

Client: UK Broadband

Location: Ealing, London

Size: 22,000 sq ft

Value: £955,000

Project: Relocation , design and fit-out

UK Broadband Ltd is the UK's largest holder of national radio spectrum suitable for 4G mobile services and fixed wireless solutions.

Our project team was commissioned to provide UK Broadband Ltd with a consultative solution to manage their office relocation from two offices into a new HQ office at International House, Ealing Broadway.

The project scope included all aspects of the fit-out of 22,700 sq ft. Works were phased across two wings over a condensed 9-week programme. This included the complete strip out of existing cabling, partitioning and flooring.

Special design attention was given to the reception and meeting room facilities along with the installation of a complex I.T. network solution.

Cedric Astor, CFO UK Broadband Ltd commented:

"Quite simply we would not have achieved this within the budget and time scale parameters without the expertise of the team at Rapport Solutions. Jeanette and the team provided us constant support every inch of the way from building selection to value engineering the design process and on site works. I would highly recommend the Rapport Solutions team to any company planning to relocate their business."

Rapport provided the following services:

- *Project Management
- *Building Appraisal
- *Design Management
- *Cost Management
- *Furniture Procurement
- *Move Management
