

Monitoring Progress with the MovementWorks DDM Programme Intervention
 Pilot Study 2015 undertaken with a Primary School Nursery Class LBO Lewisham
 Nursery Target Children

Attainment and progress

	Age in months	September 2014	July 2015	Progress
*Sabine	55	ww 22-36	ww 30-50	3 steps
*Hugo	46	s 16-26	ww 22-36	2 steps
*Michaela	57	s 16-26	ww 22-36	2 steps
*Oswald	45	b 22-36	ww 22-36	1 step
*Eloise	46	b 8-20	ww 16-26	4 steps
*Noah	55	ww 22-36	ww 30-50	3 steps
*Timmy	46	b 22-36	b 30-50	3 steps
*Sonny	46	b 22-36	b 30-50	3 steps

b = beginning, ww = working within, s = secure

Expected attainment for nursery children at end of year is s 30-50 or b 40-60.

If children enter Nursery at ARE in September, 3 or 4 steps would be considered a good level of progress over the year. Over one term we would expect at least 1 step in progress.

All target children were **significantly below ARE** in January and all have made progress towards ARE.

Sabine, Eloise, Noah, Timmy and Sonny have made **a year's progress in two terms**** Hugo and Michaela have made expected progress.

=Oswald has made less than expected progress.

Progress summary provided by the school's Early Years Co-ordinator

**The nursery children began the MovementWorks programme in January 2015. It was delivered on a whole class level during the Spring and Summer Terms.

=Oswald came to the school/programme after the Easter of that year participating in less than one term.
