managed communications architects

Btl (MDM)

Mobile Device Management (MDM) securing your mobile devices, content and apps.

BtL MDM is the fastest and most comprehensive way to configure devices for organisations, and secure corporate data on smartphones and tablets — all from a single screen.

Now you can take control of business-critical data on your company smartphones and tablets with our device management solution. It keeps you connected to your field employees and in control of any sensitive information carried on staff mobile devices

As a fully-integrated cloud platform, BtL MDM simplifies mobile device management (MDM) with rapid deployment, visibility and control that spans across mobile devices, applications and documents.

Deployment is quick — in just a few clicks, administrators can start enrolling devices and immediately manage the entire mobile device lifecycle — from enrolment to enterprise integration, configuration and management, monitoring and security, support, analytics and reporting.

Meet your Mobile device management challenges with BtL MDM

- Increase security and compliance enforcement
- Reduce the cost of supporting mobile assets
- Enhance application and performance management
- Ensure better business continuity
- Simply connect to business systems
- Increase productivity and employee satisfaction
