Hinged Door Corteo

Let there be light...

Bring your own living space dream to life relying on transparency, elegance and timeless design. The glass doors from Light & Harmony create a light-filled well-being oasis in your home.

Enjoy the light and choose from a wide range of glass designs, motifs and surfaces that fulfill your every wish.

Every product shown in this catalogue is readily available. Thus, you avoid wasting time and you can quickly fulfill your dream of a light-filled home – even if you choose a glass door, a glass sliding door or a glassed-in area.

Hinged door Alana, clear glass

Matter(s) of perspective

Clear glass or satin glass? Transparent or opaque? For every perspective, you have a choice – in any case, for lightness, stick to glass doors. With clear glass you get to keep the view; satin glass doors are translucent and, at the same time, separate the space in your home.

- | better living with natural light
- | transparency with clear glass
- | privacy with satin glass
- | with either a clear or an opaque glass:
definitely more natural light in your home.

Hinged Door Gemini

Twin 2.0 sliding system

Hinged or Sliding Door?

Combine functionality and design at your own will and taking into account the conditions in your home. And if you cannot change the latter, you can still simply modify the available space. In combination with the different functional possibilities of a glass door, be it hinged or sliding, glass is an ideal and safe material.

At the same time, glass offers the possibility of separating space in your home by using opaque surfaces – without having to do away with light.

Flow

There is nothing simpler!

With the back padding profile we developed for the Tvin 2.0 and Tvin 2.0 Convex systems your sliding system is visually pleasant and very easy to install in the frame.

Your advantage: The door frame remains as it is and costly work is not necessary.

- | easy installation: no modification of the existing frame needed
- | perfect visual integration with a balanced design
- | the back padding profile surface matches the system

Optional: automatic self-closing mechanism

Sliding system: Tvin 2.0 Convex | Glass design: Lista Due

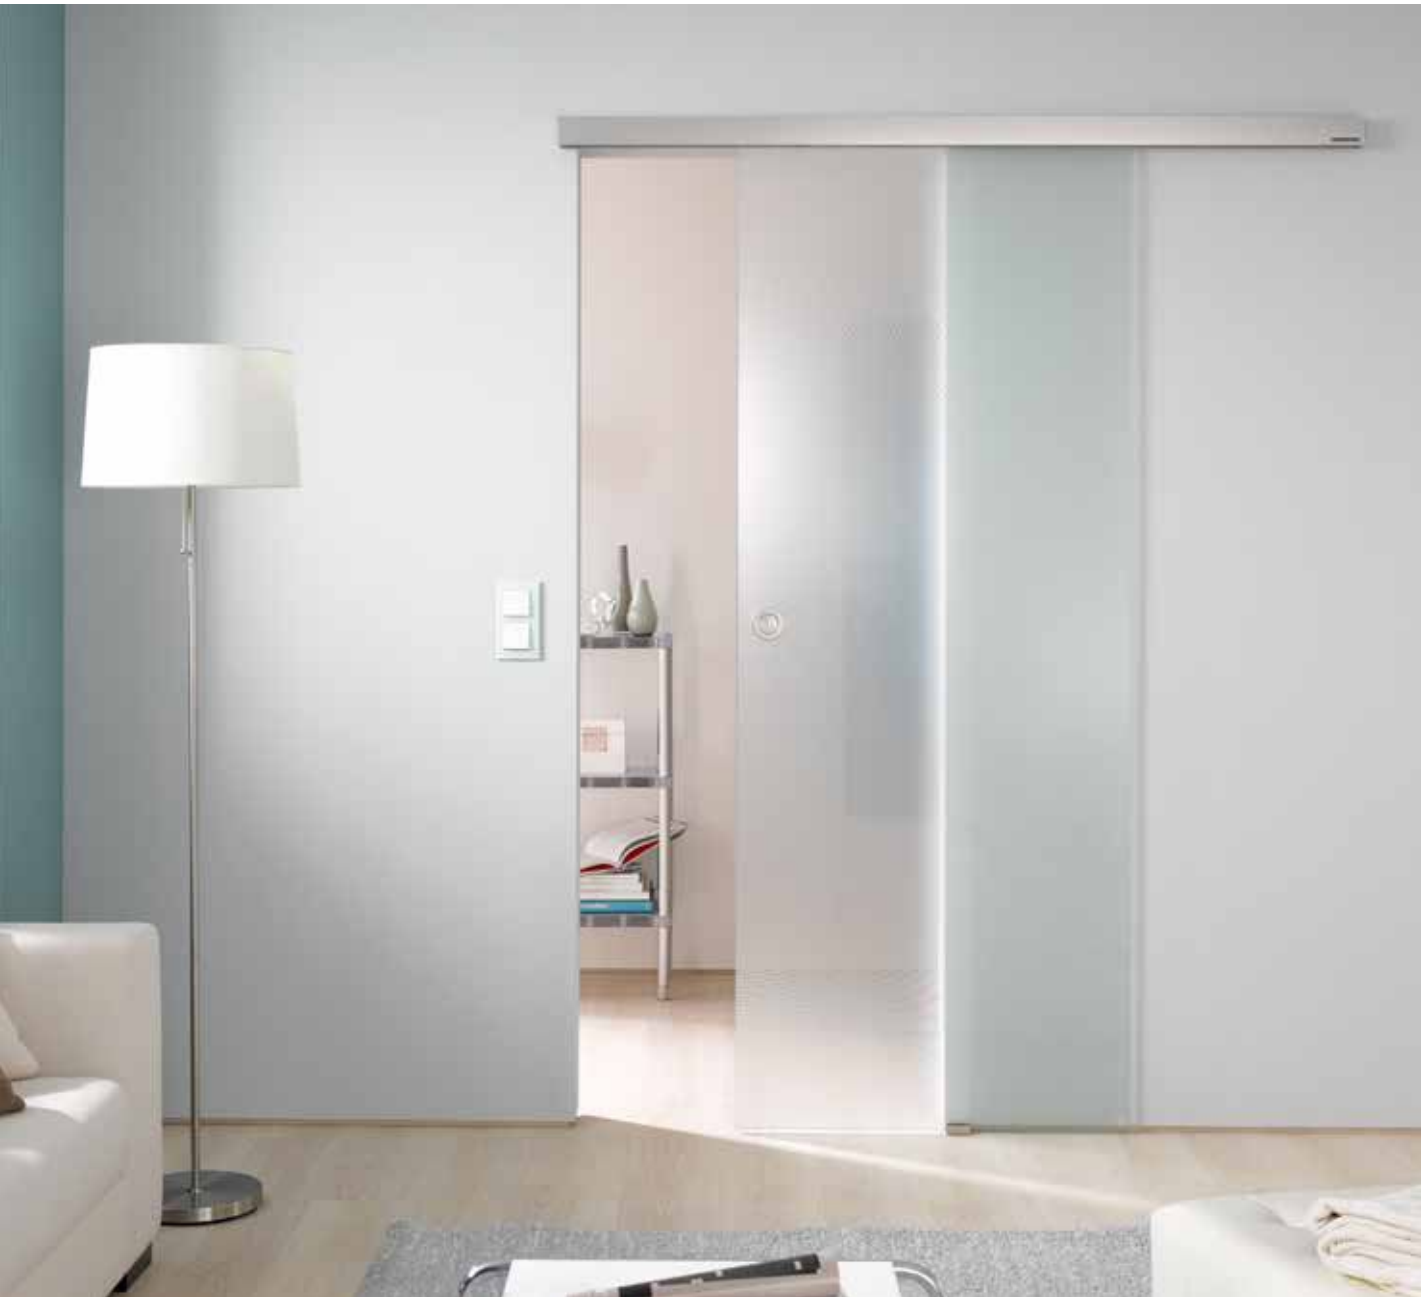

Hinged door | Glass design: Lista Due | Metal set: Square 2.0

For Vertical Lateral Thinkers

The extraordinary glass design “Lista Due” uses unique 3D optics. Two-sided continuous vertical lines create light scattering effects and an incredible impression of depth – an exclusive design with a distinctive look.

- | 3D optics effect achieved through two-sided saturation
- | continuous vertical lines with different sizes
- | interesting light effects
- | bright surfaces

Sliding system : Twin 2.0 Convex | Glass design: Lucido

Set your highlights

Plan Using Light

The function of a door determines its look. Whether you decide for satin or clear glass, it is not a just a matter of taste. Clear glass means transparent, generous space, while opaque, satin glass means bright, but visually isolated space. You can easily turn your every individual demand into a practical solution.

All metal sets and glass designs are available in combinations.
