

# ***GUN-X* Battery Watering Gun**

## **The Next Generation in Watering Gun Technology**

**The world's best selling watering gun is now faster and more durable.**

Developed as an inexpensive and safe alternative to manual battery watering, the watering gun is strong and reliable, delivering a precise flow rate that quickly fills batteries. No battery room should be without this essential maintenance tool.

Our watering guns are popular for their reliable automatic shutoff and their ability to water batteries quickly while improving filling accuracy and operator safety. Their non-electric automatic shut-off allows for low-cost watering with a quick return on investment.

### **The Gun-X - reliable, durable and easy to use:**

1. Greatly improved strength and durability
2. Faster fill speed
3. Elimination of post shut-off drip
4. Visual indication of filling and shut-off
5. Improved ease of use
6. Reliable performance
7. Easy to operate
8. Compact and lightweight

*“Reduces labor costs of up to £100 (\$150) a year for each 18-cell battery.”*

In 1983 Philadelphia Scientific first introduced the battery watering gun, and it has been the world's best selling ever since. Today it is faster, more durable and reliable than ever.

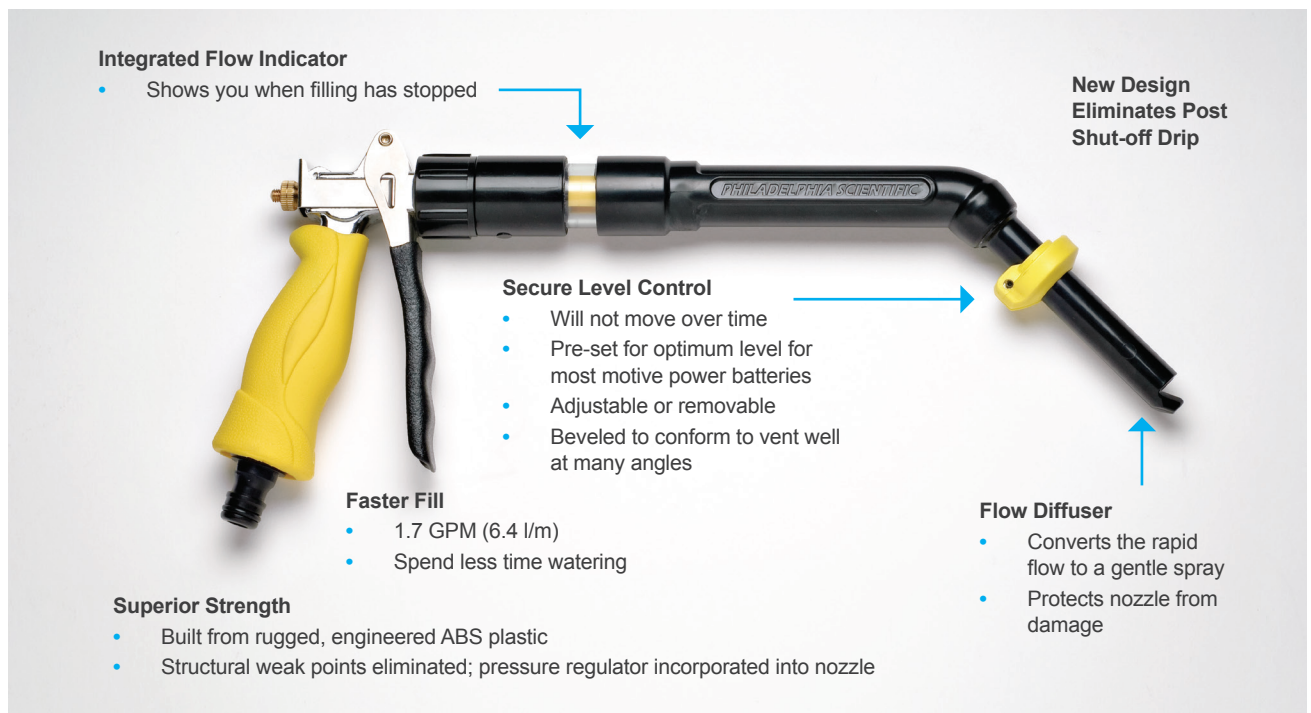

Simply connect the Battery Watering Gun to a standard water hose, our watering cart or our water deionizer system, put the tip of the gun into the battery cell and squeeze the ergonomic handle. Once the battery is filled, the mechanism will automatically shut off at exactly the right electrolyte level.

The Battery Watering Gun speeds up battery watering, improves filling accuracy, and improves operator safety.

Compared to hand watering, our next generation Battery Watering Gun reduces labor costs up to £100 a year for each 18-cell battery. It's no wonder that our watering guns have been the world's most popular battery maintenance tool for decades.

With a diameter of 17 mm (0.67 in.), our nozzle easily fits flip-top vent caps, as well as all standard quarterturn, bayonet and DIN openings.

When paired with our Blinky or Smart Blinky battery watering monitors, the Watering Gun is part of an effective battery maintenance programme that will reduce costs and improve efficiencies, saving you time and money.

## Features and benefits

- Automatic shut-off:** The Watering Gun fills cells to precisely the correct level.
- Safe:** It keeps eyes and face away from battery hazards.
- Fast but gentle:** The flow rate is 1.7 gallons/minute (6.4 liters/minute).
- Reliable:** Powered by the water itself, it has no solenoids, no electronics and no wiring. It has been tested to 1 million cycles.
- Easy Installation:** Attach in seconds to any standard water hose, our watering cart or our water deionizer system.

Philadelphia Scientific is the expert in the maintenance and management of fork lift batteries. Through continuing innovation the Lean Battery Room combines products, processes, and services designed to save time, space and money, optimising the performance of your battery room.
