1.0 RATIONALE

CRISL has upgraded the Long Term rating 'A-' (pronounced as single A minus) from BBB+ and reaffirm the Short Term rating 'ST-3' to Dienco Limited (DL) on the basis of its financials and other relevant quantitative and qualitative information up to the date of rating.

The above ratings reflect DL's Good business and financial performance, improved profitability indicators, accomplished a good number of high valued projects, regular debt repayment history, experienced management team etc. However, the above factors are constrained to some extent by levered capital structure, receivable collection risk, market competition risk etc.

The Long Term rating indicates that entity rated in this category is adjudged to offer adequate safety for timely repayment of financial obligations. This level of rating indicates a corporate entity with an adequate credit profile. Risk factors are more variable and greater in periods of economic stress than those rated in the higher categories. The Short Term rating indicates good certainty of timely repayment. Liquidity factors and company fundamentals are sound. Although ongoing funding needs may enlarge total financing requirements, access to financial market is good with small risk factors.

CRISL also placed the company with "Stable Outlook" for its steady business growth and consistent fundamentals.
