240ltr, 660ltr and 1100ltr

Infectious Clinical Waste. Hazardous

Poses a known or potential risk of infection including anatomical waste, diagnostic specimens, reagent or test vials.

Cytotoxic and Cytostatic drugs. Hazardous

Hormone and cancer treatment medicinal waste must be separated from other medicinal waste as they are classed as hazardous. Located list can be found in BNF or NIOSH list of medicines. Failure to segregate from non-hazardous medicines will mean that the waste must be treated as hazardous and incur associated hazardous waste charges.

Air Care

Air Freshener

The compact and sleek design of our Air Freshener makes it suitable for use in a variety of locations. The patented I.P.E. system provides flexible programming options allowing costs to be fixed and matching fragrance delivery and odour control to location conditions. The I.P.E. facility enables programmable fragrance intensity, by allowing users to program up to 3 periods per day of enhanced fragrance delivery to suit location requirements. Higher fragrance levels can be selected at known busy periods. A countdown clock indicates the time until the next spray and confirms operation of that air freshener.

V-Air SOLID

Multiple fragrances from one air freshener. VOC exempt. The V-Air Solid range offers a premium look and provides something different for every washroom. Choose the dispenser range that provides the latest air care and hygiene technology, in the most eye catching way. Available in Black and Chrome.

Choose from a variety of elegant inserts (Black & Chrome) to suit your location and preference. All dispensers come with effective, durable, innovative and long lasting refills.

V Air Power Plus

Need fragrance on a large scale, without the spray? Then look no further. Packed full of fragrance but completely free from any aerosols, solvents or propellants, V Air Power Plus is a revolutionary non-aerosol alternative.

- Releases high quality fragrances continually & consistently
- Fragrance changes through refills lifetime to avoid fragrance fatigue
- Provides total user control of output & intensity

Bio-Zone

Destroys bacteria, airborne viruses, chemicals and mould making unpleasant smelling washrooms become a thing of the past

- Remove odours by destroying the root cause - bacteria, viruses, micro organisms and mould
- Leave the area clean and safe
- Help prevent cross infection
- Save time, labour and money - no chemicals or perfumes to add
- Continuously purify the air and all exposed surfaces 2000 times faster than Ozone and 180 times faster than UV alone
- The system also requires minimal maintenance, is easily installed and inexpensive to run at around 2p per day)

Urinal Treatment & Water Management

Water Management System

This product has been developed to provide the ultimate control methods for washroom water consumption. It also contains an internal 'real time clock' which allows flush times to be programmed specifically to a sites requirements. This provides the best financial savings whilst not compromising on washroom hygiene within the site.

With a water management system for NWR Hygiene Group:

- Save water and money
- Real time clock will allow for ultimate programmability

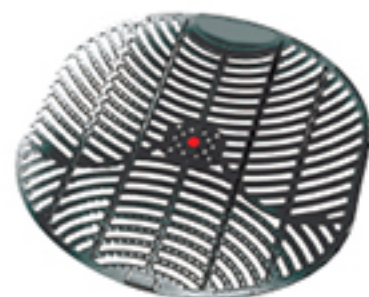

Urinal P-Screen

Urinal P-Screens are a 60 day powerful fragrance solution for most urinal shapes and sizes. P-Screen is an effective solution that reduces bad smells for up to 60 days with a deep bubble and bristle design that prevents splash back and drain blockages.

P-Screen is the World's first triple action urinal screen, offering both dual fragrance and enzyme protection. Available in a variety of fragrances.

Urinal Mat Screens

Our Urinal Mat Screens offer an effective means of keeping drains and urinals free flowing. They also work to combat odour control between washroom visits. The urinal screens are VOC exempt and non-hazardous. A pleasant fragrance is provided, keeping the urinal smelling fresh for up to 30 days.

Quadrasan

The Quadrasan system provides continuous programmable maintenance ensuring W.C. and urinal fixtures remain clean, sanitized and odour free. This programmable dispenser can be set to dispense between 8, 12, 16 and 24 hours. Quadrasan refills are available in chemical and biological formats. Both formats are available unfragranced or with a choice of fragrances. The Quadrasan is available in white or chrome.

Superior Range

Add a touch of class to your washroom with the superior range available from NWR Hygiene Group.

Feminine Hygiene

The sleek design of these bins means they can fit into the smallest of cubicles making them accessible for everyone. With the polished chrome effect giving your washrooms an enhanced appearance, raising the standard of your company. The bins are lined with a scented liner along with an enclosed lid preventing bad smells from escaping, making your washroom more pleasant. A foot pedal on these bins makes them more hygienic to use.

V-Air MVP Dispenser - Black

The V-Air MVP black dispensers are something different for the washroom.

Our soap dispenser allows flexibility for a user's preferred choice of soap and hand washing medium, with a selection of innovative liquid, spray or foam pumps, without the requirement of replacing the dispenser. The unique pouch feature included with our soap dispensers reseals each pouch, ensuring servicing of the soap dispenser is very quick, simple and contamination free.

V-Air Solid Air Freshener - Chrome

Multiple fragrances. VOC exempt. The multi - award winning V-Air Solid offers a premium look and provides something different for every ones washroom. Choose the dispenser that provides the latest air care and hygiene technology, in the most eye catching way. Available in black and chrome finishes.

Choose from a variety of inserts to suit your location and preference. All dispensers come with effective, durable, innovative and long lasting refills.

Hand Dryers

dyson airblade V

The fastest, most hygienic hand dryer

The new Dyson Airblade V™ hand dryer is quiet, hygienic, fast and compact. The Dyson Airblade V hand dryer takes just 12 seconds to dry hands. So users spend less time in the washroom, and busy periods are easier to manage.

Dyson Airblade V™ hand dryers produce up to 79% less CO₂ than some other hand dryers and up to 76% less than paper towels.

- Hands are dry in just 12 seconds
- Uses up to 80% less energy than warm air hand dryers
- Less energy means less running cost
- A HEPA filter removes over 99.9% of washroom bacteria from the air used to dry hands

dyson airblade

The fastest, most hygienic hand dryer

The Dyson Airblade™ hand dryer works in just 10 seconds - scraping water from hands like a windscreen wiper. It's the fastest hand dryer - and it purifies the air before blowing it onto hands, so it's also hygienic. And it uses up to 80% less energy than warm air hand dryers.

- Hands are dry in just 10 seconds
- Uses up to 80% less energy than warm air hand dryers
- Less energy means less running cost
- A HEPA filter removes over 99.9% of washroom bacteria from the air used to dry hands

A faster dry time and no energy-hungry heating element means the Dyson Airblade™ hand dryer costs less to run than warm air hand dryers and up to 97% less than paper towels.

Hand Dryers

Air Lite Max

The UK's first entry level high speed automatic hand dryer. Equipped to impress, the Air Lite Max has an array of features, even for a unit that was designed to fit into the lower price end of the hand dryer market.

Air Lite Max casing is high quality steel, with an intelligent heater system, that only activates when needed, meaning the user gets efficient hand drying 100% of the time, coupled with a noise level well under 75dB there really isn't anything else that comes close.

- 12 - 15 seconds drying time
- Low energy use - 500w
- Automatic operation
- Intelligent heater
- Quality stainless steel
- Low noise
- Internal UV protection
- Available in stainless satin, polished and ceramic white

Air Lite Super Max

The Air Lite Super Max is a fast conventional hand drier. It is available in a number of different colours. With its unique built in UV light the Air Lite Super Max kills bacteria in the air and on your hands while you dry them. It has a Double HEPA filter which will also kill 99.9% of bacteria.

One of the many benefits using this dryer is the Stepless Hidden Switch which allows you to adjust air speed freely. Coupled with the Intelligent LED display and Dual wave-shape outlets, it really does enable faster drying times.

The 24,000 RPM brushless motor provides a powerful hand dryer which has up to a 10 year life span

- Sensing type - Touch free infrared
- Drying time - 7-10m/s
- Air temperature 20-40 degrees C
- Internal UV protection
- Noise level - 70dB@1m
- Drain tank with level window, keeps the ground clean

Dispensers & Consumables

Soap Dispensers

Our soap dispensers allows flexibility for a user's preferred choice of soap and hand washing medium, with a selection of innovative liquid, spray or foam pumps, without the requirement of replacing the dispenser. The unique pouch feature reseals each pouch ensuring servicing of the soap dispenser is quick, simple and contamination free.

Soap Products

Our soap products are only of the highest quality ensuring that your hands are left feeling hydrated and clean. Our dispensers can hold all different forms of hand wash including gel hand wash and also alcohol gel. We also can offer a foaming hand sanitiser that cleans your hands without the need of washing or drying them. Our soaps are available in all different kinds from aroma therapy to moisturising hand wash.

Toilet Roll Dispenser

This dispenser offers a paper dispensing system that reduces wastage of paper products. The one sheet technology allows you to pull one sheet at a time therefore reducing the numbers of sheets wasted.

Paper Products & Consumables

We can offer you the highest quality eco friendly products for your company from soap and bin bags to toilet rolls, including other products such as polythene gloves and blue roll. We only offer products to you that we have tried and tested ourselves so we know that they are of a high standard and you won't be left disappointed. NWR Hygiene Group only offers the highest quality paper products suitable for your needs. Our paper products are bio-degradable and are all environmentally friendly.

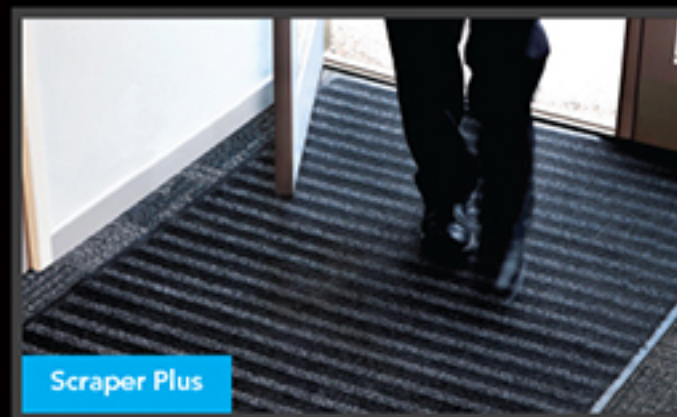

Logo Mats & Dust Control Mats

Stand out from other businesses with a dust control mat with your company name and logo. These mats are a great way to improve the look of your business as well as control the amount of dust entering your premises. You can have any design on these mats from plain and simple text to brightly coloured logos in a variety of colours.

One of our customers even had the children from the nursery draw a picture to be placed on the logo mat and they are extremely happy with the results. We have a wide variety of colours to suit every business.

Dust Control Mats

Scraper Plus

Research has shown that most of the dust and dirt in a building is brought in by pedestrian traffic. The above Scraper Plus product line, provides the ultimate solution against that type of floor contamination, stopping it literally at the door and minimising the hazard of slippery floors. The Scraper Plus range consists of textile mats tufted from successive rows of solution dyed polyamide fibres.

The monofilament fibres work as tough scrapers, combined with a high twist and heat set bicolour multifilament yarn which is designed for dirt and moisture absorption. The mats are available in a functional dark grey colour.
