

AminoFusion

Biostimulant for growth, efficiency and stress resistance

Amino acids play a vital role in stimulating growth and activating anti-stress physiology in the grass plant, enhancing the turfs natural ability to tolerate and manage environmental stress. With sufficient levels of amino acids the plant is able to stimulate photosynthesis, protein formation and the uptake of micronutrients with greater efficiency. **AminoFusion** provides a rich source of plant available amino acids promoting a healthier, more vigorous turf with enhanced nutrient uptake.

How does it work?

- **AminoFusion** simplifies the protein building process for the plant, allowing the energy saved to be used for other processes such as photosynthesis and new growth.
- **AminoFusion** contains highly effective natural chelating agents making the absorption and translocation of micronutrients inside the plant far more effective.
- The application of **AminoFusion** supplies the turf with amino acids related to anti-stress physiology helping the plant prepare for and recover from stress.

Why use AminoFusion?

- Highly concentrated
- Improves stress resistance and recovery from stress
- More efficient nutrient uptake and utilisation
- Stimulates plant growth
- Increases photosynthesis and chlorophyll concentration
- Enhances turf quality and colour
- Good tank mix compatibility

Where/when

- Suitable for use on all types of sports and amenity turfgrass
- Suitable for all year round application
- Can be used as a biostimulant to enhance the performance and efficiency of other nutrients and treatments including **NutriFusion**[®] liquid, **BIOS**[®] Turf Tonic and **Plus** range.

Application & Rates:

For foliar application.

Sports Pitches & Golf Fairways: Apply @ 5-10 l/ha. Repeat monthly or as required.

Golf Greens: Apply @ 10-20 l/ha. Repeat monthly or as required.

Dilution: Recommended for application at water rates of minimum of 150l/ha

Method: Always use a fully calibrated sprayer at the recommended dosage.

Pack Size: 10L

YOUR LOCAL DISTRIBUTOR

This product is physically compatible with a wide range of tank-mix partners. Check compatibility prior to adding to the spray tank. Consult your local advisor or Soil Harmony for specific recommendations. Efficacy may be effected by plant health, growth stage and weather conditions. Soil Harmony accepts no liability for damage to treated turf.
