

WatchGuard[®] Firebox M400 / M500

RECOMMENDED FOR MIDSIZED BUSINESSES AND DISTRIBUTED ENTERPRISES

SECURITY, PERFORMANCE, VISIBILITY

Firebox M400 and M500 firewalls are specifically engineered for mid-sized and distributed enterprises that are struggling to effectively and affordably secure networks in the face of explosive growth in bandwidth rates, encrypted traffic, video use and connection speeds. With an operating system built on the latest generation of processors from Intel, the M400 and M500 can run all of their security scanning engines in parallel, ensuring network pros never have to compromise network security for performance.

HIGHEST UTM PERFORMANCE IN THE INDUSTRY

- Firewall throughput of up to 8 Gbps to keep traffic moving.
- Best UTM throughput in its class – up to 1.7 Gbps – even with strong security enabled.
- No need to compromise protection for strong performance or vice versa. Multi-layered, interlocking security protects the network while throughput remains high.
- Gigabit Ethernet ports support high-speed LAN backbone infrastructures & gigabit WAN connections, including 2 SFP ports for fiber or copper.

BEST-IN-CLASS SECURITY

- Application-layer content inspection recognizes & blocks threats that stateful packet firewalls cannot detect.
- Powerful subscription-based security services boost protection in critical attack areas for multiple layers of defense.
 - **APT Blocker** is a cloud-based service that uses a combination of sandboxing and full system emulation to detect and block highly sophisticated Advanced Persistent Threats (APTs).
 - **Application Control** keeps unproductive, inappropriate, and dangerous applications off-limits.
 - **Intrusion Prevention Service (IPS)** delivers in-line protection from malicious exploits, including buffer overflows, SQL injections, and cross-site scripting attacks.
 - **WebBlocker** controls access to sites that host objectionable material or pose network risks.
 - **Gateway AntiVirus (GAV)** scans traffic on all major protocols to stop threats.
 - **spamBlocker** delivers continuous protection from unwanted and dangerous email.
 - **Reputation Enabled Defense** ensures faster, safer web surfing with cloud-based reputation look-up.
 - **Data Loss Prevention** automatically inspects data in motion for corporate policy violations.
 - **Network Discovery** gives administrators total visibility into every connected device.
 - **Mobile Security** only allows network access to mobile clients that adhere to corporate policy with WatchGuard's **FireClient** app installed.
- Advanced networking features, such as dynamic routing and link aggregation, allow you to add security without needing to change existing network infrastructure.
- Multiple VPN choices (IPSec, SSL, L2TP) for secure remote access include support for Android and Apple iOS devices.

EASY TO MANAGE

- **WatchGuard Dimension™**, a public and private cloud-ready visibility solution, instantly turns raw data into security intelligence.
- Interactive, real-time monitoring and reporting – at no additional charge – give an unprecedented view into network security activity so you can take immediate preventive or corrective actions.
- **RapidDeploy™** enables quick, secure configuration at remote locations without technical staff.
- Intuitive management console centrally manages all security functions.
- WAN and VPN failover provide redundancy for increased reliability.
- Extend best-in-class UTM security to the WLAN by adding WatchGuard's Wireless Access Points.
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected.
