

WINNER !

ALBRECHT
Precision Chucks

**At present,
the Albrecht APC
is the best
performing chuck
world wide.**

**In the area
of speed, tool life
and safety.**

You can expect:

**A clearly higher
chip removal rate**

**A considerably
longer tool life**

**100% process
reliability**

Winner in Speed.

Good reasons

1. Albrecht APC 400 mm

2. Hydraulic 320 mm

00:23

4. Shrink Fit 280 mm

3. Weldon 300 mm

On this photo finish the production speed of 4 chuck technologies is being compared. The machine, the milling cutter $D = 16$ and the material are identical for all 4 milling operations. We call out to any sceptic: come to the race! Albrecht APC.

Winner in Life time.

Good reasons

Weldon
One-sided wear
Out!

Hydraulic
Big nicks
Stop!

Shrink Fit
Micro
nicks
Limited!

Albrecht APC
Minimal rounding
Good
Continue!

This comparison shows the influence the chuck has on the life of your cutting tool. The test milling cutter is a 4-blades tool, D=16, with identical material, identical machine and identical parameters. The tool life advantage in the Albrecht APC chuck can clearly be attributed to the excellent vibration dampening and highly precise accuracy of this precision chuck. We ask you to value your economic advantages yourself.

Winner in Safety.

Good reasons

Weldon Holds

The most common solution.
The mill is fixed with a side lock screw.
Solid fixation. No dampening.
Run-out not so good.

Hydraulic Possible pull-out

The mill is held by an inner membrane.
This “soft” technology might enable the mill “to be levered out” especially by lateral forces.

Shrink Fit Possible pull-out

Clamping very rigid.
Thus, vibrations might loosen the mill from the chuck. The clamping torque is dependent on the tolerances of the tool shaft.

Albrecht APC Holds

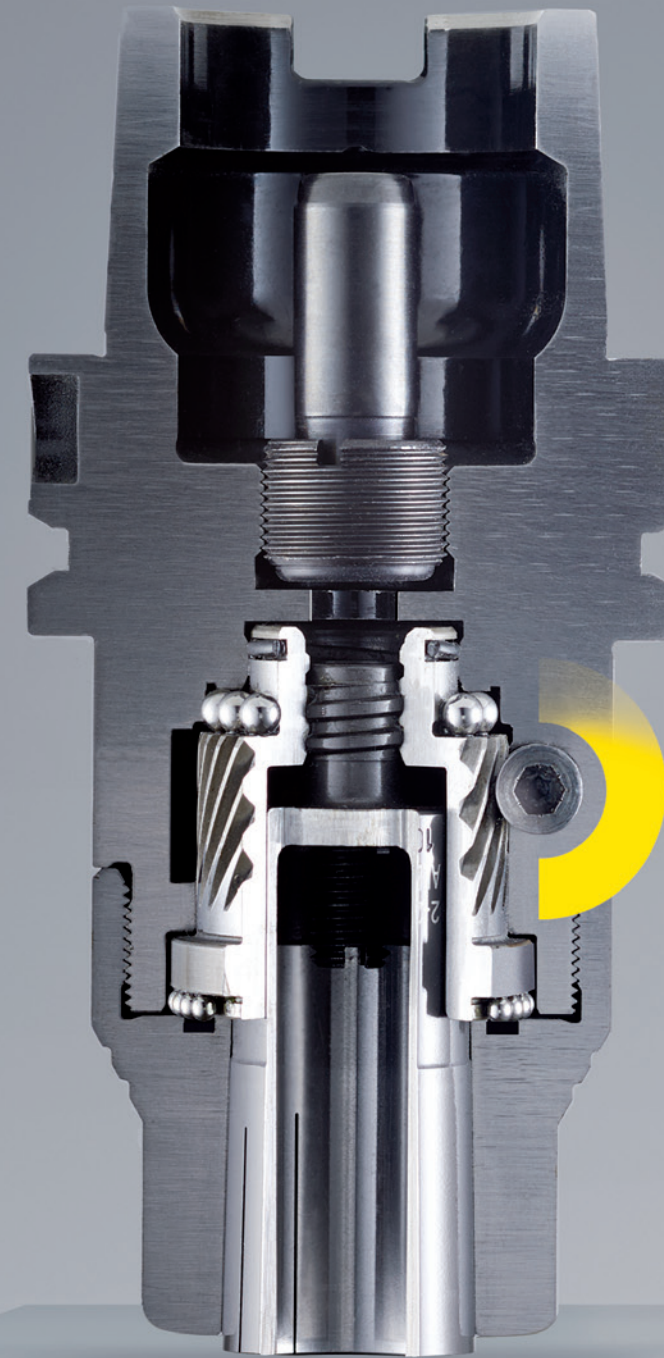

Strong clamping force due to the assemblage of collet and taper.
Available also with a Pin-Lock engaged to Weldon slot which acts as an additional safeguard for the mill. This we guarantee!

These wins have reasons.

1. The world's only Milling Chuck with 1:16 worm gear.

Patent no. 1206990.
The only way how 100% holding force gets to the cutting tool.

2. Highest rigidity thanks to design and body. Measuring portfolio from Sophia University Tokyo.

3. The worm gear with 3 tons traction force and the collet with a slow-taper angle of 1,25° do guide the tool perfectly through trochoidal-, dry- and hard-machining operations up to 110° C.

4. Ideal dampening. The collet-cone assemblage absorbs virtually all vibrations.

SK

Precision Chucks APC, DIN 69871 (ISO 7388-1). Highest gripping force due to integrated worm gear transmission. Easy exchange of tools by setting of hex-key. Maintenance free. Sealed against coolant and contamination. Slow collet taper angle. Gripping torque > 400 Nm at D = 20 mm. Runout accuracy 3 µm at 2.5 x D and standard length. Clamping of tool shanks according to DIN 1835 A, B and DIN 6535 HB, HA as well as HE up to D = 20 mm.

APC

APC collet with peripheral cooling

APC collet with peripheral cooling

Additional cooling and rinsing effect. Increases the safety of processing. Constant coolant flow of 14-16 litre/min at 50 bar coolant pressure up to D = 20 mm through the slots of the collet. Special coating. Maintenance free. Integrated, fine adjustable length stop with access from both sides. Clamping of tool shanks corresponding to DIN 1835 A, B and DIN 6535 HB, HA as well as HE up to D = 20 mm.

APC collet for tools with internal coolant

APC collet for tools with internal coolant

100% leak proof up to 100 bar coolant pressure. Special coating. Maintenance free. Integrated, fine adjustable length stop. Clamping of tool shanks corresponding to DIN 1835 A, B and DIN 6535 HB, HA as well as HE up to D = 20 mm.

Collets with Pin-Lock

APC collet with mechanical pull stop Pin-Lock

Easy mechanical pull stop solution in combination with side lock (Weldon) shanks corresponding to DIN 6535 HB and DIN 1835 B. All positive features of APC are kept like runout accuracy and dampening. Special coating. Maintenance free. Central = for tools with internal coolant. 100% leak proof up to 100 bar coolant pressure. Periphery = additional cooling and rinsing effect. Increases the safety of processing. Set consists of collet, safety pin, pin punch and torque wrench.

MQL by Albrecht

Of course the APC Precision Chuck is also available with Minimum-Quantity-Lubrication. For 1- and 2-Channel-systems in combination with internal coolant collets. Please choose your MQL Length screw and Coolant tube alternatively 1- or 2-channel. 100% perfect matched set with MQL conform delivery at the tool shaft end with 90°. Based on MQL company standard. Insertion depth corresponding to DIN 1835 and DIN 6535.

Albrecht MQL, minimum quantity lubrication
