

# HGS

Established in 1976, Harlow Group Storage provides bespoke storage, document archiving and management services from purpose built facilities situated close to Stansted Airport and the M11 motorway in Harlow, Essex.

Our longstanding customer base includes companies and organisations of all sizes – ranging from 'blue-chip' multi-nationals to smaller private firms operating in, amongst others, the engineering, financial, legal, manufacturing, medical, retail and technology sectors.

As a family owned and managed company – and active member of UKWA (the United Kingdom Warehousing Association) - our business is based around three essential tenets:

**Investing** in our staff, equipment and facilities

**Controlling** and closely monitoring our customers' dedicated storage areas

**Enabling** those customers to focus on their core business – confident that their assets (stock, components, equipment and documentation) are absolutely secure, readily accessible and in safe, dependable hands

# Investing

We pride ourselves on delivering the highest standards of service, ethics and care. And we invest heavily to maintain those high standards.

The recent expansion of our warehousing facilities has increased our storage capacity by over 20%. And every element of our infrastructure - from our forklift trucks to our climate control and IT systems – is reviewed and upgraded regularly to ensure we meet (and usually exceed) prevailing regulations.

As importantly, our highly experienced, highly regarded personnel receive industry standard training on an ongoing basis – minimising staff turnover and ensuring dedicated and informed support for our customers at every level.

The result is an efficient, customer centric organisation predicated on advanced technology, proven business processes and outstanding customer service.

# Controlling

Our facilities are completely secure, temperature controlled and impeccably clean.

And our customisable racking system enables us to cater for full sized, half sized and over sized pallets – allowing you to choose the right storage solution for your stock, components and spare parts, equipment, consumables and documentation.

Having achieved approval for storage by the Medicines and Healthcare Products Regulatory Agency (MHRA) – our facilities are also subject to stringent daily housekeeping routines, and the most demanding hygiene standards.

To ensure your complete peace of mind, we also offer 24 hour CCTV monitoring, out-of-hours guard patrols, advanced fire prevention and zoned intruder alarms as standard.

# Enabling

Acting as an extension of your organisation, we will customise and manage a dedicated storage area in line with your particular specifications and provide tailored reporting, covering everything from stock movements to trends and supplier performance – leaving you free to concentrate on your day to day business.

Fact is, we have been providing bespoke storage solutions for over 30 years. So, whether you're seeking a secure document archive or a complete storage solution, chances are we can help.

Our temperature-controlled, racked storage facilities cater for long or short term contracts, specialist products and/or general commercial storage.

And our advanced and dependable IT systems equip us to deliver a comprehensive management service – which means your stock can be retrieved quickly and easily when required.
