

# PJR SERVICES BULLETIN

**Lockdown No.3 is well underway, but rest assured we are out working as usual. This month in particular, we have an important job to do helping the schools to continue to function for the children of key workers...**

We started 2021 with a spring in our step, but like everything, it's been put on hold a little for the time being as we get to grips with the latest Covid restrictions.

Back in March, none of us thought the virus would still be here in Feb 21, but here we are, and we will continue to offer all of our services with a smile. We worked over Christmas to make sure school grounds were ready for the kids but of course, the gates have not opened as expected to all children. However things must continue behind the scenes to keep schools going for the children of frontline workers. We are pleased to be able to help where we can by cutting fields, line marking and cleaning,

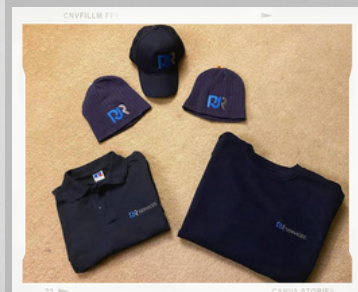

February is the last official month of winter, so at least we have longer days and warmer months to look forward to!

**We are still out working, with new COVID safety measures in place for our crew whilst in our vans.**

We are starting the year with a fashion refresh! We wanted to share with you some samples of our new uniform. We have mentioned before that it is crucial all of our team are instantly identifiable and recognisable on site and as we get busier and our team grows, it is increasingly important. This is just some of the branded workwear you will see us in on site, as we expect our fashion collection to extend to jackets and body warmers too!

## PAUL'S MONTHLY TIP...

This month it's time to re-organise your outside storage needs ready for the garden to take off in the Spring. This is a great time to take a look in that neglected shed or store space on a commercial site. You may find things buried in the back of storage you didn't even know you had (tools, paint etc) which can help you create a new inventory list. Plus by hanging and ordering items, you can find equipment easily and don't have to climb and trip over apparatus. I have done this in the past for myself and it really helps save time and money.
