

**RESIN FLOORING**  
Practical, Versatile And Cost-effective

Epoxy, polyurethane and MMA resin flooring treatments and coatings provide attractive and flexible flooring solutions for industrial and commercial properties. These screeds, coatings and seals not only lift the look of industrial and commercial properties, but they also offer improved durability, performance and ease of maintenance.

Resin flooring systems can incorporate a wide range of technical features and finishes to meet the needs of the specific site and match your company's operational requirements.

### **Epoxy Resin, Polyurethane and MMA Flooring and Coatings**

Abrasion resistant finishes

Decorative finishes

Slip resistant finishes

Anti-static and conductive

Floor demarcation

Temperature resistant finishes

Chemical resistant surfaces

Rapid cure resins

Waterproofing systems

### **Line marking and area demarcation**

IFT has carried out numerous industrial, manufacturing and transport projects, and we have demonstrated great expertise in line and area demarcation using different colours, impregnations and coatings. We can either work to architect's drawings or prepare floor plans to meet the operational and Health & Safety requirements of your site.

## Helping you make the right choice

IFT have a well-earned reputation for professionalism and craftsmanship that extends from your initial enquiry through to the delivery of the project and the associated risk assessments and method statements.

As an independent and integrated flooring treatment provider, we have a detailed knowledge of the various features and benefits of each different type and brands of screed, coating or seal. Our experienced management team also have a good understanding of the different operational requirements of our clients across a wide range of sectors. Taken together, this means that we are exceptionally well placed to survey your site and help you to select the appropriate coating or combination of coatings for your site, as well as to advise on scheduling the work for optimal results.

We also carry out the proper surface preparation of the concrete prior to application to ensure you achieve a high quality, durable finish. Our managers and skilled floor layers are highly trained and accredited in the safe application of all flooring systems. All work is carried out in strict accordance with our rigorous Health & Safety, Quality and Environmental Management Systems and procedures. As part of our value-added service we always prepare clear and detailed Risk Assessments, Method Statements and COSHH Assessments (RAMS) for each project we undertake.

In addition to primary installations, IFT will happily take on repair and change-of-use work. This ensures that you enjoy the maximum benefit from your investment in resin flooring over many years.
